(b) *Allocation of the investment in the contract where two or more annuity elements are acquired for a single consideration* (1) In the case of a contract described in §1.72-2(a)(2) which provides for two or more annuity elements, the investment in the contract determined under paragraph (a) shall be allocated to each of the annuity elements in the ratio that the expected return under each annuity element bears to the aggregate of the expected returns under all the annuity elements. The exclusion ratio for the contract as a whole shall be determined by dividing the investment in the contract (after adjustment for the present value of any or all refund features) by the aggregate of the expected returns under all the annuity elements. This may be illustrated by the following examples:

Example (1). If a contract provides for annuity payments of $1,000 per year for life (with no refund feature) to both A and B, a male and female, respectively, each 70 years of age as of the annuity starting date, such contract is acquired for consideration of $19,575 (without regard to whether paid by A, B, or both), and there is no post-June 1986 investment in the contract, the investment in the contract shall be allocated by determining the exclusion ratio for the contract, as a whole in the following manner:

Expectancy of A under Table I and §1.72-5(a)(2), 11.8 (12.1-0.5), multiplied by $1,000	$11,600
Expectancy of B computed in a similar manner ($1,000 × 14.5 [15.0 − 0.5])	14,500
Total expected return	26,100

The exclusion ratio for both A and B is then $19,575 ÷ $26,100, or 75 percent. A and B shall each exclude from gross income three-fourths ($750) of each $1,000 annual payment received and shall include the remaining one-fourth ($250) of each $1,000 annual payment received in gross income.

Example (2). Assume the same facts as in example (1) except that of the total investment in the contract of $19,575, the pre-July 1986 investment in the contract is $10,000. If the election described in §1.72-6(d)(6) is made with respect to the contract, the investment in the contract shall be allocated by determining an exclusion ratio for the contract as a whole based on separately computed exclusion ratios with respect to the pre-July 1986 investment in the contract and the post-June 1986 investment in the contract in the following manner:

Expectancy of A under Table I and §1.72-5(a)(2), 11.6 (12.1−0.5), multiplied by $1,000	$11,600
Expectancy of B under Table I and §1.72-5(a)(2), 14.5 (15.0 − 0.5), multiplied by $1,000	$14,500
Pre-July 1986 expected return .	$26,100
Expectancy of A under Table V and §1.72–5(a)(2), 15.5 (16.0–0.5), multiplied by $1,000	$15,500
Expectancy of B under Table V and §1.72–5(a)(2), 15.5 (16.0–0.5), multiplied by $1,000	$15.500
Post-June 1986 expected return .	$31,000
Pre-July 1986 exclusion ratio ($10,000 ÷ $26,100)	38.3
Post-June 1986 exclusion ratio ($9,575 ÷ 31,000)	30.9

A and B shall each exclude from gross income $692 (38.3 percent of $1,000 + 30.9 percent of $1,000) of each 41,000

payment and include the remaining $308 in gross income.

(2) In the case of a contract providing for specified annual annuity payments to be made to two persons during their joint lives and the payment of the aggregate of the two individual payments to the survivor for his life, the investment in the contract shall be allocated in accordance with the provisions of subparagraph (1) of this paragraph. For this purpose, the investment in the contract (without regard to the fact that differing amounts may have been contributed by the two annuitants) shall be divided by the expected return determined in accordance with paragraph (e)(4) of §1.72-5. The resulting exclusion ratio shall then be applied to any amounts received as an annuity by either annuitant.

(3) In the case of a contract providing two or more annuity elements, one or more of which provides for payments to be made in a manner described in paragraph (b)(3) of §1.72-2, the investment in the contract shall be allocated to the various annuity elements in the following manner:

(i) If all the annuity elements provide for payments to be made in the manner described in paragraph (b)(3) of §1.72-2, the investment in the contract shall be allocated on the basis of the amounts received by each recipient by apportioning the amount determined to be excludable under that section to each recipient in the same ratio as the total of the amounts received by him in the taxable year bears to the total of the amounts received by all recipients during the same period; and

(ii) If one or more, but not all, of the annuity elements provide for payments to be made in a manner described in paragraph (b)(3) of §1.72-2:

(a) With respect to all annuity elements to which that section does not apply, the investment in the contract for all such elements shall be the portion of the investment in the contract as a whole (found in accordance with the provisions of this section) which is properly allocable to all such elements; and

(b) With respect to all annuity elements to which paragraph (b)(3) of §1.72-2 does apply, the investment in the contract for all such elements shall be the investment in the contract as a whole (found in accordance with the provisions of this section) as reduced by the portion thereof determined under *(a)* of this subdivision.

For the purpose of determining, pursuant to *(a)* of this subdivision, the portion of the investment in the contract as a whole properly allocable to a particular annuity element, reference shall be made to the present value of such annuity element determined in accordance with paragraph (e)(1)(iii)*(b)* of §1.102–2.

(iii) In the case of a contract to which paragraph (d) of this section applies, this paragraph (b) is applied in the manner prescribed in paragraph (d) and, in particular, paragraph (d)(5)(v) of this section.

* * * * *

(d) *Pre-July 1986 and post-June 1986 investment in the contract.* (1) This paragraph (d) applies to an annuity contract if—

(i) The investment in the contract includes a pre-July 1986 investment in the contract and a post-June 1986 investment in the contract (both as defined in §1.72-6(d)(3));

(ii) The use of a multiple found in Tables I through VII of §1.72-9 is required to determine the expected return under the contract; and

(iii) The election described in paragraph (d)(6) of this section is made with respect to the contract.

(2) In the case of an annuity contract to which this paragraph (d) applies—

(i) All computations required to determine the amount excludable from gross income shall be performed separately with respect to the pre-July 1986 investment in the contract and the post-June 1986 investment in the contract as if each such amount were the entire investment in the contract;

(ii) The multiples in Tables I through IV shall be used for computations involving the pre-July 1986 investment in the contract and the multiples in Tables V through VIII shall be used for computations involving the post-June 1986 investment in the contract; and

(iii) The amount excludable from gross income shall be the sum of the amounts determined under the separate computations required by paragraph (d)(2)(i) of this section.

(3) For purposes of the regulations under section 72, the pre-July 1986 investment in the contract and post-June 1986 investment in the contract are determined in accordance with the following rules:

(i)(A) If the annuity starting date of the contract occurs before July 1, 1986, the pre-July 1986 investment in the contract is the total investment in the contract as of the annuity starting date;

(B) If the annuity starting date of the contract occurs after June 30, 1986, and the contract does not provide for a disqualifying form of payment or settlement, the pre-July 1986 investment in the contract is the investment in the contract computed as of June 30, 1986, as if June 30, 1986, had been the later of the annuity starting date of the contract or the date on which an amount is first received thereunder;

(C) If the annuity starting date of the contract occurs after June 30, 1986, and the contract provides, at the option of the annuitant or of any other person (including, in the case of an employee's annuity, an option exercisable only by, or with the consent of, the employer), for a disqualifying form of payment or settlement, the pre-July 1986 investment in the contract is zero (i.e., the total investment in the contract is post-June 1986 investment in the contract).

(ii) The post-June 1986 investment in the contract is the amount by which the total investment in the contract as of the annuity starting date exceeds the pre-July 1986 investment in the contract.

(iii) For purposes of paragraph (d)(3)(i) of this section, a disqualifying form of payment or settlement is any form of payment or settlement (whether or not selected) that permits the receipt of amounts under the contract in a form other than a life annuity. For example, each of the following options provides for a disqualifying form of payment or settlement:

(A) An option to receive a lump sum in full discharge of the obligation under the contract.

(B) An option to receive an amount under the contract after June 30, 1986, and before the annuity starting date.

(C) An option to receive an annuity for a period certain.

(D) An option to receive payments under a refund feature (within the meaning of paragraphs (b) and (c) of this section) that is substantially equivalent to an annuity for a period certain.

(E) An option to receive a temporary life annuity (within the meaning of §1.72-5(a)(3)) that is substantially equivalent to an annuity for a period certain.

An option to receive alternative forms of life annuity is not a disqualifying option for purposes of paragraph (d)(3)(i) of this section. Thus, if the sole options provided under a contract are a single life annuity and a joint and survivor life annuity, paragraph (d)(3)(i)(C) of this section does not apply to such contract.

(iv) For purposes of paragraph (d)(3)(iii) of this section, a refund feature is substantially equivalent to an annuity for a period certain if its value determined under Table VII of §1.72-9 exceeds 50 percent. Similarly, a temporary life annuity is substantially equivalent to an annuity for a period certain if the multiple determined under Table VIII of §1.72-9 exceeds 50 percent of the maximum duration of the annuity.

(4) In any separate computation under this paragraph (d), only the applicable portion of other amounts (such as the total expected return under the contract, or the total amount guaranteed under the contract as of the annuity starting date) shall be taken into account if the use of the entire amount in such computation is inconsistent with the use in the computation of only a portion of the investment in the contract. For example, such use is generally inconsistent if the computation requires a comparison of the investment in the contract and such other amount for the purpose of using the greater (or lesser) amount of the difference between the two. For purposes of the first sentence of this paragraph (d)(4), the applicable portion is the amount that bears the same ratio to the entire amount as the pre-July 1986 investment in the contract or the post-June 1986 investment in the contract, whichever is applicable, bears to the total investment in the contract as of the annuity starting date.

(5) *Application to particular computations.* (i) In the case of a contract to which this paragraph (d) applies, the exclusion ratio for purposes of §1.72-4(a) is the sum of the exclusion ratios separately computed in accordance with this paragraph (d). The exclusion ratio with respect to the pre-July 1986 investment in the contract is determined by dividing the pre-July 1986 investment in the contract by the expected return as found under §1.72-5 by applying the appropriate multiples of Tables I through IV of §1.72-9. Similarly, the exclusion ratio with respect to the post-June 1986 investment in the contract is determined by dividing the post-June 1986 investment in the contract by the expected return as found under §1.72-5 by applying the appropriate multiples in Tables V through VIII of §1.72-9.

(ii) The applicability of §1.72-4(d)(2) to a contract to which this paragraph (d) applies shall be determined separately with respect to the post-June 1986 investment in the contract and the pre-July 1986 investment in the contract and in each such determination only the applicable portion of the total expected return under the contract shall be taken into account. If §1.72-4(d)(2) applies with respect to either such investment in the contract, the separately computed exclusion ratio shall be considered to be the applicable portion of 100 percent.

(iii) If §1.72-4(d)(3) applies to a contract to which this paragraph (d) applies—

(A) The applicable portions (as defined in paragraph (d)(4) of this section) of payments received under the contract for a taxable year shall be separately computed;

(B) The pre-July 1986 investment in the contract and the post-June 1986 investment in the contract shall be separately allocated to the taxable year; and

(C) The separate applicable portions of the payments received under the contract for the taxable year shall be considered to be amounts received as an annuity (for which the exclusion ratio is 100 percent) only to the extent they do not exceed the portions of the corresponding investments in the contract which are properly allocable to that year.

See the example in §1.72-4(d)(3)(v).

(iv) If §1.72-4(e) applies to a contract to which this paragraph (d) applies, the exclusion ratio shall be separately computed with respect to the pre-July 1986 investment in the contract and the post-June 1986 investment in the contract. For purposes of the separate computations under §1.72-4(e)(2)(ii), only the applicable portion of payments received shall be taken into account and the exclusion ratio (100%) shall be applied to the separately computed portion allocated to each participant.

(v) If paragraph (b)(3) of this section applies to a contract to which this paragraph (d) applies, separate allocations are required with respect to the pre-July 1986 investment in the contract and the post-June 1986 investment in the contract. For purposes of the separate computations required to determine the portion of the investment in the contract properly allocable to a particular annuity element, only the applicable portion of the present value of the annuity element determined in accordance with §1.101-2(e)(1)(iii)*(b)* is taken into account.

(vi) If §1.72-7 applies to a contract to which this paragraph (d) applies, separate computations are required to determine the adjustment to the pre-July 1986 investment in the contract and the post-June 1986 investment in the contract. For purposes of such separate computations, only the applicable portions of the amounts described in §1.72-7(b)(3)(ii), (c)(1)(vii)*(b)*, and (d)(1)(ii) are taken into account. Similarly, in the case of computations with respect to the guarantee of a specified amount under §1.72-7(d)(1), only the applicable portion of such amount is taken into account.

(6) This paragraph (d) applies to a contract only if the first taxpayer to receive an amount as an annuity under the contract elects to perform separate computations with respect to the pre-July 1986 investment in the contract and the post-June 1986 investment in the contract as if each such amount were the entire investment in contract. If two or more annuitants receive an amount as an annuity under the contract at the same time (such as under a joint-and-last-survivorship annuity contract), an election by one of the annuitants is treated as an election by each of the annuitants. The election is made by attaching a statement to the first return filed by the taxpayer for the first taxable year in which an amount is received as an annuity under the contract. The statement must indicate that the taxpayer is electing to apply the provisions of paragraph (d) of §1.72-6, and must also contain the name, address, and taxpayer identification number of each annuitant under the contract, and the amount of the pre-July 1986 investment

in the contract.

(7) If the investment in the contract includes a post-June 1986 investment in the contract and the election described in paragraph (d)(6) of this section is not made—

(i) The amount excludable from gross income shall be determined without regard to the separate computations described in this paragraph (d); and

(ii) Only the multiples found in Table V through VIII shall be used in determining the amount excludable from gross income.

Par. 5. Section 1.72-7 is amended by revising paragraphs (b), (c), (d), and (e), and adding a new paragraph (f) to read as follows:

§1.72-7 Adjustment in investment where a contract contains a refund feature.

* * * * *

(b) *Adjustment of investment for the refund feature in the case of a single life annuity.* Where a single life annuity contract to which section 72 applies contains a refund feature and the special rule of paragraph (d) of this section does not apply, the investment in the contract shall be adjusted in the following manner:

(1) Determine the number of years necessary for the guaranteed amount to be fully paid by dividing the maximum amount guaranteed as of the annuity starting date by the amount to be received annually under the contract to the extent such amount reduces the guaranteed amount. The number of years should be stated in terms of the nearest whole year, considering for this purpose a fraction of one-half or more as an additional whole year.

(2) Consult Table III or VII (whichever is applicable) of §1.72-9 for the appropriate percentage under the whole number of years found in subparagraph (1) of this paragraph and the age (as of the annuity starting date) and, if applicant, sex of the annuitant.

(3) Multiply the percentage found in subparagraph (2) of this paragraph by whichever of the following is the smaller: (i) The investment in the contract found in accordance with §1.72-6 or (ii) the total amount guaranteed as of the annuity starting date.

(4) Subtract the amount found in subparagraph (3) of this paragraph from the investment in the contract found in accordance with §1.72-6. The resulting amount is the investment in the contract adjusted for the present value of the refund feature without discount for interest and is to be used in determining the exclusion ratio to be applied to the payments received as an annuity. The percentage found in Table III, or VII shall not be adjusted in a manner described in paragraph (a)(2) of §1.72-5. These principles may be illustrated by the following examples:

Example (1). On January 1, 1954, a husband, age 65, purchased for $21,053, an immediate installment refund annuity payable $100 per month for life. The contract provided that in the event the husband did not live long enough to recover the full purchase price, payments were to be made to his wife until the total payments under the contract equaled the purchase price. The investment in the contract adjusted for the purpose of determining the exclusion ratio is computed in the following manner.

Cost of the annuity contract (investment in the contract, unadjusted)	$21,053
Amount to be received annually	$1,200
Number of years for which payment guaranteed ($21,053 divided by $1,200)	17.5
Rounded to nearest whole number of years	18
Percentage located in Table III for age 65 (age of the annuitant as of the annuity starting date) and 18 (the number of whole years) (percent)	30
Subtract value of the refund feature to the nearest dollar (30 percent of $21,053)	$6,316
Investment in the contract adjusted for the present value of the refund feature without discount for interest	$14,737

Example (2). Assume the same facts as in example (1), except that the total investment in the contract was made after June 30, 1986. The investment in the contract adjusted for the purpose of determining the exclusion ratio is computed as follows:

Cost of the annuity contract (investment in the contract, unadjusted)	$21,053
Amount to be received annually	$1,200
Number of years for which payment guaranteed ($21,053 ÷ $1,200)	17.5
Rounded to nearest whole number of years	18
Percentage in Table VII for age 65 and 18 years (percent)	15
Subtract value of the refund feature to the nearest dollar (15 percent of $21,053)	$3,158
Investment in the contract adjusted for the present value of the refund feature without discount for interest	$17,895

Example (3). Assume the same facts as in example (1), except that the pre-July 1986 investment in the contract is $10,000 and the post-June 1986 investment in the contract is $11,053. If the annuitant makes the election described in §1.72-6(d)(6), separate computations must be performed pursuant to §1.72-6(d) to determine the adjusted investment in the contract. The pre-July 1986 investment in the contract and the post-June 1986 investment in the contract adjusted for the purpose of determining the exclusion ratios are, respectively, $7,000 and $9,395, determined as follows:

Pre-July 1986 investment in the contract (unadjusted)	$10,000
Pre-July 1986 portion of the amount to be received annually ($10,000/$21,053 × $1,200)	$570.00
Number of years for which payment guaranteed ($10,000 ÷ $570)	17.54
Rounded to nearest whole number of years	18
Percentage in Table III for age 65 and 18 years (percent)	30
Subtract value of refund feature to nearest dollar (30 percent of $10,000)	$3,000
Pre-July 1986 investment in the contract adjusted for the present value of the refund feature without discount for interest	$7,000
Post-June 1986 investment in the contract (unadjusted)	$11,053
Post-June 1986 portion of the amount to be received annually ($11,053/$21,053 × $1,200)	$630
Number of years for which payment guaranteed ($11,053 ÷ $630)	17.54
Rounded to nearest whole number of years	18
Percentage in Table VII for age 65 and 18 years (percent)	15
Subtract value of the refund feature to the nearest dollar (15 percent of $11,053)	$1,658
Post-June 1986 investment in the contract adjusted for the present value of the refund feature without discount for interest	$9,395

If, in the above examples, the guaranteed amount had exceeded the investment in the contract (or applicable portion thereof), the percentage found in Table III or VII (whichever is applicable) should have been applied to the lesser of these amounts since any excess of the guaranteed amount over the investment in the contract (as found under §1.72-6) would not have constituted a refund of premiums or other consideration paid. In such a case, however, a different multiple might have been obtained from Table III or VII (whichever is applicable) since the number of years for which payments were guaranteed would have been greater.

(c) *Adjustment of investment for the*

refund feature in the case of a joint and survivor annuity. (1) Where a joint and survivor annuity contract described in paragraph (b)(1) or (6) of §1.72-5 contains a refund feature and the special rule of paragraph (d) of this section does not apply, the investment in the contract shall be adjusted in the following manner.

(i) Determine the number of years necessary for the guaranteed amount to be fully paid by dividing the maximum amount guaranteed as of the annuity starting date by the amount to be received annually under the contract. The number of years should be stated in terms of the nearest whole year, considering for this purpose a fraction of one-half or more as an additional whole year.

(ii) Consult Table III or VII (whichever is applicable) of §1.72-9 for the appropriate percentages under the whole number of years found in subdivision (i) of this subparagraph and the age (as of the annuity starting date) and, if applicable, sex of each annuitant. If Table III applies and the annuitants are not of the same sex, substitute for the female annuitant a male annuitant 5 years younger, or for the male annuitant a female annuitant 5 years older, so that Table III will be entered in both cases with the ages of annuitants of the same sex.

(iii) Find the sum of the two percentages found in accordance with subdivision (ii) of this subparagraph.

(iv) To the age of the elder of the two annuitants (as determined under subdivision (ii) of this subparagraph if Table III applies), add the number of years (indicated in the table below) opposite the number of years by which such annuitants' ages differ:

Number of years difference in age (2 male annuitants or 2 female annuitants if Table III applies)	Addition to older age in years
0 to 1, inclusive	9
2 to 3, inclusive	8
4 to 5, inclusive	7
6 to 8, inclusive	6
9 to 11, inclusive	5
12 to 15, inclusive	4
16 to 20, inclusive	3
21 to 27, inclusive	2
28 to 42, inclusive	1
Over 42	0

(v) Consult Table III or VII (whichever is applicable) for the appropriate percentage under the whole number of years found in subdivision (i) of this subparagraph and the age and, if applicable, sex of the elder annuitant as adjusted under subdivision (iv) of this subparagraph.

(vi) Subtract the percentage obtained in subdivision (v) of this subparagraph from the sum of the percentages found under subdivision (iii) of this subparagraph. If the result is less than one, subdivisions (vii) and (viii) of this subparagraph shall be disregarded and no adjustment made to the investment in the contract.

(vii) Multiply the percentage found in subdivision (vi) of this subparagraph by whichever of the following is the smaller: *(a)* the investment in the contract found in accordance with §1.72-6 or *(b)* the total amount guaranteed as of the annuity starting date.

(viii) Subtract the amount found in subdivision (vii) of this subparagraph from the investment in the contract found in accordance with §1.72-6.

(2) The principles of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example. (1). Prior to July 1, 1986, Taxpayer A, a 70-year old male, purchases a joint and last survivor annuity for $33,050. The contract provides for payments of $100 a month to be paid first to himself for life and then to B, his 40-year-old daughter, if she survives him. The contract further provides that in the event both die before ten years' payments have been made, payments will be continued to C, a beneficiary, or to C's estate, until ten years' payments have been made. If there is no post-June 1986 investment in the contract, the investment in the contract adjusted for the purpose of determining the exclusion ratio is computed in the following manner:

Cost of the annuity contract (investment in the contract unadjusted)	$33,050
Guaranteed amount ($1,200 × 10)	$12,000
Percentage in Table III for male, age 70 (or female, age 75) for duration of the guarantee (10)	21
Percentage in Table III for female, age 40 (or male, age 35) for duration of the guarantee (10)	2
Sum of percentage obtained	23
Difference in years of age between two males, aged 70 and 35 (or 2 females, aged 75 and 40)	35
Addition, in years, to older age	1
Percentage in Table III for male one year older than A	22
Difference between percentages obtained (23 percent less 22 percent)	1
Value of the refund feature to the nearest dollar (1 percent of $12,000)	$120
Investment in the contract adjusted for present value of the refund feature	$32,930

Example (2). The facts are the same as in example (1), except that the total investment in the contract was made after June 30, 1986, and A is 73 years of age. The investment in the contract adjusted for the purpose of determining the exclusion ratio is computed in the following manner:

Cost of the annuity contract (investment in the contract, unadjusted)	$33,050
Guaranteed amount ($1,200 × 10)	$12,000
Percentage in Table VII for age 73 for duration of the guarantee (10)	14
Percentage in Table VII for age 40 for duration of the guarantee (10)	1
Sum of percentages obtained	15
Difference in years of age between two annuitants	33
Addition, in years, to older age	1
Percentage in Table VII for annuitant one year older than A	16
Difference between percentages obtained (16 percent less 15 percent)	1
Value of the refund feature to the nearest dollar (1 percent of $12,000)	$120
Investment in the contract adjusted for present value of the refund feature	$32,930

(d) *Adjustment of investment in the contract where paragraph (b)(3) of §1.72-2 applies to payments.* (1) If paragraph (b)(3) of §1.72-2 applies to payments to be made under a contract and this section also applies because of the provision for a refund feature, an adjustment shall be made to the investment in the contract in accordance with this paragraph before making the computations required by paragraph (d)(3) of §1.72-4 and paragraph (b)(7) of §1.72-5. In the case of the guarantee of a specified amount, the adjustment shall be made by applying the appropriate multiple from Table III or VII (whichever is applicable), as otherwise determined under this section, to the investment in the contract or the guaranteed amount, whichever is the lesser. The guarantee period shall be found by dividing the amount guaranteed by an amount determined by placing the payments received during the first taxable year (to the extent such payments reduce the guaranteed amount) on an annual basis. Thus, if monthly payments are first received by a taxpayer on a calendar year basis in August, his total payments (to the extent that they reduce the guaranteed amount) for the taxable year would be divided by 5 and multiplied by 12. The guaranteed amount would then be divided by the result of this computation to obtain the guarantee period. If the contract merely guarantees that proceeds from a unit or units of a fund shall be paid for a fixed number of years or the life (or lives) of an annuitant (or annuitants), whichever is the longer, the fixed number of years is the guarantee period. The appropriate percentage in Table III or VII shall be applied to whichever of the following is the smaller: (i) the investment in the contract; or (ii) the product of the payments received in the first taxable year, placed on an annual basis, multiplied by the number of years for which payment of the proceeds of a unit or units is guaranteed.

(2) The principles of this paragraph may be illustrated by the following examples:

Example (1). Taxpayer A, a 50-year-old male purchases for $25,000, a contract which provides for variable monthly payments to be paid to him for his life. The contract also provides that if he should die before receiving payments for fifteen years, payments shall continue according to the original formula to his estate or beneficiary until payments have been made for that period. Beginning with the month of September. A receives payments which total $450 for the first taxable year of receipt. This amount, placed on an annual basis, is $1,350 ($450 divided by 4, or $112.50; $112.50 multiplied by 12, or $1,350). If there is no post-June 1986 investment in the contract, the guaranteed amount is considered to be $20,250 ($1,350 × 15), and the multiple from Table III (found in the same manner as in paragraph (b) of this section), 9 percent, applied to $20.250 (since this amount is less than the investment in the contract), results in a refund adjustment of $1,822.50. The latter amount, subtracted from the investment in the contract of $25,000, results in an adjusted investment in the contract of $23,177.50. If A dies before receiving payments for 15 years and the remaining payments are made to B, his beneficiary, B shall exclude the entire amount of such payments from his gross income until the amounts so received by B, together with the amounts received by A and excludable from A's gross income, equal or exceed $25,000. Any excess and any payments thereafter received by B shall be fully includible in gross income.

Example (2). Assume the same facts as in example (1), except that the total investment in the contract was made after June 30, 1986. The applicable multiple found in Table VII is 3 percent. When this is applied to the guaranteed amount of $20,250, it results in a refund adjustment of $607.50. The adjusted investment in the contract is $24,392.50 ($25,000 – $607.50).

(e) *Adjustment of the investment in the contract where more than one annuity element is provided for a single consideration.* In the case of contracts to which paragraph (b) of §1.72-6 applies for the purpose of allocating the investment in the contract to two or more annuity elements which are provided for a single consideration, if one or more of such elements involves a refund feature, the portion of the investment in the contract properly allocable to each such element shall be adjusted for the refund feature before aggregating all the investments in order to obtain the exclusion ratio which is to apply to the contract as a whole.

Example (1). If taxpayer A, an insured 70 years of age, upon maturity of an endowment policy which cost him a net amount of $86,000, elected a dual settlement consisting of (1) monthly payments for his life aggregating $4,146 per year with 10 years' payments certain, and (2) monthly payments for his 60 year old brother, B, aggregating $2,820 per year with 20 years' payments certain, the exclusion ratio to be used by both A and B if there is no post-June 1986 investment in the contract would be determined in the following manner.

A's expected return (A's payments per year of $4,146 multiplied by his life expectancy from Table 1 of 12.1)..	$50,166.60
B's expected return (B's payments per year of $2,820 multiplied by his life expectancy from Table 1 of 18.2)..	$51,324.00
Sum of expected returns to be used in determining exclusion ratio	$101,490.60
Percentage of total expected return attributable to A's expectancy of the ($40,166.60– $101,490.60)..............	49.4
Percentage of total expected return attributable to B's expectancy of the ($51,324- $101,490.60)..............	50.6
Portion of investment in the contract allocable to A's annuity (49.4 percent of $86,000)...	$42,484.00
Portion of investment in the contract allocable to B's annuity (50.6 percent of $86,000)...	$43,516.00
Value of the refund feature with respect to A's annuity (percentage from Table III for male, age 70, and duration 10, or 21 percent, multiplied by lesser of guaranteed amount and allocable portion of investment in the contract $41,460)	$8,707.00
A's allocable portion of the investment in the contract adjusted for refund feature ($42,484 less $8,707.00) ...	$33,777.00
Value of the refund feature with respect to B's annuity (percentage from Table III for male, age 60, and duration 20, or 25 percent, multiplied by lesser of guaranteed amount and allocable portion of investment in the contract, $43,516)	$10,879.00
B's allocable portion of the investment in the contract adjusted for refund feature ($43,516 less $10,879.00) ..	$32,637.00
Sum of A's and B's allocable portions of the investment in the contract after adjustment for the refund feature	$66,414.00
Exclusion ratio for the contract as a whole (total adjusted investment in the contract, $66,414, divided by the total expected return from above, $101,490.60) (percent)	65.4

Example (2). Assume the same facts as in example (1) except that the total investment in the contract was made after June 30, 1986. The exclusion ratio to be used by both A and B would be 56.9 percent, determined as follows:

A's expected return (A's payments per year of $4,146 multiplied by his life expectancy from Table V of 16.0) .	$66,336.00
B's expected return (B's payments per year of $2,820 multiplied by his life expectancy from Table V of 24.2)	$68,244.00
Sum of expected returns to be used in determining exclusion ratio	$134,580.00
Percentage of total expected return attributable to A's expectancy of life ($66,336.00 ÷ $134,580.00).............	49.3
Percentage of total expected return attributable to B's expectancy of life ($68,244.00 ÷ $134,580.00).............	50.7
Portion of investment in the contract allocable to A's annuity (49.3 percent of $86,000)...	$42,398.00
Portion of investment in the contract allocable to B's annuity (50.7 percent of $86,000)...	$43,602.00
Value of the refund feature with respect to A's annuity (percentage from Table VII for age 70 and duration 10, or 11 percent, multiplied by lesser of the guaranteed amount and allocable portion of investment in the contract, $41,460)	$4,560.60
A's allocable portion of the investment in the contract adjusted for refund feature ($42,398 less $4,560.60) ...	$37,837.40
Value of the refund feature with respect to B's annuity (percentage from Table VII for age 60 and duration 20, or 11 percent, multiplied by lesser	

of guaranteed amount and allocable portion of investment in the contract, $43,602) . . .	$4,796.22
B's allocable portion of the investment in the contract adjusted for refund feature ($43,602 less $4,796.22) . . .	$38,805.78
Sum of A's and B's allocable portions of the investment in the contract after adjustment for the refund feature	$76,643.18
Exclusion ratio for the contract as a whole (total adjusted investment in the contract, $76,643.18, divided by the total expected return from above, $134,580.00) (percent)	56.9

(f) *Adjustment of investment in the contract with respect to contracts subject to §1.72-6(d).* In the case of a contract to which §1.72-6(d) (relating to contracts in which amounts were invested both before July 1, 1986, and after June 30, 1986) applies, this section is applied in the manner prescribed in §1.72-6(d) and, in particular, §1.72-6(d)(5)(vi).

Par. 6. Section 1.72-9 is amended by revising the material preceding and following the tables and adding new Tables V, VI, VIA, VII, and VIII to read as follows:

§1.72-9 Tables

The following tables are to be used in connection with computations under section 72 and the regulations thereunder. Tables I, II, IIA, III, and IV are to be used if the investment in the contract does not include a post-June 1986 investment in the contract (as defined in §1.72-6(d)(3)). Tables V, VI, VIA, VII, and VIII are to be used if the investment in the contract includes a post-June 1986 investment in the contract (as defined in §1.72-6(d)(3)). See §1.72-6(d)(3) for rules treating the entire investment in a contract as post-June 1986 investment in the contract if the annuity starting date of the contract is after June 30, 1986, and the contract provides for a disqualifying form of payment or settlement, such as an option to receive a lump sum in full discharge of the obligation under the contract. In addition, see §1.72-6(d) for special rules concerning the tables to be used and the separate computations required if the investment in the contract includes both a pre-July 1986 investment in the contract and a post-June 1986 investment in the contract and the election described in §1.72-6(d)(6) is made with respect to the contract.

If the terms of the contract (a) involve a life or lives, (b) are such that the above tables cannot be correctly applied, and (c) the amounts received thereunder are at least partly "amounts received as an annuity" under a contract to which section 72 applies, the taxpayer may submit with his return an actuarial computation based upon the applicable annuity table (described below) with ages set back one year, showing the appropriate factors applied in his case, subject to the approval of the Commissioner upon examination of such return. The applicable annuity table is the 1937 Standard Annuity Table (if the investment in the contract does not include a post-June 1986 investment in the contract) or the gender-neutral version of the 1983 Basic Table (if the investment in the contract includes a post-June 1986 investment in the contract). In the case of a contract to which §1.72-6(d) (relating to contracts in which amounts were invested both before July 1, 1986, and after June 30, 1986) applies, the actuarial computation shall be based on both tables in accordance with the principles of §1.72-6(d). Computations involving factors to compensate for the effects of contingencies other than mortality, such as marriage or remarriage, re-employment, recovery from disability, or the like, will not be approved.

Par. 7. Section 1.72-11 is amended by revising paragraph (c) to read as follows:

§1.72-11 Amounts not received as annuity payments.

* * * * *

(c) *Amounts received in the nature of a refund of the consideration under a contract and in full discharge of the obligation thereof.* (1) Any amount received under a contract to which section 72 applies, if it is at least in part a refund of the consideration paid, including amounts payable to a beneficiary after the death of an annuitant by reason of a provision in the contract for a life annuity with minimum period of payments certain or with a minimum amount which must be paid in any event, shall be considered an amount received in the nature of a refund of the consideration paid for such contract. If such an amount is in full discharge of an obligation to pay a fixed amount (whether in a lump sum or otherwise) or to pay amounts for a fixed number of years (including amounts described in paragraph (b)(3)(i) of §1.72-2), it shall be included in the gross income of the recipient only to the extent that it, when added to amounts previously received under the contract which were excludable from gross income under the law applicable at the time of receipt, exceeds the aggregate of premiums or other consideration paid. See section 72(e)(2)(A). This paragraph shall not apply if the total of the amounts to be paid in discharge of the obligation can in any event exceed the total of the annuity payments which would otherwise fully discharge the obligation. For rules to be applied in such a case, see paragraph (e) of this section.

(2) The principles of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). A, a male employee, retired on December 31, 1954, at the age of 60. A life annuity of $75 per month was payable to him beginning January 31, 1955. The annuity contract guaranteed that if A did not live for at least ten years after his retirement his beneficiary, B, would receive the monthly payments for any balance of such ten year period which remained at the date of A's death. Under section 72, A was deemed to have paid $3,600 toward the cost of the annuity. A lived for five years after his retirement receiving a total of $4,500 in annuity payments. After A's death, B began receiving the monthly payments of $75 beginning with the January 31, 1960 payment. B will exclude such payments from his gross income throughout 1960, 1961, and 1962, and will exclude only $18 of the first payment in 1963 from his gross income for that year. Thereafter, B will include the entire amount of all such payments in his gross income for the taxable year of recipt. This result is determined as follows:

A's investment in the contract (unadjusted)	$3,600
Multiple from Table III of §1.72-9 for male, age 60, where duration of guaranteed amount is 10 years (percent)	11
Subtract value of the refund feature to the nearest dollar (11 percent of $3,600)	396
Investment in the contract adjusted for the present value of the refund feature without discount for interest	3,204
Aggregate of premiums or other consideration paid	3,600
A's exclusion ratio ($3,204 ÷ $16,380 [$900 × 18.2]) (percent) . . . . ;	19.6
Subtract amount excludable during five years A received payments (19.6 percent of 44,500 [$999 × 5])	882
Remainder of aggregate of premiums or other consideration paid excludable from gross income of B under section 72(e)	2,718

As a result of the above computation, the number of payments to B which will exhaust the remainder of consideration paid which is excludable from gross income of the recipient is 36 6/25 ($2,718 ÷ $75) and B will exclude the payments from his gross income for three years, then exclude only $18 of the first payment for the fourth year from his gross income, and thereafter include the entire amount of all payments he receives in his gross income.

Example (2). The facts are the same as in example (1), except that B, the beneficiary, elects to receive $50 per month for his life in lieu of the payments guaranteed under the original contractual obligation. Since such amounts will be received as an annuity and may, because of the length of time B may live, exceed the amount guaranteed, they are not amounts to which this paragraph applies. See paragraph (e) of the section.

Example (3). The facts are the same as in example (1), except that B, the beneficiary, elects to receive the remaining guaranteed amount in installments which are larger or smaller than the $75 per month provided until, under the terms of the contract, the guaranteed amount is exhausted. The rule of subparagraph (1) of this paragraph and the computation illustrated in example (1) apply to such installments since the total of such installments will not exceed the original amount guaranteed to be paid at A's death in any event.

Example (4). C pays $12,000 for a contract providing that he is to be paid an annuity of $1,000 per year for 15 years. His exclusion ratio is therefore 80 percent ($12,000 ÷ $15,000). He directs that the annuity is to be paid to D, his beneficiary, if he should die before the full 15 year period has expired. C dies after 5 years and D is paid $1,000 in 1960. D will include $200 ($1,000 − $800 [80 percent of $1,000]) in his gross income for the taxable year in which he receives the $1,000 since section 72*(e)* and this section do not apply to the annuity payments made in accordance with the provisions and during the term of the contract. D will continue with the same exclusion ratio used by C (80 percent).

Example (5). In 1954, E paid $50,000 into a fund and was promised an annual income for life the amount of which would depend in part upon the earnings realized from the investment of the fund in accordance with an agreed formula. The contract also specified that if E should die before ten years had elapsed, his beneficiary, F, would be paid the amounts determined annually under the formula until ten payments had been received by E and F together, E died in 1960, having received five payments totaling $30,000. Assuming that $22,000 of this amount was properly excludable from E's gross income prior to his death. F will exclude from his gross income the payments he receives until the taxable year in which his total receipts from the fund exceeds $28,000 ($50,000 − $22,000). F will include any excess over the $28,000 in his gross income for that taxable year. Thereafter, F will include in his gross income the entire amount of any payments made to him from the fund.

Example (6). Assume the facts are the same as in example (1), except that the total investment in the contract is made after June 30, 1986, that A is to receive payments under the life annuity contract beginning on January 31, 1987, and that B will begin to receive the monthly payments on January 31, 1992. B will exclude the $75 monthly payments from gross income throughout 1992, 1993, and 1994. B will exclude only the first two monthly payments and $21 of the third monthly payment in 1995. This is determined as follows:

A's investment in the contract (unadjusted)	$3,600
Multiple from Table VII, age 60, 10 years (percent)	4
Subtract value of the refund feature (4 percent of $3,600)	$144
Investment in the contract adjusted for the present value of the refund feature without discount for interest	$3,456
Aggregate of premiums or other consideration paid	$3,600.00
A's exclusion ratio ($3,456 ÷ $21,780 [$900 × 24.2]) (percent)	15.9
Subtract amount excludable during five years A received payments (15.9 percent of $4,500 $900 × 5])	$715.00
Remainder of aggregate of premiums or other consideration paid excludable from gross income of B under section 72 (e)	$2,884.50

As a result of the above computation, the number of payments to B which will exhaust the remainder of consideration paid which is excludable from gross income of the recipient is $38\frac{23}{50}$ ($2,884.50 ÷ 75) and B will exclude the payments from gross income for three years, then exclude only the first two monthly payments and $34.50 of the third. Thereafter B shall include the entire amount of all payments received in gross income.

(3) For the purpose of applying the rule contained in subparagraph (1) of this paragraph, it is immaterial whether the recipient of the amount received in full discharge of the obligation is the same person as the recipient of amounts previously received under the contract which were excludable from gross income, except in the case of a contract transferred for a valuable consideration, with respect to which see paragraph (a) of §1.72–10. For the limit on the tax, for taxable years beginning before January 1, 1964, attributable to the receipt of a lump sum to which this paragraph applies, see paragraph (g) of this section.

* * * * *

Par. 8. Subparagraph (4) of section 1.403(b)-1(d) is amended by adding the words "to a defined benefit plan" following the words "employer contributions" in the first sentence.

Par. 9. Subparagraph (4)(ii) of section 1.403(b)-1(d) is amended by removing the words "the employee's sex and the".

Par. 10. Subparagraph (4)(iv) of section 1.403(b)-1(d) is removed and the following new subparagraph (4)(iv) is added:

§1.403(b)-1 Taxability of beneficiary under annuity purchased by section 501(c)(3) organization or public school.

* * * * *

(d) *Exclusion allowance*—(1) * * *

(4) *Determination of excludable amounts by allocation of contributions*.* * *

(iv) The lesser of the number of years of service credited through the end of the taxable year or the number of years that the plan has been in existence at such time.

TABLE I

[Value at normal retirement ages of annuity of $1.00 per annum payable in equal monthly installments during the life of the employee] [For taxable years beginning after July 1, 1986.]

Ages	*Values*
40	11.49
41	11.40
42	11.31
43	11.22
44	11.12
45	11.01

78	5.40
79	5.20
80	4.99

Note. If the normal form of retirement benefit under the plan is other than a straight life annuity, the value from Table I above should be divided by the figure set forth below opposite the normal form of retirement benefit provided by the plan.

Annuity for 5 years certain and life thereafter	0.97
Annuity for 10 years certain and life thereafter	0.90
Annuity for 15 years certain and life thereafter	0.80
Annuity for 20 years certain and life thereafter	0.70
Life annuity with installment refund	0.80
Life annuity with cash refund[1]	0.75

[1] The term "cash refund" refers to refund of accumulated employer contributions, and does not refer to refund of employee contributions only, often referred to as "modified cash refund."

REPORTING AND RECORDKEEPING REQUIREMENTS (26 CFR Part 602)

Par. 13. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 14. Section 602.101(c) is amended by inserting in the appropriate place in the table "§1.72-6 . . . [ ]".

ROSCOE L. EGGER, JR.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on March 19, 1986, 10:39 a.m., and published in the issue of the Federal Register for March 24, 1986, 51 F.R. 9978)

Estimated Tax—U.S. Citizens, Resident or Nonresident Aliens—Extension of Time

Announcement 86-48

The Internal Revenue Service has granted to any U.S. citizen or resident alien individual who is outside the United States and Puerto Rico on April 15, 1986, an automatic extension of 2 months to pay the first installment of estimated tax. Thus, the first estimated installment payment otherwise due on April 15, 1986, will be due on June 15, 1986. Since June 15 falls on a Sunday this year, however, the first estimated tax payment date is June 16, 1986. A U.S. citizen or resident alien individual who is outside the U.S. and Puerto Rico on April 15, 1986 and pays the first installment of estimated tax on June 16, 1986, generally must pay one half of the required annual payment at that time. If the required amount is not paid by June 16, then for purposes of the penalty for underpayment of the estimated tax, the period and amount of the underpayment will be calculated without regard to the extension.

A nonresident alien individual who files on a calendar year basis must make the first estimated tax payment by June 15, 1986. Again, since June 15 falls on a Sunday, the first estimated installment payment is due June 16, 1986. If a nonresident alien individual received wages subject to the same withholding rules that apply to U.S. citizens, however, then that individual must meet the usual April 15, 1986, date for the first installment payment. If the first payment is not due until June 16, 1986, the nonresident alien individual must pay one half of the required annual payment at that time.

Information concerning the payment of individual estimated income tax for 1986 can be found in Publication 54 (Rev. Nov. 1985), Tax Guide for U.S. Citizens and Resident Aliens Abroad, and in Publication 519 (Rev. Nov. 1985), U.S. Tax Guide for Aliens.

Unisex Annuity Tables—Public Hearing

Announcement 86-49[1]

SUMMARY: This document provides notice of a public hearing on proposed regulations to the annuity tables used to compute the portion of the amount received as an annuity that is includible in gross income.

DATES: The public hearing will be held on Wednesday, May 21, 1986, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Monday, May 5, 1986.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-19-80), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: B. Faye Easley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, telephone 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 72 of the Internal Revenue Code of 1954. The proposed regulations appear * * * [on page 9, this Bulletin].

The rules of §601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who submit written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Monday, May 5, 1986, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

Transitional Rule for Application of Basis Allocation Regulations Under Section 338

Announcement 86-51

The Temporary Income Tax Regulations under section 338(b) of the Internal Revenue Code will soon be amended. The amendments will provide a special transitional allocation election relating to the allocation of basis among the assets of a target corporation for stock acquisitions occurring on or before January 29, 1986, or pursuant to a binding written contract entered into on or before that date. In general, if a corporation acquires the stock of a target corporation and a section 338 election is made, then the adjusted purchase price for the target's stock must be determined and must be allocated as basis among the target's assets. By temporary regulations published in the Federal Register on January 29, 1986 (T.D. 8072), the Internal Revenue Service prescribed a method of basis allocation for stock acquisitions occurring after August 31, 1982, for which an election under section 338 is made.

---

[1] Filed by the Office of the Federal Register on March 19, 1986, 10:39 a.m., and published in the issue of the Federal Register for March 24, 1986, 51 F.R. 10024.

The amendments to the temporary regulations will provide that, under the special transitional allocation election referred to above, an acquiring corporation must allocate basis pursuant to the rules currently applicable when a combination of assets is acquired for a lump sum purchase price. Those rules would ordinarily produce results consistent with the method of allocation required under the temporary regulations. A different allocation of basis could result only if the taxpayer or the Service establishes that the total adjusted purchase price to be allocated differs from the total value of the target's assets. That would depend upon the proper valuation of the assets deemed purchased by the taxpayer, including goodwill and going concern value.

Corporations that elect to allocate basis pursuant to the amendments to the temporary regulations will be required to file a transitional allocation election apprising the Service of the allocation method employed with respect to the target's assets. The amendments to the temporary regulations will prescribe the manner and consequences of making a transitional allocation election.

Revision of Form 5330, Return of Excise Taxes Related to Employee Benefit Plans

Announcement 86-52

Form 5330, Return of Excise Taxes Related to Employee Benefit Plans, was revised January 1986 to reflect new provisions enacted in Public Law 98-369. New parts have been added to the form for two new taxes: the tax on disqualified benefits imposed by section 4976 of the Internal Revenue Code and the tax on excess fringe benefits imposed by section 4977. In addition, a new line was added for the tax on certain ESOP dispositions imposed by section 4978.

To obtain a copy of the form and the instructions, call the Internal Revenue Service forms number listed in your local telephone directory under "United States Government."

Availability of Revised Publication 721

Announcement 86-53

An updated edition of Publication 721 (Rev. Feb. 1986), Comprehensive Tax Guide to U.S. Civil Service Retirement Benefits, is now available from the Service. The publication explains in detail how the federal income, estate, and gift tax rules apply to benefits that retired federal employees, including those disabled, or their survivors receive under the Civil Service Retirement Act.

The publication covers several tax changes, including the new treatment of disability income and the addition of a new actuarial table for figuring the value of an annuity.

The publication may be ordered by calling the "Federal Tax Forms Only" number listed in the phone book under "United States Government, Internal Revenue Service."

Request for Forms Suggestions

Announcement 86-55

As part of its annual forms review process, the Internal Revenue Service is inviting written comments and suggestions for improving its tax return forms, instructions, and related schedules. The comments may apply to any tax form issued by the Internal Revenue Service. However, the Service would particularly appreciate specific suggestions on ways to reduce the reporting burden on the tax forms. The written submissions should be self-explanatory and in enough detail to communicate clearly what is being suggested. Careful consideration will be given to all comments and suggestions received. However, individual responses to the submissions will not be made because of the volume of correspondence expected.

To meet our work schedule and early printing deadlines, we request that written submissions be received by June 2, 1986.

Comments and suggestions should be sent to the Chairman, Tax Forms Coordinating Committee, Room 5577, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224. Further information about this notice may be obtained by calling (202) 566-6150.

Notice of Disposition of Declaratory Judgment Proceedings Under Section 7428; Termination of Section 7428(c) Validation of Certain Contributions Made During Pendency of Declaratory Judgment Proceedings

This announcement serves notice to donors that a court has determined that the organization listed below continues to be described in section 170(c)(2) of the Internal Revenue Code through January 1, 1984. Deductibility of contributions to this organization is subject to the normal limitations set forth under section 170 for this period. Commencing January 2, 1984, a court has determined that the organization is no longer described in section 170(c)(2), as more particularly set forth in section 7428(c)(1). Protection under section 7428(c) has terminated effective on the dated indicated.

March 10, 1986

Carolinas Hospital and Health Services, Inc., Charlotte, NC

Announcement of the Disbarment, Suspension, or Consent to Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents and Enrolled Actuaries from Practice Before the Internal Revenue Service

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Revenue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletin for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

The following individuals have been placed under consent suspension from practice before the Internal Revenue Service:

Name	Address	Designation	Term of Suspension
Robert Allen Beamer	Wauwatosa, WI	Attorney	Indefinite from February 19, 1986
Robert L. Cummings	Springfield, MO	Certified Public Accountant	Indefinite from February 27, 1986
Louis Crown	Bayside, NY	Certified Public Accountant	Indefinite from March 14, 1986
David H. Heilman	Council Grove, KS	Attorney	Indefinite from March 14, 1986
Beryl W. Markwell	Elmhurst, IL	Certified Public Accountant	Twenty-four Months from March 20, 1986
Marc Pozner	Tenafly, NJ	Certified Public Accountant	Indefinite from March 14, 1986
A. Russel Lucid	Norwell, MA	Attorney	Indefinite from March 26, 1986

Under Section 330, Title 31 of the United States Code (1970 ed.), the Secretary of the Treasury, after due notice and opportunity for hearing, is authorized to suspend or disbar from practice before the Internal Revenue Service any attorney, certified public accountant, enrolled agent, or enrolled actuary who has violated the rules and regulations governing such practice.

Attorneys, certified public accountants, enrolled agents and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before their Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify such disbarred or suspended practitioners, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been disbarred or suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date of disbarment or period of suspension. This announcement will continue to appear in the weekly Bulletin for five successive weeks for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended or disbarred and will later be consolidated and published in the Cumulative Bulletin.

After due notice and opportunity for hearing, the following individual has been disbarred from further practice before the Internal Revenue Service:

Name	Address	Designation	Effective Date
Thomas G. Abernethy, Jr.	Jackson, MS	Attorney	March 7, 1986

Announcement Relating to Proposed Regulations Published With Notice of Proposed Rulemaking

Changes in regulations as announced below have been published in the Federal Register in tentative or proposed form to provide interested parties with an opportunity to file their objections or suggestions for consideration prior to final adoption of such regulations. These announcements will appear in the Bulletin during the period which has been prescribed for the submission and consideration of any views, arguments, or suggestions pertaining to the proposed regulations so published. Statement of such views, arguments or suggestions should be submitted in writing, preferably six copies, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

Section affected	Subject	Published in the Bulletin	Expiration date for submission of views
26 CFR 1.103-10, amended.	Definition of "principal user".	1986-12 I.R.B. 19	Apr. 22, 1986

Italics indicated paperbound editions. When stocks on these publications have been depleted, all reprints will be issued in casebound editions. All others are casebound.

(*) Printed in one volume. (**) Out of print.

NOTICE

Prices shown were those in effect on July 30, 1984. Government documents prices are subject to change without prior notice. Therefore, prices in effect when your order is filled may differ from prices on this list. Since it is not feasible to change prices shown in Government documents in print, the price printed in a document may differ from the price in effect when your order is processed.

INTERNAL REVENUE BULLETIN

The Introduction on page 3 describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of the weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and *are not* included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

BULLETIN INDEX-DIGEST SYSTEM

The Bulletin Index-Digest System provides a fast and easy way to research Revenue Rulings, Revenue Procedures, Public Laws, Treasury Decisions, and other matters of a permanent nature published in the weekly Internal Revenue Bulletin, or Cumulative Bulletin from 1953 on. It is a comprehensive and up-to-date research tool that requires no filing or other clerical maintenance. The current revision consists of four Services, available on a subscription basis, each including a basic volume that covers the period 1953-1983/1984 and a cumulative supplement covering material published in subsequent Bulletins for the following two-year period. Cumulative supplements are issued quarterly for the Income Tax Service and semiannually for the Estate and Gift, Employment, and Excise Tax Service.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Please allow two to six weeks, plus mailing time, for delivery.

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenues at the least cost to the public, and in a manner that warrants the highest degree of public confidence in our integrity, efficiency and fairness. To achieve that purpose, we will:

—Encourage and achieve the highest possible degree of voluntary compliance in accordance with the tax law and regulations;

—Advise the public of their rights and responsibilities;

—Determine the extent of compliance and the causes of noncompliance;

—Do all things needed for the proper administration and enforcement of the tax laws;

—Continually search for and implement new, more efficient and effective ways of accomplishing our Mission.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents of a permanent nature are consolidated semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

Part I.—1954 Code.

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1954.

Part II.—Treaties and Tax Legislation.

This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.

To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts.

Part IV.—Items of General Interest.

With the exception of the disbarment and suspension list included in this part, none of these announcements is consolidated in the Cumulative Bulletins.

The first Bulletin for each month includes an index for the matters published during the preceding month. These monthly indexes are cumulated on a quarterly and semiannual basis, and are published in the first Bulletin of the succeeding quarterly and semi-annual period, respectively.

The Bulletin Index-Digest System, a research and reference service supplementing the Bulletin, may be obtained from the Superintendent of Documents on a subscription basis. It consists of four Services: Service No. 1, Income Tax; Service No. 2, Estate and Gift Taxes; Service No. 3, Employment Taxes; Service No. 4, Excise Taxes. Each Service consists of a basic volume and a cumulative supplement that provide (1) finding lists of items published in the Bulletin, (2) digests of revenue rulings, revenue procedures, and other published items, and (3) indexes of Public Laws, Treasury Decisions, and Tax Conventions.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Prices: Domestic—$1.75 a single copy, $82.00 a year subscription. Foreign—$2.19 a single copy, $102.50 a year for subscription.

Announcement Relating to Decisions of the Tax Court

It is the policy of the Internal Revenue Service to announce in the Internal Revenue Bulletin at the earliest practicable date the determination of the Commissioner to acquiesce or not acquiesce in a decision of the Tax Court which disallows a deficiency in tax determined by the Commissioner to be due.

Notice that the Commissioner has acquiesced or nonacquiesced in a decision of the Tax Court relates only to the issue or issues decided adversely to the Government.

Actions of the acquiescense in adverse decisions shall be relied on by Revenue officers and others concerned as conclusions of the Service only to the application of the law to the facts in the particular case. Caution should be exercised in extending the application of the decision to a similar case unless the facts and circumstances are substantially the same, and consideration should be given to the effect of new legislation, regulations, and rulings as well as subsequent court decisions and actions thereon.

Acquiescence in a decision means acceptance by the Service of the conclusion reached, and does not necessarily mean acceptance and approval of any or all of the reasons assigned by the Court for its conclusions.

No announcements are made in the Bulletin with respect to memorandum opinions of the Tax Court.

The announcements published in the weekly Internal Revenue Bulletins are consolidated semiannually and annually. The semiannual consolidation appears in the first Bulletin for July and in the Cumulative Bulletin for the first half of the year and the annual consolidation appears in the first Bulletin for the following January and in the Cumulative Bulletin for the last half of the year.

The Commissioner ACQUIESCES in the following decisions:

Taxpayer	Docket No.	Report	
		Volume	Page
Allied Industrial Cartage Co.[1]	7918-77	72	515
Commercial Security Bank[2]	5652-79	77	145

[1] Acquiescence relating to whether the rental income received by petitioner from the lease of real estate and trucks to a brother-sister corporation, which is also 100 percent owned by petitioner's sole shareholder, constitutes an amount received as compensation for the right to use corporate property by a shareholder under section 543(a)(6) of the code.

[2] Acquiescence relating to whether Orem State Bank is entitled to deduct accrued but unpaid business liabilities on its final corporate income tax return.

[3] Acquiescence relating to where petitioner, a multifaceted cultural arts and educational organization, operates two art galleries to exhibit and sell the original works of individual artists, whether these operations disqualify petitioner as an organization described in section 501(c)(3) of the Code because operated for a substantial commercial purpose or to serve the private interests of the artists.

[4] Acquiescence relating to whether petitioner's transfer of an undivided one-half interest in ranchland to his former wife, pursuant to a property settlement agreement executed in connection with their divorce, constitutes a taxable disposition.

[5] Acquiescence relating to whether a foreign death tax credit under section 2014 of the Code is allowable when the estate of a U.S. citizen, resident of a foreign country, pays death taxes to that foreign country attributable to a bank account located in that foreign country.

Part I. Rulings and Decisions Under the Internal Revenue Code of 1954

Section 170.—Charitable, etc., Contributions and Gifts

26 CFR 1.170A-1: Charitable, etc., contributions and gifts, allowance of deduction.

Charitable contribution; athletic scholarship program. Guidelines concerning whether payments to athletic scholarship programs are charitable contributions under section 170 of the Code when the payments afford the right to purchase preferred seating at a university's home football games. Rev. Rul. 84-132 is clarified, distinguished, and superseded.

Rev. Rul. 86-63

ISSUE

Whether payments to athletic scholarship programs are charitable contributions under section 170 of the Internal Revenue Code in situations where the payments afford the right to purchase preferred seating at football games.

FACTS

Situation 1. Taxpayer *A*, an individual, made a payment of $300 to a particular athletic scholarship program maintained by a university, an organization described in section 170(c)(2) of the Code. A minimum payment of $300 is required to become a "member" of the program. The only benefit afforded members is that they are permitted to purchase, by paying the stated price of $120, a season ticket to the university's home football games in a designated area in the stadium. Because the games are regularly sold out well in advance, tickets to the games covered by the season ticket would not have been readily available to *A* if *A* had not made the payment to the program. The $300 membership fee is paid annually, and a member is required to make a separate $300 payment for each season ticket the member purchases. The university did not inform its donors of the fair market value of the right to purchase a season ticket in the designated area.

Situation 2. The facts are the same as in *Situation 1* except that taxpayer *B*, an individual, made a payment of $500 to the program, even though only a $300 payment is required to become a "member" of the program. The additional $200 did not result in any benefit to *B* other than that afforded members who paid $300.

Situation 3. Taxpayer *C*, an individual, made a payment of $300 to an athletic scholarship program of a university, an organization described in section 170(c)(2). This payment entitled *C* to become a "member" of the program and, as a member, to purchase a season ticket, for an additional payment of the stated price, in a designated area in the stadium. Tickets are offered to members before season tickets go on sale to the public. Seating reasonably comparable to that available to *C* as a result of membership in the program would have been readily available to *C* even if *C* had not made the payment to the program.

Situation 4. Taxpayer *D*, an individual, made a payment of $300 to an athletic scholarship program of a university, an organization described in section 170(c)(2). This payment entitled *D* to become a "member" of the program and, as a member, to purchase a season ticket to the university's home football games, for an additional payment of the stated price, in a designated area of the stadium. The membership fee is paid annually and a member is required to make a separate $300 payment for each season ticket the member purchases. Although the games are not regularly sold out, seating reasonably comparable to that available to *D* as a result of membership in the program would not have been readily available to *D* if *D* had not made the payment to the program. The university reasonably estimated that the fair market value of the right to purchase a season ticket in the designated area of the stadium would be x dollars, and advised prospective members that the additional [$300 − x dollars] was being solicited as a contribution. In making the estimate, the university considered the level of demand for tickets, the general availability of seats, the relative desirability of seats based on their types, locations, and views, and other relevant factors.

LAW AND ANALYSIS

Section 170(a) of the Code allows, subject to certain limitations, a deduction for contributions and gifts to or for the use of organizations described in section 170(c), payment of which is made within the taxable year.

A contribution for purposes of section 170 of the Code is a voluntary transfer of money or property that is made with no expectation of procuring financial benefit commensurate with the amount of the transfer. *See* section 1.170A-1(c)(5) of the Income Tax Regulations and H.R. Rep. No. 1337, 83d Cong., 2d Sess. A44 (1954).

Rev. Rul. 67-246, 1967-2 C.B. 104, sets forth various examples concerning the deductibility, as charitable contributions under section 170 of the Code, of payments made by taxpayers in connection with admission to or other participation in fund-raising activities for charitable organizations. The revenue ruling provides that to be deductible as a charitable contribution for federal income tax purposes under section 170, a payment to or for the use of a qualified charitable organization must be a gift. No gift exists for such purposes unless, among other requirements, there is a payment of money or transfer of property without adequate consideration. Where consideration in the form of substantial privileges or benefits is received in connection with payments by patrons of fund-raising activities, there is a presumption that the payments are not gifts. *See also* Rev. Rul. 76-185, 1976-1 C.B. 60.

Rev. Rul. 67-246 explains that, if a charitable contribution deduction is claimed with respect to a payment for which such consideration is received, the burden is on the taxpayer to establish that the amount paid is not the purchase price of the privileges or benefits and that part of the payment, in fact, does qualify as a gift. In showing that a gift has been made, it is essential for the taxpayer to establish that the portion of the payment that is claimed as a gift represents the excess of the total amount paid over the fair market value of any substantial privileges or benefits received in return.

Rev. Rul. 67-246 states that, if payments solicited for a charitable fund-raising activity are designed to be partly a gift and partly the purchase price of certain privileges or benefits, the organization conducting the activity should employ procedures that make clear not only that a gift is being solicited in connection with the activity, but also the amount of the gift being solicited. To do this, the amount properly attributable to the purchase of privileges or benefits and the amount solicited as a gift should be determined in advance of solicitation. In making such a determination, the fair market value of any substantial privileges or benefits attributable to the purchase must be taken into account. After making such a determination the charitable organization should notify its donors of the amounts allocable to each component of the payment.

In the four situations described above taxpayers made payments to athletic scholarship programs of organizations described in section 170(c)(2). Each taxpayer's payment entitled the taxpayer to become a member of an athletic scholarship program. The taxpayer has made a charitable contribution only if, and only to the extent that, the payment made exceeded the value of any substantial privileges or benefits afforded by membership in the program.

HOLDING

In *Situations 1* and *2*, because tickets to the games covered by the season ticket would not otherwise have been readily available to *A* and *B*, the right to purchase a season ticket in a designated area in the stadium was a substantial benefit. This substantial benefit was afforded to *A* and *B* because each paid the minimum membership fee of $300. Accordingly, a presumption arises that the $300 reflects the value of the benefit received. Unless the taxpayer can establish that $300 exceeded the value of the benefit received, no part of the $300 payment is a charitable contribution under section 170 of the Code.

In *Situation 2*, however, the additional $200 contributed by *B* resulted in no additional substantial benefit and thus, is a charitable contribution.

In *Situation 3*, although the taxpayer was entitled to purchase a ticket before tickets went on sale to the public and although the ticket was for seating in a designated area, reasonably comparable seating would have been readily available to *C* even if *C* had not made a payment to the program. Although *C* received the benefit of obtaining a ticket early and of sitting with other program members, the benefit was not substantial. Accordingly, the entire $300 is a charitable contribution.

In *Situation 4*, because reasonably comparable seating would not otherwise have been readily available to *D*, the right to purchase a season ticket in a designated area in the stadium was a substantial benefit. This substantial benefit was afforded to *D* because *D* paid the minimum membership fee of $300. Accordingly, a presumption arises that the $300 reflects the value of the benefit received. The university, however, after taking all relevant facts and circumstances into account, reasonably estimated the fair market value of the benefit as *x* dollars. Because the university solicited the other [$300 − *x* dollars] as a contribution and the *x* dollar figure reflected the fair market value of the benefit provided, [$300 − *x* dollars] of *D*'s $300 payment is a charitable contribution.

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 84-132, 1984-2 C.B. 55, is clarified, distinguished, and superseded.

---

26 CFR 1.170A-7: contributions not in trust of partial interests in property.

Whether the transfer by a grantor/life-interest beneficiary and the successive life-interest beneficiary to a charitable remainder annuity trust of their annuity interests in the trust qualifies for a charitable deduction under section 170 of the Code. See Rev. Rul. 86-60, page 9.

Section 513.—Unrelated Trade or Business

26 CFR 1.513-6: Certain hospital services not related trade or business.

T.D. 8075

TITLE 26—INTERNAL REVENUE.—CHAPTER I, SUBCHAPTER A, PART 1—INCOME TAX: TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Treatment of Certain Hospital Services

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the treatment of certain hospital services furnished by one tax-exempt hospital to other such hospitals. Changes to the applicable tax law were made by the Tax Reform Act of 1976. [Pub. L. 94-455, 1976-3 C.B. (Vol. 1)1] The regulations affect those tax-exempt hospitals that furnish the services, and would provide the furnishing hospitals with the guidance needed to determine their unrelated business taxable income.

DATES: The regulations apply to taxable years beginning after December 31, 1983, and are effective after December 31, 1953.

FOR FURTHER INFORMATION CONTACT: Calder L. Robertson, Jr., of the Employee Plans and Exempt Organizations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, (Attention: CC:LR:T:EE-46-78) (202-566-3544) (not a toll-free number).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On December 13, 1982, the Federal Register published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 513(e) of the Internal Revenue Code of 1954 (47 Fed. Reg. 55696) [EE-46-78, 1983-1 C.B. 805]. These proposed amendments conform the regulations to section 1311 of the Tax Reform Act of 1976 (90 Stat. 3526). The regulations are issued under the authority contained in section 513(e) and in section 7805(b) of the Internal Revenue Code of 1954 (90 Stat. 3526, 68A Stat. 917; 26 U.S.C. 513(e), 7805). There was only one request for a public hearing. No public hearing was held because the request was withdrawn. After consideration of all written comments received, the regulations are adopted with minor clarification by this Treasury decision.

EFFECTIVE DATE

The regulations are effective for all taxable years beginning after December 31, 1953.

NON-APPLICABILITY OF EXECUTIVE ORDER 12291

The Commissioner has determined that this Treasury decision is not subject to review under Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

REGULATORY FLEXIBILITY ACT

Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

DRAFTING INFORMATION

The principal author of this regulation is Charles K. Kerby, III, of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing these regulations, both on matters of substance and style.

PUBLIC COMMENTS

The public comments pertained to issues that were considered by the Internal Revenue Service prior to the publication of the notice of proposed rulemaking.

The majority of public comments considered the 100 inpatient limitation of section 513(e). It was suggested that the limitation was arbitrary, and should be increased or eliminated. The final regulations do not adopt this suggestion because the statute explicitly requires the limitation.

Many commentators sought to temper the rules under section 513(e) which treat a particular service as an unrelated trade or business if the service is provided at a fee above actual cost to even one hospital, or is provided to one hospital with facilities to serve more than 100 inpatients. The approaches suggested involved treating only the excess of fees over actual cost, or the fees from the services provided to hospitals with more than 100 inpatient facilities, as derived from an unrelated trade or business. The final regulations do not adopt these approaches. Treatment of only the services provided to more than 100 inpatient hospitals as an unrelated trade or business was deemed to contradict the wording of the statute under section 513(e)(1) which requires that services be provided "solely" to hospitals that have facilities to serve no more than 100 inpatients. Similarly, treatment of the excess of fees above actual costs as unrelated trade or business income was rejected because section 513(e)(3) specifically requires that services be provided at a fee not in excess of actual costs to escape treatment as an unrelated trade or business under section 513(e). We note that section 513 deals with the characterization of a service as an unrelated or related trade or business. The statute does not directly deal with the characterization of income, and does not address the fragmentation of income suggested. Therefore, if a service fails to meet the requirements of section 513(e)(3), the service is characterized under section 513(e) and the resulting treatment of income derived is governed by section 512.

Many commentators suggested that the regulations' reference to the reasonable cost and rate of return formulations prescribed by 42 U.S.C. 1395x(v)(1)(A) and (B) and the underlying regulations (permitting reimbursement to health care providers for reasonable costs including a reasonable return on equity capital in the Medicare program) was unwarranted. Some commentators felt that a "reasonable cost" fee standard, however determined, should not be adopted. Moreover, several commentators were concerned that many indirect costs of providing services would not be allowed in the Medicare determination of reasonable costs. These commentators generally felt the regulations should be silent on standards for determining fee levels.

After consideration of these comments, it was decided to retain the regulations' reference to the Medicare formulations as a safe harbor for use in complying with section 513(e). The wording of the statute in section 513(e)(3) requires that the services be provided at a fee or cost that *does not exceed* the actual cost of services, not provided *at* actual costs. The statute does not require actual cost fees. The nature of the fees subject to the actual cost limit is left unclear by the statute. The brief legislative history suggests strongly that Congress intended that section 513(e) operate to encourage cost savings to hospitals and their patients which implies a reasonable cost fee standard. S. Rep. No. 94-938, Part 2, 94th Cong., 2d Sess. 95 (1976). Further, the subsequent language of section 513(e)(3) which incorporates into actual costs reasonable allocations for depreciation (determined by the straight-line method) and a return on capital goods used (a reasonable rate of return) reinforces the reasonable cost fee standard adopted in the final regulations.

In addition, it was felt that a uniform standard for determining the fees or costs of services to be charged was necessary in the final regulations. Moreover, after examination of the Medicare regulations and consultation with Social Security Administration officials, it was determined that most direct and indirect costs are included in the determination of reasonable cost of services under the Medicare regulations. Further, it was determined that the cost records kept under the reimbursement method of repayment for Medicare providers would still be necessary under the new prospective payment method for Medicare providers. Thus, no additional recordkeeping would be required to demonstrate compliance with section 513(e).

Although the proposed regulations referred to the rate of return for equity capital in the Medicare regulations, it was not clear that the rate for section 513(e) purposes should change with any corresponding change in rate prescribed in the Medicare regulations. Therefore, the regulations are clarified to indicate that the safe harbor rate of return on equity capital is the rate prescribed in the regulations under 42 U.S.C. 1395x(v)(1)(A) and (B). The rate of return was lowered for periods after April 20, 1983, by a change to the Medicare regulations in October 1984. Concern was expressed over the fairness of applying the lower rate of return for periods before, the regulations are also clarified to make the lower rate applicable only for taxable years beginning 90 days after publication of the final regulations.

Several commentators suggested that the final regulations clarify that the failure of a hospital service under section 513(e) to qualify for the exception from treatment as an unrelated trade or business does not preclude a showing based on all the facts and circumstances that the service provided to one or more hospitals is substantially related to the providing hospital's exempt purpose. Treas. Reg. §1.513-1(d). Nothing in the final regulations precludes a hospital from making the requisite showing under section 1.513-1(d) based on all the facts and circumstances. However, the Service has generally taken the position that the provision of commercially available services by an exempt hospital to other unrelated exempt hospitals is an unrelated trade or business. *See* Rev. Rul. 69-633, 1969-2 C.B. 121. Thus, absent a showing of special facts that indicate the provision of such a service to other unrelated hospitals is substantially related to the providing hospital's exempt purpose (other than through the production of needed income), the provision of such services to other unrelated hospitals will generally be deemed an unrelated trade or business. For these reasons, it was decided to reject any revision of the final regulations that implied as a general and practical matter a contrary result. As noted before, nothing in the final regulations precludes a special showing under section 1.513-1(d).

* * * * *

Adoption of amendments to the regulations

Accordingly, the proposed amendments to 26 CFR Part 1 are hereby adopted as clarified by this Treasury decision.

Amendments to the Regulations

1. These amendments to Part 1 are issued under the authority contained in 26 U.S.C. 7805. The authority citation for Part 1 is unchanged.

2. 26 CFR Part 1 is proposed to be amended by adding the following new §1.513-6 in the appropriate place:

PART 1—[AMENDED]

§1.513-6 Certain hospital services not unrelated trade or business.

(a) *In general.* Under section 513(e), the furnishing of a service listed in section 501(e)(1)(A) by a hospital to one or more other hospitals will not constitute unrelated trade or business if—

(1) The service is provided solely to hospitals that have facilities to serve not more than 100 inpatients,

(2) The service would, if performed by the recipient hospital, constitute an activity consistent with that hospital's exempt purposes, and

(3) The service is provided at a fee not in excess of actual cost, including straight line depreciation and a reasonable rate of return on the capital goods used to provide the service. For purposes of this section, a rate of return on capital goods will be considered "reasonable" provided that it does not exceed, on an annual basis, the percentage described below which is based on the average of the rates of interest on special issues of public debt obligations issued to the Federal Hospital Insurance Trust Fund for each of the months included in the taxable year of the hospital during which the capital goods are used in providing the service. Determinations as to the cost of services and the applicable rate of return should be made as prescribed by 42 U.S.C. 1395x(v)(1)(A) and (B) and the regulations thereunder (permitting a health care facility to be reimbursed under the Medicare program for the "reasonable cost of [its] services," including, in the case of certain proprietary facilities, a "reasonable return on equity capital"). For taxable years beginning on or before [90 days after publication of this regulation in the Federal Register] the rate of return shall be one and one-half times the average of the rates of interest on public debt obligations described above which were in effect on or before April 20, 1983.

(b) *Hospital defined.* As used in this section the word "hospital" means a hospital described in section 170(b)(1)(A)(iii).

(c) *Example.* The provisions of this section are illustrated by the following example:

Example. A large metropolitan hospital provides various services to other hospitals. The hospital furnishes a purchasing service to hospitals N and O, a data processing service to hospitals R and S, and a food service to hospitals X and Y. All the hospitals are described in section 170(b)(1)(A)(iii). All the hospitals have facilities to serve not more than 100 inpatients except hospital N. The services are furnished at cost to all hospitals except that hospital R is charged a fee in excess of cost for its use of the data processing service. The purchasing service constitutes unrelated trade or business because it is not provided solely to hospitals having facilities to serve not more than 100 inpatients.

The data processing service constitutes unrelated trade or business because it is provided at a fee in excess of cost. The food service satisfies all three requirements of paragraph (a) of this section and does not constitute unrelated trade or business.

(d) *Effective date.* Section 513(e) and this section apply to taxable years beginning after December 31, 1953.

The Treasury Decision is issued under the authority contained in sections 513(e) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1729 68A Stat. 917; 26 U.S.C. 513(e), 7805).

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved January 21, 1986.

J. Roger Mentz,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on February 12, 1986, 8:45 a.m., and published in the issue of the Federal Register for February 13, 1986, 51 F.R. 5320)

Section 664.—Definitions

26 CFR 1.664-2: Charitable remainder annuity trust.

Whether the transfer of an annuity interest in a charitable remainder annuity trust by a grantor/life-interest beneficiary to the charitable beneficiary is a transfer to a permissible recipient under section 664 of the Code. See Rev. Rul. 86-60, below.

Section 2522.—Charitable and Similar Gifts

26 CFR 25.2522(c)-3: Transfers not exclusively for charitable, etc., purposes in the case of gifts made after July 31, 1969.
(Also Sections 170, 664; 1.170A, 1.664-2.)

Charitable remainder annuity trust; guaranteed annuity; partial interest; assignment of noncharitable interest. The transfer by the grantor life-interest beneficiary and the successive life-interest beneficiary of their annuity interests in a charitable remainder annuity trust to the charitable beneficiary qualifies for the charitable deductions under sections 170 and 2522 of the Code.

Rev. Rul. 86-60

ISSUE

Under the circumstances described below, if the grantor/life-interest beneficiary and the successive life-interest beneficiary of a charitable remainder annuity trust donate their annuity interest in the trust to the charitable remainder beneficiary, do the donations qualify for the charitable deductions under sections 170 and 2522 of the Internal Revenue Code?

FACTS

Situation 1. In 1980, *A* created a charitable remainder annuity trust (hereinafter, CRAT) described in section 664(d)(1) of the Code. *A* retained the annuity interest in the trust for life. The remainder beneficiary was *X*, a charitable organization described in sections 170(c) and 2522(a). In 1984 *A* transferred the annuity interest in the trust to *X*.

Situation 2. In 1980, *A* created a CRAT described in section 664(d)(1) of the Code. The trust instrument provides that the trustee shall pay the annuity amount annually to *A* for life and upon *A*'s death to *B*, the successive life interest beneficiary, for such time as *B* survives. Upon the death of the survivor of *A* and *B*, the corpus is to be distributed to *X*, a charitable organization that meets the requirements of sections 170(c) and 2522(a). In 1984, *A* and *B* assigned their interests in the trust to the charitable remainder beneficiary.

No property interests were created for the purpose of avoiding the rules of section 170(f)(2) and (f)(3)(A).

LAW AND ANALYSIS

Section 170(a)(1) of the Code allows as an income tax deduction any contribution or gift to or for the use of organizations described in section 170(c), payment of which is made within the taxable year.

Section 170(f)(2)(B) of the Code provides that no charitable contribution deduction is allowed for the value of any interest in property (other than a remainder interest) transferred in trust unless the interest is in the form of a guaranteed annuity or a fixed percentage distributed annually of the fair market value of the trust property, determined annually, and the grantor is treated as the owner of the interest for purposes of applying section 671 (relating to grantor trusts).

Section 170(f)(3)(A) of the Code provides that a contribution (not made by a transfer in trust) of less than the taxpayer's entire interest in property is not allowed as a charitable deduction except to the extent such contribution would have been allowed as a deduction had it been transferred in trust.

Sections 1.170A-6(a)(2) and 1.170A-7(a)(2)(i) of the Income Tax Regulations provide that a deduction is allowed for a contribution of a partial interest in property if such interest is the taxpayer's entire interest in the property, such as an income interest or a remainder interest. If, however, the property in which such partial interest exists was divided in order to create such interest and thus avoid the rules of section 170(f)(2) and (f)(3)(A), the deduction is not allowed.

Section 1.170A-1(c)(1) of the regulations provides that, if a charitable contribution is made in property other than money, the amount of the contribution is generally the fair market value of the property at the time of the contribution.

Section 2501 of the Code imposes a tax on the transfer of property by gift. The gift tax applies, under section 2511, to all transfers by gift, whether the transfer is in trust or otherwise, and whether the gift is direct or indirect.

Section 2522 of the Code provides for a gift tax charitable deduction for the value of property transferred to organizations described in section 2522(a).

However, section 2522(c)(2) of the Code and section 25.2522(c)3-(c)(1) and (2) of the Gift Tax Regulations provide that if a donor transfers an interest in property for charitable purposes and an interest in the same property is retained by the donor, or is transferred or has been transferred (for less than adequate and full consideration) for private purposes, no gift tax deduction is allowed under section 2522 unless the charitable interest is:

(A) an undivided portion of the donor's entire interest,

(B) a remainder interest in a personal residence,

(C) a remainder interest in a farm,

(D) a remainder interest in a charitable remainder trust or a pooled income fund,

(E) a guaranteed annuity interest,

(F) a unitrust interest, or

(G) a qualified conservation contribution.

A guaranteed annuity interest is an irrevocable right to receive a determinable amount periodically, but not less often than annually, for a specified term or for the life or lives of a named individual or individuals, each of whom is living and identifiable at the date of the gift. Section 1.170A-6(c)(2)(i) of the Income Tax Regulations and section 25.2522(c)-3(c)(2)(v) of the Gift Tax Regulations.

Section 1.170A-1(e) of the Income Tax Regulations and section 25.2522(c)-3(b) of the Gift Tax Regulations provide that if, as of the date of the gift, a transfer for charitable purposes is dependent upon the performance of some act or the happening of a precedent event in order that it might become effective, no deduction is allowable unless the possibility that the charitable transfer will not become effective is so remote as to be negligible.

In *Situation 1*, in 1984 *A* transferred *A*'s entire life annuity interest to *X* charity, an organization described in section 170(c) of the Code. Although *A* had previously divided the interest *A* held in the property, the division was not to avoid section 170(f)(2)(A). Thus, under section 1.170A-7(a)(2)(i), *A*'s transfer of *A*'s entire life annuity interest qualifies for an income tax charitable deduction.

A's transfer also qualifies for a gift tax charitable deduction. Following the 1984 transfer, *A* did not retain any interest in the trust, and neither at that time nor at any prior time did *A* make a transfer from the trust for private purposes. Although the transfer of the remainder interest to *X* divided *A*'s prior interest, that transfer was for charitable, not private purposes. Consequently, in order to qualify for a gift tax charitable deduction, *A*'s 1984 transfer to *X* need not be in a form described in section 2522 of the Code and section 25.2522(c)-3(c)(2) of the regulations. Accordingly, *A*'s transfer of the life annuity interest to *X* qualifies for a gift tax deduction under section 2522 of the Code.

In *Situation 2*, *A* transferred to *X* charity *A*'s life annuity interest in 1984. The life annuity interest was the only interest in the charitable remainder annuity trust that *A* owned at the time of the transfer. Although *A* had previously divided the interest *A* held in the property, that division was not to avoid section 170(f)(3)(A). Thus, under section 1.170A-7(a)(2)(i) of the regulations, *A*'s transfer of *A*'s entire life annuity interest qualifies for an income tax deduction.

Further, in 1984, *B* transferred to *X* charity *B*'s secondary life annuity interest, the only interest in the charitable remainder trust that *B* ever owned. Therefore, under section 1.170A-7(a)(2)(i) of the regulations, *B*'s transfer of *B*'s entire secondary life annuity interest qualifies for an income tax deduction.

The transfers by *A* and *B* also qualify for the gift tax charitable deduction. *A* made a completed gift under section 2511 of the Code to *B* of the secondary life annuity interest in the trust in 1980. Because *A* made a completed gift in the trust to a noncharitable beneficiary, the restrictions in section 2522(c)(2) apply. Thus, *Situation 2* differs from *Situation 1*. In *Situation 2* no gift tax deduction is allowed for *A*'s 1984 transfer to *X* of *A*'s life interest in the trust unless it is described in section 25.2522(c)-3(c)(2) of the regulations. Because *A*'s 1984 transfer to *X* is of a right to receive a fixed amount annually for the life of *A* and qualifies as a guaranteed annuity, it is a transfer of a guaranteed annuity interest as described in section 25.2522(c)-3(c)(2)(v). Consequently, the gift qualifies for a gift tax charitable deduction under section 2522.

Further, *B* has made a completed gift under section 2522 of the Code of *B*'s secondary life annuity interest in the trust in 1984. Following this transfer, *B* did not retain any interest in the trust, and at no time had *B* made a transfer of an interest in the trust for a private purpose. Consequently, there is no requirement that *B*'s 1984 transfer to *X* be in one of the forms set out in section 25.2522(c)-3(c)(2) of the regulations in order to qualify for a gift tax charitable deduction. Thus, *B*'s transfer of the secondary life annuity interest to *X* in 1984 qualifies for a gift tax reduction under section 2522.

Sections 1.170A-1(e) and 25.2522(c)-3(b) of the regulations are not applicable to the transfer of these annuities because, immediately after *A* and *B* transferred their respective annuity interests to charity, the interests transferred were not in any way dependent upon the happening of an event or a condition precedent in order that the interests might become effective.

HOLDINGS

In *Situation 1*, the gift by *A*, the grantor, to the remainder beneficiary of *A*'s retained life annuity interest in a charitable remainder annuity trust qualifies for an income tax charitable deduction under section 170 of the Code and a gift tax charitable deduction under section 2522.

In *Situation 2*, where *A* has created a charitable remainder annuity trust with life annuity interest to *A* and survivor life annuity interest to *B*, the gifts by *A* and *B* of their life annuity interests in the trust to the charitable remainder beneficiary qualify for an income tax charitable deduction and a gift tax charitable deduction. *A*'s gift of the life annuity, however, qualified for the gift tax charitable deduction only because the interest that was transferred was in one of the forms set out in section 25.2522(c)-3(c)(2) of the regulations.

Section 4161.—Imposition of Tax

26 CFR 48.4161(b)-1: Imposition and rates of tax; bows and arrows.

The excise tax imposed by section 4161(b)(2) of the Code applies to the sale of bow and arrow component parts to be used in the production of the bows and arrows by an Indian tribe. See Rev. Rul. 86-61, below.

Section 4221.—Certain Tax-Free Sales

26 CFR 48.4221-2: Tax-free sale of articles to be used for, or resold for further manufacture. (Also Sections 4161, 4225; 48.4161(b)-1, 48.4225-1.)

Bow and arrow components; native Indian handicraft. Bow and arrow component parts may not be sold tax free under sections 4221(a)(1) and 4221(d)(6)(A) of the Code for use in the production of bows and arrows as articles of native Indian handicraft by Indian tribes. Rev. Rul. 77-90 distinguished.

Rev. Rul. 86-61

ISSUE

May bow and arrow components be sold tax free under section 4221(a)(1) of the Internal Revenue Code for use in the manufacture by an Indian tribe of bows and arrows that, under section 4225, are exempt from manufacturers excise tax?

FACTS

A manufacturer sells to an Indian tribe various components used in the production of bows and arrows. Utilizing Indians working on an Indian reservation, the Indian tribe produces finished handicraft bows and arrows from the components. The finished bows qualify as native Indian handicraft. The Indian tribe then sells the completed bows and arrows.

LAW AND ANALYSIS

Section 4161(b)(1) of the Code, as amended by the Tax Reform Act of 1984, section 1017, 1984-3 (Vol. 1) C.B. 1, 529, imposes an 11 percent tax on the sale of certain bows and arrows by the manufacturer producer or importer. Section 4161(b)(2)(A) imposes an 11 percent tax on the sale by the manufacturer, producer or importer of parts and accessories suitable for inclusion in or attachment to a bow or arrow described in section 4161(b)(1).

Section 4221(a)(1) of the Code provides that no tax shall be imposed under section 4161 on the sale by the manufacturer of an article for use by the purchaser for further manufacture, or for resale by the purchaser to a second purchaser for use by such second purchaser in further manufacture.

Section 4221(d)(6)(A) of the Code states that an article shall be treated as sold for use in further manufacture if such article is for use by the purchaser as material in the manufacture or production of, or as a component part of, another article taxable under Chapter 32 of the Code to be manufactured or produced by that purchaser.

Section 4225 of the Code states, in pertinent part, that no tax shall be imposed under Chapter 32 on any article of native Indian handicraft manufactured or produced by Indians on Indian reservations.

Section 48.4225-1 of the Manufacturers and Retailers Excise Tax Regulations provides that the exemption under section 4225 of the Code applies to articles taxable under chapter 32 of the Code that are of native Indian handicraft and are manufactured or produced by Indians on Indian reservations.

Rev. Rul. 72-536, 1972-2 C.B. 573, concerns lubricating oil sold for use in the manufacture of light-duty trucks. Effective December 11, 1971, the manufactures excise tax previously imposed on those trucks was repealed. The ruling holds that, effective that date, lubricating oil could not be sold tax free under section 4221(a)(1) for use in the manufacture of those trucks, because they had ceased to be articles subject to the manufacturers excise tax.

Rev. Rul. 77-90, 1977-1 C.B. 334, concerns the sale by a manufacturer of tread rubber for use in the further manufacture of tires that are sold for export prior to any other use. The ruling holds that under section 4221(a)(1) of the Code the sale of the rubber for tire manufacture is exempt from the manufacturers excise tax and the subsequent sale of the tires for export is exempt from tax under section 4221(a)(2).

Section 4221(a)(1) of the Code exempts the sale of articles for further manufacture only if the article sold is to be used as material in the manufacture or production of, or as a component part of, "another article taxable under [chapter 32]." Section 4221(d)(6)(A). As a result of the effect of section 4225, however, qualifying articles of native Indian handicraft that are otherwise taxable under chapter 32 are to have no tax imposed on them under chapter 32. *See* section 48.4225-1 of the regulations. Such articles, therefore, are not taxable under chapter 32, and material or components sold for use in the production of articles of native Indian handicraft are not sold for use in the production of articles taxable under chapter 32. The sale of material and components for that use, therefore, is not exempt under section 4221(a)(1). *See* Rev. Rul. 72-536.

Although the tax on such a sale of material and components may be passed through in the form of higher prices to the producer of native Indian handicraft, the imposition of the tax on the sale does not subvert the purpose of section 4225 of the Code. Any subsequent sale by the producer of the handicraft is exempt from tax. Thus, in the present situation, the handicraft articles produced and sold by the tribe still enjoy an excise tax exemption to the extent that their value was contributed by the tribe's handiwork. It is that handiwork at which the policy of section 4225 is directed.

The present situation is distinguishable from that in Rev. Rul. 77-90. In Rev. Rul. 77-90 the sale of tread rubber by the manufacturer to a tire retreader was exempt from tax under section 4221(a)(1) of the Code as a sale for further manufacture. The retreader's subsequent sale of the tires for export, however, was exempt under section 4221(a)(2), which exempts the sale of any article for export. Tires themselves are normally taxable articles under chapter 32 of the Code. Thus, the exemption for sale for further manufacture of taxable articles applies to the sale of tread rubber to a tire retreader, notwithstanding the exemption of the later sale. In contrast, articles of native Indian handicraft are always tax exempt, regardless of their subsequent disposition, whether abroad or domestic. Accordingly, parts sold for the manufacture of native Indian handicraft are necessarily sold for the manufacture of an article that is not taxable under chapter 32. For this reason, the exemption under section 4221(a)(1) does not apply.

Furthermore the policy behind exempting from tax articles that are sold for export—to encourage United States exports—would not be served by exempting only the value contributed by the last manufacturer in a series of manufacturers. Because that policy is not concerned with who manufactured an article that is sold for export, there is no connection between the policy and the amount of value that is added by the last manufacturer. In contrast, here there is a relation between the policy behind section 4225 of the Code—to encourage Indian hand work—and the value contributed by the producer of native Indian handicraft, who is an Indian on a reservation.

The bows and arrows described above are article native Indian handicraft and, therefore, pursuant to section 4225 of the Code, are not subject to the manufacturers excise tax. Consequently, the sales of bow and arrow component parts to be used in the production of the bows and arrows by the Indian tribe may not be made tax free under section 4221(a)(1) since the parts are not sold for use in the manufacture of another article taxable under chapter 32.

HOLDING

The tax imposed by section 4161(b)(2) of the Code applies to the sale of bow and arrow component parts to Indians for use in the production of bows and arrows that are exempt from the manufacturers excise tax.

EFFECT ON OTHER
REVENUE RULINGS

Rev. Rul. 77-90 is distinguished.

Section 4225.—Exemption of Articles Manufactured or Produced by Indians

26 CFR 48.4225-1: Exemption of articles manufactured or produced by Indians.

Whether, as a result of the effect of section 4225 of the Code, qualifying articles (bows and arrows) of native Indian handicraft that are otherwise taxable under chapter 32 of the Code are exempt from tax. See Rev. Rul. 86-61, page 11.

Section 4481.—Imposition of Tax

26 CFR 41.4481-1: Imposition of tax.

Highway use tax; vehicles registered in Canada. Effective July 1, 1985, highway use tax does not apply to Canadian trucks that are registered in British Columbia and have prorate licenses under the Uniform Vehicle Registration and Reciprocity Agreement. Rev. Rul. 81-86 revoked effective for periods beginning after June 30, 1985.

Rev. Rul. 86-62

Section 41.4481-1(a)(2) of the Highway Use Tax Regulations, as amended by T.D. 8027, 1985-26 I.R.B. 6, concerns any highway motor vehicle that is issued a base plate by a Canadian province under the International Registration Plan (IRP) or similar agreement and has a proportional registration under such agreement to satisfy the registration laws of any of the United States. The section provides that for taxable periods beginning after June 30, 1985, these vehicles are exempt from the tax imposed by section 4481(a) of the Internal Revenue Code.

Rev. Rul. 81-86, 1981-1 C.B. 504, holds, effective July 1, 1981, that the highway use tax imposed by section 4481(a) of the Code applies to certain trucks. The trucks involved are those that are registered (base plated) in the Canadian province of British Columbia and that have "prorate licenses" under the Uniform Vehicle Registration Proration and Reciprocity Agreement (U.V.R.P.R.A.). A prorate license is a special license that, under the U.V.R.P.R.A., allows certain commercial fleet interstate vehicles to satisfy the registration laws of certain U.S. states.

The U.V.R.P.R.A is a reciprocal agreement similar to the IRP, and its prorate licensing constitutes a proportional registration in satisfaction of state laws. Thus, under section 41.4481-1(a)(2) of the regulations, effective July 1, 1985, a Canadian truck that is registered in British Columbia and has a prorate license under the U.V.R.P.R.A. is not subject to the highway use tax imposed by section 4481(a) of the Code.

Rev. Rul. 81-86 is therefore revoked, effective for taxable periods beginning after June 30, 1985.

In *Little Audrey's Transportation Co. v. United States,* 369 F.Supp 329 (D. Neb. 1974), *aff'd mem.*, 508 F.2d 846 (8th Cir. 1974), the court held that, under a reciprocal proration agreement similar to the U.V.R.P.R.A., prorate licensing did not constitute registration. Rev. Rul. 81-86 stated that the Internal Revenue Service would no longer follow the holding. Although Rev. Rul. 81-86 is now revoked, the Service will continue to not follow that holding.

Section 4988.—Windfall Profit; Removal Price

26 CFR 51.4988-2: Net income limitation on windfall profit.
(Also Section 4996; 51.4996-1.)

T.D. 8076

TITLE 26—INTERNAL REVENUE.—CHAPTER I, SUBCHAPTER D, PART 51—EXCISE TAX REGULATIONS UNDER THE CRUDE OIL WINDFALL PROFIT TAX ACT OF 1980

Net Profits Interests

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final excise tax regulations relating to the rules applicable to a net profits interest for purposes of the windfall profit tax on domestic crude oil. Changes to the applicable law were made by sections 201(h) and 203(c) of the Technical Corrections Act of 1982 [Pub. L. 97-448, 1983-1 C.B. 451, 465, 467]. The regulations provide guidance for determining the portion of crude oil produced from the property attributable to the holder of a net profits interest. These regulations supersede §150.4996-1(b)(3) of the Temporary Excise Tax Regulations under the Crude Oil Windfall Profit Tax Act of 1980 [Pub. L. 96-223, 1980-3 C.B. 1], 26 CFR Part 150, for those net profits interests for which these regulations would be effective. Those temporary regulations remain in effect for those net profits interests for which these regulations are not effective (*e.g.*, a net profits interest established by an agreement entered into before April 1, 1982, which is held by a profit making corporation).

DATE: The amendments are effective generally with respect to net profits agreements entered into (or renewed) after March 31, 1982. However, in the case of a 90 percent or more net profits interest held by an exempt charity or exempt governmental interest, these amendments are effective with respect to crude oil removed after February 29, 1980. For purposes of determining the category of crude oil removed (or deemed removed) from the premises before April 1, 1986, the taxpayer may determine the category of all such oil by allocating it among all categories of crude oil in proportion to the production from that property in each such category that was removed (or deemed removed) from the premises during the calendar quarter immediately preceding the calendar quarter of production.

FOR FURTHER INFORMATION CONTACT: David R. Haglund of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3297).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On August 29, 1984 ,the Federal Register published proposed amendments to the Excise Tax Regulations under the Crude Oil Windfall Profit Tax Act of 1980 (26 CFR Part 51) under sections 4988 and 4996 of the Internal Revenue Code of 1954 (49 FR 34242) [LR-38-82, 1984-2 C.B. 852]. The amendments were proposed to conform the regulations to sections 201(h) and 203(c) of the Technical Corrections Act of 1982. Two comments on the proposed amendments were received. A public hearing was not requested and one was not held. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

EXPLANATION OF PROVISIONS

The windfall profit tax imposes a tax on the producer of domestic crude oil except exempt oil. Section 4996(a)(1)(A) provides that the term "producer" generally means the holder of an economic interest with respect to the crude oil. The holder of a net profits interest in a property is generally considered to hold an economic interest with respect to the crude oil. Under §150.4996-1(b)(3) of the Temporary Excise Tax Regulations under the Crude Oil Windfall Profit Tax Act of 1980 (promulgated before enactment of the Technical Corrections Act of 1982), the holder of a net profits interest was only treated as the producer of the number of barrels of crude oil equal to the net profits interest holder's share of net profits divided by the removal price of the crude oil. For example, if X received $120 as his share of net profits and the removal price of the crude oil was $30 per barrel, X was treated as the producer of four barrels of crude oil.

Section 201(h) of the Technical Corrections Act of 1982 amended the definition of "producer' in section 4996(a) to provide special rules for producers subject to a net profits interest agreement. These special rules provide that for windfall profit tax purposes the amount of crude oil equal in value to the cost of operating the property (cost recovery oil) will be treated as produced by the net profits interest holder and the person holding the interest burdened by the net profits interest in the same proportion as their respective shares of net profits. Section 201(h) of the Act also amends section 4988(b) by adding a new paragraph (6) which provides that for purposes of the net income limitation the expenses of producing the crude oil will be allocated in the same manner as the cost recovery oil. Thus, the holder of a 10 percent net profits interest is treated as the producer of 10 percent of the barrels of cost recovery oil produced and will be attributed 10 percent of the expenses of producing that crude oil.

In response to comments received the final regulations modify the notice of proposed rulemaking in several respects. One commentator expressed the view that cost recovery oil and other oil (oil attributable to profits) should be treated differently because, in its view, the amount of other oil is governed by the rules applicable for percentage depletion purposes and should be calculated accordingly. This suggestion was not adopted. The Act provided that cost recovery oil shall be treated as shared in the same proportion as other oil is shared under the net profits agreement. Thus, the Act recognizes that other oil is shared according to the sharing ratio in the net profits agreement. Although section 4996(a)(1)(B) only addresses the treatment of cost recovery oil (because the treatment of that oil before the statutory change was the principal cause of distortion in windfall profit tax liabilities), it clearly indicates that other oil and cost recovery oil are to be determined under the same rules. Accordingly, the final regulations emphasize that each barrel of crude oil production covered by a net profits agreement, including all cost recovery oil, shall be treated as produced by the parties to such agreement in proportion to the respective shares (determined after reduction for such cost recovery oil) of the production of the crude oil covered by such agreement.

The final regulations also clarify that state and local property and severance taxes are qualified costs, and point out that a provision in a net profits agreement that reduces net profits by windfall profit tax has no effect on windfall profit tax.

Another modification in the final regulations is made in response to comments that the proposed rule requiring that categories of oil be determined by reference to production in the preceding calendar quarter is unduly burdensome. The final regulations provide simply that a net profits interest holder is the producer of a fraction of each barrel produced. Accordingly, the holder of a net profits interest takes its share of all categories of oil and of all base prices and all removal prices. For oil removed or deemed removed from the premises before April 1, 1986, taxpayers may base categories of crude oil upon the proposed rule.

Commentators suggested that the cost recovery rules should not apply unless there are actual net profits under the agreement. Section 4996(a)(1)(B)(ii) provides that the cost recovery rules shall not apply before payout. Payout is the time at which the holder of the net profits interest is first entitled to income under the net profits agreement. Because of lower production levels or increased costs subsequent to payout the holder of the net profits interest may not be entitled to any net profits. However, the statutory provision relating to the inapplicability of the cost recovery rules before payout would not have been necessary if the cost recovery rules only applied when there are net profits. Therefore, the statute reflects an intention that once payout occurs the holder of a net profits interest is attributed a share of the cost recovery oil even if there are no net profits in such periods. Moreover, this position is consistent with Congressional intent as indicated by the following statement from the Senate report: "[The allocation of cost recovery oil] will be made beginning in the first taxable period with respect to which the owner or owners of the net profits interest receive a share of production remaining after cost recovery and for all taxable periods thereafter regardless of whether or not the property subsequently shows a loss." S. Rep. No. 97-592, 97th Cong., 2nd Sess. 43 (1982) [1983-1 C.B. 492].

SPECIAL ANALYSIS

The Commissioner of the Internal Revenue has determined that these final rules are not major rules as defined in Executive Order 12291. Accordingly, a regulatory impact analysis is not required.

Although a notice of proposed rulemaking which solicits public comments was issued, the Internal Revenue Service concluded that when notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Accordingly, these final regulations do not constitute regulations subject to the Regulatory Flexibility act (5 U.S.C. Chapter 6).

DRAFTING INFORMATION

The principal author of these final regulations is David R. Haglund of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing these regulations, both on matters of substance and style.

* * * * *

Adoption of amendments to the regulations.

Accordingly, 26 CFR Part 51 is amended as follows:

Paragraph 1. The authority for Part 51 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 51.4996-1(b)(3) is also issued under 26 U.S.C. 4996(a)(1)(B) and 26 U.S.C. 4996(h)(2).

Par. 2. Paragraph (c) of §51.4988-2 is amended by redesignating subparagraphs (4), (5), and (6) as (5), (6), and (7), respectively, and by inserting a new subparagraph (4) to read as set forth below.

§51.4988-2 Net income limitation on windfall profit.

* * * * *

(c) *Special rules.* * * *

(4) *Certain net profits interests.* (i) For purposes of determining the net income limitation under this section in the case of any person treated under paragraph (b)(3) of §51.4996-1 (relating to net profits interests) as the producer of any portion of cost recovery oil (within the meaning of §51.4996-1(b)(3)(iv)) covered by a net profits agreement (within the meaning of §51.4996-1(b)(3)(iii))—

(A) Such person (and only such person) shall include in its gross income from the property the gross income from such portion, and

(B) The qualified costs (within the meaning of §51.4996-1(b)(3)(v)) allocable to such portion shall be treated as paid or incurred by such person (and only by such person).

The determination of cost depletion under paragraph (b)(3) of this section shall be made with regard to the principles of paragraph (b)(3) of §51.4996-1. Thus, a person treated under that paragraph as the producer of any portion of cost recovery oil covered by a net profits agreement computes the cost depletion deduction allowable under paragraph (b)(3) of this section by using as the number of units sold that number of units which such person would have used for income tax purposes if such person's gross income from the property had included the gross income attributable to that portion of the cost recovery oil of which such person is treated as the producer.

(ii) The principles of this subparagraph may be illustrated by the following examples:

Example (1). B owns 100 percent of the working interest in Whiteacre. B's working interest is burdened by a 75 percent net profits interest held by C. The net profits agreement provides that the amount of net profits is determined by subtracting from gross income from the sale of crude oil or gas production from Whiteacre all payments to royalty holders and all operating expenses except the windfall profit tax. Whiteacre produces only taxable crude oil. For the taxable year, 20,000 barrels of crude oil are produced from Whiteacre and sold for $40 per barrel for a total of $800,00. Of this amount, $100,000 is paid to D for his ⅛ royalty interest ($40 × (20,000 × ⅛)). The operating expenses attributable to the production of the taxable crude oil (including state severance taxes) are $100,000. The net profits for the year are $600,000 ($800,000 (gross income) − ($100,000 (royalty payment + $100,000 (expenses). C is entitled to $450,000 ($600,000 × .75). Under §51.4996-1(b)(3), C is treated as the producer of 13,125 barrels of crude oil (20,000 × ⅞ × .75). Thus, for purposes of determining C's hypothetical cost depletion deduction allowable for the taxable year under paragraph (b)(3) of §51.4988-2, C would use the 13,125 barrels as his number of units sold and would attribute $75,000 of the costs ($100,000 × .75) to that production for purposes of calculating the net income limitation.

Example (2). Assume the same facts as example (1) except that the net profits agreement provides that he amount of net profits is reduced by the windfall profit tax. Because qualified costs as defined in §51.4996-1(b)(3)(v) do not include the windfall profit tax, the net profits interest holder's share of production attributable to his share of net profits under the agreement is determined without regard to any reduction in profits attributable to the windfall profit tax. The results are the same as in example (1).

(5) *Computation of the net income limitation for taxable year that includes March 1, 1980.* * * *

(6) *Election to capitalize qualified tertiary injectant expenses.* * * *

(7) *Computation of the net income limitation before October 27, 1981, under notice of proposed rulemaking.* * * *

* * * * *

Par. 3. Paragraph (b)(3) of §51.4996-1 is revised to read as follows:

§51.4996-1 Definitions.

* * * * *

(b) *Producer*. * * *

(3) *Certain net profits interests*—(i) *In general*. In the case of any property (within the meaning of paragraph (i) of this section), each barrel of crude oil production covered by a net profits agreement (within the meaning of paragraph (b)(3)(iii) of this section), including all cost recovery oil (within the meaning of paragraph (b)(3)(iv) of this section), shall be treated as produced by the parties to such agreement in proportion to the respective shares (determined after reduction for such cost recovery oil) of the production of the crude oil covered by such agreement. For example, the holder of a 5 percent net profits interest is the producer of 5 percent of each barrel of crude oil produced (both cost recovery oil and other oil) from the property burdened by the net profits interest. See example (1) of paragraph (b)(3)(viii) of this section. An economic interest in crude oil in place in the ground which is not a working interest (within the meaning of paragraph (d)(2) of §51.4992-1) without regard to this subparagraph shall not be considered a working interest by reason of the allocation of costs to a holder of a net profits interest under this subparagraph. Notwithstanding the preceding provisions of this paragraph (b)(3)(i), in the case of crude oil removed (or deemed removed) from the premises before April 1, 1986, the taxpayer may determine the category of all such oil by allocating it among all categories of crude oil in proportion to the production from that property in each such category that was removed (or deemed removed) from the premises during the calendar quarter immediately preceding the calendar quarter of the production whose category is being determined.

(ii) *General rule inapplicable before payout*. In the case of any property, the provisions of paragraph (b)(3)(i) of this section only shall apply for—

(A) The first taxable period in which, under the agreement with respect to such property, one or more persons receive a share described in paragraph (b)(3)(iii)(B) of this section, and

(B) All subsequent taxable periods to which such agreement applies (whether or not the property shows a loss in such period).

(iii) *Net profits agreement defined*. The term "net profits agreement" means an agreement entered into (or renewed) after march 31, 1982, that provides for sharing part or all of the production of crude oil from a property where—

(A) One or more persons are to be reimbursed for qualified costs (within the meaning of paragraph (b)(3)(v) of this section) by the allocation of cost recovery oil, and

(B) One or more persons are to receive a share of any production of crude oil from the property remaining after reduction for the cost recovery oil referred to in paragraph (b)(3)(iii)(A) of this section.

The term "net profits agreement" shall include an agreement that provides that a party to the agreement is entitled to the greater or lesser of a specified share of production of crude oil from the property remaining after reduction for cost recovery oil or some other amount (such as a specified share of total production or a maximum or minimum amount) provided the requirements of paragraph (b)(3)(iii)(A) and (B) of this section are satisfied. If a party to an agreement described in the preceding sentence receives a share of production other than the specified share of production of crude oil from the property remaining after reduction for cost recovery oil, such party shall be treated as receiving a share of production of crude oil from the property remaining after reduction for cost recovery oil in certain situations. If such party receives a maximum or minimum amount with respect to any crude oil production instead of a specified share of production, such party shall not be treated as receiving a share of production remaining after reduction for cost recovery oil with respect to such crude oil production. However, if such party is entitled to receive the greater of a specified share of production or a specified amount and receives the specified share of production remaining after reduction for cost recovery oil instead of the specified amount, such party shall be treated as receiving a share of production remaining after reduction for cost recovery oil to the extent that the amount of the share received exceeds the specified amount. See example (4) of paragraph (b)(3)(viii) of this section.

(iv) *Cost recovery oil defined*. The

term "cost recovery oil" means crude oil produced from the property that is allocated to a person as reimbursement for qualified costs paid or incurred with respect to the property. Accordingly, cost recovery oil exists to the extent that the agreement provides that qualified costs are chargeable against profits and to the extent that the property has sufficient revenues to reimburse for the expenses (*i.e.*, the amount of cost recovery oil cannot exceed the amount of oil produced). If a net profits agreement provides that net profits are determined from proceeds other than proceeds solely from the production of crude oil, cost recovery oil shall be deemed to exist to the extent that, based on all the facts and circumstances, the expenses paid or incurred in producing the net profits are attributable to the production of crude oil. See example (7) of paragraph (b)(3)(viii) of this section.

(v) *Qualified costs.* The term "qualified costs" means any amount paid or incurred for exploring, developing, or producing natural gas or crude oil from a reservoir on the property. The term includes any overhead or indirect costs paid or incurred that are attributable to the activities described in the preceding sentence. The term includes any state or local property or severance taxes with respect to the oil, but does not include any amount that is paid or incurred with respect to the tax imposed by chapter 45.

(vi) *Scope of agreement.* A net profits agreement shall be treated as covering only shares of production of crude oil held by persons who hold economic interests in the property (determined without regard to paragraph (b)(3)(i) of this section).

(vii) *Effective date for certain governmental entities and certain charities.* If 90 percent or more of the remaining production referred to in paragraph (b)(3)(iii)(B) of this section is to be received by holders of a qualified governmental interest (within the meaning of section 4994(a)) or holders of a qualified charitable interest (within the meaning of section 4994(b)), or both, that do not share in the costs referred to in paragraph (b)(3)(iii)(A) of this section, then the requirement of paragraph (b)(3)(iii) that the agreement be entered into (or renewed) after March 31, 1982, shall not apply. Accordingly, the applicability of the provisions of this subparagraph is determined without regard to the date on which the net profits agreement was entered into.

(viii) The principles of this subparagraph may be illustrated by the following examples:

Example (1). A, an independent producer, holds the working interest in property X which produces tier 1 oil. A's interest is burdened by a 95 percent net profits interest held by B who is neither an independent producer nor an exempt producer. The agreement between A and B provides that the amount of net profits is determined by subtracting from gross income all operating expenses except windfall profit taxes. Property X produces 400 barrels of crude oil during the month of May. A is the producer of 5 percent of each of the 400 barrels produced in May and B is the producer of 95 percent of each of such barrels (totalling 20 barrels and 380 barrels, respectively).

Example (2). C, an independent producer, owns an oil and gas property that is burdened by an overriding royalty interest held by D. The overriding royalty interest agreement provides that D is entitled to the lesser of the proceeds from ¼ of the production from the property or 50 percent of the net profits from the property for a calendar quarter. The property produced 1,000 barrels at $30 per barrel for a calendar quarter and had net profits of $1,400. The proceeds from ¼ of the production for the quarter exceeded 50 percent of the net profits. D is treated as the holder of a 50 percent net profits interest with respect to those barrels of crude oil for which D's share of the proceeds from production is determined by reference to 50 percent of net profits. D is the producer of 500 barrels (50% of each of the 1000 barrels produced).

Example (3). E, an independent producer, owns an oil and gas property that is burdened by a net profits interest (determined before any reduction of the net profits for chapter 45 taxes) held by F. F is entitled to 10 percent of the net profits or $2,200 (or revenue from total production if revenue from production is $2,200 or less per calendar quarter) for a calendar quarter, whichever is greater. For a calendar quarter gross income from the property is $26,010 (867 barrels at $30 each) and expenses are $4,800. F's share of net profits is $2,121 (($26,010 − $4,800) × 10%). F receives $2,200 because this amount exceeds 10 percent of net profits. F is treated as the holder of an 8.45829% royalty interest ($2,200 ÷ $26,010), and is treated as the producer of 73.33337 barrels of crude oil (867 × 8.45829%) with respect to that royalty interest.

Example (4). Assume the same facts as example (3) except that the expenses are $1,200. F's share of net profits is $2,481 (($26,010 − $1,200) × 10%). F is treated as the holder of an 8.45829% royalty interest ($2,000 ÷ $26,010) because F is entitled to the $2,200 without regard to net profits. F is also treated as the holder of a 1,24281% net profits interest because $281 ($2,481 − $2,200) are determined by reference to net profits from production ($281 ÷ ($26,010 − ($1,200 + $2,200))). F is treated as the producer of 84.10853 barrels of crude oil. Of this amount, 73.33337 barrels are attributable to the royalty interest (867 × 8.45829%) and 10.77516 barrels are attributable to the net profits interest (867 × 1.24281%). F is treated as the producer of 1.24281% of the cost recovery oil, and, accordingly, is allocated $14.91372 of expenses (1.24281% × $1,200) for purposes of the net income limitation.

Example (5). On January 1, 1983, G and H enter into an agreement which provides for the following: (1) G will incur all expenses of exploring for and developing property Y, (2) G will receive all production from Y until G has recovered all expenses for exploration and development, and (3) after G has recovered all expenses for exploration and development, G and H will share equally the production remaining after G has recovered operating costs (determined without regard to the tax imposed by chapter 45). Y begins producing crude oil on July 1, 1983. G recovers all expenses for exploration and development as of December 31, 1983, and on January 1, 1984, G and H begin sharing the production from Y remaining after G has recovered operating expenses. For purposes of paragraph (b)(3)(iii)(A) of this section, H is not treated as receiving a share described in paragraph (b)(3)(iii)(B) of this section until January 1, 1984.

Example (6). Assume the same facts as example (6) except that the agreement provides that after G has recovered all expenses for exploration and development, G and H will share equally the revenue and expenses of production from Y. The agreement between G and H is not a net profits agreement because H's share of production after G has recovered all expenses for exploration and development is burdened by the expenses of such production.

Example (7). J, an independent producer, owns property Z which produces tier 1 and tier 2 oil. J's interest is burdened by a 95 percent net profits interest held by K whose interest is a qualified charitable interest. The net profits agreement between J and K provides that the amount of net profits is determined by subtracting from gross income from the sale of crude oil and natural gas production from property Z all operating expenses except the windfall profit tax. The agreement also provides that the proceeds from the production of natural gas shall be used to reimburse J for all operating expenses for the production of crude oil and natural gas from property Z. Fifty percent of the gross income from property Z is attributable to the production of crude oil and 50 percent is attributable to the production of natural gas. However, 80 percent of the operating expenses of property Z are attributable to the production of crude oil while only 20 percent are attributable to the production of natural gas. During January of 1984, property Z produces 900 barrels of crude oil which sell for $27,000 ($30 per barrel) and 10,000 MCF of natural gas which also sell for $27,000. The operating expenses of property Z for that month are $4,500, $3,600 of which are attributable to the production of crude oil land $900 of which are attributable to the production of natural gas. Because 80 percent of the operating expenses are attributable to the production of crude oil, cost recovery oil shall be deemed to exist to the extent of 80 percent of the operating expenses. Accordingly, there are 120 barrels of cost recovery oil ($3,600 (operating expenses attributable to crude oil) ÷ $30 (removal price of each barrel of crude oil)).

26 CFR 51.4996-1: Definitions.

Rules relating to a net profits interest for purposes of the windfall profit tax. See T.D. 8076, page 13.

Section 6011.—General Requirement of Return, Statement, or List

26 CFR 301.6011-2: Required use of magnetic media.

T.D. 8081

TITLE 26—INTERNAL REVENUE.—CHAPTER 1, SUBCHAPTER F, SUBCHAPTER H, PART 301—PROCEDURE AND ADMINISTRATION; PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Returns Required on Magnetic Media

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to returns required to be filed on magnetic media. Changes to the applicable law were made by the Tax Equity and Fiscal Responsibility Act of 1982 [Pub. L. 97-248, 1982-2 C.B. 462] and the Interest and Dividend Tax Compliance Act of 1983 [Pub. L. 98-67, 1983-2 C.B. 352]. The regulations apply to persons required to file certain returns (other than individual, estate, and trust income tax returns) and provide guidance with respect to the magnetic media filing requirement.

DATES: The regulations are effective as of March 25, 1986 and generally apply to returns filed after December 31, 1986.

FOR FURTHER INFORMATION CONTACT: 1. Magnetic Media Reporting, Internal Revenue Service, National Computer Center, P.O. Box 1359, Martinsburg, West Virginia 25401-1359, 304-263-8700 (not a toll-free call), if the inquiry relates to the waiver procedure or to magnetic media filing for returns required on Form 1098, 1099 series, 5498, 6248, 8027 or W-2G.

2. Magnetic Media Coordinator, Internal Revenue Service, Philadelphia Service Center, P.O. Box 245, Bensalem, Pennsylvania 19020, 214-969-2237 (not a toll-free call), if the inquiry relates to magnetic media filing for returns required on Form 1042S.

3. The following regional magnetic media coordinators of the Social Security Administration, if the inquiry relates to magnetic media filing for returns required on Form W-2 or W-2P:

SUPPLEMENTARY INFORMATION:

BACKGROUND

On September 18, 1985, the FEDERAL REGISTER published proposed amendments to the Procedure and Administration Regulations (26 CFR Part 301) and to the Table of OMB Control Numbers under the Paperwork Reduction Act (26 CFR Part 602) relating to section 6011(e) of the Internal Revenue Code of 1954 (50 FR 37871) [LR-289-82, 1985-43 I.R.B. 26]. The amendments were proposed to reflect the addition to the Code of section 6011(e) by section 319 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248, 96 Stat. 610) [1982-2 C.B. 462, 566] and its amendment by section 109 of the Interest and Dividend Tax Compliance Act of 1983 (Pub. L. 98-67, 97 Stat. 383) [1983-2 C.B. 352, 359]. Twenty-two written comments responding to the notice of proposed rulemaking were received. On December 18, 1985, the Internal Revenue Service held a public hearing on the proposed amendments. Two individuals provided oral comments at the public hearing. After consideration of all comments received, the proposed amendments are adopted as revised by this Treasury decision.

SUMMARY OF PROPOSED AMENDMENTS

Under the proposed amendments, any person that is required to use Form 1042S (Income Subject to Withholding under Chapter 3 of the Internal Revenue Code), 1098 (Mortgage Interest Statement), 5498 (Individual Retirement Arrangement Information), 6348 (Annual Information Return of Windfall Profit Tax), 8027 (Employer's Annual Information Return of Tip Income and Allocated Tips), W-2 (Wage and Tax Statement), W-2G (Statement for Recipients of Certain Gambling Winnings), W-2P (Statement for Recipients of Annuities, Pensions, Retired Pay, or IRA Payments), W-4 (Employee's Withholding Allowance Certificate) or any form in the 1099 series (Information Returns) for the purpose of making a return must provide the information required by such form on magnetic media, unless (1) the person is a low-volume filer with respect to the return or (2) the person is granted a waiver with respect to the return by the Internal Revenue Service. Failure to file a return on magnetic media when required to do so by the regulations would be treated as a failure to file the return and would subject the person to the corresponding penalty.

For calendar years (or annual filing periods) beginning before January 1, 1987, the proposed amendments generally permit the filing of returns on the prescribed paper form for all returns other than those required on Form 1099-DIV, 1099-PATR, 1099-INT, or 1099-OID if fewer than 500 returns were required to be filed on that form for the preceding year (or annual period). For calendar years (or annual filing periods) beginning on or after January 1, 1987, the proposed amendments generally permit the filing of returns on the prescribed paper form for all returns other than those required on Form 1099-DIV, 1099-PATR, 1099-INT, or 1099-OID if fewer than 250 returns were required to be filed on that form for the preceding year (or annual period). The proposed amendments also provide that a person required to file a return on magnetic media may receive a waiver from such requirement in appropriate circumstances upon a showing of hardship.

In addition, under the proposed amendments, persons subject to the magnetic media requirement are required to obtain prior consent to the use of the magnetic medium on which the information is to be submitted. The proposed amendments provide that applications for consent to the use of a magnetic medium and requests for waiver generally must be filed at least 90 days before the filing of the first return for which the consent or waiver is requested. In the case of certain returns (Forms W-2 and W-2P) filed in 1987 and 1988, however, the application for consent or request for waiver is due no later than June 30 of the preceding year.

PUBLIC COMMENTS

I. LOW-VOLUME THRESHOLDS.

Several commentators objected to the low-volume thresholds contained in the proposed amendments (500 returns for calendar years (or annual filing periods) beginning before January 1, 1987; 250 returns for calendar years (or annual filing periods) beginning on or after January 1, 1987). Some of these commentators believe that the low-volume thresholds should be increased, while others believe that the implementation of the 250-return threshold should be postponed until a later year. A few commentators believe that the regulations should establish a different threshold for each type of return based on the degree of difficulty in filing on magnetic media for the type of return. In addition, one commentator believes that the low-volume thresholds should apply on an establishment or location basis rather than on a taxpayer basis. Finally, a few commentators believe that the low-volume thresholds should be revised to take into account part-time workers and employee turnover.

The final regulations do not change the low-volume thresholds that were contained in the proposed amendments (except to clarify that a separate threshold applies to each member of an affiliated group of corporations filing a consolidated return) for a number of reasons. First, the purpose of the low-volume thresholds is to exclude from the magnetic media filing requirement those taxpayers that the Internal Revenue Service believes should be excluded because the volume of returns filed does not justify the incremental cost of filing on magnetic media. Taxpayers filing more than 250 returns during any calendar year (or annual filing period) should be able to comply with the magnetic media requirement without incurring unreasonable costs. Many taxpayers filing over 250 returns use computers in other facets of their business. Other taxpayers that do not utilize computers in their business should be able to contract with a computer service bureau to convert the information to magnetic media at a reasonable cost.

Furthermore, taxpayers that are required to file returns in excess of the low-volume thresholds can request a waiver from the magnetic media requirement. As was stated in the preamble to the proposed regulations, it is anticipated that the waiver authority will be exercised so as not to unduly burden taxpayers lacking the necessary data processing facilities and access at a reasonable cost to computer service bureaus.

The final regulations do not adopt a different low-volume threshold for each type of return because the cost of filing on magnetic media should not vary significantly based on the type of return being filed. In addition, the low-volume threshold is not determined on an establishment or location basis because in many cases an exemption would be inappropriate and hardship cases can be dealt with through the waiver process. Finally, the final regulations do not modify the low-volume threshold to take into account part-time employees and employee turnover because the Internal Revenue Service believes that the volume of returns, and not the number of employees, is the best indicator of the incremental cost of filing on magnetic media.

II. TYPES OF RETURNS REQUIRED ON MAGNETIC MEDIA.

Several commentators indicated that it is inappropriate and confusing to require magnetic media reporting for information contained on Form W-4 because Form W-4 is not a return (as required by section 6011(e)(1)), but rather is a form that is completed by an employe to enable the employer to withhold an approprite amount of Federal income tax from the employee's wages. Other commentators argued that magnetic media reporting is inappropriate for information contained on Form 1099-A or Form 1099-R because the transactions that give rise to a return on such forms occur at irregular intervals throughout the year.

The Internal Revenue Service has determined that magnetic media reporting is unnecessary for returns filed on Form W-4, and, thus, the final regulations exclude returns filed on Form W-4 from the list of returns required on magnetic media. The Internal Revenue Service does not believe that the irregularity of a transaction that gives rise to a return will affect a taxpayer's ability to comply with the magnetic media requirement. Taxpayers filing Form 1099-A or Form 1099-R can compile the information required by such forms at the time of the underlying transaction and periodically transcribe the information on magnetic media without a substantial economic burden. For this reason, the final regulations require magnetic media reporting for information contained on Form 1099-A or Form 1099-R.

III. PERMISSIBLE MEDIA FOR FILING RETURNS.

Commentators also suggested that the regulations permit magnetic media filing of 5-1/4 inch personal computer floppy disks. Although the Social Security Administration and the Internal Revenue Service are currently able to process information submitted on 5-1/4 inch floppy disks, the Social Security Administration has announced that it will have the capability to process such information for returns filed after December 31, 1986, and the Internal Revenue Service anticipates that it will also have the capability to process such information for certain returns filed after December 31, 1986. Persons that plan to file on 5-1/4 inch floppy disks should submit a timely consent application that indicates that choice. If the Internal Revenue Service is unable to process such information for returns required to be filed in 1987, a hardship waiver will ordinarily be granted for such year.

IV. RETURNS OF BROKERS AND BARTER EXCHANGES.

One commentator requested clarification with respect to the application of the low-volume thresholds to returns required on Form 1099-B (Proceeds from Broker and Barter Exchange Transactions). The proposed and final regulations do not apply to returns required on Form 1099-B. Consequently, under section 1.6045-1(l) of the Income Tax Regulations, all returns required on Form 1099-B must be filed on magnetic media unless a hardship waiver is granted with respect to such return.

V. COORDINATION OF RULES APPLICABLE TO RETURNS REQUIRED ON FORMS W-2 AND W-2P WITH RULES APPLICABLE TO RETURNS REQUIRED ON OTHER FORMS.

One commentator suggested that the approval of magnetic media be performed by a single government agency and that the deadlines for the submission of consent and waiver applications for returns required on Form W-2 and W-2P be the same as the deadlines for other returns (at least 90 days before the filing of the first return for which consent or a waiver is requested). The regulations contain different rules for returns required on Form W-2 and W-2P because these returns are submitted to the Social Security Administration where the information on the returns is processed for use by the Social Security Administration and the Internal Revenue Service. The regulations do not permit approval of a magnetic medium by a single agency because the computer capabilities of the Social Security Administration and the Internal Revenue Service currently differ and are likely to differ in the future. The deadlines for the submission of consent and waiver applications are not uniform for the same reason.

VI. IMPOSITION OF FAILURE TO FILE PENALTY FOR FAILURE TO FILE ON MAGNETIC MEDIA.

The proposed regulations provide that if a person fails to file on magnetic media when required to do so by section 6011(e) and the regulations, such person is deemed to have failed to file the return and is subject to the corresponding penalties for failure to file such return. One commentator requested a transition period before the imposition of penalties for the failure to file on magnetic media. In addition, the commentator suggested that the regulations provide that any reasonable cause or due diligence exception to the penalty for failure to file apply in the case of a failure to file on magnetic media. The Internal Revenue Service believes that it is inappropriate to provide a blanket waiver of the penalty for the failure to file on magnetic media for a transition period. The regulations have been clarified, however, to permit the assertion of a reasonable cause or due diligence exception to the imposition of the penalty if the underlying failure to file penalty permits such an exception.

VII. EFFECTIVE DATE.

One commentator requested clarification of the effective date of the regulations. Section 110 of the Interest and Dividend Tax Compliance Act of 1983 provides that in the case of returns required on Form 1099-DIV, 1099-PATR, 1099-INT, or 1099-OID, the magnetic media requirement applies to payments made after December 31, 1983. The final regulations, which follow the proposed regulations, apply to returns filed after December 31, 1986. The final regulations have been clarified, however, to provide that returns required on Form 1099-DIV, 1099-PATR, 1099-INT, or 1099-OID for payments made after December 31, 1983, are subject to the magnetic media requirement even if such returns are filed before January 1, 1987.

VIII. REGUALTORY FLEXIBILITY ANALYSIS.

Two commentators believe that the Internal Revenue Service should have undertaken a regulatory flexibility analysis to assess the impact of the regulation on small businesses and other small entities. Under section 605(b) of title 5 of the United States Code, an initial or final regulatory flexibility analysis is not required if the head of the agency that is proposing a rule certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. In the notice of proposed rulemaking that was published oin September 18, 1985 (50 FR 37871 [LR-289-82, 1985-43 I.R.B. 26]), it was certified that the proposed regulations will not have a significant impact on a substantial number of small entities. This certification was based on a determination that the economic impact of the proposed reporting requirements will be minimal in most cases and, in any event, for returns required on Form 1099-DIV, 1099-PATR, 1099-INT, or 1099-OID, is attributable to requirements directly imposed by the statute. The Internal Revenue Service believes that the certification was proper, and thus, a regulatory flexibility analysis is not required.

IX. MISCELLANEOUS COMMENTS.

Finally, a few commentators claimed that the magnetic media requirements was overly budensome but did not suggest any specific modifications to the proposed amendments, and other commentators suggested changes that are outside the scope of this regulation project.

EXECUTIVE ORDER 12291, REGUALTORY FLEXIBILITY ACT AND PAPERWORK REDUCTION ACT

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis therefore is not required. It is hereby certified that the regulations adopted in this document will not have a significant impact on a substantial number of small entities (see discussion under the Special Analyses heading in the notice of proposed rulemaking; 50 FR 37872). Accordingly, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act (5 U.S.C. chapter 6).

The collection of information requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under section 3504(h) of the Paperwork Reduction Act.

DRAFTING INFORMATION

The principal author of these regulations is C. Scott MeLeod of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

* * * * *

Adoption of amendments to the regulations

Accordingly, 26 CFR Parts 301 and 602 are amended as follows:

PROCEDURE AND ADMINISTRATION REGULATIONS
(26 CFR Part 301)

Paragraph 1. The authority for Part 301 is amended by adding the following authority citation:

Authority: 26 U.S.C 7805. * * * Section 301.6011-2 also issued under 26 U.S.C. 6011(e).

Par. 2. New §301.6011-2 is added immediately after §301.6011-1 to read as follows:

§301.6011-2 Required use of magnetic media.

(a) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) *Magnetic media.* The term "magnetic media" means any magnetic media permitted under applicable regulations, revenue procedures, or, in the case of returns filed with the Social Security Administration, Social Security Administration publications. These generally include magnetic tape, diskette, cassette, and mini-disk, as well as other media specifically permitted under the applicable regulations or procedures. Use of diskette and cassette may be subject to certain limitations or special rules in the case of returns required on Form W-2 or W-2P.

(2) *Machine-readable paper form.* The term "machine-readable paper form" means—

(i) Optical-scan paper form; or

(ii) Any other machine-readable paper form permitted under applicable regulations, revenue procedures, or Social Security Administrtion publications.

(3) *Person.* The term "person" includes any person that is required to

file a return that is described in paragraph (b) of this section. Thus, the term "person" includes the United States, a State, the District of Columbia, a foreign government, a political subdivision of a State or a foreign government, or an internal organization. In addition, in the case of an affiliated group of corporations filing a consolidated return, each member of the affiliated group is a separate person.

(b) *Returns required on magnetic media.* (1) If the use of Form 1042S, 1098, 1099 series, 5498, 6248, 8027, W-2G, or other form treated as a form specified in this paragraph (b)(1) is required by the applicable regulations or revenue procedures for the purpose of making a return, the information required by such form shall, except as otherwise provided in paragraph (c) of this section, be submitted on magnetic media. Returns on magnetic media shall be made in accordance with applicable review procedures. Pursuant to these procedures, the consent of the Commissioner of Internal Revenue (or other authorized officer or employee of the Internal Revenue Service) to a magnetic medium shall be obtained prior to submitted a return on such magnetic medium. An application for such consent shall be in writing and must be filed at least 90 days after the filing of the first return for which consent is requested.

(2) If the use of Form W-2, W-2P, or other form treated as a form specified in this paragraph (b)(2) is required by the regulations or revenue procedures for the purpose of making a return (not including the copy of Form W-2 or W-2P that is required to be attached to an Individual Income Tax Return), the information required by such form shall, except as otherwise provided in paragraph (c) of this section, be submitted on magnetic media. Returns on magnetic media shall be made in accordance with applicable Social Security Administration procedures. Thus, the consent of the Secretary of Health and Human Services (or other authorized officer or employee of the Department of Health and Human Services) to a magnetic medium shall be obtained prior to submitting a return on such magnetic medium. An application for such consent shall be in writing and must be filed—

(i) On or before June 30, 1986, in the case of returns filed in 1987;

(ii) On or before June 30, 1987, in the case of returns filed in 1988; and

(iii) At least 90 days before the filing of the first return for which consent is requested in all other cases.

(3) The Commissioner may prescribe by revenue procedure that additional forms are treated, for purposes of this section, as forms specified in paragraph (b)(1) or (b)(2) of this section.

(c) *Exceptions*—(1) *Low-volume filers*—(i) *In general.* A person required to make returns on a particular type of form specified in paragraph (b) of this section (other than Form 1099-DIV, 1099-PATR, 1099-INT, or 1099-OID) may make such returns on the prescribed paper form for a calendar year or other applicable annual period (whether such returns are filed during the calendar year or annual period or during the subsequent calendar year or annual period) if—

(A) In the case of the calendar year or annual period beginning before January 1, 1987—

(*1*) On the first day of such calendar year or annual period the person reasonably expects to file fewer than 500 returns on such form for the calendar year or annual period; and

(*2*) The person was not required to file 500 or more returns on such form for the preceding calendar year or annual period; or

(B) In the case of a calendar year or annual period beginning on or after January 1, 1987—

(*1*) On the first day of such calendar year or annual period the person reasonably expects to file fewer than 250 returns on such form for the calendar year of annual period; and

(*2*) The person was not required to file 250 or more returns on such form for the preceding calendar year or annual period.

Alternatively, such persons may make returns on magnetic media in accordance with paragraph (b) of this section.

(ii) *Machine-readable forms.* Returns made on a paper form under this paragraph (c)(1) shall be machine-readable if applicable revenue procedures provide for a machine-readable paper form.

(iii) *Form 1099 series.* Each form within the Form 1099 series is considered a separate type of form for purposes of this paragraph (c)(1). Thus, for example, in the case of a calendar year beginning on or after January 1, 1987, if on the first day of such calendar year a person reasonably expects to file 200 returns on Form 1099-A and 150 returns on Form 1099-MISC and for the preceding calendar year the person was required to file 200 returns on form 1099-A and 150 returns on Form 1099-MISC, the person may make such returns on the prescribed paper form for such calendar year.

(2) *Special rule for Form 1099-DIV, 1099-PATR, 1099-INT, 1099-OID*—(i) *50 or fewer returns.* A person required to make returns on Form 1099-DIV, 1099-PATR, 1099-INT, or 1099-OID may make such returns on a machine-readable paper form for a calendar year if—

(A) On the first day of such calendar year the person reasonably expects to file 50 or fewer returns on such forms for the calendar year; and

(B) The person was not required to file more than 50 returns on such forms for the preceding calendar year.

Alternatively, such persons may make returns on magnetic media in accordance with paragraph (b) of this section.

(ii) *Aggregation of returns.* For purposes of determining the number of returns that a person was required to file or reasonably expects to file on Form 1099-IDV, 1099-PATR, 1099-INT, or 1099-OID, all such returns shall be aggregated. Thus, for example, if a person filed 30 returns on Form 1099-INT and 30 returns on Form 1099-DIV for a calendar year, or reasonably expects to do so for the succeeding calendar year, all returns made by such person or Form 1099-DIV, 1099-PATR, 1099-INT and 1099-OID for the succeeding calendar year must be on magnetic media.

(3) *Provided by regulations*—(i) *In general.* This section does not apply to a return if the regulations relating to such return require reporting on magnetic media.

(ii) *Example.* The following example illustrates the application of the rule in paragraph (c)(3)(i) of this section:

Example. Section 1.6045-1(l), relating to returns of information of brokers and barter exchanges, requires the use of magnetic media as a method of reporting. Thus, this section does not apply to returns required to be filed under section 6045.

(4) *Waiver.* (i) The Commissioner may waive the requirements of this sec-

tion if hardship is shown in an application filed in accordance with this paragraph (c)(4)(i). Such waiver shall specify the type of form and period to which it applies and shall be subject to such terms and conditions regarding the method of reporting as may be prescribed by the Commissioner. In determining whether hardship has been shown, the principal factor to be taken into account will be the amount, if any, by which the cost of filing returns in accordance with this section exceeds the cost of filing the returns on other media. A request for waiver shall be in writing and must be filed—

(A) On or before June 30, 1986, in the case of returns on Form W-2 or W-2P filed in 1987;

(B) On or before June 30, 1987, in the case of returns on Form W-2 or W-2P filed in 1988; and

(C) At least 90 days before the filing of the first return for which a waiver is requested in all other cases.

(ii) The Commissioner may by revenue procedure prescribe rules that supplement the provisions of paragraph (c)(4)(i) of this section.

(d) *Paper form returns.* Returns submitted or paper forms (whether or not machine-readable) permitted under paragraph (c) of this section shall be made in accordance with applicable revenue or Social Security Administration procedures.

(e) *Applicability of current procedures.* Until procedures are prescribed which further implement the mandatory filing on magnetic media provided by this section, a return to which this section applies shall be made in the manner and shall be subject to the requirements and conditions (including the requirement of applying for consent to the magnetic medium) prescribed in the regulations, revenue procedures and Social Security Administration publications relating to the filing of such return on magnetic media. In addition, consent to the use of a magnetic medium obtained in accordance with such regulations, revenue procedures and Social Security Administration publications (regardless of when obtained) will be considered consent to the use of such medium for purposes of paragraph (b) of this section.

(f) *Failure to file.* If a person fails to file a return on magnetic media when required to do so by section 6011(e) of this section, such person is deemed to have failed to file the return. See sections 6652 and 6693 for penalties for failure to file certain returns.

(g) *Effective date.* (1) Except as otherwise provided in paragraph (g)(2) of this section, this section applies to returns filed after December 31, 1986.

(2) Returns required on Form 1099-DIV, 1099-PATR, 1099-INT, or 1099-OID for payments made after December 31, 1983, must be filed on magnetic media except as otherwise provided in paragraph (c) of this section.

OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT (26 CFR PART 602)

Par. 3. The authority citation for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Part 4. Section 602.101(c) is amended by inserting in the appropriate place in the table "§301.6011-2 . . . [1545-0387]".

ROSCOE L. EGGER, JR.,
Commissioner of Internal Revenue.

Approved March 5, 1986.

ROGER MENTZ,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on March 20, 1986, 4:25 p.m., and published in the issue of the Federal Register for March 25, 1986, 51 F.R. 10348)

Section 6053.—Reporting of Tips

26 CFR 31.6053-3T: Reporting by certain large food or beverage establishments with respect to tips.

Guidance is provided to both employers and employees of certain large food and beverage establishments who want to petition the district director for a reduction in the tip rate allocation figure from 8 percent of the gross receipts to a figure not below 2 percent. See Rev. Proc. 86-21, page 29.

Section 6111.—Registration of Tax Shelters

26 CFR 301.6111-1T: Questions and answers relating to tax shelter registration (Temporary).

T.D. 8078

TITLE 26—INTERNAL REVENUE.—CHAPTER 1, SUBCHAPTER F, SUBCHAPTER H, PART 301—PROCEDURE AND ADMINISTRATION; PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Tax Shelter Registration

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to tax shelter registration. In addition, the text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced * * * [on page 32, this Bulletin]. Changes to the applicable tax law were made by the Tax Reform Act of 1984 [Pub. L. 98-369, 1984-3 C.B. (Vol. 1) 1]. The regulations affect organizers, sellers, investors and certain other persons associated with investments that are considered tax shelters.

DATES: The regulations apply to tax shelters in which any interest is first sold after August 31, 1984.

FOR FURTHER INFORMATION CONTACT: Paulette Chernyshev of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention CC:LR:T). Telephone 202-566-3288, (not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document amends the temporary Procedure and Administration Regulations (26 CFR Part 301) published in the FEDERAL REGISTER on August 15, 1984 (49 FR 32712) [T.D. 7964, 1984-2 C.B. 263]. The temporary regulations amended by this document relate to tax shelter registration under section 6111 of the Internal Revenue Code of 1954, as added by section 141 of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 678) [1984-3 C.B. (Vol. 1) 1, 190]. This document also amends the Table of OMB Control Numbers (26 CFR Part 602).

The temporary regulations have been drafted in question and answer format. No inference should be shown regarding issues not raised herein or because certain questions and not others are included. The temporary regulations contained in this document will remain in effect until additional temporary or final regulations are published in the Federal Register.

EXPLANATION OF PROVISIONS

Question and answer 45 of the temporary regulations relating to tax shelter registration (§301.6111-1T) provided that a tax shelter organizer is not required to file an amended application for registration if the facts relating to the tax shelter change after the tax shelter has been registered. A number of commentators have requested that tax shelter organizers be allowed to file amended applications for registration. Accordingly, the temporary regulations have been revised to permit, but not require, the filing of amended applications in certain circumstances. However, permission to file an amended application does not alter the requirement to file a complete and accurate initial application by the required date. If the initial application was timely filed and contained complete and accurate information, the filing of an amended application to reflect later developments will not affect the determination as to whether the initial application would be subject to penalty.

Question and answer 52 of the temporary regulations required a person who sells (or otherwise transfers) an interest in a tax shelter to furnish the registration number of the tax shelter to the purchaser (or transferee) at the time of the sale (or transfer) of the interest (or, if later, within 7 days after the seller or transferor receives the registration number). Commentators have requested that sellers be allowed more time to furnish the registration number. Accordingly, the temporary regulations have been amended to provide that the seller (or transferor) must furnish the registration number to the purchaser (or transferee) at the time of sale (or transfer) of the interest (or, if later, within 20 days after the seller or transferor receives the registration number). The regulations continue to provide that a written statement explaining that a registration number has been applied for and providing certain other information must be furnished to the purchaser (or transferee) at the time of the sale if the registration number is not furnished at that time.

EXECUTIVE ORDER 12291, REGULATORY FLEXIBILITY ACT, AND PAPERWORK REDUCTION ACT

The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 Accordingly, a Regulatory Impact Analysis is not required. A general notice of proposed rulemaking is not required for temporary regulations. Accordingly, the temporary regulations are not subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

The collection of information requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under section 3507 of the Paperwork Reduction Act.

DRAFTING INFORMATION

The principal author of these regulations is Paulette Chernyshev of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

Amendments to the reguations.

The amendments to 26 CFR Part 301 and 26 CFR Part 602 are as follows:

PROCEDURE AND ADMINISTRATION

(26 CFR Part 301)

Paragraph 1. The authority for Part 301 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Sectioin 301.6111-1T also issued under 26 U.S.C. 6111.

Par. 2. Section 301.6111-1T is amended by revising answers 45 and 52, adding new question and answer 45A, and revising the table of contents to reflect the additional question and answer. The revised and added provisions read as follows:

§301.6111-1T Questions and answers relating to tax shelter registration (Temporary)

* * * * *

Table of Contents

* * * * *

Information reported on an amended application. . . .45A

* * * * *

Q-45. If the facts relating to a tax shelter change after the tax shelter has been registered, must the tax shelter be registered again or must an amended application for registration be filed by the tax shelter organizer?

A-45. No. The tax shelter organizer, however, is permitted to file an amended application if a material change in facts occurs after the initial registration. A material change in facts is—

(1) A change in the identifying information relating to the tax shelter or tax shelter organizer,

(2) The acquisition or construction of a principal asset not reported on the initial application for registration,

(3) A change in the method of financing a minimum investment unit, or

(4) A change in the principal business activity.

In addition, a change in any tax shelter ratio reported on the initial application for registration that increases or decreases the reciprocal of the tax shelter ratio (*i.e.*, the fraction in which the amount of the applicable investment base is the numerator and the amount of the applicable deductions and credits is the denominator) by 50 percent or more is a material change in facts. For example, if the tax shelter ratio increases from 2 to 1 to 4 to 1, the reciprocal of the tax shelter ratio decreases from 1/2 and 1/4, a 50-percent decrease. Similarly, if the tax shelter ratio decreases from 6 to 1 to 4 to 1, the reciprocal of the tax shelter ratio increases from 1/6 to 1/4, a 50-percent increase. In either case, there is a material change in facts and an amended application could be filed.

Q-45A. What information should be included on an amended application for registration?

A-45A. The tax shelter organizer must include the identifying information requested on Form 8264, Application for registration of a Tax Shelter, and the tax shelter registration number that has been assigned to the tax shelter. In addition, the tax shelter organizer should include any other information requested on Form 8264 (1) that has changed since the tax shelter was registered, or (2) that the tax shelter organizer did not know at the time the tax shelter was registered but has learned of since the registration.

For example, assume that A organizes partnership L, a blind pool that will invest in real estate. Before the real estate is identified or acquired, interests in L will be offered to the public in an offering that must be registered with the Securities and Exchange Commission. Although A does not know what real estate L will acquire and therefore is unable to calculate the tax shelter ratio with certainty, A concludes (based on representations made or to be made) that the tax shelter ratio will exceed 2 to 1 as to some of the investors. Accordingly, A registers L as a tax shelter. A attaches a statement to the application for registration, explaining that L is a blind pool organized to invest in real estate, but that L has not yet acquired any real estate. In addition, A attaches a statement explaining that although the tax shelter ratio is expected to exceed 2 to 1, A cannot compute the tax shelter ratio with certainty because L has not yet acquired any real estate. Several months after L is registered, L acquires a shopping center. A may file an amended application for registration. In addition to reporting the identifying information and the tax shelter registration number on the amended application, A should report the shopping center as the principal asset and the recomputed tax shelter ratio.

As another example, assume that C organizes a limited partnership that is a tax shelter. On the application for registration, C reports that the tax shelter ratio is 2.2 to 1. After the partnership has been registered, C finds that the partnership is unable to attract sufficient investors. To make investing in the partnership more attractive, C decides to offer financing for the purchase of interests in the partnership. As a result of the change in financing, the tax shelter ratio will be 5 to 1. Because there is a change in financing and a change in the tax shelter ratio that decreases the reciprocal of the tax shelter ratio by 50 percent or more, C may file an amended application for registration. In addition to reporting the identifying information and the tax shelter registration number on the amended application, C should report the recomputed tax shelter ratio and information relating to the change in financing.

* * * * *

Q-52. When must the registration number be furnished to purchasers of interests in the tax shelter?

A-52. The person who sells (or otherwise transfers) an interest in a tax shelter must furnish the registration number to the purchaser (or transferee) at the time of sale (or transfer) of the interest (or, if later, within 20 days after the seller or transferor receives the registration number). If the registration number is not furnished at the time of the sale (or other transfer), the seller (or transferor) must furnish the statement described in A-54 to the purchaser (or transferee) at the time of the sale (or other transfer). If interests in a tax shelter were sold before September 1, 1984, all investors who acquired their interests in the tax shelter before September 1, 1984, must be furnished with the registration number of the tax shelter by December 31, 1984. The registration number will be considered furnished to the investor if it is mailed to the investor at the last address of the investor known to the person required to furnish the number.

OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

(26 CFR Part 602)

Par. 3. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Section 602.101(c) is amended by inserting in the appropriate place in the table "§301.6111-1T . . . 1545-0865".

There is need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impractical to issue this Treasury decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States code or subject to the effective date limitation of subsection (d) of that section.

ROSCOE L. EGGER, JR.,
Commissioner of Internal Revenue.

Approved February 11, 1986.

J. ROGER MENTZ,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on March 3, 1986, 8:45 a.m., and published in the issue of the Federal Register for March 4, 1986, 51 F.R. 7439)

Section 6867.—Presumptions Where Owner of Large Amount of Cash is Not Identified

26 CFR 301.6867-1T: Illegal activity cash.

T.D. 8079

TITLE 26—INTERNAL REVENUE.—CHAPTER I, SUBCHAPTER F, PART 301—PROCEDURE AND ADMINISTRATION

Illegal Activity Cash

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to illegal activity cash. Changes to the applicable tax law were made by the Tax Equity and Fiscal Responsibility Act of 1982 [Pub. L. 97-248, 1982-2 C.B. 462]. The regulations affect certain persons subject to jeopardy or termination assessments and provide the guidance necessary for Internal Revenue Service personnel who must administer the Act.

DATE: The regulations are effective March 24, 1986.

FOR FURTHER INFORMATION CONTACT: Ewan D. Purkiss of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3238, not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains temporary regulations under section 6867 of the Internal Revenue Code of 1954, as added by section 330(a) of the Tax Equity and Fiscal Responsibility Act of 1982 [Pub. L. 97-248, 1982-2 C.B. 462, 570]. The temporary regulations contained in this document will remain in effect until additional temporary or final regulations are published in the Federal Register.

Under section 6867, if an individual in physical possession of cash in excess of $10,000 does not claim the cash as the individual's or as that of another person whose identity is readily ascertainable (and who acknowledges ownership of the cash), then for purposes of section 6851 (relating to termination assessments) and section 6861 (relating to jeopardy assessments) it will be presumed that the cash represents gross income of an individual for the taxable year in which the possession occurs, and that the collection of tax will be jeopardized by delay.

Section 6867(d) provides that cash includes cash equivalents. The term "cash equivalents" means foreign currency, any bearer obligation, and any medium of exchange that is of a type frequently used in illegal activities and that is specified in regualtions prescribed by the Commissioner. The temporary regulations specify that coins, precious metals, jewelry, precious stones, and postage stamps are cash equivalents.

EXECUTIVE ORDER 12291; REGULATORY FLEXIBILITY ACT

The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required.

A general notice of proposed rulemaking is not required for temporary regulations. Accordingly, the temporary regulations are not subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

DRAFTING INFORMATION

The principal author of these regulations is Ewan D. Purkiss of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

* * * * *

Amendments to the regulations.

The amendments to 26 CFR Part 301 are as follows:

PROCEDURE AND ADMINISTRATION (26 CFR Part 301)

Paragraph 1. The authority for Part 301 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 301.6867-1T also issued under 26 U.S.C. 6867(d)(2)(C)(ii).

Par. 2. A new §301.6867-1T is added to read as follows:

§301.6867-1T Illegal activity cash.

For purposes of section 6867—

(a) *Cash.* The term "cash" includes any cash equivalents.

(b) *Cash equivalent*—(1) *In general.* The term "cash equivalent" includes foreign currency, any bearer obligation, and any medium of exchange that is of a type that has been frequently used in illegal activities and that is listed in paragraph (b)(2) of this section.

(2) *Specific cash equivalents.* The following are also cash equivalents:

(i) Coins,
(ii) Precious metals,
(iii) Jewelry,
(iv) Precious stones, and
(v) Postage stamps.

(3) *Value of cash equivalents.* Any cash equivalent will be taken into account at its fair market value except in the case of a bearer obligation, which will be taken into account at its face amount.

(c) *Effective date.* The provisions of this section are effective March 24, 1986.

There is need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impractical to issue the Treasury decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of this section.

Acting Assistant Secretary
of the Treasury.

(Filed by the Office of the Federal Register on March 21, 1986, 8:45 a.m., and published in the issue of the Federal Register for March 24, 1986, 51 F.R. 9949)

Section 7701.—Definitions.

26 CFR 301.7701-4: Trusts.

T.D. 8080

TITLE 26—INTERNAL REVENUE.—CHAPTER I, SUBCHAPTER F, PART 301—PROCEDURE AND ADMINISTRATION

Classification of Investment Trusts With Multiple Classes of Ownership

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations on Procedure and Administration relating to the classification for federal tax purposes of investment trusts with multiple classes of ownership. The regulations are designed to clarify the application of the classification rules to an investment trust with multiple classes of ownership interests. These regulations provide guidance to taxpayers and Internal Revenue Service personnel.

DATE: The regulations are effective on April 28, 1984, and with respect to trusts, any interests in which are initially issued on or after April 28, 1984.

FOR FURTHER INFORMATION CONTACT: Stuart G. Wessler of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3297, not a toll-free call).

SUPPLEMENTARY INFORMATION

BACKGROUND

On May 2, 1984, the FEDERAL REGISTER published proposed amendments to the Regulations on Procedure and Administration (26 CFR Part 301) under seciton 7701 of the Internal Revenue Code of 1954 (49 FR 18741) [LR-68-84, 1984-1 C.B. 777]. The proposed amendments related to the definition of the term "trust" for federal tax purposes. A public hearing was held on July 31, 1984. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

EXPLANATION OF PROVISIONS

Section 301.7701-4(c) of the Regulations on Procedure and Administration provides guidance as to the classification for federal tax purposes of certain "investment" trusts. Before its amendment by this Treasury decision, those regulations (the "prior regulations") classified an entity of the type known as a "fixed investment trust" as a trust or as an association (taxable as a corporation), depending upon whether the governing instrument created a power to vary the investment of the certificate holders. The prior regulations did not address whether an investment trust that permitted investors to choose among different classes of ownership interests with varying investment attributes would be classified as a trust for federal tax purposes.

In general, a trust for federal tax purposes is limited to a trust created simply to conserve or protect property for the trust beneficiaries. Ordinarily, the beneficiaries of the trust do no more than accept its benefits and are not its creators or voluntary planners. Certain "investment" trusts, however, are recognized as serving the traditional custodial purposes of an ordinary trust even though interests therein are voluntarily acquired by the beneficiaries. Thus, investment trusts have been treated as trusts for federal tax purposes where employed simply to hold investment assets, albeit for the benefit of voluntary investors. *Commissioner* v. *Chase National Bank*, 122 F.2d 450 (2d Cir. 1941).

Historically, the issue of whether an investment trust serves the mere custodial purpose of holding investment assets has focused on whether the beneficiaries' investment was fixed or could instead be varied under the terms of the trust agreement. The existence of a power to vary the beneficiaries' investment, even though only contingent in form, is sufficient to "turn the venture into a 'business.'" *Commissioner* v. *North American Bond Trust*, 122 F.2d 545, 546 (2d Cir. 1941), *cert. denied*, 314 U.S. 701 (1942). Thus, the prior regulations limited trust classification to "fixed investment trusts" where there was no power under the trust agreement to vary the investment of the certificate holders.

Recently, new forms of investment trusts have been created that involve not only voluntary acquisition of interest by investors but also different classes of beneficial interests with varying investment attributes. These so-called "multiple class trusts" vest no discretionary power in the trustee over investment of the trust assets and thus assertedly satisfy the fixed investment requirement of the prior regulations. At the time the prior regulations were first promulgated, however, the entities commonly known as fixed investment trusts had only one class of investment certificates. The certificates represented undivided interests in the trust property, and were, in form, receipts for the securities held by the trust.[1] Thus, where the trustee had no power to vary investment, a fixed investment trust was little more than a depository arrangement, formed to hold a pool of specific investment assets. Although the trust device permitted individual investors to diversify investment risk, the arrangement in substance provided a form of direct, if common, ownership of the trust assets. This use of a trust to hold investment assets and thereby facilitate direct investment by a pool of investors is consistent with the custodial purposes that have traditionally limited trust classification.

Multiple class trusts depart from the traditional form of fixed investment trust in that the interests of the beneficiaries are not undivided, but diverse. The existence of varied beneficial interests may indicate that the trust is not employed simply to hold investment assets, but serves a significant additional purpose of providing investors with economic and legal interests that could not be acquired through direct investment in the trust assets. Such use of an investment trust introduces the potential for complex allocations of trust income among investors, with correspondingly difficult issues of how such income is to be allocated for tax purposes. These issues are properly foreign to the taxation of trust income, where rules have not developed to accommodate the varied forms of commercial investment, and no comprehensive economic substance requirement governs the allocation of income for tax purposes.

Based on the above considerations, proposed amendments to prior §301.7701-4 would have denied trust classification to investment trusts with multiple classes of ownership. Generally, the final regulations retain this rule. However, in response to public comment, the proposed regulations have been modified to provide that trust classification may be appropriate for a multiple class trust if the trust is formed to serve the traditional custodial purposes of a fixed investment trust and the existence of multiple classes of beneficial interests is incidental to such purposes.

Thus, under the standard contained in the final regulations, the classification of multiple class trusts depends on the purposes for which the trust is formed, and the significance of multiple classes of ownership interests in relation to those purposes. A fixed investment trust with multiple classes of ownership interests, that otherwise possesses the characteristics of a trust, would be classified as a trust if the trust is employed to facilitate direct investment in the assets of the trust, and the existence of multiple classes of ownership interests is incidental to such purpose. Whether the existence of multiple classes of ownership interests is incidental to the use of an investment trust as a vehicle to facilitate direct investment, or instead reflects a purpose to provide investors with diverse interests in the trust assets, generally depends on the extent to which the investment attributes of interests in the trust diverge from direct ownership of the trust assets. The extent of such divergence may, in turn, be reflected by the extent to which the interests of the investors in a multiple class trust could be reproduced without resort to multiple classes of ownership. For example, the creation of a subordinated and preferred class of interests in a trust holding real estate mortgages may be incidental to the purpose of the trust to facilitate direct investment in the mortgages, where the subordinated interest is retained as a security device by the originator of the mortgages, and is in lieu of a direct guarantee to investors. The final regulations provide additional examples of the classification of investment trusts with multiple classes of ownership interests. Further guidance as to the application of the new standard will be provided through the administrative rulings process.

---

[1] "The investor [in a fixed trust] . . . has a beneficial undivided interest in specific deposited securities or property. . . . In the fixed trust . . . only one class of security is issued—the certificate of beneficial interest which is, in form, a receipt issued by the trustee for the deposited property." Investment Trusts and Investment Companies, H. R. Doc. 567, 76th Cong., 3d Sess. 8-9 (1940) (footnote omitted).

The final regulations apply only to investment trusts, and hence have no applicability to trusts that would be classified as "ordinary trusts" under existing §301.7701-4(a) or "business trusts" under existing §301.7701-4(b). Moreover, the final regulations are not intended to affect existing standards for classification of fixed investment trusts with a single class of ownership interests.

On May 17, 1984, the Internal Revenue Service announced that the final regulations would not apply to certain state and local government financing arrangements the substance of which is the issuance of a series of separate debt obligations directly by the governmental unit (Announcement 84-62, 1984-24 I.R.B. 29). The Internal Revenue Service will treat those financing arrangements in accordance with that announcement.

One commentator suggested that the proposed amendments to the regulations constituted legislative regulations for which the Service was required to prepare a Regulatory Flexibility Analysis and a Regulatory Impact Analysis. The Service, however, has concluded that these regulations are interpretative regulations not subject to those requirements.

Finally, certain commentators raised other issues that the Service considers to be beyond the scope of the classification issues that these regulations address.

EXECUTIVE ORDER 12291 AND REGULATORY FLEXIBILITY ACT

The Commissioner of Internal Revenue has determined that this final rule is not subject to Executive Order 12291 and the Treasury-OMB implementation of that Order, dated April 29, 1983, because the final rule is not a major legislative rule. Accordingly, a Regulatory Impact Analysis is not required.

Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

DRAFTING INFORMATION

The principal author of these regulations is Stuart G. Wessler of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in developing the regulations, on matters of both substance and style.

* * * * *

Adoption of amendments to the regulations.

Accordingly, 26 CFR Part 301 is amended as follows:

Paragraph 1. The authority for Part 301 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 2. Section 301.7701-4 is amended by revising paragraph (c) to read as follows:

§301.7701-4 Trusts.

* * * * *

(c) *Certain investment trusts*—(1) An "investment" trust will not be classified as a trust if there is a power under the trust agreement to vary the investment of the certificate holders. *See Commissioner v. North American Bond Trust*, 122 F.2d 545 (2d Cir. 1941), *cert. denied*, 314 U.S. 701 (1942). An investment trust with a single class of ownership interests, representing undivided beneficial interests in the assets of the trust, will be classified as a trust if there is no power under the trust agreement to vary the investment of the certificate holder. An investment trust with multiple classes of ownership interests will ordinarily be classified as an association or a partnership under §301.7701-2; however, an investment trust with multiple classes of ownership interests, in which there is no power under the trust agreement to vary the investment of the certificate holder, will be classified as a trust if the trust is formed to facilitate direct investment in the assets of the trust and the existence of multiple classes of ownership interests is incidental to that purpose.

(2) The provisions of paragraph (c)(1) of this section may be illustrated by the following examples:

Example (1): A corporation purchases a portfolio of residential mortgages and transfers the mortgages to a bank under a trust agreement. At the same time, the bank as trustee delivers to the corporation certificates evidencing rights to payments from the pooled mortgages; the corporation sells the certificates to the public. The trustee holds legal title to the mortgages in the pool for the benefit of the certificate holders but has no power to reinvest proceeds attributable to the mortgages in the pool or to vary investments in the pool in any other manner. There are two classes of certificates. Holders of class A certificates are entitled to all payments of mortgage principal, both scheduled and prepaid, until their certificates are retired; holders of class B certificates receive payments of principal only after all class A certificates have been retired. The different rights of the class A and class B certificates serve to shift to the holders of the class A certificates, in addition to the earlier scheduled payments of principal, the risk that mortgages in the pool will be prepaid so that the holders of the class B certificates will have "call protection" (freedom for premature termination of their interests on account of prepayments). The trust thus serves to create investment interests with respect to the mortgages held by the trust that differ significantly from direct investment in the mortgages. As a consequence, the existence or multiple classes of trust ownership is not incidental to any purpose of the trust to facilitate direct investment, and accordingly, the trust is classified as an association or a partnership under §301.7701-2.

Example (2): Corporation M is the orginator of a portfolio of residential mortgages and transfers the mortgages to a bank under a trust agreement. At the same time, the bank as trustee delivers to M certificates evidencing rights to payments from the pooled mortgages. The trustee holds legal title to the mortgages in the pool for the benefit of the certificate holders, but has no power to reinvest proceeds attributable to the mortgages in the pool or to vary investments in the pool in any other manner. There are two classes of certificates. Holders of class C certificates are entitled to receive 90 percent of the payments of principal and interest on the mortgages; class D certificate holders are entitled to receive the other ten percent. The two classes of certificates are identical except that, in the event of a default on the underlying mortgages, the payment rights of class D certificates holders are subordinated to the rights of class C certificate holders. M sells the class C certificates to investors and retains the class D certificates. The trust has multiple classes of ownership interests, given the greater security provided to holders of class C certificates. The interests of certificate holders, however, are substantially equivalent to undivided interests in the pool of mortgages, coupled with a limited recourse guarantee running from M to the holders of class C certificates. In such circumstances, the existence of multiple classes of ownership interests in incidental to the trust's purpose of facilitating direct investment in the assets of the trust. Accordingly, the trust is classified as a trust.

Example (3): A promoter forms a trust in which shareholders of a publicly traded corporation can deposit their stock. For each share of stock deposited with the trust, the participant receives two certificates that are initially attached, but may be separated and traded independently of each other. One certificate represents the right to dividends and the value of the underlying stock up to a specified amount; the other certificate represents the right to appreciation in the stock's value above the specified amount. The separate certificates represent two different classes of ownership interest in the trust, which effectively separate divided rights on the stock held by the trust from a portion of the right to appreciation in the value of such stock. The multiple classes of ownership interests are designed to permit investors, by transferring one of the certificates and retaining the other, to fulfill their varying investment objectives of seeking primarily either dividend income or capital appreciation from the stock held by the trust. Given that the trust serves to create investment interests with respect to the stock held by the trust that differ significantly from direct investment in such stock, the trust is not formed to facilitate direct investment in the assets of the trust. Accordingly, the trust is classified as an association or a partnership under §301.7701-2.

Example (4): Corporation N purchases a portfolio of bonds and transfers the bonds to a bank under a trust agreement. At the same time, the trustee delivers to N certificates evidencing interests in the bonds. These certificates are sold to public investors. Each certificate represents the right to receive a particular payment with respect to a specific bond. Under section 1286, stripped coupons and stripped bonds are treated as separate bonds for federal income tax purposes. Although the interest of each certificate holder is different from that of each other certificate holder, and the trust thus has multiple classes of ownership, the multiple classes simply provide each certificate holder with a direct interest in what is treated under section 1286 as a separate bond. Given the similarity of the interests acquired by the certificate holders to the interests that could be acquired by direct investment, the multiple classes of trust interests merely facilitate direct investment in the assets held by the trust. Accordingly, the trust is classified as a trust.

ROSCOE L. EGGER, JR.,
Commissioner of
Internal Revenue.

Approved March 3, 1986.

J. ROGER MENTZ,
Acting Assistant Secretary
of the Treasury.

(Filed by the Office of the Federal Register on March 21, 1986, 8:45 a.m., and published in the issue of the Federal Register for March 24, 1986, 51 F.R. 9950)

Part III. Administrative, Procedural, and Miscellaneous

26 CFR 601.401: Employment taxes.
(Also Part I, Section 6053; 31.6053-3.)

Rev. Proc. 86-21

SECTION 1. PURPOSE

This revenue procedure pertains to employers and employees of certain large food or beverage establishments. It provides guidelines for such employers and employees who wish to petition the district director for the district in which the establishment is located regarding the percentage of gross receipts required under section 6053(c)(3)(A) of the Internal Revenue Code to be either reported by employees or allocated as tips. They may petition to reduce that percentage from 8 percent to a lower percentage (not below 2 percent). This revenue procedure amplifies and supersedes Rev. Proc. 85-4, 1985-1 C.B. 493, as modified by Rev. Proc. 85-10, 1985-1 C.B. 499. Those revenue procedures together provided guidance to employers for submitting petitions for a tip rate reduction to the district director and stated that additional guidance for employees would be issued upon publication of regulations.

SEC. 2. BACKGROUND

.01 Section 6053(c)(1) of the Code requires an employer of a large food or beverage establishment to report the following information to the Secretary for each calendar year at the time and manner prescribed by regulations:

(a) The gross receipts of the establishment from the provision of food and beverages (other than nonallocable receipts).

(b) The aggregate amount of charge receipts (other than nonallocable receipts).

(c) The aggregate amount of charged tips shown on the charge receipts.

(d) The sum of:

(1) the aggreagate amount reported by employees to the employer under section 6053(a), plus

(2) the amount the employer is required to report under section 6051 with respect to service charges of less than 10 percent.

(e) The amount allocated to each employee under section 6053(c)(3).

.02 Under section 6053(c)(3)(A) of the Code, as added by section 314(a) of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), 1982-2 C.B. 462, 562, an employer of a large food or beverage establishment, for purposes of that reporting, must allocate as tips among employees who perform services during any payroll period and who customarily receive tip income an amount equal to the excess of:

(1) 8 percent of the gross receipts (other than nonallocable receipts) of the establishment for the payroll period, over

(2) the total amount reported by the employees to the employer for the period.

.03 Under section 6053(c)(3)(B) of the Code, the employer must allocate the above amount according to a good faith agreement by the employer and the employees or, in the absence of such an agreement, in the manner determined by regulations.

.04 As originally enacted by TEFRA, section 6053(c)(3)(C) of the Code permitted the Secretary, upon petition of the employer, to reduce (but not below 5 percent) the percentage of gross receipts required to be allocated when the Secretary deternmined that the percentage of gross receipts constituting tips was less than 8 percent. The Tax Reform Act of 1984, section 1072, 1984-3 (Vol. 1) C.B. 1,560, amended section 6053(c)(3)(C), effective July 18, 1984, to include a majority of emnployees in one petitioning process and to allow reduction in the appropriate percentage as low as 2 percent. As amended, section 6053(c)(3)(C) provides that, upon the petition of either the employer or a majority of employees of such employer, the Secretary may reduce (but not below 2 percent) the percentage of gross receipts required to be allocated when the Secretary determines that the percentage of gross receipts constituting tips is less than 8 percent.

.05 Section 6053(c)(4) of the Code defines the term "large food or beverage establishment" to mean any trade or business (1) which provides food or beverages, (2) for which the tipping of employees serving food or beverages is customary, and (3) which normally employed more than 10 employees on a typical business day during the preceding calendar year.

.06 Under section 31.6053-3T(h)(1) and (2) of the Temporary Employment Tax Regulations, an employer or a majority of employees of an employer may petition the district director for the internal revenue district in which the establishment is located to have the percentage of the gross receipts that is used to determine the amount to be allocated under section 6053(c)(3)(A) of the Code reduced from 8 percent to a percentage that the petitioning employer or employees believe to be the actual percentage of the gross receipts that reflects the amount of tips for the establishment. The district director may thereafter reduce the percentage to the percentage the district director determines to be the proper estimate of the actual percentage of gross receipts constituting tips for the establishment, but not below 2 percent. The petition must be in writing and must include sufficient information to allow the district director to determine with reasonable accuracy the actual tip rate of the establishment.

.07 Under section 31.6053-3T(h)(3) of the temporary regulations, 8 percent of the gross receipts must continue to be used for purposes of complying with section 6053(c) of the Code until the district director notifies the employer in writing both of approval of a reduction of the percentage and of the term for which the reduced percentage is effective.

.08 Under section 31.6053-3T(h)(4) of the temporary regulations, a single petition may be made for 2 or more establishments if they are essentially the same type of business, they are located in the same internal revenue region, and a good faith determination has been made by the petitioner that the tip rates of the various establishments are essentially the same. Single petitions shall include the names and locations of the establishments for which a reduction is requested and the information required by section 3 for a typical establishment. A single petition for multi-establishments located in the same internal revenue region must be filed with the district director for the internal revenue district in which the greatest number of establishments included in the petition are located. If two or more districts have the same number of establishments and no other district has more, the petitioner may choose among those districts.

SEC. 3. PROCEDURES

REQUIREMENTS FOR ALL PETITIONS

.01 Employers and employees submitting a petition must clearly demonstrate that a rate less than 8 percent should apply. The petition must be in writing and contain the information listed below. If this information is not applicable or available, the petition should so state and, if necessary, explain why. The following must be contained in, or attached to, the petition:

(a) The employer's name, address, and employer identification number.

(b) The establishment's name, address, and establishment identification number.

(c) A detailed description of the establishment. This description should include any information the employer (or employees) believe would assist in determining the tip rate, such as:

(1) The type of restaurant, for example, lounge, sandwich shop, coffee shop,

(2) The days and hours of operation,

(3) A general description of the operation of the establishment, including the type of service provided by the staff and the type of self-service, if any,

(4) The person to whom the customer pays the check (waiter or waitress, cashier, etc.) and whether the check is paid before or after the meal,

(5) Whether alcoholic beverages are available,

(6) The past year's:

(A) total gross sales,

(B) total amount of charge sales,

(C) total amount of charge sales with charge tips,

(D) total amount of charge tips,

(E) total reported tips,

(F) total carry-out sales,

(G) percentage of sales representing breakfast, lunch, and dinner business,

(H) average dollar amount of the guest check,

(I) service charge, if any, added to the check, and

(J) percentage of sales with a service charge.

(7) Type of clientele.

(d) A copy of a representative menu for each meal.

.02 If an employer or employee files separate petitions in more than one district in the same region for establishments that are not essentially the same type of business, or do not have the same tip rate, each petition filed must indicate the name of any other district in which a petition has been submitted.

.03 Employers or employees of large establishments that may request rate reductions in 2 or more regions must state in each petition the name of any other Service region and district in which they have also submitted a petition so that consistent treatment may be obtained.

.04 The petition must contain the following statement.

"Under penalties of perjury, I/we declare that I/we have examined this petition, including accompanying documents and to the best of my/our knowledge and belief, the facts presented in support of this petition are true, correct, and complete." In the case of an employer petition, it should be signed by a responsible person who is duly authorized to make and sign a return, statement, or other document. An employee petition must be signed by each employee submitting the petition.

EMPLOYER PETITIONS

.05 In addition to the requirements of section 3.01, there must also be attached to employer petitions copies of any Form 8027, Employer's Annual Return of Tip Income and Allocated Tips, filed for the establishment for the three immediately preceding calendar years.

EMPLOYEE PETITIONS

.06 A majority (more than one-half) of all the directly tipped employees must consent to an employee-originated petition. For multi-establishment employers, the employee majority is more than one-half of the total number of directly tipped employees of all the establishments at the time the petition is filed. *See* section 31.6053-3T(h)(2)(iii) of the temporary regulations.

.07 In addition to the requirements of section 3.01, employee petitions must also state both the total number of directly tipped employees employed by the establishment and the total number of directly tipped employees consenting to the application. The employees must supply all necessary information that is available to them. Employees must promptly notify their employer of the petition. Upon receipt of the notification, the employer must promptly submit to the district director copies of any Form 8027 filed for the 3 immediately preceding calendar years. If the employer possesses relevant information, the employer should provide it to the district director upon either the employees' or the district director's request. Any information supplied by the employer during the petitioning process will not be disclosed by the Internal Revenue Service to any employees of the employer nor to representatives of such employees. Section 31.6053-3T-(h)(2)(iii)(B) of the temporary regulations.

SEC. 4. APPEAL RIGHTS

.01 Employers or employees who disagree with the district director's decision may file an administrative appeal stating the reason(s) for disagreement. The Appeals office will consider the appeal and advise the employer (employee) of its determination.

.02 Neither section 6053 of the Code nor any other section provides for administrative or judicial review of Appeals' determination.

SEC. 5. EFFECTIVE DATE

This revenue procedure is effective on April 28, 1986, the date of its publication.

SEC. 6. EFFECT ON OTHER REVENUE PROCEDURES

Rev. Proc. 85-4, as modified by Rev. Proc. 85-10, is amplified and, as amplified, is superseded.

Merchant Marine Capital Construction Fund—Applicable Rate of Interest on Nonqualified Withdrawals

Notice 86-5

Under the authority in section 607(h)(4)(B) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1177(h)(4)(B)), we hereby determine and announce that the applicable rate of interest on the amount of additional tax attributable to any nonqualified withdrawals from a capital construction fund established under section 607 of the Act shall be 13.32 percent, with respect to nonqualified withdrawals made in the taxable year beginning in 1985.

The determination of the applicable rate of interest with respect to nonqualified withdrawals was computed, according to the joint regulations issued under the Act (46 CFR 391.7(e)(2)(ii)), by multiplying eight percent by the ratio which (a) the average yield on 5-year Treasury securities for the calendar year immediately preceding the beginning of such taxable year bears to (b) the average yield on 5-year Treasury securities for the calendar year 1970. The applicable rate so determined was computed to the nearest one-hundredth of one percent.

So ordered by: *Acting Deputy Administrator Maritime Administration.*

Administrator, National Oceanic and Atmospheric Administration.

Assistant Secretary for Tax Policy, *Department of the Treasury.*

Dated: March 3, 1986.

Richard E. Bowman,
Acting Deputy Maritime Administrator.
Anthony J. Galio,
Administrator, National Oceanic and Atmospheric Administration.

J. Roger Mentz,
Acting Assistant Secretary for Tax Policy.

(Filed by the Office of the Federal Register on March 7, 1986, 8:45 a.m., and published in the issue of the Federal Register for March 10, 1986, 51 F.R. 8270)

Nonconventional Source Fuel Credit Notice 86-6

ACTION: Publication of inflation adjustment factor and reference price for calendar year 1985 as required by section 29(d)(2)(A) of the Internal Revenue Code (26 U.S.C. 29(d)(2)(A) (formerly 44D renumbered by the Tax Reform Act of 1984 [Pub.L. 98–369, 1984-3 C.B. (Vol. 1) 1]).

SUMMARY: The inflation adjustment factor and reference price are used in determining the availability of the tax credited for production of fuel from nonconventional sources under section 29 of the Internal Revenue Code.

DATE: The 1985 inflation adjustment factor and reference price apply to qualified fuels sold during calendar year 1985.

INFLATION FACTOR: The inflation adjustment factor for calendar year 1985 is 1.4211.

PRICE: The reference price for all qualified fuels is $24.08 per equivalent barrel for the 1985 calendar year.

Because the above reference price does not exceed $23.50 multiplied by the inflation adjustment factor, the phaseout of credit provided for in section 29(b)(1) of the Internal Revenue Code does not occur for any qualified fuel based on the above reference price.

NOTE.—After December 31, 1984, gas produced from a tight formation that also falls under any of the categories of gas specified in 18 CFR 272.103(a) (as amended) under the Natural Gas Policy Act of 1978 (NGPA) will no longer be eligible for the credit allowed by section 29 (formerly section 44D) of the Internal Revenue Code.

Part IV. Items of General Interest

Notice of Proposed Rulemaking

Tax Shelter Registration

LR-66-85

SUMMARY: * * * [T]he Internal Revenue Service is issuing temporary regulations relating to tax shelter registration. The text of those temporary regulations also serves as the comment document for this proposed rulemaking.

DATES: Written comments and requests for a public hearing must be delivered by May 5, 1986. The amendments are proposed to be effective generally with respect to tax shelters in which any interest is first sold after August 31, 1984.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-66-85), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Paulette Chernyshev, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T) telephone 202-566-3288 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

The temporary regulations (designated by a "T" following the section citation) * * * [on page 22, this Bulletin] amend Parts 301 and 602 of Title 26 of the Code of Federal Regulations. These amendments change the rules relating to tax shelter registration under section 6111 of the Internal Revenue Code of 1954, as added by section 141 of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 678 [1984-3 C.B. (Vol. 1) 1, 190]. For the text of the temporary regulations, see FR Doc. 86-4683 (T.D. 8078) published * * * [on page 22, this Bulletin]. The preamble to the temporary regulations provides a discussion of the rules. The final regulations, which this document proposes to base on those temporary regulations, would amend Parts 301 and 602 of Title 26 of the Code of Federal Regulations.

EXECUTIVE ORDER 12291; REGULATORY FLEXIBILITY ACT

The Commissioner of Internal Revenue has determined that this proposed rule in not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required.

Although this document is a notice of proposed rulemaking that solicits public comments, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the FEDERAL REGISTER.

The collection of information requirements contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act. Comments on these requirements should be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Internal Revenue Service, New Executive Office Buidling, Washington, D.C. 20503. The Internal Revenue Service requests that persons submitting comments on these requirements to OMB also send copies of those comments to the Service.

DRAFTING INFORMATION

The principal author of these regulations is Paulette Chernyshev of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

ROSCOE L. EGGER, JR.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on March 3, 1986, 8:45 a.m., and published in the issue of the Federal Register for March 4, 1986, 51 F.R. 7454)

Foundations Status of Certain Organizations

Announcement 86-54

The following organizations have failed to establish or have been unable to maintain their status as public charities or as operating foundations. Accordingly, grantors and contributors may not, after this date, rely on previous rulings or designations in the cumulative List of Organizations (Publication 78), or on the presumption arising from the filing of notices under section 508(b) of the Code. This listing does *not* indicate that the organizations have lost their status as organizations described in section 501(c)(3), eligible to receive deductible contributions.

Former Public Charities. The following organizations (which have been treated as organizations that are not private foundations described in section 509(a) of the Code) are now classified as private foundations:

All Housing Inc., Oakland, CA
American Decorative Arts Forum of North Carolina, San Francisco, CA
B.G.S.U. Sig Ep Foundation, Bowling Green, OH
Bashful Unicorn, San Francisco, CA
Bear Valley Springs Pavilion Society, Tehachap, CA
Bible Is Proclaiming, Inc., The, St. Petersburg, FL
Big Brothers/Big Sisters of Fulton County, Inc., Rochester, IN
Books for Special Kids, Inc., San Francisco, CA
Bridge of Life, San Jose, CA
Buhach Pre-School Inc., Merced, CA

C.W. Vanover Evangelistic Association, Waverly, OH
Cadillac Area College Consortium, The, Cadillac, MI
Cal Reentry, Inc., Woodland, CA
Carl Gallion Evangelistic Association, Inc., The, Ashland, KY
Catticus Corporation, Santa Barbara, CA
Central California Association for the Disabled, Bakersfield, CA
Central States Education Fund, Chicago, IL
Chic Street Man's New School for Performance, Santa Barbara, CA
Chicanos in Action, San Jose, CA
Christ Holy Love Mission, Inc., Oakland, CA
Christian Study Center, Youngstown, OH
Cincinnati Gospel Music Workshop, The, Cincinnati, OH
Clearwater High School Marine Corps Junior ROTC Booster Club, Inc., Clearwater, FL
Clive Firefighters Association, Clive, IA
Coal Information Network of Kentucky, Madisonville, KY
Coalition for Handicapped Childrens Education, Inc., Las Vegas, NV
Columbia Band Boosters, Columbia Station, OH
Coming of Age, San Francisco, CA
Commission on Education and Career Development, Oakland, CA
Community Services Agency 202 Program, Inc., Reno, NV
Consensus, Inc., Carson City, NV
Covered Bridge Foundation, Felton, CA
Cristaccia, Inc., Grove City, OH
Cystinosis Foundation of California Inc., Oakland, CA
DPI Education and Research Fund, Inc., Detroit, MI
Donald Allen Danes Family Organization, The, Kuna, ID
Echo-Wood Lake Athletic Booster Club, Inc., Wood Lake, MN
Education and Technology Foundation, Dale City, CA
Eternal Life Evangelistic Association, Canton, OH
Evening Optimist Foundation of Madison, Madison, WI
Faith Community Services, Inc., North Las Vegas, NV
Family and Living Skills Corporation, San Jose, CA
Fellowship Center for Biblical Studies, Bainbridge, PA
Fenix Service Corp., Watsonville, CA
Fisheries Protection Institute, Santa Barbara, CA
Foundation for Independent Living, Berkeley, CA
Foundation for the Educational Development of Monterey Peninsula College, Monterey, CA
Foundation for the Survival of the Handicapped, Columbus, OH
Fountain Gate Christian Home for Children, Inc., Santa Rosa, CA
Friends at the Beloit Library Inc., The, Beloit, WI
Friends of DTA, Las Vegas, NV
Friends of the Freedom Library, Freedom, CA
Friends of the Griffith Quarry, Inc., Penryn, CA
Full Circle Community Center, Inc., Ypsilanti, MI
Gathering Place of Rockford, The, Rockford, IL
Gifted Challenge Institute, Stow, OH
Greenfield, Bainbridge and Waverly Scenic Railroad, Inc., The, Bainbridge, OH
Growth, Achievement, and Progress Corp., Grand Rapids, MI
Handicappers Northwest, Portland, OR
Howard Homes, Inc., Detroit, MI
Hubbard County Food Shelf, Park Rapids, MN
Humane Society of Collinsville Inc., Collinsville, IL
International Medical Institute of San Francisco, San Francisco, CA
Jewish Association of Concerned Citizens, Des Moines, IA
Jewish Council for Retarded Citizens, Inc., The, University Heights, MI
Junior Tennis Council of St. Louis, St. Louis, MO
Just Another Summer Theatre, Newark, OH
Juvenile Diversion Program and Runaway Services of Jackson County, Inc., Jackson, MI
Kings' Kids Club, Inc., The, Legrane, KY
Kiwanis Club of Northville Foundation, Inc., Northville, MI
Knights of Columbus Mental Retardation Foundation of Nebraska, Bellevue, NE
Lincoln Education Action Foundation, Stockton, CA

Universal Christian Fellowship, Southfield, MI
UP-Wingers, Inc., New York, NY
Visionary Performing Artists Inc., Napa, CA
Volunteer Action Center of Dade County, Inc., Miami, FL
Wellspring, Inc., Nashville, TN
West Coast Actors, Theatre, Roseville, CA
Workplace, Inc., The, Mound, MN
Womens Action for Survival Education Fund, Inc., San Francisco, CA
Writers West of Alameda, Alameda, CA
Youth Advocate Program, Eaton Rapids, MI
Youth Orchestra of Monterey County, Seaside, CA
ZebrAwareness, Spokane, WA
Zohar Dance Company, Palo Alto, CA

If an organization listed above submits information that warrants the renewal of its classification as a public charity or as a private operating foundation, the Internal Revenue Service will issue a ruling or determination letter with the revised classification as to foundation status. Grantors and contributors may thereafter rely upon such ruling or determination letter as provided in section 1.509(a)-7 of the Income Tax Regulations. It is not the practice of the Service to announce such revised classification of foundation status in the Internal Revenue Bulletin.

Establishment of the Office of the Associate Chief Counsel (International)

Announcement 86-56

The Service has announced that, effective March 17, 1986, all international functions within the Office of Chief Counsel were consolidated into the Office of Associate Chief Counsel (International). Previously, the National Office international legal and technical support responsibilities were divided among various offices within the Chief Counsel's office.

The Office of the Associate Chief Counsel (International) is responsible for addressing issues raised by taxpayers that concern the U.S. taxation of international transactions and is currently attempting to determine the areas in which guidance is needed in the form of regulations or published rulings. Taxpayers and tax practitioners are encouraged to submit issues for consideration either orally or in writing to Kevin Dolan, Associate Chief Counsel (International), Internal Revenue Service, Washington, D.C. 20224, Attn: CC:INTL, Room 3042, (202) 566-9060 (not a toll-free number).

Limitations on Alternative Benefits—Public Hearing

Announcement 86-57[1]

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to certain restrictions on an employee's right to receive alternative forms of benefit under qualified plans.

DATES: The public hearing will be held on Thursday, May 22, 1986, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Thursday, May 8, 1986.

ADDRESS: The public hearing will be held in the I.R.S. Chief Counsel Conference Room, Fourth Floor, Room 4415, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, ATTN: CC:LR:T (EE-95-84), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Faye Easley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, telephone 202-566-3935 (not a toll-free call).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 401 and 411 of the Internal Revenue Code of 1954. The proposed regulations appeared in the FEDERAL REGISTER for Thursday, January 30, 1986 (51 FR 3798) [EE-95-84, 1986-9 I.R.B. 25].

The rules of §601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Thursday, May 8, 1986, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

---

[1] Filed by the Office of the Federal Register on April 9, 1986, 8:45 a.m., and published in the issue of the Federal Register for April 10, 1986, 51 F.R. 12340.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

Effective Dates for Rev. Rul. 86-7 and Rev. Rul. 86-58

Announcement 86-58

The effective date for Rev. Rul. 86-7, 1986-4 I.R.B. 6, is April 18, 1985, the determination date of that ruling.

The effective date for Rev. Rul. 86-8, 1986-4 I.R.B. 6, is April 1, 1985, the determination date of that ruling.

These effective dates will appear with the rulings in the 1986-1 Cumulative Bulletin.

Announcement of the Disbarment, Suspension, or Consent to Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents and Enrolled Actuaries from Practice Before the Internal Revenue Service

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Revenue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletin for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

The following individuals have been placed under consent suspension from practice before the Internal Revenue Service:

Name	Address	Designation	Term of Suspension
Louis Crown	Bayside, NY	Certified Public Accountant	Indefinite from March 14, 1986
David H. Heilman	Council Grove, KS	Attorney	Indefinite from March 14, 1986
Beryl W. Markwell	Elmhurst, IL	Certified Public Accountant	Twenty-four Months from March 20, 1986
Marc Pozner	Tenafly, NJ	Certified Public Accountant	Indefinite from March 14, 1986
A. Russel Lucid	Norwell, MA	Attorney	Indefinite from March 26, 1986

Under Section 330, Title 31 of the United States Code (1970 ed.), the Secretary of the Treasury, after due notice and opportunity for hearing, is authorized to suspend or disbar from practice before the Internal Revenue Service any attorney, certified public accountant, enrolled agent, or enrolled actuary who has violated the rules and regulations governing such practice.

Attorneys, certified public accountants, enrolled agents and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before their Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify such disbarred or suspended practitioners, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been disbarred or suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date of disbarment or period of suspension. This announcement will continue to appear in the weekly Bulletin for five successive weeks for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended or disbarred and will later be consolidated and published in the Cumulative Bulletin.

After due notice and opportunity for hearing, the following individual has been disbarred from further practice before the Internal Revenue Service:

Name	Address	Designation	Effective Date
Thomas G. Abernethy, Jr.	Jackson, MS	Attorney	March 7, 1986

Announcement Relating to Proposed Regulations Published With Notice of Proposed Rulemaking

Changes in regulations as announced below have been published in the Federal Register in tentative or proposed form to provide interested parties with an opportunity to file their objections or suggestions for consideration prior to final adoption of such regulations. These announcements will appear in the Bulletin during the period which has been prescribed for the submission and consideration of any views, arguments, or suggestions pertaining to the proposed regulations so published. Statement of such views, arguments or suggestions should be submitted in writing, preferably six copies, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

Section affected	Subject	Published in the Bulletin	Expiration date for submission of views
26 CFR 1.72-4, 1.72-5, 1.72-6, 1.72-7, 1.72-9, 1.72-11, 1.403(b)-1(d)(4), 1.403(b)-1(d)(4)(ii), amended; 1.403(b)-1(d)(4)(iv), 1.401(a)-18, 1.401(j)-1 through 1.401(j)-6, removed; 1.403(b)-1(d)(4)(iv), added.	Unisex annuity tables	1986-16 I.R.B. 9	May 8, 1986

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as "rulings") that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with *modified, below*).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with *amplified* and *clarified*, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in law or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in the new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1954 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, *modified and superseded* describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.

Abbreviations

The following abbreviations in current use and formerly used will appear in material published in the Bulletin.

A—Individual.
Acq.—Acquiescence.
B—Individual.
BE—Beneficiary.
BK—Bank.
B.T.A.—Board of Tax Appeals.

INTERNAL REVENUE BULLETIN

The Introduction on page 3 describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of the weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and *are not* included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

BULLETIN INDEX-DIGEST SYSTEM

The Bulletin Index-Digest System provides a fast and easy way to research Revenue Rulings, Revenue Procedures, Public Laws, Treasury Decisions, and other matters of a permanent nature published in the weekly Internal Revenue Bulletin, or Cumulative Bulletin from 1953 on. It is a comprehensive and up-to-date research tool that requires no filing or other clerical maintenance. The current revision consists of four Services, available on a subscription basis, each including a basic volume that covers the period 1953-1983/1984 and a cumulative supplement covering material published in subsequent Bulletins for the following two-year period. Cumulative supplements are issued quarterly for the Income Tax Service and semiannually for the Estate and Gift, Employment, and Excise Tax Service.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Please allow two to six weeks, plus mailing time, for delivery.

INTERNAL REVENUE BULLETIN

The Introduction on page 3 describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of the weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and *are not* included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

BULLETIN INDEX-DIGEST SYSTEM

The Bulletin Index-Digest System provides a fast and easy way to research Revenue Rulings, Revenue Procedures, Public Laws, Treasury Decisions, and other matters of a permanent nature published in the weekly Internal Revenue Bulletin, or Cumulative Bulletin from 1953 on. It is a comprehensive and up-to-date research tool that requires no filing or other clerical maintenance. The current revision consists of four Services, available on a subscription basis, each including a basic volume that covers the period 1953-1983/1984 and a cumulative supplement covering material published in subsequent Bulletins for the following two-year period. Cumulative supplements are issued quarterly for the Income Tax Service and semiannually for the Estate and Gift, Employment, and Excise Tax Service.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Please allow two to six weeks, plus mailing time, for delivery.

INCOME TAX

LR-189-84, page 4.

Proposed amendments to the regulations relate to debt instruments with original issue discount, to imputed interest or deferred payment sales or exchanges of property, and to safe haven interest rates for commonly controlled taxpayers.

Finding Lists begin on page 85.
Announcement of Disbarments and Suspensions begin on page 81.
Announcement of Notice of Proposed Rulemaking on page 83.
Monthly Index for April begins on page 88.

Department of the Treasury
Internal Revenue Service

T 22.23:

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenues at the least cost to the public, and in a manner that warrants the highest degree of public confidence in our integrity, efficiency and fairness. To achieve that purpose, we will:

—Encourage and achieve the highest possible degree of voluntary compliance in accordance with the tax law and regulations;

—Advise the public of their rights and responsibilities;

—Determine the extent of compliance and the causes of noncompliance;

—Do all things needed for the proper administration and enforcement of the tax laws;

—Continually search for and implement new, more efficient and effective ways of accomplishing our Mission.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents of a permanent nature are consolidated semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

Part I.—1954 Code.

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1954.

Part II.—Treaties and Tax Legislation.

This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.

To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts.

Part IV.—Items of General Interest.

With the exception of the disbarment and suspension list included in this part, none of these announcements is consolidated in the Cumulative Bulletins.

The first Bulletin for each month includes an index for the matters published during the preceding month. These monthly indexes are cumulated on a quarterly and semiannual basis, and are published in the first Bulletin of the succeeding quarterly and semi-annual period, respectively.

The Bulletin Index-Digest System, a research and reference service supplementing the Bulletin, may be obtained from the Superintendent of Documents on a subscription basis. It consists of four Services: Service No. 1, Income Tax; Service No. 2, Estate and Gift Taxes; Service No. 3, Employment Taxes; Service No. 4, Excise Taxes. Each Service consists of a basic volume and a cumulative supplement that provide (1) finding lists of items published in the Bulletin, (2) digests of revenue rulings, revenue procedures, and other published items, and (3) indexes of Public Laws, Treasury Decisions, and Tax Conventions.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Prices: Domestic—$1.75 a single copy, $82.00 a year subscription. Foreign—$2.19 a single copy, $102.50 a year for subscription.

Part IV. Items of General Interest

Notice of Proposed Rulemaking

Debt Instruments With Original Issue Discount; Imputed Interest on Deferred Payment Sales or Exchanges of Property; and Safe Haven Interest Rates for Commonly Controlled Taxpayers

LR-189-84

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to: (1) The tax treatment of debt instruments issued after July 1, 1982, that contain original issue discount, (2) the imputation of and the accounting for interest with respect to sales and exchanges of property occurring after December 31, 1984, and (3) safe haven interest rates for loans or advances between commonly controlled taxpayers and safe haven leases between such taxpayers. Changes to the applicable law were made by the Tax Equity and Fiscal Responsibility Act of 1982 as amended by the Technical Corrections Act of 1982, and the Tax Reform Act of 1984 as amended by Pub. L. 98-612 and Pub. L. 99-121. The regulations would provide needed guidance to taxpayers who must comply with these provisions of the law.

DATES:

Proposed Effective Date: Generally, the regulations contained in this document are proposed to be effective as follows:

§ 1.163-7, §§ 1.1271-1 to 1.1273-2, §§ 1.1275-1 to 1.1275-5—Debt instruments issued after July 1, 1982
§§ 1.483-1 to 1.483-5, §§ 1.1274-1 to 1.1274-7—Sales or exchanges of property occurring after December 31, 1984
§ 1.1274A-1—Certain sales or exchanges of property occurring after June 30, 1985
§ 1.446-2—Lending transactions occurring after May 8, 1986 certain sales or exchanges of property occurring after December 31, 1984
§ 1.482-2—Term loans and advances entered into after and demand loans and advances after such date

Dates for Comments and Request for a Public Hearing: Written comments and request for a public hearing must be delivered or mailed by June 9, 1986.

ADDRESS: Send comments (preferably eight copies) and request for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T, (LR-189-84), 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Theresa E. Bearman (sections 163, 1271, 1272, 1273, 1275 and related matters), Ewan D. Purkiss (sections 446, 483, 1274 and related matters), Susan T. Baker (all matters other than those relating to sections 446, 482 and 483), or Joseph M. Rosenthal (section 482 and related matters) of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:LR:T LR-189-84). Telephone 202-566-3829 (Bearman), 202-566-3238 (Purkiss), 202-566-3294 (Baker), 202-566-3289 (Rosenthal) not a toll-free call).

SUPPLEMENTARY INFORMATION:

I. Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part I) under sections 163(e), 446, 482, 483 and 1271 through 1275 of the Internal Revenue Code of 1954. With the exception of the amendments to the regulations under section 446, these amendments are proposed to conform the regulations to section 231 of the Tax Equity and Fiscal Responsibility Act of 1982 (96 Stat. 324, 496), as amended by section 306 of the Technical Corrections Act of 1982 (97 Stat. 448), and sections 41, 42 and 44 of the Tax Reform Act of 1984 (98 Stat. 494, 531) as amended by Pub. L. 98-612 (98 Stat. 3180) and Pub. L. 99-121 (99 Stat. 505). The amendments to the regulations under section 446 are proposed to provide rules to account for interest in transactions outside the scope of the original issue discount rules.

II. Introduction

The regulations under sections 163(e), 483, and 1271 through 1275 provide two principal sets of rules: The imputed interest rules and the original issue discount rules. The imputed interest rules are prescribed by sections 1274 and 483, and the original issue discount rules by sections 163(e), 1271, 1272, 1273 and 1275.

The imputed interest rules of sections 1274 and 483 relate to the measurement of interest and principal for tax purposes in a sale or exchange of property (other than publicly traded property) involving deferred payments. For transactions subject to the imputed interest rules, interest will be imputed to the transaction if a minimum amount of interest is not stated. If a transaction states at least the minimum amount of interest, it is said to provide for adequate stated interest. When interest is imputed to a transaction, a portion of the stated principal amount of the debt instrument is recharacterized as interest for tax purposes. The imputed interest rules do not require an increase in the total amount of payments agreed to by the parties to a transaction. These rules merely recharacterize as interest for Federal tax purposes a portion of the payments denominated as principal by the parties. In the case of transactions to which section 1274 applies, imputed interest is treated as original issue discount and is accounted for under those rules. In the case of transactions subject to section 483, imputed interest (and any stated interest) is subject to a new set of rules provided under section 446 and is accounted for under those rules.

In general, under the original issue discount rules, a portion of the original issue discount on a debt instrument is required to be included in income by the holder and deducted from income by the issuer annually without regard to their regular accounting methods. The total amount of original issue discount is defined as the difference between the debt instrument's stated redemption price at maturity and its issue price and arises in one of three ways. First, in the case of a debt instrument subject to section 1274 that does not provide for adequate stated interest, interest is imputed and is treated as original issue discount. Second, in the case of a debt instrument issued for cash or publicly traded property, original issue discount arises if the debt instrument is issued for less than its face amount. Third, in the case of all debt instruments, original issue discount arises if the debt instrument does not call for interest that is payable currently at a single constant rate over its entire term.

III. The Imputed Interest Rules

A. Applicability

1. Section 1274

Section 1274 applies to any debt instrument issued in exchange for property if neither the debt instrument nor the property is publicly traded and if one or more of the payments under the debt instrument are due more than 6 months after the date of the sale or exchange. Section 1274, however, does not apply to the following:

(a) Certain sales or exchanges by an individual, estate, testamentary trust, or small corporation or partnership of a farm if the sales price of the farm does not exceed $1,000,000;

(b) Any sale or exchange by an individual of the individual's principal residence, regardless of the amount of the sales price;

(c) Any sale or exchange of property if the sum of all the payments (including principal and interest) under any debt instrument and the value of any other consideration does not exceed $250,000;

(d) Any debt instrument issued in a qualified sale within the meaning of section 483(e) if the stated principal amount of the debt instrument does not exceed $500,000; and

(e) Any cash method debt instrument within the meaning of section 1274A(c).

2. Section 483

Section 483 applies to sales or exchanges of non-publicly traded property excepted from the provisions of section 1274. Thus, section 483 applies to: the sale or exchange of a farm if the sales price does not exceed $1,000,000, sales involving total payments of $250,000 or less, sales of principal residences, qualified sales of land, and cash method debt instruments. Unlike section 1274, however, section 483 applies only if the contract for the sale or exchange calls for payments due more than one year from the date of the sale or exchange. Section 483 does not apply to the following:

(a) Any sale or exchange of property if the sales price does not exceed $3,000; and

(b) In the case of a purchaser, any amount that is treated as containing interest under section 163(b).

3. Exceptions From Both Sections 1274 and 483

The imputed interest rules of sections 1274 and 483 do not apply to the following:

(a) Any transaction to the extent any amount is contingent upon the productivity, use, or disposition of property and entitled to capital gain treatment under section 1235, relating to sales or exchanges of patents.

(b) Any annuity under section 72 that is not a debt instrument within the meaning of section 1275(a).

(c) Any issuer (obligor) of a debt instrument issued for property that is personal use property in the hands of the issuer. The imputed interest rules, however, apply to any holder (obligee) of the debt instrument unless the loan incurred in the transaction is a below-market loan of the type described in section 7872(c)(1)(A)–(C). The treatment of the latter class of debt instruments is governed by the provisions of section 7872.

(d) Any debt instrument that evidences demand loan (within the meaning of section 7872(f)(5)) and is a below-market loan of the type described in section 7872(c)(1)(A)–(C). The treatment of these debt instruments is governed by the provisions of section 7872.

B. Stating Adequate Interest To Avoid the Imputation of Interest

1. In General

To prevent the imputation of interest, a debt instrument must provide for adequate stated interest. For this purpose, a debt instrument generally provides for adequate stated interest if it calls for interest over its entire term at a rate no lower than the test rate of interest applicable to the debt instrument. If a debt instrument does not provide for a fixed rate of interest at least equal to the test rate of interest, the adequacy of interest is determined by comparing the stated principal amount involved in the transaction with the sum of present values of all payments due under the debt instrument, determined by discounting the payments at a rate equal to the test rate of interest. A debt instrument generally has adequate stated interest if the stated principal amount of debt instrument is less than or equal to the sum of these present values. However, in the case of a potentially abusive situation as discussed below, the debt instrument does not have adequate stated interest unless the stated principal amount is less than or equal to the fair market value of the property sold or exchanged.

The test rate of interest applicable to a debt instrument generally depends on the amount of seller financing (based on stated principal) involved in the transaction. For sales or exchanges of property (other than new section 38 property) involving seller financing of $2,800,000 or less, the test rate of interest is the lower of the applicable Federal rate or 9 percent, compounded semiannually (or an equivalent rate based on an appropriate compounding period). If the sales price is contingent, the 9 percent rate is not available unless the sales price cannot exceed $2,800,000. For sales or exchanges of property with seller financing in excess of $2,800,000, and all sales or exchanges of new section 38 property, the test rate of interest is 100 percent of the applicable Federal rate. For sales or exchanges of property involved in sale-leaseback transactions, the test rate of interest is 110 percent of the applicable Federal rate. These rules also apply to transactions subject to section 483. Sales or exchanges that are qualified sales, however, are subject to a special lower test rate of interest as discussed below. For sales or exchanges occurring before July 1, 1985, special test rates of interest apply.

The applicable Federal rate is either the Federal short-term rate (for debt instruments with terms not over 3 years), the Federal mid-term rate (for debt instruments, with terms over 3 years but not over 9 years), or the Federal long-term rate (for debt instruments with terms over 9 years). The Federal rates are annual stated rates of interest based on semiannual compounding. The Federal rates are published monthly by the Commissioner in Revenue Rulings along with equivalent annual, quarterly and monthly rates. In general, the appropriate compounding period depends on the intervals between payments. In general, the applicable Federal rate is the lowest of the rates in effect for the first month in which there is a binding written contract or the two preceding two months.

The applicable Federal rates are determined monthly. The Federal rates are based on the yields to maturity of outstanding marketable obligations of the United States of similar maturities (for example, maturities up to 3 years for the Federal short-term rate) for the one-month period ending on the 14th day of the month preceding the month for which the rates are applicable. In certain cases, the applicable Federal rate may be a lower rate based on certain allowable Treasury index rates.

2. Special Rules

a. *Test Rate for Installment Obligations.* The proposed regulations provide special rules for determining whether an installment obligation provides for adequate stated interest. For self-amortizing installment and level-principal obligations, tables are provided under which the test rate of interest may be computed as a blended rate equal to a weighted average of the Federal rates. In general, the rules are designed to allow taxpayers to receive the benefit of the short-term and mid-term rates (which are generally lower than the long-term rate) without having to provide three separate debt instruments.

b. *Contingent Payments.* In general, contingent interest payments are not taken into account in applying the imputed interest rules. Thus, whether a debt instrument states adequate interest will be determined by ignoring any contingent interest payments.

Under a special rule proposed by the regulations, however, the stated principal amount of a debt instrument calling for contingent payments of interest will be respected in certain cases. To qualify for the special rule, the contingent payments of interest must be conditioned on a return from the use of the property. In addition, the debt instrument must call for fixed payments of interest equal to at least 80 percent of the test rate of interest applicable to the debt instrument, and it must be reasonable to expect that the payments of contingent interest will raise the yield on the debt instrument to at least the test rate of interest. If the property acquired for the debt instrument is depreciable or inventoriable property, then, in addition to the requirements noted above, the term of the debt instrument cannot exceed 4 years in the case of 3-year or 5-year property or inventoriable property, or 12 years in the case of any other depreciable property that is not inventoriable property.

The contingent payment rules do not affect whether rights to receive contingent payments constitute debt or equity for Federal tax purposes or whether an instrument evidences a valid indebtedness.

c. *Variable Rate Debt Instruments.* For purposes of determining whether a debt instrument calling for variable interest based on current values of an objective interest index provides for adequate stated interest, the proposed regulations generally treat the debt instrument as if it called for interest at a fixed rate equal to the rate established by the index on the date the test rate of interest is determined. Examples of objective indices include the prime rate, the applicable Federal rate, the average yield on Treasury securities, the LIBOR (London Interbank Offered Rate). If the rate of interest determined by the index is no lower than the test rate of interest, the debt instrument has adequate stated interest. Interest payments based on an index other than an objective interest index are generally treated as contingent payments.

Under the proposed regulations, the applicable Federal rate for a variable rate debt instrument that calls for variable interest payments based on current values of an objective interest index is the Federal rate corresponding to the adjustment interval of the debt instrument. Thus, for example, if the interest rate on a debt instrument is tied to a bank's prime rate and adjusted annually, the adequacy of interest is determined by testing the rate of interest as determined by the index against the Federal short-term rate.

d. *Qualified Sales of Land.* In the case of a debt instrument issued in a qualified sale of land and subject to the rules of section 483(e), the test rate of interest is 6 percent, compounded semiannually. A qualified sale is a sale or exchange of land by an individual to a member of the individual's family. A debt instrument issued in a qualified sale is subject to the rules of section 483(e) if the face amount (stated principal amount) of the debt instrument issued for the land does not exceed $500,000, regardless of the amount of the sales price, and if certain other conditions are satisfied. Thus, the parties are free to structure a sale with two debt instruments, the first having a face amount of $500,000 and a 6 percent interest rate, and the second subject to the rules of section 1274 or section 483, whichever is applicable. If, however, a single debt instrument is issued with a face amount in excess of $500,000, the 6 percent test rate does not apply.

The proposed regulations contain this rule because the Service is concerned with the complexity of rules that would be necessary to apply two different accounting rules to a single debt instrument. The Service invites comments on this proposed rule.

3. Potentially Abusive Transactions

Regardless of the amount of interest stated in a sale or exchange, if the transaction is a potentially abusive transaction, the adequacy of interest is determined by comparing the stated principal amount of the debt instrument with the fair market value of the property sold or exchanged as discussed above. A potentially abusive situation includes any transaction that is a tax shelter (within the meaning of section 6661(b)(2)(C)(ii)), and any situation involving recent sales transactions, nonrecourse financing, and financing with a term in excess of the economic life of the property. In addition, under regulatory authority, the proposed regulations categorize as potentially abusive situations transactions involving foreign currency. The potentially abusive situation rules also may apply to cash method debt instruments (which are described in greater detail below) subject to section 483.

4. Assumptions and Modifications

Sections 1274 and 483 do not apply to a debt instrument assumed or taken subject to in a sale or exchange occurring after June 30, 1985, or a debt instrument issued before October 16, 1985, assumed or taken subject to in a sale or exchange involving a sales price of $100,000,000 or less occurring after December 31, 1984, and before July 1, 1985, unless the debt instrument is modified. The proposed regulations provide special rules for a debt instrument issued after October 15, 1984, or any debt instrument involved in a transaction with a sales price in excess of $100,000,000 that is assumed or taken subject to in a sale or exchange occurring after December 31, 1984, and before July 1, 1985, and that is not modified as part of the sale or exchange.

If a debt instrument assumed or taken subject to is modified, the modification is treated as a separate transaction. In general, a modified debt instrument is treated as a new debt instrument given in exchange for the old debt instrument in a transaction to which section 1274 applies. If a modification is attributable to the seller the modification is treated as occurring immediately before the sale or exchange, and the buyer is treated as assuming the modified debt instrument. Modifications are attributable to the seller unless the seller neither consents to nor participates in the modification. If a modification is attributable to the buyer, the modification is treated as occurring immediately after the sale or exchange.

With certain exceptions, sections 1274 and 483 apply to a debt instrument issued after October 15, 1984, or a debt instrument involved in a transaction with a sales price in excess of $100,000,000 that is assumed or taken subject to and that is not modified as part of a sale or exchange occurring after December 31, 1984, and before July 1, 1985. In these cases, sections 1274 and 483 apply only for purposes of determining the tax consequences of the sale or exchange to the buyer.

C. Imputation of Interest

Under section 1274, if a debt instrument does not provide for adequate stated interest, the issue price of the debt instrument is its imputed principal amount. Except in the case of potentially abusive situations, the imputed principal amount of a debt instrument is the sum of the present values of all the payments due under the instrument determined by discounting the payments at the imputed rate of interest. Generally, for purposes of imputing interest, the imputed rate of interest is the same as the test rate of interest. For sales or exchanges occurring before July 1, 1985, special imputed rates of interest apply.

When interest is imputed, the imputed principal amount becomes the issue price. This issue price is lower than the stated principal amount of the debt instrument, since it reflects the fact that a portion of the stated principal is recharacterized as interest. Thus, the imputed interest is treated as original issue discount. In potentially abusive situations, the imputed principal amount of the debt instrument is the fair market value of the property sold or exchanged.

Under section 483, imputed interest is referred to as unstated interest. Unstated interest is defined as the excess of the deferred payments (all payments of the sales price due more than 6 months after the date of the sale or exchange) over the sum of the present values of the deferred payments and any stated interest. For this purpose, the present values are determined by discounting the payments at the imputed rate of interest. In the case of cash method debt instruments to which the potentially abusive rules apply, the fair market value of the property sold or exchanged is used in place of the present value of the deferred payments and any stated interest.

IV. Accounting for Original Issue Discount

A. In General

Original issue discount is defined as the excess of a debt instrument's stated redemption price at maturity over its issue price. A portion of the original issue discount on a debt instrument is accounted for on a current basis by both the issuer and the holder. The amount of original issue discount that is accounted for on a current basis is the amoaunt that accrues on a constant interest or economic accrual basis, regardless of whether the issuer or holder is an accrual basis taxpayer.

For purposes of determining the accrual of original issue discount, the term of a debt instrument generally is divided into accrual periods of equal length as discussed in greater detail below. Original issue discount is allocated to each accrual period according to a formula based upon the adjusted issue price of the debt instrument at the beginning of the accrual period, the yield of the debt instrument, and the actual interest payments (if any) for that period. To determine the holder's annual inclusion under section 1272, the original issue discount allocated to each accrual period is then apportioned ratably among the days within the accrual period to produce the daily portion of original issue discount for each day during that accrual period. The total amount of original issue discount includible for any taxable year is the sum of the daily portions of original issue discount for each day during the taxable year that the taxpayer held the debt instrument.

Debt instruments excepted from the current inclusion rule are debt instruments with a term of one year or less, tax-exempt obligations, debt instruments issued by a natural person before March 2, 1984, debt instruments purchased at a premium, U.S. savings bonds, certain loans made between natural persons, and debt instruments issued before January 1, 1985, which are not capital assets in the hands of the holder.

In general, the amount of original issue discount deductible by an issuer under section 163(e) is determined in the same manner as the amount includible by the holder under section 1272. The regulations contain several exceptions to this general rule.

B. Paying Interest Currently at Constant Rate To Avoid the Original Issue Discount Rules

In the case of any debt instrument subject to section 1274 that provides for adequate stated interest, or in the case of any debt instrument issued at par for cash or publicly traded property, the original issue discount rules do not apply if all interest is payable currently at a constant rate over the entire term of the debt instrument. For this purpose, interest is considered payable currently if the interest is payable unconditionally and at regular intervals of one year or less. Interest is not considered payable at a constant rate if the debt instrument involves deferred interest (if the debt instrument has a lower initial rate of interest or an interest holiday for an initial period) or prepaid interest (if it has a higher initial rate of interest).

C. Determining the Total Amount of Original Issue Discount

1. Stated Redemption Price at Maturity

Except in the case of installment obligations, the stated redemption price at maturity of a debt instrument is defined as the amount fixed by the last modification of the purchase agreement including interest and other amounts payable at that time. The stated redemption price at maturity does not include any interest based on a fixed or variable rate that is actually and unconditionally payable at intervals of one year or less over the entire term of the debt instrument. These amounts are referred to as qualified periodic interest payments. In the case of an installment obligation, the stated redemption price at maturity equals the sum of all payments under the debt instrument less any qualified periodic interest payments.

2. Determination of Issue Price

If a debt instrument subject to section 1274 states adequate interest, the issue price is the stated principal amount of the debt instrument. If the debt instrument does not state adequate interest as discussed above, the issue price is the imputed principal amount determined according to the provisions of section 1274.

The issue price of a debt instrument not subject to section 1274 is determined as follows:

(a) A debt instrument that is part of an issue of debt instruments publicly offered and issued for cash—the initial price at which a substantial portion of the issue is sold to the public;

(b) A debt instrument that is part of an issue of debt instruments not publicly offered and issued for cash—the price paid by the first buyer;

(c) A debt instrument that is issued for property and is part of an issue of debt instruments a portion of which is traded on an established securities market—the fair market value of that debt instrument determined as of the first trading date after the date of issue of the debt instrument;

(d) A nonpublicly traded debt instrument issued in exchange for publicly traded property—the fair market value of the property; and

(e) A debt instrument that does not fall within the first four categories set forth above and that is not governed by section 1274—its stated redemption price at maturity.

3. De Minimis Rules

In the case of the holder, a debt instrument having a *de minimis* amount of original issue discount is treated as if the original issue discount were zero. Except in the case of an installment obligation, discount is considered *de minimis* if it is less than one-quarter of one percent of the stated redemption price at maturity multiplied by the number of complete years to maturity.

Special rules are provided for installment obligations. To compute the *de minimis* amount of original issue discount allowable on installment obligations generally, taxpayers must utilize a weighted average maturity in lieu of the number of full years from the issue date to final maturity. For debt instruments which are self-amortizing obligations, the proposed regulations provide a safe harbor which allows taxpayers to treat one-sixth of one percent of the stated redemption price at maturity multiplied by the number of complete years to final maturity as *de minimis* original issue discount.

D. Allocation of Original Issue Discount to an Accrual Period

1. In General

The amount of original issue discount allocable to an accrual period generally is equal to the product of the adjusted issue price at the beginning of the accrual period and the yield of the debt instrument, less amounts of stated interest payable during the accrual period. Each of the terms used in this calculation is defined under section 1272 and the proposed regulations as described in the succeeding discussion.

2. Accrual Period

Generally, for debt instruments issued after December 31, 1984, the accrual period is the interval between payment or compounding dates provided by the debt instrument (but in no event longer than one year), with the final accrual period ending on the maturity date of the debt instrument. Rules are provided for debt instruments with irregular payment or compounding intervals. For debt instruments that provide for a single payment at maturity and that have no other payment or compounding dates, the accrual period is the six-month period ending on the date in each calendar year that corresponds to the maturity date of the debt instrument or the date that is six months prior to that date. For debt instruments issued after July 12, 1982, and before January 1, 1985, the accrual period is the one-year period beginning on the issue date and on the corresponding day in each calendar year throughout the term of the debt instrument.

3. Adjusted Issue Price

The adjusted issue price at the beginning of the first accrual period is the issue price. The adjusted issue price at the beginning of each succeeding accrual period is equal to the adjusted issue price at the beginning of the immediately preceding accrual period increased by the amount of original issue discount accrued during that period. In the case of an installment obligation, the adjusted issue price at the beginning of an accrual period is reduced by any payments of principal or interest that are included in the stated redemption price at maturity and that are made during the immediately preceding accrual period.

4. Yield

The yield of a debt instrument is that rate of interest that, when used to determine the present value of all payments of principal and interest to be made under the debt instrument, provides an amount equal to the issue price of the debt instrument. Yield is expressed as an annual interest rate and is determined by compounding at the end of the accrual period. Special rules are provided for certain debt instruments that provide a variable rate of interest with a resulting variable yield as discussed in greater detail below.

5. Acquisition Premium

In determining the amount a holder must include in income, the daily portion of original issue discount is reduced by an appropriate share of any acquisition premium paid by that holder. Acquisition premium arises when a person purchases a debt instrument at a price which is in excess of the revised issue price on the date of purchase, but which is less than the stated redemption price at maturity. For debt instruments issued after July 1, 1982, and purchased before July 19, 1984, the daily portion is reduced ratably by an amount equal to the total acquisition premium divided by the number of days from the date of purchase up to (but not including) the stated maturity date. For debt instruments issued after July 1, 1982, and purchased after July 18, 1984, the daily portion is reduced by a constant fraction equal to the total acquisition premium divided by the total unaccrued original issue discount on the date of purchase.

E. Special Rules

1. Serial Maturity and Installment Obligations

Under regulations published under section 1232 of prior law, single obligations that provided for payments prior to maturity (other than payments of interest at fixed, periodic intervals of one year or less over the entire term of the obligation) were treated as a serial issue with each installment payment representing a separate obligation with its own issue price and stated redemption price at maturity. Original issue discount with respect to a serial issue, where independent issue prices could not be established for each individual series, was apportioned among the series based upon a linear ("bond-years") formula.

Because the OID rules now apply to a much broader class of obligations, including mortgages involving as many as 360 separate payments of principal, the proposed regulations eliminate the prior law treatment of each payment of principal under an installment obligation as a separate debt instrument. Instead, the regulations treat all installment obligations and certain serial maturity obligations as a single installment obligation for all purposes under sections 1271 through 1275. For this purpose, an installment obligation is defined as a debt instrument that provides for payments prior to maturity other than qualified periodic interest payments. Stated redemption price at maturity of an installment obligation is defined as the sum of all payments to be made under the obligation other than qualified periodic interest payments. This rule is effective for installment obligations issued after December 31, 1984 and for debt instruments maturing serially issued after May 8, 1986; the issuer and holder may, however, elect jointly to change this treatment.

2. Variable Rate Debt Instruments

The proposed regulations provide rules for the determination of the amount of original issue discount on debt instruments that provide for a variable rate of interest based on current values of an objective interest rate index. Generally, original issue discount attributable to deferred payments of interest made under these debt instruments is accounted for based upon a variable yield equal to the variable rate fixed by the debt instrument. Any other original issue discount on these debt instruments is determined on the issue date by assuming that the interest rate in effect on that date remains constant over the entire term of the debt instrument and is accounted for on that basis, regardless of the actual interest rate under the debt instrument.

3. Contingent Payments

Under the proposed regulations, contingent payments are generally not taken into account in applying the original issue discount and imputed interest rules. Instead, contingent payments are segregated from noncontingent payments and are accounted for separately. In determining whether a payment is contingent, the Commissioner may disregard remote and incidental contingencies. The parties to a transaction are, however, bound by its form and must treat a payment subject to a stated contingency as contingent. The contingent payment rules do not affect whether rights to receive contingent payments constitute debt or equity for Federal tax purposes or whether an instrument evidences a valid indebtedness.

Under the separate accounting rules for contingent payments, contingent payments may be recharacterized in certain situations. First, any payment of principal made on account of a sale or exchange of nonpublicly traded property that is not accompanied by a payment of adequate stated interest will be recharacterized in part as interest. Second, in the case of a debt instrument that does not provide for adequate stated interest and that accordingly has imputed interest, certain contingent interest payments may be recharacterized in part as principal to restore to basis amounts previously recharacterized as imputed interest. In these cases, a payment subject to recharacterization is treated as a payment of principal in an amount equal to the present value of the payment and as a payment of interest to the extent of the difference between the amount of the payment and the present value of the payment. The amount of all payments characterized as principal, however, cannot exceed the amount of the fixed or maximum stated principal amount under a debt instrument.

Third, a contingent payment made under a debt instrument issued for cash or publicly traded property may be recharacterized in a case in which the issue price of the debt instrument exceeds the sum of all the noncontingent payments due under the debt instrument. In such a case, the noncontingent payments under the debt instrument are treated entirely as principal. Each contingent payment is treated as a payment of interest to the extent of the total interest deemed accrued and not allocated to prior payments, and a payment of principal to the extent of the excess of the amount of the payment over the portion of the payment treated as interest. The total interest deemed accrued for any accrual period is based on an assumed yield to maturity equal to the applicable Federal rate which would have applied had the debt instrument been issued for nonpublicly traded property. Once the sum of all the portions of the contingent payments that are treated as principal under this rule reaches the difference between the issue price of the debt instrument and the sum of all the noncontingent payments under the debt instrument, any additional contingent payments are treated as interest.

If a contingent payment is paid within six months of the date it becomes fixed, the portion of the payment recharacterized as interest is accounted for by both the issuer and the holder when the payment becomes fixed. The proposed regulations provide, however, that if a contingent payment is not paid within six months of the date it becomes fixed, the buyer is treated as having issued a separate debt instrument on the date the payment becomes fixed. The issue price of this deemed debt instrument is determined under section 1274 (regardless of whether the payment arose under a debt instrument that was issued for cash or publicly traded property). An amount equal to the issue price is characterized as principal and interest as discussed above.

In the case of a debt instrument subject to section 1274, special rules are provided for the treatment of payments contingent only with respect to due date but which are payable within a fixed period. Under these rules, the buyer's initial basis and the allocation of interest to accrual periods are determined by assuming that all payments under the debt instrument are made at the latest possible date and in the smallest amount permitted. When payments are made before the end of the fixed period, basis and interest accrual adjustments are made.

4. Put or Call Options

The proposed regulations provide a special rule for the determination of yield, maturity date, and stated redemption price at maturity of a debt instrument that provides for a put or call option or an option to extend the term of the debt instrument. Yield of such a debt instrument is determined as of the issue date by assuming that the holder of the particular option will act in accordance with his own economic interest (as viewed from the issue date) in deciding whether to exercise the option. For example, if the issuer of a debt instrument has a call right and if the yield to the call date (assuming exercise of the call option) would be less than the yield to maturity assuming no exercise of the call, it will be assumed as of the date of issue that the call option will be exercised. The maturity date and the stated redemption price at maturity are then determined according to the presumption of exercise. Special rules are provided for debt instruments issued in a transaction governed by section 1274 that contain such options.

5. Reorganizations

In the case of debt instruments issued after December 13, 1982, in exchange for other debt instruments in a reorganization (within the meaning of section 368(a)), a special rule limits the original issue discount created upon the exchange. If the issue price of the new debt instrument would be less than the adjusted issue price of the old debt instrument but for this rule, then the issue price of the new debt instrument is equal to the adjusted issue price of the old debt instrument.

F. Information Reporting Requirements

Section 1275(c)(1) requires an issuer of publicly offered debt instruments issued after the date of publication of these regulations in final form having original issue discount to set forth on the face of the debt instrument the amount of original issue discount and the issue date. In addition, the proposed regulations require the yield to maturity, the method selected to determine yield for a short accrual period, and the amount of original issue discount allocable to a short accrual period to be set forth on the face of the debt instrument. Similar requirements apply to the first holder of a nonpublicly offered debt instrument, if such holder disposes of the debt instrument before maturity.

Section 1275(c)(2) requires the issuer of a publicly offered debt instrument having original issue discount to furnish the Secretary with certain information. The temporary regulations issued under this section require certain additional items to be furnished to the Secretary and are proposed herein as a part of these regulations with the following amendment: Section 1275(c)(2) shall not apply to issuers of publicly offered debt instruments that are: (1) Certificates of deposit, or (2) stripped bonds and coupons within the meaning of section 1286.

G. Treatment of Amounts Received on Sale, Exchange or Redemption of Debt Instruments

Under the law in effect prior to the Tax Reform Act of 1984, amounts received upon retirement of certain debt instruments held as capital assets were considered to have been received in exchange therefor. Gain on sale, exchange, or retirement was treated as capital gain in the absence of an intention to call the bond before maturity. In the case of a short-term obligation, a portion of the gain was treated as ordinary interest income to the extent of accured discount in the hands of the holder.

The rules of prior law relating to the characterization of gain upon sale, exchange or retirement of a debt instrument issued at a discount have been retained, except that the requirement that the debt instrument be a capital asset in the hands of the holder has been repealed for debt instruments issued at a discount after July 18, 1984.

V. Accounting for Interest

Under the revised section 483, unstated interest is required to be accounted for on an economic accrual basis consistent with the allocation of original issue discount under section 1272(a) and Rev. Rul. 83-84, 1983-1 C.B. 97. Unlike original issue discount, however, unstated interest is not subject to annual periodic inclusion or deduction. The proposed regulations prescribe rules under section 446 governing the method of accounting for interest in lending and deferred payment transactions outside the scope of the original issue discount rules. Thus, these rules apply to the accounting for unstated interest (and any stated interest) in transactions to which section 483 applies. Under the proposed section 446 regulations, interest accrues in generally the same manner as original issue discount. For purposes of determining how accrued interest is allocated to payments under a debt instrument, a payment is treated: First, as a payment of interest to the extent interest has accrued and remains unpaid as of the date of the payment; second, as a prepayment of interest to the extent the parties have allocated more interest to payments than the amount of interest that has accrued as of the date of the payment; and third, as a payment of principal to the extent of the excess of the payment over the sum of the accrued and the prepaid interest. In certain small transactions, however, the allocation of the parties of less interest to a payment than the amount of accrued interest that remains unpaid as of the date of the payment will be respected.

VI. Cash Method Debt Instruments

As noted above, section 483 rather than section 1274 applies to cash method debt instruments. Interest on a cash method debt instrument is accounted for under the cash receipts and disbursements method of accounting. In general, a debt instrument is a cash method debt instrument if the stated principal amount of the debt instrument does not exceed $2,000,000, the lender is neither an accrual method taxpayer nor a dealer with respect to the property, and the borrower and the lender jointly elect the cash method treatment. However, a debt instrument issued in exchange for new section 38 property or a debt instrument issued in a sale-leaseback transaction does not qualify for the cash method treatment. The cash method election is generally binding on successors of the lender and the borrower. If, however, the lender (or a successor thereof) transfers the cash method debt instrument to an accrual method taxpayer, the election does not apply to the successor for any period after the transfer and section 1272 will apply to the successor.

VII. Amendments to Section 482 Regulations

1. In General

In section 44(b)(2) of the Tax Reform Act of 1984, Congress directed the Treasury to amend the safe haven interest rates under the section 482 regulations to provide floating rates consistent with the rates applicable under sections 483 and 1274. These proposed regulations are in response to that directive. In addition, these proposed regulations would make certain other changes to the section 482 regulations. The proposed regulations would reduce the interest-free period on certain intercompany balances between controlled taxpayers under existing § 1.482-2(a)(3) from six months to 60 days. The proposed regulations would also delete the formula method for determining a safe-haven rental charge for leases of tangible depreciable property between related taxpayers under § 1.482-2(c)(2)(ii).

2. Explanation of the Proposed Regulations

a. Safe Haven Interest Rates

Section 1.482-2(a)(2)(iii) of the proposed regulations provides generally that the range of safe haven interest rates on loans or advances between controlled entities will be between 100 percent and 130 percent of the applicable Federal rate (AFR) corresponding to the term of the loan, with adjustments for inadequate interest made at 100 percent of the AFR, compounded semiannually, and adjustments for excessive interest made at 130 percent of the AFR, compounded semiannually. The upper limit of 130 percent of the AFR approximates the interest yield on bonds with a Moody's rating of BAA. Consistent with section 1274(e), the lower limit is 110 percent of the AFR in the case of sale-leaseback transactions. The effective dates of the proposed regulations are described in § 1.482-2(a)(2)(iii)(A) of the proposed regulations.

The proposed regulations continue the rule of the existing regulations that controlled taxpayers may demonstrate that a rate outside the safe haven range is a more appropriate rate under all the facts and circumstances.

Section 1.482-2(a)(3) of the proposed regulations provides that where the interest rate on a loan or advance is subject to adjustment both under section 482 and some other Code section (for example, sections 467, 483, 1274, or 7872), the other Code section is to be applied first, and the provisions of section 482 may then be applied to the loan or advance, as adjusted by the other Code section. If the other Code section does not apply to the loan or advance because of an exception, limitation, or *de minimis* rule contained in the other Code section, the provisions of the section 482 regulations may still be applied to the loan or advance by the district director. Under this arrangement it would be unlikely that actual adjustments would be required under both section 482 and the other Code section. Under certain circumstances, however, both section 482 and the other Code section may apply. For example, if the AFR exceeds 9 percent, and if the related taxpayers use the special 9 percent rate prescribed in section 1274A(a), the transaction may be subject to further adjustment under section 482.

Under proposed § 1.482-2(a)(1)(iii), the interest-free period on certain intercompany balances (six months under the existing regulations) is reduced to 60 days. The proposed regulations continue the rule of the existing regulations that the taxpayer is permitted to use a longer interest-free period if it can demonstrate that it regularly grants uncontrolled parties a longer interest-free period on similar transactions in its trade or business.

b. Leases

Section 1.482-2(c) of the existing regulations provides a formula method for determining a safe haven rental charge for certain leases of tangible depreciable property between controlled entities. There is no minimum or maximum lease period for which the safe haven rental charge can be used. Under the existing regulation taxpayers are never required to use the safe haven formula rental if the taxpayer can establish a more appropriate rental charge. However, in cases where the taxpayer may use the safe haven rental amount, the IRS may not challenge the safe haven amount, even if the amount does not clearly reflect income. Because of these deficiencies in the operation of the safe haven formula, it would be deleted under the proposed regulations. The safe haven rule for subleases under § 1.482-2(c)(2)(iii) would be retained. The effective dates of the proposed regulations are described in § 1.482-2(c)(2)(ii).

VIII. Questions Reserved

The proposed regulations do not revise the definition of intention to call before maturity nor do they address the application of the intention to call rules in the case of debt instruments with indefinite maturities. The Internal Revenue Service is actively considering and welcomes comments specifically directed toward these reserved issues, as well as those directed to the following:

1. How the original issue discount rules should apply to foreign currency transactions, and
2. Whether a portion of the issue price of a debt instrument providing for a conversion feature should properly be

allocated to that conversion feature in a manner similar to the allocation of issue price for investment units under section 1273(c)(2).

Regulatory Flexibility Act

Although this document is a notice of proposed rulemaking that solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Non-Application of Executive Order 12291

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

Comments and Request for a Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register.** The collection of information requirements contained herein have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act. Comments on the requirements should be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Internal Revenue Service, New Executive Office Building, Washington, DC 20503. The Internal Revenue Service requests that persons submitting comments to OMB also send copies of the comments to the Service.

Drafting Information

The principal author of the proposed regulations under sections 163, 1271, 1272, 1273, and 1275 is Theresa E. Bearman of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service; the principal author of the regulations under sections 446, 483 and 1274 is Ewan D. Purkiss of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service; and the principal author of the regulations under section 482 is Joseph M. Rosenthal of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in developing the regulations on matters of both substance and style.

List of Subjects

26 CFR 1.61–1—1.281–4

Income taxes, Taxable income, Deductions, Exemptions.

26 CFR 1.301–1—1.385–6

Income taxes, Corporations, Corporate distributions, Corporate adjustments, Reorganizations.

26 CFR 1.401–0—1.425–1

Income taxes, Employee benefit plan, Pensions, Stock options, Individual retirement accounts, Employee stock ownership plans.

26 CFR 1.441–1—1.483–2

Income taxes, Accounting, Deferred compensation plans.

26 CFR 1.581–1—1.601–1

Income taxes, Banks.

26 CFR 1.611–0—1.638–2

Income taxes, Natural resources, Deductions, Exclusions from income.

26 CFR 1.801–1—1.832–6

Income taxes, Insurance companies.

26 CFR 1.861–1—1.997–1

Income taxes, Aliens, Exports, DISC, Foreign investments in U.S., Foreign tax credit, Sources of income, United States investments abroad.

26 CFR 1.1001–1—1.1102–3

Income taxes, Gain and loss, Basis, Nontaxable exchanges.

26 CFR 1.1271—1.1288

Income taxes, Capital gains and losses, Original issue discount, Applicable Federal rate, Market discount, Short-term obligations, Stripped bonds and stripped coupons, Tax-exempt obligations.

26 CFR 1.1501–1—1.1564–1

Income taxes, Controlled group of corporations, Consolidated returns.

26 CFR 1.6001–1—1.6109–2

Income taxes, Administration and procedure, Filing requirements.

26 CFR 1.9001—1.9101–1

Income taxes, Administration and procedure, Miscellaneous tax acts, Extensions of time for elections.

26 CFR Part 3

Income taxes, Maritime carriers.

26 CFR Part 5f

Income taxes, Tax Equity and Fiscal Responsibility Act of 1982.

26 CFR Part 6a

Bonds, Income taxes, Mortgages, Veterans.

26 CFR Part 25

Gift taxes.

26 CFR Part 514

France, Tax treaties.

Proposed Amendments to the Regulations

Accordingly, 26 CFR Part 1, Part 3, Part 5f, Part 6a, Part 25, and Part 514 are proposed to be amended as follows:

PART 1—INCOME TAX: TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for Part 1 is amended by adding the following citations: (citations before * * * indicate general rulemaking authoriy)

Authority: 26 U.S.C. 7805. * * * Sections 1.483–1 through 1.483–5 also issued under 26 U.S.C. 483(g). Sections 1.1271–1 through 1.1275–5 also issued under 26 U.S.C. 1275(d). Section 1.1274A–1 also issued under 26 U.S.C. 1274A(e).

Par. 2. Paragraph (c)(3) of § 1.61–6 is revised to read as follows:

§ 1.61–6 Gains derived from dealings in property.

* * * * *

(c) *Character of recognized gain.* * * *

(3) Amounts received on retirement or sale or exchange of debt instruments, section 1271;

* * * * *

§ 1.61–7 [Amended]

Par. 3. In paragraph (d) of § 1.61–7, the third sentence is amended by removing the phrase "section 1232" and adding in its place the phrase "section 1271".

§ 1.163–4 [Amended]

Par. 4. Section 1.163–4 is amended as follows:

1. The heading is revised by adding a comma and the phrase "and before July 2, 1982." after the word "1969".

2. In paragraph (a)(1), the second sentence is amended by removing the phrase "section 1232(b)(1)" and adding in its place the phrase "section 1273(a)(1)", and the second sentence is further amended by removing the phrase "the second sentence thereof" in the parenthetical and adding in its place the phrase "section 1273(a)(3)".

3. Paragraph (b) is amended by removing the phrase "section 1232(b)(1)" from each place that it appears in the paragraph and adding its place the phrase "section 1273(a)(1)", by removing the phrase "the second sentence thereof" from each place it appears in the paragraph and adding in its place the phrase "section 1273(a)(3)", and by removing the phrase "section 1232(a)(3)(A)" from *Example (4)* and adding in its place the phrase "section 1271(a)(3)(A)".

4. Paragraph (d) is amended by adding the phrase "and before July 2, 1982," after the word "1969," each place that it appears.

Par. 5. A new § 1.163-7 is inserted immediately following § 1.163-6T. New § 1.163-7 reads as follows:

§ 1.163-7 Deduction for original issue discount on certain debt instruments issued after July 1, 1982.

(a) *Applicability.* Section 163(e) and this section apply to debt instruments having original issue discount (determined without reference to section 1273(a)(3) and § 1.1273-1(a)(3)) issued after July 1, 1982, other than debt instruments issued by a natural person before March 2, 1984, described in section 1272(a)(2)(D), and debt instruments representing loans between natural persons described in section 1272(a)(2)(E). For purposes of this section, the term "debt instrument" shall have the same meaning as in section 1275(a)(1) and § 1.1275-1(b)(1). A debt instrument subject to this section at the time of issuance continues to be subject to this section notwithstanding an assumption of the debt instrument by a natural person before March 2, 1984.

(b) *General rule.* Except as provided in paragraphs (c) and (d) of this section and in § 1.1275-2(f)(2), an issuer or a transferee may deduct as interest the amount of original issue discount on a debt instrument equal to the sum of the daily portions of original issue discount for all days in the taxable year during which the issuer (or transferee) was primarily liable on the debt instrument. The daily portion shall be determined according to the rules stated in § 1.1272-1(c) except that the following are disregarded—

(1) Any reduction in the amount of original issue discount includible in gross income by subsequent holders by reason of section 1272(a)(6), and

(2) The *de minimis* rule of section 1273 (a)(3) and § 1.1273-(a)(3).

The transfer of a debt instrument by any holder to a subsequent purchaser shall not affect the accrual of deductions under this section.

(c) *Limitations*—(1) *Personal use property.* In the case of a debt instrument whose issue price is determined under section 1273(b) (1), (2), or (3), that is incurred in connection with the acquisition or carrying of personal use property, original issue discount is not deductible until paid, or, if later, when accured. See § 1.1275-2(f).

(2) *Short-term obligations.* In the case of a short-term obligation (as defined in section 1283(a)(1)), the issuer or transferee may deduct original issue discount only when paid, (or, if later, when accrued), if the issuer or transferee uses the cash receipts and disbursements method of accounting.

(3) *Other limitations.* Other sections of the Code may limit the deductibility of original issue discount otherwise allowable under section 163(e) and this section. See, for example, section 163(d) (relating to interest on investment indebtedness) and section 189 (relating to construction period interest).

(d) *De minimis discount deductible on straight-line basis in certain cases.* Notwithstanding paragraph (c)(1) of this section, in the case of an installment obligation which—

(1) Is a self-amortizing installment obligation (within the meaning of § 1.1273-1(b)(2) (iii)) or is a level principal obligation (within the meaning of § 1.1274-6(d)(2)(ii)(D)), and

(2) Has a *de minimis* amount of original issue discount (as determined under § 1.1273-1(a)(3)),

the amount of original issue discount (including points) that is allocated to each payment of principal under the debt instrument shall be the total amount of original issue discount divided by the total number of principal payments. For purposes of paragraph (d)(1) of this section, an obligation shall be considered to be a self-amortizing or level principal obligation if it would be so classified but for the fact that it calls for varying rates of interest over the term of the obligation.

(e) *Recovery or retention of amounts previously deducted.* In any taxable year in which an amount of original issue discount that was deducted as interest under this section is retained or recovered by the taxpayer, such as, for example, by reason of a fine, penalty, forfeiture, or other withdrawal fee, this amount shall be includible in the gross income of the taxpayer for the taxable year.

(f) *Deduction upon repurchase*—(1) Except as provided in paragraph (f)(2) of this section, if a debt instrument is issued and subsequently repurchased at a price in excess of the issue price plus any amount of original issue discount deductible prior to the date of repurchase, or minus any amount of premium returned as income prior to repurchase, the excess of the repurchase price over the issue price adjusted for amortized premium or deductible discount is deductible as interest for the taxable year. For purposes of section 163(e) and paragraph (f) of this section, the term "repurchase" is defined by reference to section 1272(d)(1) and § 1.1272-1(m).

(2) The provisions of paragraph (f)(1) of this section shall not apply to the extent a deduction is disallowed by section 249 (relating to the limitation on deduction of bond premium on repurchase of convertible obligation) and the regulations thereunder.

(g) *Effective date.* Section 1.163-7 applies to debt instruments issued with original issue discount (determined under section 1273 without regard to section 1273(a)(3)) after July 1, 1982. A debt instrument issued after July 1, 1982, pursuant to a written commitment that was binding on July 1, 1982, and at all times thereafter, shall be treated as issued on July 1, 1982, for purposes of this section and § 1.163-4. A written commitment is binding on July 1, 1982, and at all times thereafter if it contains an obligation to issue the debt instruments at a particular price and rate of interest and may be enforced against the issuer under applicable state law. Thus, for example, the rules of section 163(e) and this section do not apply to debt instruments issued pursuant to the exercise of warrants outstanding on July 1, 1982, that were exercisable against the issuer under state law and that prescribe the price and interest rate at which they may be exercised. For rules relating to debt instruments issued with original issue discount on or before July 1, 1982, see section 163(e) as in effect before its amendment by section 231 of the Tax Equity and Fiscal Responsibility Act of 1982 and § 1.163-4.

§ 1.249-1 [Amended]

Par. 6. Section 1.249-1 is amended as follows:

1. In paragraph (c)(2) by removing the phrase "section 1232(b)" and adding in its place the phrase "sections 1273(b) and 1274", and by removing the phrase "§§ 1.163-3 and 1.163-4." and adding in

its place the phrase "§§ 1.163-3, 1.163-4, and 1.163-7.".

2. In paragraph (d)(2), the first sentence, by removing the phrase "§§ 1.163-3, 1.163-4." and adding in its place the phrase "§§ 1.163-3 and 1.163-4, and 1.163-7.".

3. In paragraph (f)(2), the second sentence, by removing the phrase "§§ 1.163-3(c) and 1.163-4(c)." and adding in its place the phrase "§§ 1.163-3(c), 1.163-4(c), and 1.163-7(f).".

Par. 7. Paragraph (b)(1) of § 1.409-1 is amended by removing the word "1232" from the last sentence thereof and adding in its place the phrase "1271 through 1275".

Par. 8. A new § 1.446-2 is added immediately following § 1.446-1. New § 1.446-2 reads as follows:

§ 1.446-2 Method of accounting for interest.

(a) *Applicability*—(1) *In general.* This section prescribes the method of accounting for interest and applies to all interest and amounts treated as interest (whether stated or unstated) in any lending or deferred-payment transaction other than amounts that are taken into account under—

(i) Sections 1272 and 163(e) (relating to current inclusion in income of original issue discount and an allowable deduction for original issue discount),

(ii) Section 467(a)(2) (relating to certain payments for the use of property or services), or

(iii) Section 7872(a) (relating to the treatment of gift and demand loans with below-market interest rates).

Thus, the amounts to which this section applies include the stated and unstated interest in any sale or exchange of property for deferred payments to which section 1274 does not apply. For example, this section applies to interest under a debt instrument described in section 1274A(c)(2) and § 1.1274A-1(c)(2) (relating to debt instruments for which the issuer and holder have made an election to use the cash method of accounting). This section also applies to the interest in any agreement for the use of property or provision of services for deferred payments to the extent section 467(a)(2) does not apply to the agreement. In addition, this section applies to the interest in a lending transaction such as a loan described in section 1272(a)(2)(E) (relating to certain loans between natural persons) to which sections 1272 and 163(e) do not apply by reason of exceptions or safe harbors. Similarly, if section 1272 or 163(e) applies with respect to one party to a transaction but such sections do not apply with respect to the other party to the transaction, this section applies to the interest provided with respect to such other party.

(2) *Effect on other provisions.* Notwithstanding the provisions of this section, interest or an amount treated as interest is not deductible for any taxable year in which such deduction is not allowed by reason of any other provision of the Code. For purposes of such other provision, however, the rules of this section shall be taken into account in determining the taxable year in which such amount is otherwise allowable as a deduction. For circumstances in which interest is not allowable as a deduction for a taxable year, see, for example, section 189 (relating to real property construction period interest), section 163(d) (relating to interest on investment indebtedness) and section 267(a) (relating to losses, expenses, and interest with respect to transactions between related persons).

(b) *Accrual of interest*—(1) *In general.* For purposes of this section, the interest (including any unstated interest determined under section 483) in any lending or deferred-payment transaction (the loan) accrues at a single rate equal to the yield to maturity as defined in paragraph (c)(1) of this section regardless of any contrary formulas that may be stated by the parties to the transaction in any debt instrument or agreement. For this purpose, the interest under all debt instruments issued by a borrower to the same lender as part of a single transaction shall be aggregated and treated as interest in a single lending or deferred-payment transaction. For circumstances in which multiple sales or exchanges are treated as a single sale or exchange, see § 1.1274A-1(d).

(2) *Amount of interest that accrues for an accrual period*—(i) *In general.* The amount of interest that accrues for any accrual period (other than a short first accrual period, or a final accrual period) is equal to the product of—

(A) The outstanding loan balance at the beginning of the accrual period, and

(B) The yield to maturity of the loan, divided by the number of accrual periods in a year.

(ii) *Short first accrual period*—(A) *In general.* (*1*) Except as otherwise provided in this paragraph (b)(2)(ii)(A), the amount of interest that accrues for a short first accrual period shall be determined under the exact method described in paragraph (b)(2)(ii)(B) of this section, and a convention that assumes that a year consists of 12 30-day months shall be used for purposes of determining the fraction (f) with respect to the short period.

(*2*) If section 483 does not apply to the loan (as, for example, in the case of a loan that provides for adequate stated interest within the meaning of § 1.483-2) and the loan provides that interest for the short first accrual period accrues under the approximate method described in paragraph (b)(2)(ii)(C) of this section or any other reasonable method, the amount of interest that accrues for such short period shall be determined under such method. In addition, for purposes of determining the fraction (f) with respect to a short period under paragraph (b)(2)(ii) (B) or (C) of this section, the use of the convention that assumes that a year consists of 12 30-day months is optional if section 483 does not apply to the loan.

(B) *Exact method.* The exact method assumes daily compounding of interest. Under this method, the amount of interest that accrues for the short accrual period is equal to the result of the following formula:

$$I=P\times[(1+i/k)^f-1]$$

In which:

I = The amount of interest that accrues for the short accrual period

P = The outstanding loan balance at the beginning of the short accrual period as determined under paragraph (c)(3)(i) of this section.

i = The yield to maturity of the loan expressed as a decimal

k = The number of accrual periods that are contained in a year

f = A fraction, the numerator of which is the length of the short accrual period, and the denominator of which is the length of a full accrual period.

(C) *Approximate method.* The approximate method assumes simple interest within an accrual period (that is, no compounding during the short accrual period). Under the approximate method, the amount of interest that accrues for the short period is determined by multiplying the amount that would constitute the proper accrual of interest for a full accrual period by a fraction, the numerator of which is the length of the short accrual period and the denominator of which is the length of a full accrual period. Thus, the amount of interest that accrues for the short accrual period is equal to the result of the following formula:

$$I=P\times(i/k)\times f$$

In which:

I = The amount of interest that accrues for the short accrual period

P = The outstanding loan balance at the beginning of the short accrual period as determined under paragraph (c)(3)(i) of this section

i = The yield to maturity of the loan expressed as a decimal

k = The number of accrual periods that are contained in a year

f = A fraction, the numerator of which is the length of the short accrual period, and the denominator of which is the length of a full accrual period.

(iii) *Final accrual period.* The amount of interest that accrues for the final accrual period (including a short final accrual period) is equal to the excess of—

(A) The aggregate amount of interest due under the loan, over

(B) The aggregate amount of accrued interest allocated to all accrual periods preceding the final accrual period.

(c) *Definitions*—(1) *Yield to maturity*—(i) *In general.* The yield to maturity (yield) of a loan is the rate of interest (based on compounding at the end of each accrual period) at which the present value of all payments (including interest and principal) required to be made under the loan is equal to the amount lent. Paragraph (c)(1) (ii) and (iii) of this section provides special rules to allow a simple calculation of yield in certain circumstances. In the case of a loan that has a short first accrual period, the yield shall be computed in a manner consistent with the method used to determine the amount of interest that accrues for such short accural period under paragraph (b)(2) of this section. For rules relating to the determination of present value, see § 1.1274–5.

(ii) *Yield equals stated rate in certain cases.* Except as provided in paragraph (c)(1)(iii) of this section, the yield of a loan is the stated rate of interest provided in the loan if—

(A) The stated rate of interest remains constant over the entire term of the loan (including short periods),

(B) Interest is either paid or compounded at the end of each accrual period, and

(C) No interest other than the stated rate (for example, points or other forms of discount) is provided in the loan.

(iii) *Contracts to which section 483 applies.* Except in the case of a cash method debt instrument received in exchange for property in a potentially abusive situation (see § 1.483-3(a)), the yield of a loan to which section 483 applies (that is, a loan that does not provide for adequate stated interest and is otherwise subject to section 483) is the imputed rate of interest applicable to the loan as determined under § 1.483–4. In the case of a cash method debt instrument received in exchange for property in a potentially abusive situation, the yield shall be determined only as prescribed in paragraph (c)(1)(i) of this section.

(2) *Accrual period*—(i) *Regular payment or compounding at intervals of one year or less.* If a loan calls for more than one payment or compounding date (other that the date of the loan) and all dates on which an amount is either paid or compounded occur at regular intervals of one year or less, the accrual period is such interval. A loan shall not fail to qualify for this rule merely because the interval between the date of the loan and the first payment or compounding date after the date of the loan (the first payment or compounding date) or the interval between the maturity date and the preceding payment or compounding date differs from the interval between other payment or compounding dates.

(ii) *Irregular payment or compounding; intervals of more than one year.* If a loan calls for more than one payment or compounding date (other than the date of the loan) and all dates on which an amount is either paid or compounded do not occur at regular intervals of one year or less, the accrual period is the longest period of not more than one year such that all intervals consist of a whole number of accrual periods. The interval between the date of the loan and the first payment or compounding date and the interval between the maturity date and the preceding payment or compounding date are not taken into account in applying this paragraph (c)(2)(ii) unless the loan calls for only one payment or compounding date between the date of the loan and the maturity date.

(iii) *Loans calling for a single payment.* If a loan calls for a single payment at maturity and for no other payment or compounding dates (other than the date of the loan), the accrual periods are the six-month periods (or the shorter period from the date of the loan) that end on the day in the calendar year that corresponds either to the maturity date or to the date that is six months before the maturity date.

(iv) *Short accrual period.* (A) If the interval between the date of a loan for which the accrual period is determined under paragraph (c)(2) (i) or (ii) of this section and the first payment or compounding date does not consist of a whole number of accrual periods, the first accrual period shall be the short period such that the remainder, if any, of such interval consists of a whole number of accrual periods.

(B) If the interval between the last date before maturity on which an amount is paid or compounded and the maturity date of a loan for which the accrual period is determined under paragraph (c)(2) (i) or (ii) of this section does not consist of a whole number of accrual periods, the final accrual period shall be the short period such that the remainder, if any, of such interval consists of a whole number of accrual periods.

(v) *Date accrual period begins.* The first accrual period beings on the date of the loan and each subsequent accrual period begins on the date after the last day of the preceding accrual period.

(3) *Outstanding loan balance*—(i) *First accrual period.* The outstanding loan balance at the beginning of the first accrual period is equal to—

(A) In the case of a loan to which section 483 applies, the amount described in § 1.483–2(c)(2), or

(B) In any other case, the amount lent.

(ii) *Subsequent accrual periods.* The outstanding loan balance at the beginning of any accrual period other than the first accrual period is equal to—

(A) The sum of—

(*1*) The outstanding loan balance at the beginning of the preceding accrual period, and

(*2*) The amount of interest that accrued for the preceding accrual period,

reduced by

(B) The amount of any payment required to be made during the preceding accrual period.

(d) *Allocation of interest to payments*—(1) *In general.* Except as provided in paragraph (d)(3) of this section, each payment under a loan (other than payments of additional interest or similar charges provided with respect to amounts that are not paid when due) shall be treated—

(i) First, as a payment of interest to the extent of the accrued and unpaid interest (within the meaning of paragraph (d)(2) of this section) as of the date the payment becomes due;

(ii) Second, as a prepayment of interest to the extent (if any) the amount of interest allocated by the parties to the payment exceeds—

(A) The aggregate amount of accrued interest as of the date the payment becomes due, reduced (but not below zero) by

(B) The aggregate amount of interest allocated by the parties to prior payments; and

(iii) Third, as a payment of principal to the extent (if any) the amount of the payment exceeds the sum of the amounts described in paragraph (d)(1) (i) and (ii) of this section.

(2) *Accrued and unpaid interest.* The amount of accrued and unpaid interest as of the date any payment becomes due is the excess, if any, of—

(i) The aggregate amount of accrued interest as of the date the payment becomes due, over

(ii) The aggregate amount previously treated as a payment of interest under paragraph (d)(1) (i) or (ii) of this section.

(3) *Allocation respected in certain small transactions*—(i) *In general.* If the aggregate amount of interest and principal payable under a loan does not exceed $250,000 and section 483 does not apply to the loan (as, for example, in the case of a loan that provides for adequate stated interest within the meaning of § 1.483–2), the allocation of interest and principal shall be respected. Similarly, if section 483 applies to a loan under which the aggregate amount payable does not exceed $250,000, but does not apply to a party to the loan (as, for example, in the case of an obligor under a debt instrument given in consideration for the sale or exchange of personal use property), the allocation of the parties shall be respected for purposes of determining the tax liability of the party not subject to section 483.

(ii) *Prepaid interest.* The amount of interest allocated to any payment under this paragraph (d)(3) shall be treated as prepaid interest to the extent such amount exceeds—

(A) The aggregate amount of accrued interest as of the date the payment becomes due, reduced (but not below zero) by

(B) The aggregate amount of interest allocated to prior payments under this paragraph (d)(3).

(e) *Accounting for prepaid interest.* Prepaid interest must be included in income by a lender when received, regardless of the lender's method of accounting. Except as otherwise provided in section 461(g)(2), prepaid interest is not deductible before such interest accrues (determined under paragraph (b) of this section).

(f) *Special rules*—(1) *Variable rate debt instruments.* In the case of any loan that is a variable rate debt instrument (within the meaning of § 1.1275–5(a)) the amount of interest that accrues for an accrual period shall be determined in a manner consistent with the rules of § 1.1275–5.

(2) *Contingent payments*—(i) *In general.* In the case of a contingent payment (other than a contingent payment to which paragraph (b)(4) of § 1.483–5 (relating to payments contingent with respect to due date but payable within a fixed period) applies), interest does not accrue before the date the payment becomes fixed and the amount of interest that would otherwise have accrued (as determined under paragraph (b) of this section) on or before the date the payment becomes fixed accrues on such date. Any remaining interest with respect to the payment accrues in the manner described in paragraph (b) of this section.

(ii) *Certain contingent payments within a fixed period.* In the case of contingent payments to which paragraph (b)(4) of § 1.483–5 applies, the amount of interest that accrues for an accrual period shall be determined in a manner consistent with the rules of § 1.1275–4(d).

(g) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). (i) On July 1, 1986, A sells his personal residence to B for a stated purchase price of $1,297,143.66. The property is not personal use property (within the meaning of section 1275(b)(3) and § 1.1275–2(f)(3)) in the hands of B. Under the loan agreement, B is required to make two installment payments of $648,571.83, the first due on June 30, 1988, and the second due on June 30, 1990.

(ii) The agreement does not provide for adequate stated interest. Thus, section 483 applies to the loan and the yield is the imputed rate of interest determined under § 1.483–4. Assume that under § 1.483–4 the imputed rate of interest is 9.2 percent, compounded annually, and that under § 1.483–3 there is unstated interest of $297,143.66. Under paragraph (c)(2)(ii) of this section the accrual period is one year. Paragraph (c)(2)(iv) of this section does not apply because the first interval (July 1, 1986–June 30, 1988) consists of two annual accrual periods. Accordingly, the first accrual period is a full period.

(iii) Under paragraph (c)(3)(i) of this section, the outstanding loan balance at the beginning of the first accrual period is $1,000,000 (the amount described in § 1.483–2(c)(2) (sales price minus total unstated interest)). Under paragraph (b)(2) of this section, the amount of interest that accrues for the first accrual period is $92,000 ($1,000,000 × .092). At the beginning of the second accrual period the outstanding loan balance is $1,092,000 ($1,000,000 + $92,000). The amount of interest that accrues for the second annual accrual period is $100,464 ($1,092,000 × .092). Thus, as of the date the first payment becomes due, $192,464.00 of interest has accrued.

(iv) Under paragraph (d)(1) of this section, the $648,571.83 payment is treated first as a payment of interest to the extent of $192,464.00. Since the parties have not allocated interest to the payment in excess of the amount of interest that has accrued as of the date the payment becomes due, there is no prepayment of interest and the remainder of the payment ($456,107.83) is treated as a payment of principal.

(v) The outstanding loan balance at the beginning of the third annual accrual period is $543,892.17 (($1,092,000 + $100,464) less $648,571.83). The amount of interest that accrues for the third accrual period is $50,038.08 ($543,892.17 × .092). The amount of interest that accrues for the final accrual period is $54,641.58, the excess of the aggregate amount of interest due under the loan ($297,143.66), over the amount of interest that had accrued for all accrual periods preceding the final accrual period ($242,502.08). As of the date the second payment becomes due, $104,679.66 of interest has accrued. Thus, of the $648,571.83 payment, $104,679.66 is treated as interest and $543,892.17 is treated as principal.

Example (2). (i) The facts are the same as in example (1), except that the sales price is $1,000,000, and the loan agreement calls for adequate stated interest of $297,143.66. Further, the loan agreement provides that the entire payment of interest is allocated to the first installment payment.

(ii) Since the parties have allocated more interest to the first payment ($297,143.66) than the amount of interest that has accrued as of the date the first payment becomes due ($192,464.00), the excess of $104,679.66 is a prepayment of interest. The amount of the prepaid interest must be included in A's income when the first payment is received, but is deductible by B only as it accrues after the date of the prepayment. Thus, B may deduct $50,038.08 ($543,892.17 × .092) of the prepaid interest as it accrues during the third accrual period and the remainder ($54,641.58 ($104,679.66 minus $50,038.08)) as it accrues during the fourth accrual period if such amounts are allowable as deductions.

Example (3). The facts are the same as in example (1), except that the sales price is $100,000 and the loan agreement calls for two installment payments of $64,857.18, each consisting of $50,000 of principal and $14,857.18 of interest. Since the loan provides for adequate stated interest and the total amount payable is less than $250,000, the allocation of principal and interest by A and B is respected even though A and B have allocated less interest to the first installment payment than the amount that has accrued as of the date the payment becomes due.

Example (4). The facts are the same as in example (3), except that the loan agreement provides that the first installment consists of $35,142.82 of principal and $29,714.36 of interest, and the second installment consists entirely of principal. Since the parties have allocated to the first payment more interest ($29,714.36) than the amount of interest that has accrued as of the date the first payment becomes due ($19,246.40 (($100,000 × .092) + ($109,200 × .092)), the excess of $10,467.96 is a prepayment of interest. The amount of the prepaid interest must be included in A's income when the first payment is received, but is deductible by B only as it accrues after the date of the prepayment.

Example (5). The facts are the same as in example (3), except that the sales price is $106,123.37 and the loan agreement provides that each installment consists of $53,055.60 of principal and $11,795.50 of interest. Thus, the loan does not provide for adequate stated interest. Since the loan does not provide for adequate stated interest, the allocation of interest by A and B will not be respected even though the total amount of payments due is less than $250,000. Thus, the first payment is treated as a payment of interest to the extent of $19,246.40.

Example (6). (i) Assume that on June 1, 1986, A sells personal property to B for $145,000. The contract calls for interest payable at 8 percent, compounded annually. Further, the contract calls for B to make annual payments of $36,316.19 beginning on December 31, 1987, and ending with a final payment on December 31, 1991. In addition, the contract calls for a payment of interest on December 31, 1986, of $6,657.95 for the period from June 1, 1986, to December 31, 1986. Thus, under paragraph (c)(2) (i) and (iv) of this section, the accrual period is one year and the first accrual period is a short period of 7 months. The allocation by the parties of interest and principal with respect to each $36,316.19 payment due under the contract is as follows:

Payment	Principal	Interest
1 $36,316.19	$24,716.19	$11,600.00
2. $36,316.19	26,693.49	9,622.70
3 $36,316.19	28,828.96	7,487.23
4 $36,316.19	31,135.28	5,180.91
5 $36,316.19	33,626.10	2,690.09

(ii) If the test and imputed rates of interest are 9.20 percent, compounded annually, the contract does not provide for adequate stated interest. At a rate of 9.20 percent, compounded annually, the present value of the 5 deferred payments and the 6 payments of stated interest is $139,819.50. Thus, if section 483 is otherwise applicable, the contract contains unstated interest equal to $5,180.50 (the excess of $145,000 (the sum of the deferred payments) over $139,819.50 (the sum of the present values of the deferred payments and stated interest)). Under paragraph (c)(3) of this section, the outstanding loan balance ("OLB") at the beginning of the first accrual period (the date of the sale or exchange) is $139,819.50.

(iii) Under § 1.483–3(b) and paragraph (b)(2)(ii) of this section, the exact method must be used to determine the amount of interest that accrues for the short first accrual period. In addition, for purposes of determining the fraction (f) with respect to the short period, a convention that assumes that a year consists of 12 30-day months must be used. Thus, the amount of interest that accrues for the short accrual period from June 1, 1986, through December 31, 1986, is $7,365.75 ($139,819.50 × [(1 + .092) 210/360 − 1]). Since the amount of the payment at the end of the short accrual period ($6,657.95) is less than the amount of accrued interest, the entire payment is treated as interest.

(iv) The amount of interest that accrues for each accrual period following the short period (determined under paragraph (b)(2) of this section) is set forth in the following schedule:

Accrual period	OLB at the beginning of accrual period	Accrued interest
1987	$140,527.30	$12,928.51
1988	117,139.62	10,776.85
1989	91,600.26	8,427.23
1990	63,711.32	5,861.44
1991	33,256.58	3,059.61

(The schedule reflects minor adjustments attributable to rounding.)

(v) A payment of $36,316.19 is due on December 31, 1987. As of the date this payment is due, interest of $20,294.26 will have accrued ($7,365.75 plus $12,928.51). The amount of this payment that is treated as interest is $13,636.31 (total interest accrued ($20,294.26) minus the amount previously treated as interest ($6,657.95)). The four subsequent payments of $36,316.19 are treated as payments of interest to the extent interest accrues during the year prior to the payment.

Example (7). (i) Assume that on January 1, 1986, A sells new section 38 property to B for $30,000 under a contract calling for 10 percent interest, compounded monthly. The contract calls for 24 monthly payments of $1,384.35 (each consisting of 10 percent interest on the unpaid principal balance of the debt under the contract, and partial payment of principal) beginning with a payment on January 31, 1986, and ending with a payment on December 31, 1987. The allocation by the parties of interest and principal with respect to each $1,384.35 payment due under the contract is as follows:

Payment	Principal	Interest
1. $1,384.35	$1,134.35	$250.00
2. 1,384.35	1,143.80	240.55
3. 1,384.35	1,153.33	231.02
4. 1,384.35	1,162.94	221.40
5. 1,384.35	1,172.63	211.71
6. 1,384.35	1,182.41	201.94
7. 1,384.35	1,192.26	192.09
8. 1,384.35	1,202.20	182.15
9. 1,384.35	1,212.21	172.13
10. 1,384.35	1,222.32	162.03
11. 1,384.35	1,232.50	151.85
12. 1,384.35	1,242.77	141.58
13. 1,384.35	1,253.13	131.22
14. 1,384.35	1,263.57	120.78
15. 1,384.35	1,274.10	110.25
16. 1,384.35	1,284.72	99.63
17. 1,384.35	1,295.42	88.92
18. 1,384.35	1,306.22	78.13
19. 1,384.35	1,317.11	67.24
20. 1,384.35	1,328.08	56.27
21. 1,384.35	1,339.15	45.20
22. 1,384.35	1,350.31	34.04
23. 1,384.35	1,361.56	22.79
24. 1,384.35	1,372.91	11.44

(The schedule reflects minor adjustments attributable to rounding.)

(ii) Assume that the contract does not provide for adequate stated interest and that the imputed rate of interest is 12 percent, compounded monthly. Under § 1.483–1(b) the first six payments of principal are not treated as deferred payments since they are not due later than six months from the date of the sale or exchange. At a rate of interest of 12 percent, compounded monthly, the present value of the 18 deferred payments (payments 7 through 24) and 24 stated interest payments is $22,697.31. Thus, if section 483 is otherwise applicable, the contract contains total unstated interest of $353.22 (the excess of $23,050.53 (the sum of the deferred payments) over $22,697.31 (the sum of the present values of the deferred payments and stated interest)). Under paragraph (c)(3) of this section, the outstanding loan balance (OLB) of the contract at the beginning of the first accrual period (the date of the sale or exchange) is $22,697.31. The amount of interest that accrues for each accrual period is set forth in the following schedule:

Accrual period	OLB at the beginning of accrual period	Accrued interest	Payment at end of period
January 1986	$22,697.31	$226.97	$250.00
February 1986	22,674.28	226.74	240.55
March 1986	22,660.46	226.60	231.02
April 1986	22,656.06	226.56	221.40
May 1986	22,661.22	226.61	211.71
June 1986	22,676.12	226.76	201.94
July 1986	22,700.94	227.01	1,384.35
August 1986	21,543.60	215.44	1,384.35
September 1986	20,374.69	203.75	1,384.35
October 1986	19,194.09	191.94	1,384.35
November 1986	18,001.68	180.02	1,384.35
December 1986	16,797.34	167.97	1,384.35
January	15,580.97	155.81	1,384.35
February 1987	14,352.43	143.52	1,384.35
March 1987	13,111.60	131.12	1,384.35
April 1987	11,858.37	118.58	1,384.35
May 1987	10,592.60	105.93	1,384.35
June 1987	9,314.18	93.14	1,384.35
July 1987	8,022.97	80.23	1,384.35
August 1987	6,718.85	67.19	1,384.35
September 1987	5,401.69	54.02	1,384.35
October 1987	4,071.35	40.71	1,384.35
November 1987	2,727.72	27.28	1,384.35
December 1987	1,370.65	13.71	1,384.35

(The schedule reflects minor adjustments attributable to rounding.)

(iii) The amount of the first six payments ($1,356.62, the amount allocated to interest by the parties with respect to the first six payments) is less than the aggregate amount of interest that accrues for the first six months ($1,360.24). Thus, the aggregate amount of the payments is treated as interest. (The fact that a portion of the first three payments represents a prepayment of interest is of no consequence if A and B are both calendar year taxpayers.) As of July 31, 1986, the amount of accrued and unpaid interest is $230.63 (the interest accruing for the seventh accrual period ($227.01) plus the accrued and unpaid interest from the six preceding accrual periods ($3.62)). Thus, the payment of $1,384.35 due on July 31, 1986, is treat as interest to the extent of the accrued and unpaid interest ($230.63), and the remainder of the payment is treated as principal. The seventeen subsequent payments are treated as interest to the extent interest accrues in the month preceding the payment and as principal to extent of any excess.

Example (8). (i) Assume that on January 1, 1987, A sells personal property (other than new section 38 property) to B for $100,000. The contract for sale calls for 10 annual payments of $14,902.95 (each representing a partial payment of the sales price and interest at 8 percent, compounded annually) beginning with a payment on January 1, 1988, and ending with a payment on January 1, 1997. The allocation by the parties of interest and principal with respect to each $14,902.95 payment follows the Rule of 78s. Thus, under the contract the amount of stated interest for each accural period is as follows:

Accrual period	Stated interest payment	Cumulative stated interest payment
1	$8,914.45	$8,914.45
2	8,023.00	16,937.45
3	7,131.56	24,069.01
4	6,240.12	30,309.13
5	5,348.67	35,657.80
6	4,457.23	40,115.03
7	3,565.78	43,680.81
8	2,674.34	46,355.15
9	1,782.89	48,138.04

Accrual period	Stated interest payment	Cumulative stated interest payment
10	891.45	49,029.49

(ii) Assume that the test and imputed rate of interest applicable to this contract is 9.2 percent, compounded annually, and section 483 is otherwise applicable. Thus, the contract contains unstated interest. The outstanding loan balance (OLB), the interest accrued for each annual period, and the cumulative interest at the end of each accrual period are as follows:

Accrual period	OLB at the beginning of accrual period	Accrued interest	Cumulative interest accrual
1	$94,805.80	$8,722.13	$8,722.13
2	88,624.98	8,153.50	16,875.63
3	81,875.53	7,532.55	24,408.18
4	74,505.13	6,854.47	31,262.65
5	66,456.65	6,114.02	37,376.66
6	57,667.71	5,305.43	42,682.09
7	48,070.19	4,422.46	47,104.55
8	37,589.70	3,458.25	50,562.80
9	26,145.00	2,405.34	52,968.14
10	13,647.39	1,255.56	54,223.70

(iii) The stated interest payment for the first annual accrual period ($8,914.45) exceeds the interest that accrues for the first accrual period ($8,722.13) by $192.32. Thus, the first payment is treated as a payment of accrued interest to the extent of $8,722.13, a prepayment of interest to the extent of $192.32, and a payment of principal to the extent of $5,988.50. A has interest income of $8,914.45 with respect to the payment, but B's interest deduction is limited to $8,722.13. B may deduct the prepayment of interest only as interest accrues during the second accrual period.

(iv) As of January 1, 1989, the total amount of accrued interest is $16,875.63. The amount previously treated as interest is $8,914.45. Thus, the second payment consists of accrued interest to the extent of $7,961.18 (the excess of $16,875.63 over $8,914.45). The amount of stated interest included in the second payment ($8,023.00) exceeds the total amount of accrued interest reduced by the amount of stated interest included in the first payment ($16,875.63 − $8,914.45 = $7,961.18). Accordingly, the second payment is treated as a prepayment of interest to the extent of $61.82 (the excess of $8,023.00 over $7,961.18). The balance of $6,879.95 is treated as a payment of principal.

(v) A has interest income of $8,023.00 with respect to the second payment. B may deduct $7,961.18 of accrued interest with respect to the second payment. The prepayment of interest with respect to the second payment ($61.82) is deductible only as interest accrues during the third accrual period.

(vi) As of January 1, 1990, the total amount of accrued interest is $24,408.18. The amount previously treated as interest is $16,937.45 ($8,914.45 plus $8,023.00). Thus, the third payment consists of accrued interest to the extent of $7,470.73 (the excess of $24,408.18 over $16,937.45). Since the amount of stated interest ($7,131.58) does not exceed the total amount of accrued interest reduced by the amount of stated interest included in the first two payments ($24,408.18 − $16,937.45 = $7,470.73) no portion of the third payment is treated as a prepayment of interest and the balance of the payment ($7,432.22) is treated as principal.

(vii) A has interest income of $7,470.73 with respect to the third payment and B may deduct this amount.

(viii) For the seven remaining payments, the accrued interest exceeds the stated interest. Thus, each payment is treated as interest to the extent of the accrued interest for the preceding accrual period and principal to the extent of the balance of the payment.

(h) *Effective date*—(1) *In general.* This section applies with respect to any lending or deferred payment transaction that occurs after May 8, 1986 and is not pursuant to a written contract that was binding on such date and at all times thereafter before the transaction.

(2) *Transactions subject to section 483.* In the case of deferred payment transactions that do not provide adequate stated interest and to which section 483 is otherwise applicable, this section applies with respect to any transaction to which the amendment made by section 41(b) of the Tax Reform Act of 1984 applies. For rules relating to the circumstances in which the amendment made by that section applies to a transaction, see § 1.483–1(e).

Par. 9. In paragraph (d) of § 1.451–1 the heading and text are revised to read as follows:

§ 1.451–1 General rule for taxable year of inclusion.

* * * * *

(d) *Special rule for inclusion of original issue discount.* For inclusion of original issue discount in respect of certain debt instruments issued after May 27, 1969, see section 1272.

* * * * *

Par. 10. Paragraph (b) of § 1.451–2 is amended by removing the eighth and ninth sentences and adding in their place new sentences to read as follows:

§ 1.451–2 Constructive receipt of income.

* * * * *

(b) *Examples of constructive receipt.* * * * However, in the case of certain deposits made after December 31, 1970, in banks, domestic building and loan associations, and similar financial institutions, the inclusion rules of section 1272 apply. See §§ 1.1232–3A and 1.1272–1. * * *

Par. 11. Paragraph (a)(1)(i) of § 1.454–1 is revised to read as follows:

§ 1.454–1 Obligations issued at discount.

(a) *Certain non-interest bearing obligations issued at discount*—(1) *Election to include increase in income currently.* If a taxpayer owns—

(i) A non-interest bearing obligation issued at a discount and redeemable for fixed amounts increasing at stated intervals (other than adebt instrument issued after May 27, 1969, as to which inclusion of original issue discount is required under section 1272), or

* * * * *

Par. 12. Paragraphs (a) and (c)(2) of § 1.482–2 are revised to read as follows:

§ 1.482–2 Determination of taxable income in specific situations.

(a) *Loans or advances*—(1) *Interest on bona fide indebtedness*—(i) *In general.* Where one member of a group of controlled entities makes a loan or advance directly or indirectly to, or otherwise becomes a creditor of, another member of such group and either charges no interest, or charges interest at a rate which is not equal to an arm's length rate of interest (as defined in paragraph (a)(2) of this section) with respect to such loan or advance, the district director may make appropriate allocations to reflect an arm's length rate of interest for the use of such loan or advance.

(ii) *Application of paragraph (a) of this section*—(A) *Interest on bona fide indebtedness.* Paragraph (a) of this section applies only to determine the appropriateness of the rate of interest charged on the principal amount of a bona fide indebtedness between members of a group of controlled entities, including—

(*1*) Loans or advances of money or other consideration (whether or not evidenced by a written instrument), and

(*2*) Indebtedness arising in the ordinary course of business from sales, leases, or the rendition of services by or between members of the group, or any other similar extension of credit.

(B) *Alleged indebtedness.* This paragraph (a) does not apply to so much of an alleged indebtedness which is not in fact a bona fide indebtedness, even if the stated rate of interest thereon would be within the safe haven rates prescribed in paragraph (a)(2)(iii) of this section. For example, paragraph (a) of this section does not apply to payments with respect to all or a portion of such alleged indebtedness where in fact all or a portion of an alleged indebtedness is a contribution to the capital of a corporation or a distribution by a corporation with respect to its shares. Similarly, this paragraph (a) does not apply to payments with respect to an alleged purchase-money debt instrument given in consideration for an alleged sale of property between two controlled entities where in fact the transaction constitutes a lease of the property. Payments made with respect to alleged indebtedness (including alleged stated interest thereon) shall be treated according to their substance. See § 1.482-2(a)(3)(i).

(iii) *Interest period.* The interest period with respect to a bona fide indebtedness between controlled entities commences on the date the indebtedness arises. However, with respect to indebtedness described in paragraph (a)(1)(ii)(A)(2) of this section that is not evidenced by a written instrument requiring payment of interest, the interest period is not required to commence until a date sixty days (six months in the case of such indebtedness arising before [Insert date after date this document is published in the **Federal Register** as a final rule]) after the date the indebtedness arises, or until a later date if the taxpayer is able to demonstrate that either it or others in its industry, as a regular trade practice, permit comparable balances in the case of similar transactions with unrelated parties to remain outstanding for a longer period without charging interest.

(iv) *Payment; book entries.* In determining the period of time for which a balance is outstanding, payments or credits shall be applied first against any accrued interest and then against the earliest balance outstanding; however, the taxpayer may apply such payments or credits in some other order on its books in accordance with an agreement or understanding of the parties if the taxpayer can demonstrate that either it or others in its industry, as a regular trade practice, enter into such agreements or understandings in the case of similar balances with unrelated parties.

(2) *Arm's length interest rate*—(i) *In general.* For purposes of section 482 and paragraph (a) of this section, an arm's length rate of interest shall be a rate of interest which was charged, or would have been charged, at the time the indebtedness arose, in independent transactions with or between unrelated parties under similar circumstances. All relevant factors shall be considered, including the principal amount and duration of the loan, the security involved, the credit standing of the borrower, and the interest rate prevailing at the situs of the lender or creditor for comparable loans between unrelated parties.

(ii) *Funds obtained at situs of borrower.* Notwithstanding the other provisions of paragraph (a)(2) of this section, if the loan or advance represents the proceeds of a loan obtained by the lender at the situs of the borrower, the arm's length rate for any taxable year shall be equal to the rate actually paid by the lender increased by an amount which reflects the costs or deductions incurred by the lender in borrowing such amounts and making such loans, unless the taxpayer establishes a more appropriate rate under the standards set forth in paragraph (a)(2)(i) of this section.

(iii) *Safe haven interest rates for certain loans and advances made after May 8, 1986*—(A) *Applicability*—(*1*) *General rule.* Except as otherwise provided in paragraph (a)(2) of this section, paragraph (a)(2)(iii)(B) applies with respect to the rate of interest charged and to the amount of interest paid or accrued in any taxable year—

(*i*) Under a term loan or advance between members of a group of controlled entities where (except as provided in paragraph (a)(2)(iii)(A)(*2*)(*ii*)) the loan or advance is entered into after May 8, 1986, and

(*ii*) After May 8, 1986 under a demand loan or advance between such controlled entities.

(*2*) *Grandfather rule for existing loans.* The safe haven rates prescribed in paragraph (a)(2)(iii)(B) of this section shall not apply, and the safe haven rates prescribed in 26 CFR § 1.482-2(a)(2)(iii) (revised as of April 1, 1985) shall apply to—

(i) Term loans or advances made before May 9, 1986 proposed rule, and

(ii) Term loans or advances made before August 7, 1986, pursuant to a binding written contract entered into before May 9, 1986.

(B) *Safe haven interest rate based on applicable Federal rate.* Except as otherwise provided in this paragraph (a)(2), in the case of a loan or advance between members of a group of controlled entities, an arm's length rate of interest referred to in paragraph (a)(2)(i) of this section shall be for purposes of Chapter 1 of the Code—

(*1*) The rate of interest actually charged if that rate is—

(i) Not less than 100 percent of the applicable Federal rate (the "lower limit"), and

(ii) Not greater than 130 percent of the applicable Federal rate (the "upper limit"), or

(*2*) If either no interest is charged or if the rate of interest charged is less than the lower limit, then an arm's length rate of interest shall be equal to the lower limit, compounded semiannually, or

(*3*) If the rate of interest charged is greater than the upper limit, then an arm's length rate of interest shall be equal to the upper limit, compounded semiannually,

unless the taxpayer establishes a more appropriate compound rate of interest under paragraph (a)(2)(i) of this section. However, if the compound rate of interest actually charged is greater than the upper limit and less than the rate determined under paragraph (a)(2)(i) of this section, or if the compound rate actually charged is less than the lower limit and greater than the rate determined under paragraph (a)(2)(i), then the compound rate actually charged shall be deemed to be an arm's length rate under paragraph (a)(2)(i). In the case of any sale-leaseback described in section 1274(*e*), the lower limit shall be 110 percent of the applicable Federal rate, compounded semiannually.

(C) *Applicable Federal rate.* For purposes of paragraph (a)(2)(iii)(B) of this section, the term "applicable Federal rate" means, in the case of a loan or advance to which this section applies and having a term of—

(*1*) Not over 3 years, the Federal short-term rate,

(*2*) Over 3 years but not over 9 years, the Federal mid-term rate, or

(*3*) Over 9 years, the Federal long-term rate,

as determined under section 1274(d) in effect on the date such loan or advance is made. In the case of any sale or exchange between controlled entities, the lower limit shall be the lowest of the applicable Federal rates in effect for any month in the 3-calendar-month period ending with the first calendar month in which there is a binding written contract in effect for such sale or exchange (the "lowest 3-month rate", as defined in section 1274(d)(2)). In the case of a demand loan or advance to which this section applies, the "applicable Federal rate" means the Federal short-term rate determined under section 1274(d) (determined without regard to the lowest 3-month short term rate determined under section 1274(d)(2)) in effect for each day on which any amount of such loan or advance (including unpaid accrued interest determined under paragraph (a)(2) of this section) is outstanding.

(D) *Lender in business of making loans.* If the lender in a loan or advance transaction to which paragraph (a)(2) of this section applies is regularly engaged in the trade or business or making loans or advances to unrelated parties, the safe haven rates prescribed in paragraph (a)(2)(iii)(B) shall not apply, and the arm's length interest rate to be used shall be determined under the standards described in paragraph (a)(2)(i), including reference to the interest rates charged in such trade or business by the lender on loans or advances of a similar type made to unrelated parties at and about the time the loan or advance to which paragraph (a)(2) of this section applies was made.

(E) *Foreign currency loans.* The safe haven interest rates prescribed in paragraph (a)(2)(iii)(B) of this section do not apply to any loan or advance the principal or interest of which is expressed in a currency other than U.S. dollars. A loan or advance the interest or principal of which may be repaid at the option of either the lender or the borrower in or by reference to a fixed amount of U.S. dollars is not a loan or advance described in the preceding sentence.

(3) *Coordination with interest adjustments required under certain other Code sections.* If the stated rate of interest on the stated principal amount of a loan or advance between controlled entities is subject to adjustment under section 482 and is also subject to adjustment under any other section of the Code (for example, section 467, 483, 1274 or 7872), section 482 and paragraph (a) of this section may be applied to such loan or advance in addition to such other Code section. After the enactment of the Tax Reform Act of 1984, Pub. L. 98–369, and the enactment of Pub. L. 99–121, such other Code sections include sections 467, 483, 1274 and 7872. The order in which the different provisions shall be applied is as follows:

(i) First, the substance of the transaction shall be determined; for this purpose, all the relevant facts and circumstances shall be considered and any law or rule of law (assignment of income, step transaction, etc.) may apply. Only the rate of interest with respect to the stated principal amount of the bona fide indebtedness (within the meaning of paragraph (a)(1) of this section), if any, shall be subject to adjustment under section 482, paragraph (a) of this section, and any other Code section.

(ii) Second, the other Code section shall be applied to the loan or advance to determine whether any amount other than stated interest is to be treated as interest, and if so, to determine such amount according to the provisions of such other Code section.

(iii) Third, whether or not the other Code section applies to adjust the amounts treated as interest under such loan or advance, section 482 and paragraph (a) of this section may then be applied by the district director to determine whether the rate of interest charged on the loan or advance, as adjusted by any other Code section, is greater or less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

(iv) Fourth, section 482 and paragraphs (b) through (e) of this section, if applicable, may be applied by the district director to make any appropriate allocations, other than an interest rate adjustment, to reflect an arm's length transaction based upon the principal amount of the loan or advance and the interest rate as adjusted under paragraph (a)(3) (i), (ii) or (iii) of this section. For example, assume that two commonly controlled taxpayers enter into a deferred payment sale of tangible property and no interest is provided, and assume also that section 483 is applied to treat a portion of the stated sales price as interest, thereby reducing the stated sales price. If after this recharacterization of a portion of the stated sales price as interest, the recomputed sales price does not reflect an arm's length sales price under the principles of paragraph (e) of this section, the district director may make other appropriate allocations (other than an interest rate adjustment) to reflect an arm's length sales price.

(4) *Examples.* The principles of paragraph (a)(3) of this section may be illustrated by the following examples:

Example (1). An individual, A, transfers $20,000 to a corporation controlled by A in exchange for the corporation's note which bears adequate stated interest. The district director recharacterizes the transaction as a contribution to the capital of the corporation in exchange for preferred stock. Under paragraph (a)(3)(i) of this section, section 1.482–2(a) does not apply to the transaction because there is no bona fide indebtedness.

Example (2). B, an individual, is an employee of Z corporation, and is also the controlling shareholder of Z. Z makes a demand loan of $15,000 to B at a rate of interest that is less than the applicable Federal rate. In this instance the other operative Code section is section 7872. Under section 7872(b), the difference between the amount loaned and the present value of all payments due under the loan using a discount rate equal to 100 percent of the applicable Federal rate is treated as an amount of cash transferred from the corporation to B and such amount is treated as interest. Under paragraph (a)(3)(iii) of this section, section 482 and paragraph (a) of this section may also be applied by the district director to determine if the rate of interest charged on this $15,000 loan (100 percent of the AFR, compounded semiannually, as adjusted by section 7872) is an arm's length rate of interest. Because the rate of interest on the loan, as adjusted by section 7872, is within the safe haven range of 100–130 percent of the AFR, compounded semiannually, no further interest rate adjustments under section 482 and paragraph (a) of this section will be made to this loan.

Example (3). The facts are the same as in example (2) except that the amount lent by Z to B is 9,000, and that amount is the aggregate outstanding amount of loans between Z and B. Under the $10,000 *de minimis* exception of section 7872(c)(3), no adjustment for interest will be made to this $9,000 loan under section 7872. Under paragraph (a)(3)(iii) of this section, the district director may apply section 482 and paragraph (a) of this section to this $9,000 loan to determine whether the rate of interest charged is less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

Example (4). X and Y are commonly controlled taxpayers. At a time when the applicable Federal rate is 12 percent, compounded semiannually, X sells property to Y in exchange for a note with a stated rate of interest of 18 percent, compounded semiannually. Assume that the other applicable Code section to the transaction is section 483. Section 483 does not apply to this transaction because, under section 483(d), there is no total unstated interest under the contract using the test rate of interest equal to 100 percent of the applicable Federal rate. Under paragraph (a)(3)(iii) of this section, section 482 and paragraph (a) of this section may be applied by the district director to determine whether the rate of interest under the note is excessive, that is, to determine whether the 18 percent stated interest rate under the note exceeds an arm's length rate of interest.

Example (5). Assume that A and B are commonly controlled taxpayers and that the applicable Federal rate is 10 percent, compounded semiannually. On June 30, 1986, A sells property to B and receives in exchange B's purchase-money note in the amount of $2,000,000. The stated interest rate on the note is 9%, compounded semiannually, and the stated redemption price at maturity on the note is $2,000,000. Assume that the other applicable Code section to this transaction is section 1274. Because the stated principal amount of B's note does not exceed $2,800,000, the discount rate used for purposes of section 1274 will be 9 percent, compounded semiannually, see section 1274A. Section 1274 does not apply to this transaction because there is adequate stated interest on the debt instrument using a discount rate equal to 9%, compounded semiannually, and the stated redemption price at maturity does not exceed the stated principal amount. Under paragraph (a)(3)(iii) of this section, the district director may apply section 482 and paragraph (a) of this section to this $2,000,000 note to determine whether the 9% rate of interest charged is less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

* * * * *

(c) *Use of tangible property* * * *

(2) *Arm's length charge*—(i) *In general.* For purposes of paragraph (c) of this section, an arm's length rental charge shall be the amount of rent which was charged, or would have been charged for the use of the same or similar property, during the time it was in use, in independent transactions with or between unrelated parties under similar circumstances considering the

period and location of the use, the owner's investment in the property or rent paid for the property, expenses of maintaining the property, the type of property involved, its condition, and all other relevant facts.

(ii) *Safe haven rental charge.* See 26 CFR § 1.482–2(c)(2)(ii) (revised as of April 1, 1985), for the determination of safe haven rental charges in the case of certain leases entered into before May 9, 1986, and for leases entered into before August 7, 1986, pursuant to a binding written contract entered into before May 9, 1986.

(iii) *Subleases.* (A) Except as provided in paragraph (c)(2)(iii)(B) of this section, where possession, use, or occupancy of tangible property, which is leased by the owner (lessee) from an unrelated party is transferred by sublease or other arrangement to the user, an arm's length rental charge shall be considered to be equal to all the deductions claimed by the owner (lessee) which are attributable to the property for the period such property is used by the user. Where only a portion of such property was transferred, any allocations shall be made with reference to the portion transferred. The deductions to be considered include the rent paid or accrued by the owner (lessee) during the period of use and all other deductions directly and indirectly connected with the property paid or accrued by the owner (lessee) during such period. Such deductions include deductions for maintenance and repair, utilities, management and other similar deductions.

(B) The provisions of paragraph (c)(2)(iii)(A) of this section shall not apply if either—

(*1*) The taxpayer establishes a more appropriate rental charge under the general rule set forth in paragraph (c)(2)(i) of this section, or

(*2*) During the taxable year, the owner (lessee) or the user was regularly engaged in the trade or business of renting property of the same general type as the property in question to unrelated persons.

* * * * *

Par. 13. Sections 1.483–1 and 1.483–2 are revised and new §§ 1.483–3 through 1.483–5 are added immediately after § 1.483–2. The revised and added provisions read as follows:

§ 1.483–1 Interest on certain deferred payments.

(a) *Amount constituting interest in certain deferred payment transaction*—(1) *In general.* Section 483 applies, subject to the exceptions and limitations of paragraph (c) (2) and (3) of this section, to a contract for the sale or exchange of property if—

(i) The sale or exchange is described in paragraph (c)(1) of this section,

(ii) The contract provides for payments due more than one year after the date of the sale or exchange, and

(iii) The contract does not provide for adequate stated interest (within the meaning of § 1.483–2).

For purposes of section 483, the term sale or exchange includes any transaction treated as a sale or exchange for tax purposes. Section 483 may apply to a contract whether the contract is express (written or oral) or implied. In general, all payments made after the date of a sale or exchange are considered as made under a contract for that sale or exchange. For purposes of section 483, the term "property" includes debt instruments and investment units, but does not include money, services, or the right to use property. For the treatment of certain payments for use of property or services, see sections 404 and 467.

(2) *Treatment of contracts to which section 483 applies*—(i) *In general.* A contract that does not provide for adequate stated interest contains unstated interest. For rules relating to the treatment of unstated interest, see paragraph (a)(2)(ii) of this section. For rules relating to the determination of the total amount of unstated interest, see § 1.483–3. For rules relating to the method of accounting for interest (including unstated interest) under a contract to which section 483 applies, see § 1.446–2.

(ii) *Treatment of unstated interest.* If section 483 applies to a contract, unstated interest under the contract is treated as interest for tax purposes. Thus, for example, unstated interest is not treated as part of the amount realized from the sale or exchange of property (in the case of the seller) or as part of the cost of the property (in the case of the purchaser), and is generally not included in the basis to the purchaser of any property acquired in the sale or exchange.

(iii) *Certain transactions between related parties.* For rules relating to the determination of basis of property in certain transactions between related parties, see § 1.1012–2.

(b) *Deferred payments*—(1) *In general.* For purposes of section 483, a deferred payment means any payment on account of the sale or exchange that constitutes all or part of the sales price (as defined in paragraph (b)(2) of this section), and that is due more than 6 months after the date of the sale or exchange. A payment may be made in the form of cash, stock or securities, or other property (except as provided in paragraph (b)(3) of this section).

(2) *Meaning of sales price.* For purposes of section 483, the sales price with respect to any sale or exchange means the amount due under the contract (other than interest provided in the contract), and the amount of any liability included in the amount realized from the sale or exchange (see § 1.1001–2). Thus, the sales price with respect to any sale or exchange includes any amount of unstated interest under the contract.

(3) *Treatment of debt instruments.* For purposes of section 483, a debt instrument of a purchaser which is given in consideration for the sale or exchange of property is not a payment, and any payment due under the debt instrument is to be treated as due under the contract for the sale of exchange. For the meaning of the term "debt instrument," see section 1275(a)(1) and § 1.1275–1(b).

(c) *Transactions to which section 483 may apply*—(1) *In general.* Section 483 may apply only in the case of a sale or exchange of property to which section 1274 does not apply by reason of—

(i) Section 1274(c)(4)(A) and § 1.1274–1(b)(2), relating to certain sales or exchanges of farms for $1,000,000 or less;

(ii) Section 1274(c)(4)(B) and § 1.1274–1(b)(3), relating to certain sales or exchanges of principal residences;

(iii) Section 1274(c)(4)(C) and § 1.1274–1(b)(4), relating to sales or exchanges for which the total payments do not exceed $250,000;

(iv) Section 483(e) and § 1.483–4(b)(2), relating to qualified sales; or

(v) Section 1274A(c)(2) and § 1.1274A–1(c), relating to cash method debt instruments.

(2) *Exceptions to the application of section 483*—(i) *Publicly traded debt instruments or property.* Section 483 does not apply to any debt instrument to which section 1273(b)(3) applies. Thus, section 483 does not apply to any contract for the sale of property if the only deferred payments are required under a publicly traded debt instrument. Similarly, section 483 does not apply to any contract for the sale or exchange of publicly traded property.

(ii) *Sales price of $3,000 or less.* Section 483 does not apply to a contract for the sale or exchange of property if it can be determined at the time of the sale or exchange that the sales price (within the meaning of paragraph (b)(2) of this section) cannot exceed $3,000. If it cannot be determined at the time of the sale or exchange that the sales price cannot exceed $3,000, this exception does not apply even if the sales price eventually paid for the property is less than $3,000. For purposes of determining whether the sales price of property exceeds $3,000, all sales or exchanges which are part of the same transaction (or a series of related transactions) shall be aggregated in accordance with the rules in § 1.1274A–1(d).

(iii) *Certain transfers subject to section 1041.* Section 483 does not apply to any transfers of property subject to section 1041 (relating to transfers of property between spouses or incident to divorce).

(3) *Limitations on the application of section 483—*(i) *Carrying charges.* In the case of the purchaser, the tax treatment of amounts paid on account of the sale or exchange of property shall be determined without regard to section 483 if such amounts are treated under section 163(b) (relating to deduction for interest on certain installment purchases) as if they include interest. Thus, the purchaser computes interest deductions with respect to payments under a contract to which section 163(b) applies under that section and without regard to section 483, even though the amount treated as interest under section 163(b) differs from the amount treated as interest income by the seller under section 483.

(ii) *Certain sales of patents.* Section 483 does not apply to any amount payable with respect to a transfer by an individual seller (holder) described in section 1235 (relating to sales or exchanges or patents) that is contingent on the productivity, use, or disposition of the property transferred.

(iii) *Transactions involving personal use property—*(A) *Treatment of obligors.* Section 483 does not apply to an obligor (issuer) under a debt instrument given in consideration for the sale or exchange of property that is personal use property (within the meaning of section 1275(b)(3) and § 1.1275–2(f)(3)) in the hands of the issuer. Thus, in the case of the issuer, the tax treatment of any amount payable under such debt instrument is determined without regard to section 483 and the regulations thereunder.

(B) *Treatment of certain obligees.* Section 483 does not apply to an obligee (holder) under a debt instrument that (1) is given in consideration for the sale or exchange of property that is personal use property (within the meaning of section 1275(b)(3) and § 1.1275–2(f)(3)) in the hands of the issuer, and (2) evidences a loan described in section 7872(c)(1)(A) (relating to gift loans), 7872(c)(1)(B) (relating to compensation-related loans), or 7872(c)(1)(C) (relating to corporation-shareholder loans). For rules relating to the treatment of loans described in the preceding sentence, see section 7872 and the regulations thereunder.

(iv) *Transactions involving certain demand loans.* Section 483 does not apply to any payment under a debt instrument that evidences a demand loan (within the meaning of section 7872(f)(5)) described in section 7872(c)(1)(A) (relating to gift loans), 7872(c)(1)(B) (relating to compensation-related loans), or 7872(c)(1)(C) (relating to corporation-shareholder loans). For rules relating to the treatment of loans described in the preceding sentence, see section 7872 and the regulations thereunder.

(v) *Transactions involving certain annuity contracts.* Section 483 does not apply to any payment under an annuity contract described in section 1275(a)(1)(B) (relating to annuity contracts excluded from the definition of debt instrument).

(d) *Modifications and assumptions.* A modification of a debt instrument shall be treated as a sale or exchange of property for purposes of section 483 if the modified debt instrument would be treated under § 1.1274–1(c) as a new debt instrument given in consideration for the unmodified debt instrument. In addition, debt instruments assumed or taken subject to in connection with a sale or exchange shall be treated for purposes of section 483 in a manner consistent with the rules of § 1.1274–7. Thus, for example, if a debt instrument assumed in connection with a sale or exchange is not modified as part of the sale or exchange, section 483—

(1) Shall not apply to any payment under the debt instrument in the case of a sale or exchange occurring after June 30, 1985, or a debt instrument issued before October 16, 1984; and

(2) Shall apply to payments under the debt instrument (except as provided in § 1.1274–7(b)(3) and section 44(b)(7) of the Tax Reform Act of 1984 (as amended by Pub. L. 98–612)) solely for purposes of determining the tax consequences of the sale or exchange to the buyer in the case of a debt instrument issued after October 15, 1984, and assumed in connection with a sale or exchange occurring before July 1, 1985.

(e) *Effective date.* Sections 1.483–1 through 1.483–5 apply, except as otherwise provided in this paragraph (e), to any sale or exchange occurring after December 31, 1984, unless the sale or exchange is made pursuant to a written contract (including an irrevocable written option) which was binding on March 1, 1984. For this purpose, a sale or exchange is not made pursuant to a written contract which was binding on March 1, 1984, if a substantial modification (within the meaning of § 1.1274–6(e)(1)(iii)) in the terms of a contract occurs after March 1, 1984, and before the sale or exchange. Sections 1.483–1 through 1.483–5 shall not apply to any modification of a debt instrument arising from a sale or exchange unless the debt instrument arises from a sale or exchange to which such sections apply (within the meaning of this paragraph (e)) or the debt instrument is assumed or taken subject to in connection with, and the modification is part of, such a sale. For rules relating to sales or exchanges occurring before January 1, 1985, sales or exchanges pursuant to a written contract (including an irrevocable written option) which was binding on March 1, 1984, and modifications of debt instruments to which §§ 1.483–1 through 1.483–5 do not apply by reason of the preceding sentence, see section 44(b)(3) of the Tax Reform Act of 1984, section 483 as in effect before its amendment by section 41(b) of the Tax Reform Act of 1984, and 26 CFR 1.483–1 and 1.483–2 (revised as of April 1, 1985).

§ 1.483–2 Adequate stated interest.

(a) *In general.* This section prescribes rules for determining whether a contract for the sale or exchange of property provides for adequate stated interest. The rules prescribed by this section apply to any contract whether the contract calls for the payment of principal in a lump sum, the periodic payment of principal, or irregular payments of principal. A contract generally provides for adequate stated interest if it calls for interest on the outstanding principal balance at a rate (with an appropriate compounding period) at least equal to the test rate of interest. For rules relating to the determination of the test rate of interest and rules relating to the appropriate compounding period, see § 1.483–4. Paragraph (b) of this section provides rules for determining adequate stated interest (except with respect to certain cash method debt instruments) if the contract provides for a fixed rate of interest and compounding or payment of interest at regular intervals. Paragraph (c) of this section provides rules for determining adequate stated interest in the case of contracts that do not satisfy the requirements of paragraph (b) of this section. For special rules relating to contracts calling for variable rates of interest, see paragraph (d) of this section. For special rules relating to contracts calling for contingent payments of interest, see paragraph (e) of this section.

(b) *Certain contracts that provide for a stated rate of interest*—(1) *In general.* A contract provides for adequate stated interest if on the date of the sale or exchange—

(i) The contract provides for interest on the outstanding principal balance due under the contract (the stated rate of interest) at a fixed rate;

(ii) The stated rate of interest is no lower than the test rate of interest (based on the appropriate compounding period);

(iii) The contract requires interest to be paid or compounded at the end of each compounding period for the entire term of the contract; and

(iv) In the case of a cash method debt instrument (within the meaning of section 1274A (c)(2) and § 1.1274A–1(c)), such debt instrument is not received in exchange for property in a potentially abusive situation (as defined in § 1.1274–4(g)).

For rules relating to the determination of adequate stated interest in the case of contracts that do not satisfy the requirements of this paragraph (b)(1), see paragraph (c) of this section. For rules relating to the test rate of interest, see § 1.483–4. For rules relating to the appropriate compounding period, see § 1.483–4(c).

(2) *Interest payable for a short period*—(i) *In general.* The stated rate of interest is a fixed rate within the meaning of paragraph (b)(1) of this section only if it also applies for short periods (that is, any period shorter than the compounding period on which the test rate of interest is based). For this purpose, the stated rate of interest applies for short periods if the interest payable for a short period is determined by either of the two alternative methods prescribed by this paragraph (b)(2), or by any other reasonable method.

The methods prescribed by this paragraph (b)(2) are the exact method and the approximate method. An example of another reasonable method is monthly compounding which reflects compounding of interest at the end of each month, with simple interest within a month. For this purpose and for purposes of determining the fraction (f) with respect to a short period under paragraph (b)(2) (ii) and (iii) of this section, a convention that assumes that a year consists of 12 30-day months may be adopted.

(ii) *Exact method.* The exact method assumes daily compounding of interest. Under this method, the amount of interest payable on an outstanding principal amount (P) for any short period is equal to the result of the following formula:

$I=P\times[(1+i/k)^{f}-1]$

In which:

I = Interest payable for the short period
i = The stated rate of interest expressed as a decimal
k = The number of compounding periods on which the stated rate of interest is based that are contained in a year
f = A fraction, the numerator of which is the length of the short period, and the denominator of which is the length of the full compounding period on which the stated rate of interest is based.

For illustrations of the application of the formula for the exact method, see paragraph (b)(3) of this section, examples (4), (6) and (8).

(iii) *Approximate method.* The approximate method is also provided for the convenience of taxpayers who do not desire to use the exact method. The approximate method assumes simple interest within any compounding period and always produces an amount of interest for the short period that is slightly higher than the amount of interest produced under the exact method. Under this method, the amount of interest payable on an outstanding principal amount for a short period is determined by multiplying the amount of stated interest for a full period by a fraction, the numerator of which is equal to the length of the short period and the denominator of which is the length of the full period. Thus, the amount of interest payable on an outstanding principal amount (P) for a short period is equal to the result of the following formula:

$I=P\times(i/k)\times f$

In which:

I = Interest payable for the short period
i = The stated rate of interest expressed as a decimal
k = The number of compounding periods on which the stated rate of interest is based that are contained in a year
f = A fraction, the numerator of which is the length of the short period, and the denominator of which is the length of the full compounding period on which the stated rate of interest is based.

For illustrations of the application of the formula for the appropriate method, see paragraph (b)(3) of this section, examples (5) and (7).

(3) *Examples.* The provisions of paragraph (b) of this section may be illustrated by the following examples:

Example (1). Assume that a contract for the sale of nonpublicly traded personal property calls for a $100,000 payment of principal at the end of a 10–year term and 20 semiannual payments of interest of $4,500 on the outstanding balance of the principal. The appropriate compounding period is semiannual. The test rate of interest is 9 percent based on semiannual compounding. The contract provides for adequate stated interest because it provides for interest equal to the 9 percent test rate of interest payable semiannually, the compounding period for the test rate.

Example (2). The facts are the same as in example (1), except that the debt instrument calls for 10 annual interest payments of $9,000. The appropriate compounding period is annual. The test rate of interest is 9.20 percent based on annual compounding. The contract does not provide for adequate stated interest because it does not provide for interest equal to 9.20 percent compounded annually, the rate of interest equivalent to 9 percent compounded semiannually.

Example (3). On May 1, 1986, A sells B nonpublicly traded personal property under a contract that calls for B to make a principal payment of $200,000 and 9.00 percent interest, $9,000 payable on June 30 and December 31 of each year beginning on December 31, 1986. The compounding period is semiannual. Assume that the debt instrument is a cash method debt instrument that is not received in exchange for property in a potentially abusive situation. The test rate of interest is 9 percent, compounded semiannually. Even though the contract calls for a stated rate of interest no lower than the test rate of interest, the contract does not provide for adequate stated interest because the stated rate of interest does not apply for the short period from May 1, 1986, through June 30, 1986.

Example (4). The facts are the same as in example (3), except that the contract calls for a payment of interest on June 30, 1986, for the period from May 1, 1986, through June 30, 1986 (one-third of a full compounding period). Under the exact method, the contract provides for adequate stated interest (that is, interest of 9 percent compounded semiannually) if the amount of interest payable on the outstanding principal balance for the short period is $2,956.09 determined as follows:

$\$200{,}000\times(1+.09/2)^{1/3}-1]=\$2{,}956.09$

Example (5). The facts are the same as in example (4), except that the amount payable on the outstanding principal balance for the short period is determined under the approximate method. Under the approximate method, the amount of stated interest payable for the short period is $3,000 determined as follows:

$\$200{,}000\times(.09/2)\times 1/3)=\$3{,}000$

Example (6). The facts are the same as in example (4), except that the sale occurs on May 20, 1986. Assume that a convention that assumes that a year consists of 12 30–day months is adopted for purposes of determining the fraction (f) with respect to the short period. Thus, f is 42/180 of the semiannual period. Under the exact method, the interest payable on June 30, 1986, for the short period is $2,064.71 determined as follows:

$\$200{,}000\times[(1+.09/2)42/180-1]=\$2{,}064.71$

Example (7). The facts are the same as in example (6), except that interest payable for the short period is determined under the approximate method. Under this method, the amount of interest payable on June 30, 1986, for the short period is $2,100.00 determined as follows:

$200,000 × (.09/2) × (42/180) = $2,100.00

Example (8). Assume that on July 4, 1986, personal property is sold for $88,000. The contract calls for an $8,000 down payment and monthly payments of $634.51 (consisting of 8.84 percent interest on the unpaid balance of the principal and a partial payment of principal) due on the first of each month for a period of 30 years beginning on September 1, 1986. In addition, the contract calls for an advance interest payment of $549.91 for the period from July 4, 1986, through July 31, 1986. The compounding period is monthly and the test rate of interest based on monthly compounding is 8.84 percent. The contract provides for adequate stated interest because it calls for interest payable at the stated rate of interest (8.84 percent) for the short period calculated under the exact method ($80,000 × [(+.0884/12)28/30 − 1] = $549.91), and interest for the remaining term of the contract at a rate of 8.84 percent payable monthly, the compounding period for the test rate.

(c) *Contracts that do not meet the requirements of paragraph (b)(1) of this section*—(1) *In general.* This paragraph (c)(1) applies to contracts and cash method debt instruments that do not meet the requirements of paragraph (b)(1) of this section.

A contract or cash method debt instrument to which this paragraph (c)(1) applies provides for adequate stated interest only if the sum of the deferred payments due under the contract or debt instrument does not exceed the amount described in paragraph (c)(2) of this section.

(2) *Amount described in paragraph (c)(2) of this section.* The amount described in this paragraph (c)(2) is—

(i) The sum of the present value of the deferred payments and any stated interest payments due under the contract; or

(ii) In the case of a cash method debt instrument (within the meaning of section 1274A(c)(2) and § 1.1274A-1(c)) received in exchange for property in a potentially abusive situation (as defined in § 1.1274-4(g)), the fair market value of such property reduced by the fair market value of any consideration other than the debt instrument.

(3) *Determination of present values.* For purposes of paragraph (c)(2) of this section, the present value of any payment is determined in accordance with the rules of § 1.483-3(b) except that the payment is discounted at the test rate of interest (as defined in § 1.483-4), and the approximate method as prescribed in § 1.1274-5(d)(2)(iii) or any other reasonable method may be used to determine the amount of discount for a short period. In addition, for purposes of determining the fraction (f) with respect to a short period, the use of the convention that assumes that a year consists of 12 30-day months is optional.

(4) *Examples.* The provisions of this paragraph (c) may be illustrated by the following examples:

Example (1). Assume that A sells B nonpublicly traded personal property for $60,000. The contract for sale calls for a lump sum payment of $150,000 (consisting of the $60,000 sales price and a $90,000 payment of interest) due in 10 years. The contract does not call for the compounding of interest at the end of each compounding period over the entire term of the contract. Accordingly, the contract provides for adequate stated interest only if the deferred payment does not exceed the present value of the deferred payment and the interest payment. Based on annual compounding (an appropriate compounding period), the test rate of interest is 9.20 percent. At a discount rate of 9.20 percent, the present value of the deferred payment and the interest payment is $62,210.67. Since the deferred payment of $60,000 does not exceed $62,210.67, the contract provides for adequate stated interest.

Example (2). Assume that in a potentially abusive situation, a contract for the sale of nonpublicly traded personal property calls for the issue of a cash method debt instrument with a stated principal amount of $700,000. No other consideration is given. The debt instrument calls for annual compounding of interest over its entire term at a rate of 9.20 percent (the test rate of interest applicable to the debt instrument). Thus, the present value of the deferred payment and the interest payments is $700,000. The fair market value of the property is $500,000. A cash debt method debt instrument received in exchange for property in a potentially abusive situation provides for adequate stated interest only if the deferred payment does not exceed the fair market value of the property. Since the deferred payment ($700,000) exceeds the fair market value of the property ($500,000), the debt instrument does not provide for adequate stated interest.

(d) *Treatment of contracts calling for variable rates of interest based on an interest index*—(1) *In general.* Except as provided in paragraphs (d) (2) and (3) of this section, a contract that calls for deferred payments under a variable rate debt instrument (within the meaning of § 1.1275-5) shall be treated for purposes of determining whether the contract provides for adequate stated interest as if the rate of interest determined under the index were a fixed rate equal to the rate of interest determined under the index as of the date when the test rate of interest is determined (see § 1.483-4). Thus, for any period in which interest is payable at a rate determined under the index, the rate of interest fixed by the index as of the date the test rate of interest is determined is treated for purposes of paragraph (b) of this section as the stated rate of interest, and is used to determine the amount of any stated interest payment for purposes of paragraph (c) of this section.

(2) *Limitation on increases in rate.* In the case of a contract that limits the number of percentage or basis points by which the rate of interest can vary from one period to the next—

(i) Paragraph (d)(1) of this section shall apply only if, for each period, the limitation permits the rate of interest to increase by at least as many percentage of basis points as such rate is permitted to decrease; and

(ii) Paragraph (a)(2) of § 1.1274-6 shall not apply if, by reason of such limitation, the number of percentage points by which the rate (based on annual compounding) can increase for any period is less than ½ of the number of months in the adjustment interval preceding such period.

For illustrations of the application of this paragraph (d)(2), see § 1.1274-3(d)(1)(v), examples (2), (3), (4) and (5).

(3) *Ceiling on variable rate of interest.* Paragraph (d)(1) of this section shall not apply to any contract that places a ceiling on the maximum rate of interest payable under the debt instrument unless—

(i) The excess of the rate initially fixed by the index over the test rate of interest plus the excess of the maximum rate permitted by the ceiling over the test rate is at least equal to 5 percentage points, and

(ii) In the case of a debt instrument with a term that exceeds 3 years, the maximum rate permitted by the ceiling is at least equal to the test rate of interest determined without regard to § 1.1274-6(a)(2) plus the difference between such rate and the actual test rate of interest.

For illustrations of the application of this paragraph (d)(3), see § 1.1274-3(d)(1)(v), examples (6), (7) and (8).

(4) *Treatment of payment if variable rate of interest rules do not apply.* If paragraph (d)(1) of this section does not apply to a contract, variable payments of interest under the contract are contingent payments of interest subject to the rules of § 1.483-5, but only to the extent such variable payments exceed the minimum payments of interest permitted under the contract. For this purpose, the minimum payment of interest permitted under the contract for any period shall be determined by taking into account any floor on the minimum rate of interest payable under the contract and, in the case of a contract described in paragraph (d)(2) of this section, the maximum permissible decrease in the interest rate for each period during the term of the contract.

(5) *Examples.* The provisions of this paragraph (d) may be illustrated by the following examples:

Example (1). Assume that a contract for the sale of nonpublicly traded property calls for the issue of a debt instrument in the principal amount of $75,000 due in ten years. The debt instrument calls for interest payable semiannually at a rate of 3 percentage points above the yield on 6-month Treasury bills for the mid-point of the semiannual period of the interest payment. The debt instrument is a variable rate debt instrument within the meaning of § 1.1275-5. The test rate of interest applicable to the debt instrument is 9 percent, compounded semiannually. Assume that the yield on 6-month Treasury bills on the date of the binding written contract for the sale is 8.89 percent. Thus, the debt instrument is tested for adequate stated interest as if it provided for a stated rate of interest of 11.89 percent (3 percent plus 8.89 percent), compounded semiannually, payable over its entire term. Since the test rate of interest is 9 percent, compounded semiannually, and the debt instrument is treated as providing for stated interest of 11.89 percent payable semiannually, the debt instrument provides for adequate stated interest.

Example (2). The facts are the same as in example (1), except that the interest payable at a rate equal to 3 percentage points above the yield on 6-month Treasury bills begins in the fourth year of the debt instrument. In the first, second, and third years of the debt instrument interest is payable semiannually at annual rates of 7, 8 and 9 percent, respectively. Thus, the debt instrument is treated as providing interest payable as follows:

Semiannual period	Interest rate [1]	Interest amount per period
1-2	7	$2,625.00
3-4	8	3,000.00
5-6	9	3,375.00
7-20	11.89	4,458.75

[1] Percent.

Since the debt instrument does not provide for interest payable at a rate at least equal to the test rate of 9 percent, compounded semiannually, over its entire term, it has adequate stated interest only if the deferred payment ($75,000) does not exceed the present value of the deferred payment and the interest treated as payable under the debt instrument. The present value of the deferred payment and the stated interest payments, using a discount rate of 9 percent, is $81,459.93. Since the deferred payment does not exceed the present value of the payments, the debt instrument provides for adequate stated interest.

(e) *Contingent interest*—(1) *In general.* Except as provided in this paragraph (e), contingent payments of interest are not taken into account in determining whether a contract provides for adequate stated interest. For additional rules relating to the treatment of contingent payments of interest, see § 1.483-5.

(2) *Special rule.* A contract provides for adequate stated interest if the contract provides for contingent payments of interest described in paragraph (e)(3) of this section, and the contract meets the requirements of paragraph (e)(4) of this section.

(3) *Nature of contingent interest taken into account in determining adequate stated interest.* A contingent payment of interest is described in this paragraph (e)(3) only if it is conditioned on a return from the exploitation of the property acquired under the contract. Such contingent interest payments include payments conditioned on profits, sales, rents, production, or royalties from the property.

(4) *Contingent interest as adequate stated interest*—(i) *In general.* A contract for the sale or exchange of property that does not include any recovery property (within the meaning of section 168(c)(1)) or any property described in section 1221(1) (relating to stock in trade, inventories, and other property held for sale to customers) provides for adequate stated interest if—

(A) The contract would satisfy paragraph (b) or (c) of this section (taking into account the provisions of paragraph (d) of this section) at a test rate equal to 80 percent of the test rate of interest applicable to the contract, and

(B) It is reasonable to expect (as of the date the test rate is determined) that contingent payments of interest described in paragraph (e)(3) of this section will raise the total yield on the contract to at least the test rate of interest applicable to the contract.

For an illustration of circumstances in which it is reasonable to expect that contingent interest will raise the total yield on a contract to at least the test rate of interest, see § 1.1274-3(d)(2)(v), example (1).

(ii) *Depreciable or inventoriable property.* A contract for the sale or exchange of property that includes any recovery property or any property described in section 1221(1) provides for adequate stated interest if—

(A) The contract satisfies the requirements of pararaph (e)(4)(i) of this section, and

(b) The term of the contract does not exceed 12 years (4 years in the case of a contract for the sale or exchange of property that includes any 3-year or 5-year property (within the meaning of section 168(c)) or any property described in section 1221(1)).

(iii) *Entity look-through rule.* For purposes of this paragraph (e)(4), the purchase of an interest in an entity shall be treated as a purchase of the underlying assets of the entity if the bases of the assets are determined, in whole or in part, by reference to the amount paid for such interest. If the entity owns any recovery property or property described in section 1221(1), paragrah (e)(4)(ii) of this section shall apply even with respect to that portion of the purchase price attributable to nonrecovery property that is not described in section 1221(1). For example, if one corporation purchases stock of another corporation owning nonrecovery property that is not described in section 1221(1) and at least one item of 3-year or 5-year property and makes an election under section 338 (relating to certain stock purchases treated as asset acquisitions), the stock purchase shall be treated as a purchase of 3-year or 5-year property for purposes of paragraph (e)(4)(ii) of this section.

(5) *Examples.* The provisions of this paragraph (e) may be illustrated by the following examples.

Example (1). Assume that a contract for the sale of 3-year property held for rent calls for the issue of a debt instrument due in 4 years. The debt instrument calls for interest at 7.5 percent payable annually and contingent interest equal to 5 percent of the gross rents from the property. Assume that the test rate of interest is 9.20 percent, compounded annually, and that it is reasonable to expect that the gross rents will be at least $68,000 per year. Rents of this amount would produce contingent interest payments of $3,400 per year which would raise the yield on the debt instrument to at least the test rate. The contract provides for adequate stated interest because the stated rate of interest is not lower than 80 percent of the test rate, the term of the debt instrument does not exceed 4 years, and it is reasonable to expect that the contingent interest payments will raise the yield to the test rate of interest.

Example (2). The facts are the same as in example (1), except that the debt instrument has a term of 5 years. Since the term of the contract exceeds 4 years and the stated rate of interest (7.5 percent, compounded annually) is lower than the test rate of interest (9.20 percent, compounded annually), the contract does not provide for adequate stated interest.

Example (3). The facts are the same as in example (1), except that the rental property is 19-year property and the term of the debt instrument is 10 years. The contract provides for adequate stated interest because the term of the debt instrument does not exceed 12 years.

§ 1.483-3 Unstated interest.

(a) *In general.* For purposes of section 483, the term "unstated interest" means an amount equal to the excess of—

(1) The sum of the deferred payments due under the contract, over

(2)(i) The sum of the present values of the deferred payments and the present values of any interest payments due under the contract, or

(ii) In the case of a cash method debt instrument (within the meaning of section 1274A(c)(2) and § 1.1274A–1(c)) received in exchange for property in a potentially abusive situation (as defined in § 1.1275–4(g)), the fair market value of such property (reduced by the fair market value of any consideration other than the debt instrument).

(b) *Determination of present values.* The present value of any deferred payment or interest payment is to be determined by discounting the payment from the time it becomes due to the date of the sale or exchange at the imputed rate of interest applicable to the contract in accordance with the provisions of § 1.1274–5. For rules relating to the imputed rate of interest, see § 1.483–4. For purposes of determining the amount of unstated interest when there is a short period (that is, a period shorter than a full compounding period) the exact method as prescribed in § 1.1274–5(d)(2)(ii) shall be used. In addition, for purposes of determining the fraction (f) with respect to a short period, a convention that assumes that a year consists of 12 30-day months shall be used. The exact method and 12 30-day month convention shall also be used for purposes of determining the amount of interest (including unstated interest) that accrues for a short first accrual period. See § 1.446–2.

(c) *Treatment of variable rate of interest in determining total unstated interest.* If paragraph (d)(1) of § 1.483–2 (relating to payments of interest based on an objective interest rate index) applies to a contract, the rate of interest fixed by the index as of the date the imputed rate of interest is determined is treated for purposes of determining the amount of unstated interest as the stated rate of interest for any period in which interest is payable at a rate determined under the index. If paragraph (d)(1) of § 1.483–2 does not apply to a contract (either because it does not call payments under a variable rate debt instrument (within the meaning of § 1.1275–5) or because, for example, the variable rate debt instrument places a nonqualifying ceiling on the variable rate), variable payments of interest under the contract shall be treated as contingent payments to the extent provided in § 1.483–2(d)(4) and shall be subject to the provisions of § 1.483–5.

(d) *Treatment of contingent payments in determining total unstated interest.* In the case of a contract calling for any contingent payment, total unstated interest shall be determined solely by reference to the noncontingent payments. For additional rules relating to the treatment of contingent payments, see § 1.483–5.

(e) *Examples.* The provisions of this section may be illustrated by examples (1), (6), (7) and (8) of § 1.446–2(h) and by the following examples:

Example (1). On January 1, 1986, A sells property to B for $100,000 under a contract for sale that calls for B to make a $100,000 deferred payment on January 1, 1986. The contract does not provide for any interest. The imputed rate of interest based on semiannual compounding is 9 percent. The contract contains unstated interest of $58,535.71 ($100,000 (the deferred payment) minus the present value of the deferred payment ($41,464.29)).

Example (2). The facts are the same as in example (1), except that, in lieu of the $100,000 lump sum payment, the contract calls for B to make a $10,000 payment on January 1 of each year beginning with a payment on January 1, 1987, and ending with a payment on January 1, 1996. The imputed rate of interest based on annual compounding is 9.20 percent. The contract contains unstated interest of $36,384.54 ($100,000 (the sum of the deferred payments) minus the present value of the stream of $10,000 deferred payments ($63,615.46)).

Example (3). The facts are the same as in example (1), except that the contract calls for B to make a payment of interest of $79,084.77 (6 percent interest compounded annually) together with the $100,000 deferred payment due on January 1, 1996. The contract contains unstated interest of $25,726.77 ($100,000 (the deferred payment) minus $74,273.23 (the sum of the present values of the deferred payment ($41,454.29) and the stated interest ($32,791.94))).

Example (4). The facts are the same as in example (1), except that the contract calls for 10 annual installment payments of $13,586.80 (each representing a partial payment of the sales price ($100,000) and interest at 6 percent, compounded annually) beginning with a payment on January 1, 1987, and ending with a payment on January 1, 1996. The contract contains unstated interest of $13,566.95 ($100,000 (the sum of the deferred payments) minus $86,433.05 (the present value of the stream of $13,586.80 payments consisting of deferred payments and stated interest)).

Example (5). On May 31, 1986, A sells property to B for $100,000. The contract calls for 5 annual installment payments of $23,739.64 (each representing a partial payment of the sales price and 6 percent interest, compounded annually) beginning with a payment on December 31, 1987, and ending with a payment on December 31, 1991. In addition, the contract calls for a payment of interest of $3,457.45 on December 31, 1986, for the period from May 31, 1986, to December 31, 1986. Assume the contract does not provide for adequate stated interest and that the imputed rate of interest is 9.20 percent, compounded annually. Since the compounding period for the imputed rate is one year, there is a short period from May 31, 1986, to December 31, 1986. Thus, the fraction (f) with respect to the short period is equal to 210 days/360 days. The present value of the stream of $23,739.64 payments is $87,264.60. The present value of the stated interest payment of $3,457.45 on December 31, 1986, is $3,284.43. Thus, the contract contains unstated interest of $9,450.97 ($100,000 (the sum of the deferred payments) minus $90,549.03 ($87,264.60 + $3,284.43)).

Example (6). The facts are the same as in example (5), except that the $3,457.45 payment of interest for the short period is made on May 31, 1986. The contract contains unstated interest of $9,277.95 (the excess of $100,000 (the sum of the deferred payments) over $90,722.05 (the sum of the present value of the stream of $23,739.64 payments ($87,264.60) and the amount of the stated interest payment of $3,457.45 on May 31, 1986)).

§ 1.483–4 Test and imputed rates of interest applicable to a contract.

(a) *General rule.* Except as provided in paragraph (b) of this section, the test rate and imputed rate of interest for purposes of section 483 shall each be the lower of—

(1) The applicable Federal rate (based on the appropriate compounding period), or

(2) Nine percent, compounded semiannually, or an equivalent rate based on an appropriate compounding period.

The rates equivalent to 9 percent, compounded semiannually, for annual, quarterly and monthly compounding periods are as follows:

Appropriate compounding period	Test and imputed rate (percent)
Annual	9.20
Quarterly	8.90
Monthly	8.84

For rules relating to the determination of the applicable Federal rate, see paragraph (d) of this section. For rules relating to the appropriate compounding period on which the test and imputed rates of interest are to be based, see paragraph (c) of this section.

(b) *Special rates of interest applicable to certain sales*—(i) *Higher rates in certain cases*—(1) *Sales of new section 38 property after June 30, 1985.* In the case of a sale or exchange of new section 38 property (within the meaning of section 48(b) and the regulations thereunder), occurring after June 30, 1985, the test and imputed interest rates shall be equal to 100 percent of the applicable Federal rate.

(ii) *Sale-leaseback transactions occurring after June 30, 1985.* In the case of a debt instrument given in consideration for the sale or exchange of property occurring after June 30, 1985, all or a portion of which, pursuant to a plan, is leased by the transferor of the property or a person related to the transferor (within the meaning of section 168(e)(4)(D)) after the sale or exchange, the test and imputed interest rates shall be equal to 110 percent of the applicable Federal rate.

(iii) *Certain sales of principal residences.* This paragraph (b)(1)(iii) applies to a sale or exchange by an individual of the individual's principal residence (within the meaning of section 1034) if the stated principal amount of the debt instrument given in consideration for the sale or exchange exceeds the qualified amount. For this purpose, the qualified amount is the amount described in § 1.1274A–1(b)(2) in the case of a sale or exchange occurring after June 30, 1985, and $2,000,000 in the case of a sale or exchange occurring before July 1, 1985. In the case of a sale or exchange to which this paragraph (b)(1)(iii) applies, the test and imputed rates of interest shall be equal to—

(A) The applicable Federal rate for sales or exchanges occurring after June 30, 1985; and

(B) The rates determined under §§ 1.1274–3(e)(2)(i)(A)(*2*) and 1.1274–4(b)(2)(i)(B) for sales or exchanges occurring before July 1, 1985.

(iv) *Sales and exchanges occurring before July 1, 1985.* Except as otherwise provided in this paragraph (b), the imputed rate of interest in the case of a sale or exchange occurring before July 1, 1985, shall be 10 percent, compounded semiannually, or an equivalent rate based on an appropriate compounding period. The rates equivalent to 10 percent, compounded semiannually, for annual, quarterly and monthly compounding periods are as follows:

Appropriate compounding period	Imputed rate (percent)
Annual	10.25
Quarterly	9.88
Monthly	9.80

In the case of a sale or exchange of new section 38 property (within the meaning of section 48(b) and the regulations thereunder) occurring before July 1, 1985, the test rate shall be 110 percent of the applicable Federal rate and the imputed interest rate shall be 120 percent of the applicable Federal rate.

(2) *Lower rate for certain sales of land between related parties*—(i) *In general.* This paragraph (b)(2) applies to a debt instrument issued in a sale or exchange of land by an individual to a member of such individual's family (a qualified sale) if—

(A) Such individuals are the only parties to the debt instrument;

(B) The debt instrument is not given in consideration for any property other than land; and

(C) The stated principal amount of the debt instrument, when added to the aggregate stated principal amount of any other debt instruments to which this paragraph (b)(2) applies that were issued in prior qualified sales between such individuals during the same calendar year, does not exceed $500,000.

The rules of section 1274 and the regulations thereunder do not apply to any debt instrument to which this paragraph (b)(2) applies. Such rules apply, however, to any other debt instrument given in consideration for a qualified sale, unless section 1274 is otherwise inapplicable.

(ii) *Rate applicable to qualified sales.* In the case of a debt instrument to which this paragraph (b)(2) applies, the test and imputed rates of interest shall not exceed the semiannual rates prescribed by this paragraph (b)(2)(ii) or equivalent rates based on an appropriate compounding period. The semiannual rates prescribed by this paragraph (b)(2)(ii) and the equivalent rates for annual, quarterly and monthly compounding periods are as follows:

Appropriate compounding period	Test rate; imputed rate for sales or exchanges occurring after June 30, 1985 (percent)	Imputed rate for sales or exchanges occurring before July 1, 1985 (percent)
Annual	6.09	7.12
Semiannual	6.00	7.00
Quarterly	5.96	6.94
Monthly	5.93	6.90

(iii) *Special rules.* The following rules and definitions are applied in determining whether a sale or exchange is a qualified sale:

(A) *Land.* The term "land" does not include any structure (whether or not subject to depreciation or cost recovery allowances), or any permanent improvement or cultivation under, upon, or over real property if such improvement or cultivation is of a nature subject to cost recovery allowances, amortization or allowances for depreciation.

(B) *Definition of family members.* The members of an individual's family include only the individual's brother and sister (whether by the whole or half blood), spouse, ancestors, and lineal descendants. In determining any of these relationships full effect shall be given to a legal adoption. The term "ancestor" includes parents and grandparents, and "lineal descendants" includes children and grandchildren. The members of an individual's family are determined as of the date of the sale or exchange.

(C) *Nonresident aliens.* A sale or exchange is not a qualified sale if any party to the sale or exchange is a nonresident alien individual.

(iv) *Examples.* The provisions of this paragraph (b)(2) may be illustrated by the following examples:

Example (1). Assume that on January 1, 1987, A sells land to B, A's child, for $650,000. The contract for sale calls for B to make a $250,000 down payment and issue a debt instrument with a stated principal amount of $400,000. The sale is a qualified sale and this paragraph (b)(2) applies to the debt instrument.

Example (2). The facts are the same as in example (1), except that on June 1, 1987, A sells additional land to B under a contract that calls for B to issue a debt instrument with a stated principal amount of $100,000. The stated principal amount of this debt instrument ($100,000) when added to the stated principal amount of the prior debt instrument ($400,000) does not exceed $500,000. Thus, this paragraph (b)(2) applies to both debt instruments.

Example (3). The facts are the same as in example (1), except that on June 1, 1987, A sells additional land to B under a contract that calls for B to issue a debt instrument with a stated principal amount of $150,000. Since the stated principal amount of this debt instrument when added to the stated principal amount of the prior debt instrument exceeds $500,000, this paragraph (b)(2) does not apply to the debt instrument issued in the sale of June 1, 1987. Section 1274, if otherwise applicable, applies to the $150,000 debt instrument.

(c) *Appropriate compounding period; conversion of test and imputed rates of interest to an appropriate compounding period.* The test and imputed rates of interest must be based on an appropriate compounding period. The appropriate compounding period for the test rate is determined in accordance with the rules of § 1.1274–3(e)(3), and the appropriate compounding period for the imputed rate of interest is determined in accordance with the rules of § 1.1274–4(c). Test and imputed rates of interest based on the appropriate compounding period shall be determined in accordance with the rules of § 1.1274–3(e)(4) if such rates are not otherwise provided or if rates accurate to more than two decimal places are desired by both parties to the transaction.

(d) *Determination of applicable Federal rate.* For purposes of determining the test and imputed rates of interest, the applicable Federal rate with respect to a contract is the rate that would be determined under § 1.1274–6 if the contract were a debt instrument subject to section 1274.

(e) *Treatment of certain options.* Whether an option described in § 1.1272-1(f)(4) (ii) or (v) (relating to certain put and call options and options to extend) is presumed exercised for purposes of section 483 shall be determined in a manner consistent with the rules of § 1.1274-6(f) (relating to treatment of certain options). Thus, for example, the holder of a debt instrument shall be presumed to exercise a put option or an option to extend for all purposes of section 483 if the amount described in § 1.483-2(c)(2)(i), assuming exercise of the option, exceeds the amount described in § 1.483-2(c)(2)(i), assuming nonexercise of the option.

§ 1.483-5 Contingent payments.

(a) *In general.* This section provides rules for applying section 483 to any contract for the sale or exchange of property (the overall contract) that provides for any contingent payment. This section does not provide guidance concerning whether a contract is properly treated as debt or equity, or whether a contract evidences a valid indebtedness for Federal tax purposes, and no inference may be drawn with respect to these issues from anything in this section.

(b) *General rules*—(1) *Separation of noncontingent and contingent payments.* Except as otherwise provided in section 483 and the regulations thereunder, the noncontingent payments under an overall contract described in paragraph (a) of this section must be separated from the contingent payments under the contract. In such cases, noncontingent payments are subject to the rules of paragraph (b)(2) of this section, and contingent payments are subject to the rules of paragraph (b)(3) of this section. In addition, see paragraph (b)(4) of this section for special rules applicable to an overall contract that provides for certain contingent payments within a fixed period.

(2) *Noncontingent payments treated as separate contract.* The noncontingent payments under an overall contract to which paragraph (b)(1) of this section applies shall be treated for purposes of section 483 as if they were made under a separate contract. The amount of unstated interest with respect to such separate contract shall be determined solely by reference to the noncontingent payments of principal and interest.

(3) *Recharacterization of certain contingent payments*—(i) *In general.* Except as otherwise provided in paragraph (b)(4) of this section, a contingent payment to which this paragraph (b)(3)(i) applies, whether denominated as principal, interest, or both, shall be treated as consisting of—

(A) A payment of principal in an amount equal to the present value of the payment determined by discounting the payment at the test rate of interest applicable to the payment from the date the payment becomes due to the date of the sale or exchange, and

(B) A payment of interest in an amount equal to the excess of the total amount of the payment over the amount treated as principal.

For purposes of this paragraph (b)(3)(i), the present value of a payment is determined in accordance with the rules of § 1.483-3(b) except that the payment is discounted at the test rate of interest applicable to the payment. The test rate of interest applicable to a payment is the text rate of interest applicable to the overall contract under which the payment is made as determined under § 1.483-4. If, however, the test rate of interest applicable to the overall contract is determined by reference to the applicable Federal rate, the test rate of interest applicable to the payment shall be determined by reference to the appropriate Federal rate (for example, the Federal mid-term rate) for the period from the date of the sale or exchange to the date the payment is made.

(ii) *Payments to which paragraph (b)(3)(i) of this section applies.* Paragraph (b)(3)(i) of this section shall apply to—

(A) Any contingent payment of principal for which the contract does not provide adequate stated interest, or

(B) Any contingent payment of interest (other than adequate stated interest provided with respect to a contingent payment of principal) that is made under an overall contract that does not provide for adequate stated interest within the meaning of § 1.483-2 (that is, the contract contains unstated interest within the meaning of § 1.483-3) or that is provided with respect to a contingent payment of principal.

For purposes of this paragraph (b)(3)(ii), adequate stated interest with respect to a contingent payment of principal shall be determined in accordance with § 1.483-2 as if the contingent payment were the only payment of principal due under a contract. Thus, a contract provides for adequate stated interest with respect to a contingent payment of principal if the stated rate of interest is no lower than the test rate of interest applicable to the payment and interest at the stated rate is paid for the period from the date of the sale or exchange to the date the payment is due.

(iii) *Limitation on the characterization of amounts as principal.* If an overall contract calls for a fixed or stated maximum amount of principal, then notwithstanding paragraph (b)(3) (i) and (ii) of this section, the total amount of payments treated as principal (including amounts treatd as principal under this paragraph (b)) shall not exceed the fixed or stated maximum amount of principal.

(iv) *Taxable year of inclusion, deduction, and adjustment to basis.* For rules relating to the method of accounting for the portion of a contingent payment characterized as interest under this paragraph (b)(3), see § 1.446-2(f)(2)(i). In addition, the adjusted basis of the property sold or exchanged shall be increased on the date the payment becomes fixed by the portion of a contingent payment treated as principal.

(4) *Certain contingent payments within a fixed period.* If an overall contract described in paragraph (a) of this section provides for contingent payments described in § 1.1275-4(d) (relating to certain contingent payments within a fixed period), the buyer's basis in the property, and the amount of and the accrual of interest (including unstated interest) attributable to such payments shall be determined in a manner consistent with § 1.1275-4(d). For rules relating to the allocation of such interest to payments, see § 1.446-2(d).

(c) *Definition of contingent payment.* In determining whether a payment called for under a contract is contingent, remote and incidental contingencies may be disregarded by the Commissioner. The parties to a transaction, however, are bound by its form. Thus, neither party may treat any amount under a debt instrument whose payment is subject to a stated contingency as noncontingent. A payment shall not be considered contingent merely because the amount of or the liability for the payment may be impaired by insolvency or default. Variable payments of interest, if made under a contract to which § 1.483-2(d)(1) applies, shall not be treated as contingent, and if made under a contract to which § 1.483-2(d)(1) does not apply, shall be treated as contingent to the extent provided in § 1.483-2(d)(4). In addition, payments of fixed or minimum principal contingent as to due date that call for fixed or (in the case of a contract to which § 1.483-2(d)(1) applies) variable interest at a rate that constitutes adequate stated interest shall not be treated as contingent. Any payment of principal in excess of the minimum amount of principal shall be treated as contingent and, if not accompanied by adequate stated interest or if described in § 1.1275–4(d), shall be subject to the rules of paragraph (b) (3) or (4) of this section.

(d) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). (i) On March 1, 1986, A sells rental personal property to B for $100,000. The contract for sale calls for B to make a $20,000 down payment and a single payment of $100,000 due on March 1, 1991. In addition, the contract calls for annual payments, beginning with a payment on March 1, 1987, of noncontingent interest at a rate of 6 percent, compounded annually, and contingent interest equal to a specified percentage of the gross rents from the property for the calendar year preceding the payment.

(ii) Assume that the test rate of interest for this contract is 9.20 percent, compounded annually. Thus, the special rule of § 1.483–2(e) does not apply and the contract does not provide for adequate stated interest. At a test rate of interest of 9.20 percent, compounded annually, the contract contains unstated interest of $12,382.56 (the excess of $100,000 (deferred payments) over $87,617.44 (the sum of the present values of the deferred payments and the noncontingent interest payments)). Thus, B's initial basis in the property is $107,617.44 ($87,617.44 plus the $20,000 down payment).

(iii) Assume that a contingent payment of interest of $3,000 becomes due on March 1, 1987. Since the payment of interest is being made under a contract that does not provide for adequate stated interest (and is not adequate stated interest with respect to a contingent payment of principal), it is subject to recharacterization. Because the test rate was not based on the applicable Federal rate, all payments must be recharacterized based on a discount rate of 9.20 percent, compounded annually. The payment is recharacterized as principal in the amount of $2,747.25 (the present value of the payment) and as interest in the amount of $252.75 (the excess of the payment ($3,000) over the amount of the payment treated as principal ($2,747.25)). On the date the payment becomes fixed, B increases the basis of the property by $2,747.25, the amount of the payment recharacterized as principal.

(iv) Assume that contingent payments of interest for years 1988, 1989, 1990 and 1991 and the amounts recharacterized as interest or principal are as follows:

Year	Payment	Principal	Interest
1988	$2,500	$2,096.50	$403.50
1989	3,200	2,457.44	742.56
1990	3,200	2,250.40	949.60
1991	4,[illegible]	2,704.81	1,495.19

B will increase the basis of the property over the remaining 4 years by an additional $9,509.15.

Example (2). The facts are the same as in example (1), except that the amount of the final contingent payment of interest is $5,000. If subject to unlimited recharacterization, the $5,000 payment would be treated as principal in the amount of $3,220.01 and as interest in the amount of $1,779.99. If the payment is treated as a $3,220.01 payment of principal (when taken together with all other contingent and noncontingent payments treated as principal), principal payments due under the contract would exceed the fixed stated principal amount due under the contract of $100,000. Thus, the amount of the payment treated as principal is limited to $2,830.97 (the excess of the stated principal amount ($100,000) over the sum of noncontingent payment of principal ($87,617.44) and the prior contingent payments treated as principal ($9,551.59)), and the amount of the payment treated as interest is $2,169.03 (the excess of the payment ($5,000) over the amount of the payment treated as principal ($2,830.97)).

Example (3). (i) On March 1, 1986, A sells rental personal property to B under a contract that calls for a $30,000 down payment, and six annual payments equal to 10 percent of the gross rents from the property. The contract further specifies that the maximum of payments under the contract (exclusive of the down payment) cannot exceed $200,000. The contract does not call for the contingent payments to bear any interest. Since it is not certain that any payment other than the $30,000 down payment will be made, B's basis in the property is initially limited to $30,000.

(ii) Since the contract does not provide for adequate stated interest with respect to the contingent payments, each payment is subject to recharacterization. The test rate of interest applicable to the payments is 9.20 percent, compounded annually. Assume that the contingent payments for the years 1987 through 1992 are set forth in column (1) of the following table. The characterization of principal and interest for each payment is set forth in columns (2) and (3) of the table.

Year	Payment (1)	Principal (2)	Interest (3)
1987	$37,000	$33,882.78	$3,117.22
1988	42,000	35,221.19	6,778.81
1989	33,000	25,342.30	7,657.70
1990	29,000	20,394.24	8,605.76
1991	39,000	25,116.05	13,883.95
1992	20,000	11,794.90	8,205.10

§ 1.582–1 [Amended]

Par. 14. In §1.582–1, paragraphs (d) and (e)(3)(i) are amended by removing the phrase "section 1232" from each place that it appears and adding in its place the phrase "sections 1271 through 1275".

§ 1.636–1 [Amended]

Par. 15. In §1.636–1, paragraph (a)(1)(ii) is amended by removing the phrase "section 1232" and adding in its place the phrase "section 1271".

§ 1.818–3 [Amended]

Par. 16. In § 1.818–3, paragraph (f) is amended by removing the phrase "section 1232(a) (relating to the taxation of bonds and other evidences of indebtedness)" and adding in its place the phrase "section 1271 (relating to the treatment of amounts received on retirement or sale or exchange of debt instruments)", and by removing the phrase "section 1232(a)(2)(C)" and adding in its place the phrase "section 1271(d)".

§ 1.861–2 [Amended]

Par. 17. In § 1.861–2, paragraph (a)(4) is amended by removing the phrase "section 1232(b)(1)" and adding in its place the phrase "section 1273(a)(1)".

§ 1.993–1 [Amended]

Par. 18. In § 1.993–1, paragraph (g) is amended by removing the phrase "section 1232" and adding in its place the phrase "section 1272".

§ 1.1001–1 [Amended]

Par. 19. In § 1.1001–1, paragraph (g) is amended by removing the phrase "section 1232(b)" and adding in its place the phrase "section 1273", and by removing the phrase "paragraph (b)(2)(iii)(b) of § 1.1232–3." and adding in its place the phrase "§ 1.1273–2."

§ 1.1012–1 [Amended]

Par. 20. In § 1.1012–1, paragraph (f) is amended by removing the phrase "section 1232(b)" and adding in its place the phrase "section 1273" and by removing the phrase "paragraph (b)(2)(iii)(b) of § 1.1232–3." and adding in its place the phrase "§ 1.1273–2."

Par. 21. Section 1.1012–2 is revised to read as follows:

§ 1.1012–2 Certain sales or exchanges between related parties.

(a) *In general.* In the case of a sale or exchange of property in which the relationship between the seller and the buyer is such that the sale or exchange is not necessarily an arm's-length transaction, the transaction shall be examined to determine whether the value of the consideration provided by the buyer is greater than or less than the value of the property. If the value of the consideration exceeds the value of the property, this excess shall not be treated as relating to the sale or exchange and will be recharacterized according to the relationship between the parties. If the value of the property exceeds the value of the consideration, this excess generally shall be treated as transferred from the seller to the buyer based on the relationship between the parties and not as transferred in exchange for the debt instrument. The preceding sentence shall not apply to any transaction that would be characterized as in part a gift and in part a sale under § 1.170A–4(c)(2) and § 1.1011–2(b) or under § 1.1015–4.

(b) *Value.* In applying this section to any sale or exchange where all or a part of the consideration furnished by the buyer consists of one or more debt instruments issued by the buyer to the seller, then, for purposes of this section—

(1) The value of any such debt instrument to which section 1274 applies or which has adequate stated interest within the meaning of section 1274(c)(2) or § 1.483–2 shall be its issue price;

(2) The value of any such debt instrument issued under a contract to which section 483 applies shall be the amount described in § 1.483–3(a)(2)(i); and

(3) In determining whether the value of the consideration furnished by the buyer exceeds the value of the property, the value of the property shall be determined by reference to the price that an unrelated buyer (having the same creditworthiness as the actual buyer) would be willing to pay for the property in an arm's-length transaction if seller financing (taken into account at its issue price) were offered on the same terms as those offered to the actual buyer.

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). (i) On January 1, 1986, Corporation X sells nonpublicly traded property to A, the sole shareholder of X. In consideration for the sale, A makes a down payment of $200,000 and issues a debt instrument calling for a single payment of $1,000,000 due in five years. No interest is provided for in the debt instrument. Because A is the sole shareholder of X, the transaction must be examined to determine whether the value of the property exceeds the value of the consideration furnished by A. For this purpose, the value of the property is its fair market value (determined without regard to any seller financing).

(ii) Assume that the fair market value of the property is $900,000 and that the issue price of the debt instrument under § 1.1274–4 is $643,928. Thus, the value of the consideration furnished by A is $843,928 (the sum of $200,000 (the portion of the consideration attributable to the down payment) and $643,928 (the portion of the consideration attributable to the debt instrument)). Since the value of the property ($900,000) exceeds the valve of the consideration ($843,928), X Corporation is treated as having made a distribution to shareholder A to which section 301 applies. The amount of the distribution is $56,072 (the difference between $900,000 and $843,928). The basis of the property in the hands of A is $900,000 ($843,928 (consideration actually furnished by A) increased by $56,072 (the amount of the section 301 distribution)).

Example (2). The facts are the same as in Example (1) except that the fair market value of the property is $800,000. X is not treated as having made a section 301 distribution to A and A's basis in the property is $800,000. The transaction need not be examined for excessive consideration since a sale from a corporation to a shareholder ordinarily would not be used to disguise a contribution to capital from the shareholder to the corporation.

Example (3). (i) C sells nonpublicly traded property to his employer D for $300,000 in cash and D's debt instrument having a face amount of $1,000,000, payable in 5 years with interest payable semiannually at a rate of 9 percent. Because D is C's employer, the transaction must be examined to determine if a portion of the amount designated as consideration for the property is in fact disguised compensation.

(ii) Assume that the fair market value of the property (assuming no seller financing), is $1,000,000 and that the issue price of D's debt instrument is $1,000,000. Assume further that a buyer unrelated to D and having the same creditworthiness as C would be willing to pay $1,200,000 for the property if allowed to pay $300,000 in cash and $900,000 in the form of a 5-year debt instrument calling for semiannual payments of interest at a rate of 9 percent. The value of the consideration furnished by D is $1,300,000 (cash of $300,000 plus a debt instrument having an issue price of $1,000,000). Since this amount exceeds the value of the property by $100,000, only $200,000 of the $300,000 transferred from D to C is treated as consideration furnished for the property. The remaining $100,000 is treated as compensation. D's basis in the property is $1,200,000 (cash consideration of $200,000 plus a debt instrument with an issue price of $1,000,000).

Example (4). The facts are the same as in Example (3) except that the property could be sold to the unrelated buyer for $1,400,000 (assuming a down payment of $300,000 and 5-year seller financing at 9 percent for the balance of the purchase price). Because the value of the consideration furnished by D ($1,300,000) does not exceed the value of the property ($1,400,000), D is not treated as having paid compensation to C. D's basis in the property is $1,300,000. The transaction need not be examined for insufficient consideration since employees ordinarily do not make bargain sales to their employers.

Par. 22. In § 1.1016–5, paragraph (s) is revised to read as follows:

§ 1.1016–5 Miscellaneous adjustments to basis.

* * * * *

(s) *Original issue discount.* In the case of certain debt instruments issued at a discount after May 27, 1969, the basis shall be increased under section 1272(d)(2) by the amount of original issue discount included in the holder's gross income pursuant to section 1272.

* * * * *

§ 1.1037–1 [Amended]

Par. 23. Section 1.1037–1 is amended as follows:

1. In paragraph (a) by removing the phrase "the first sentence of section 1232(a)(2)(B)." and adding in its place "section 1271(c)(2)(A)", by removing the phrase "section 1232(b)(2)" each place that it appears in *Example* (6) and *Example* (7) and adding in its place the phrase "section 1273(b)(1)", by removing the phrase "section 1232(a)(2)(B)" each place it appears in *Example* (7) and adding in its place the phrase "section 1271(c)(2)(A)", and by removing the phrase "section 1232(a)(2)(B)(ii)" each place it appears in *Example* (6) and *Example* (7) and adding in its place the phrase "section 1271(c)(2)(A)(ii)".

2. In paragraph (b) by removing the phrase "section 1232" from the heading and adding in its place the phrase "section 1271", by removing the phrase "section 1232(a)(2)(B)" each place that it appears and adding in its place the phrase "section 1271(c)(2)(A)", and by removing the phrase "section 1232" from the heading of paragraph (b)(6) and adding in its place the phrase "section 1271".

§ 1.1232–1 [Amended]

Par. 24. Section 1.1232–1 is amended as follows:

1. In paragraph (a) by revising the heading to read "Bonds and other evidences of indebtedness issued before July 2, 1982; scope of section"; by removing the first sentence and adding the following new sentence as the first sentence of the paragraph, and by removing the phrase "after May 27, 1969," from the fourth sentence and adding in its place the phrase "after May 27, 1969, and before July 2, 1982,". The added sentence reads as follows: "Section 1232 as in effect before its repeal by section 42(a) of the Tax Reform Act of 1984 applies to any bond, debenture, note, or certificate of indebtedness (referred to in this section and §§ 1.1232–2 through 1.1232–4 as an obligation) (1) which is a capital asset in the hand of the taxpayer, and (2) which is issued by any corporation, or by any government or political subdivision thereof."

2. In paragraph (c)(3) by removing the phrase "December 31, 1975." from the heading and adding in its place the phrase "December 31, 1975, and before July 2, 1982"; and by adding the phrase "and before July 2, 1982" immediately after the first parenthetical in the first sentence thereof.

§ 1.1232–2 [Amended]

Par. 25. The heading of § 1.1232–2 is revised to read "Retirement of an obligation issued before July 2, 1982."

§ 1.1232–3 [Amended]

Par. 26. Section 1.1232–3 is amended as follows:

1. The heading is amended by adding the phrase "and before July 2, 1982." immediately following the phrase "December 31, 1954."

2. Paragraph (a) is amended by removing the phrase "after May 27, 1969" from the heading and from each place that it appears and adding in its place the phrase "after May 27, 1969, and before July 2, 1982".

3. Paragraph (f), the first sentence, is amended by removing the phrase "after December 31, 1954," and inserting the phrase "after December 31, 1954, and before August 17, 1984," in its place.

§ 1.1232-3A [Amended]

Par. 27. Section 1.1232-3A is amended as follows:

1. The heading and paragraph (a) are amended by removing the phrase "after May 27, 1969," and adding in its place the phrase "after May 27, 1969, and before July 2, 1982."

2. Paragraph (f) is amended by removing the phrase "after December 31, 1975" and by adding in its place the phrase "after December 31, 1975, and before July 2, 1982,".

Par. 28. Sections 1.1271-1 through 1.1275-5 are added in the appropriate place. The new sections read as follows:

§ 1.1271-1 Treatment of amounts received on retirement or sale or exchange of debt instruments.

(a) *Applicability.* Section 1271 and this section provide for the treatment of amounts received on retirement or sale or exchange of a debt instrument (as defined in section 1275(a) and § 1.1275-1(b)) issued after July 1, 1982, other than a debt instrument issued by a natural person as described in § 1.1275-1(g). Section 1271 and this section do not apply to a debt instrument acquired before July 18, 1984, which was not a capital asset in the hands of the holder on July 17, 1984. To determine whether a debt instrument was a capital asset in the hands of the holder, see § 1.1232-1(b). For rules relating to debt instruments issued before July 2, 1982, see § 1.1232-1.

(b) *General rules*—(1) *Retirement.* Amounts received on retirement of a debt instrument to which section 1271 applies are considered as received in exchange for the debt instrument.

(2) *Sale or exchange.* Gain realized upon the sale or exchange of a debt instrument to which section 1271 applies is either capital gain or ordinary income, depending on the character of the debt instrument in the hands of the holder. If the debt instrument is a capital asset in the hands of the holder, gain realized is capital gain unless—

(i) There was an intention to call the debt instrument before maturity, (in which case, all or a portion of the gain realized is treated as ordinary income under section 1271(a)(2)(A)); or

(ii) The debt instrument is a short-term obligation (as defined in section 1283(a)(1)) issued at a discount (in which case, all or a portion of the gain realized may be treated as ordinary income under § 1.1271-3).

(3) *Example.* The rules stated in paragraph (b) of this section may be illustrated as follows:

Example. On November 1, 1985, B, a calendar-year taxpayer, purchases at original issue for cash of $86,235.17, N Corporation's 15-year bond, maturing on October 31, 2000, at a stated redemption price of $100,000. Assume that the bond is a capital asset in B's hands. The bond provides for semiannual payments of interest at 10%. The bond has $13,764.83 of original issue discount (stated redemption price at maturity, $100,000, less issue price, $86,235.17). There is no intention to call the bond before maturity. On November 1, 1986, B sells the bond to C, a calendar-year taxpayer, for cash of $90,000. B has included $1,214.48 of original issue discount in gross income and has increased his basis by that amount to $87,449.65 (see § 1.1272-1(k), Example (4) for the computation of daily portion of original issue discount). B has realized a gain of $2,550.35 (amount realized, $90,000, less adjusted basis, $87,449.65). Since there was no intention to call the bond before maturity at the date of issue, under paragraph (b)(2)(i) of this section all of B's gain, $2,550.35, is capital gain.

(c) *Amounts previously includible in income.* Nothing in section 1271, this section, or §§ 1.1271-2 and 1.1271-3 shall require the inclusion of any amount previously includible in gross income. Thus, if an amount was previously includible in a taxpayer's income on account of a debt instrument issued at a discount and redeemable for fixed amounts increasing at stated intervals, or under section 811(b) (or corresponding provisions of prior law) relating to accrual of discount on bonds or other evidences of indebtedness held by life insurance companies, this amount is not again includible in the taxpayer's gross income. For example, amounts includible in income by a cash receipts and disbursements method taxpayer who has made an election under section 454 (a) or (c) (relating to accounting rules for certain debt instruments issued at a discount to which section 1272 does not apply) are not also includible in gross income upon sale or exchange of the obligation. In the case of a gain which under section 1271(a)(2) would include an amount considered to be ordinary income and a further amount considered to be long-term capital gain, any amount to which this paragraph applies is first used to offset the amount considered to be ordinary income to the extent such previously included income constituted ordinary income.

§ 1.1271-2 Intention to call before maturity [Reserved]

§ 1.1271-3 Gain on disposition of certain short-term obligations.

(a) *Short-term government obligations*—(1) *General rule.* Any gain realized on the sale or exchange of a short-term government obligation issued at a discount which does not exceed an amount equal to the ratable share of the acquisition discount (as defined in paragraph (a)(3) of this section) shall constitute ordinary interest income.

(2) *Short-term government obligation.* For purposes of this section, the term "short-term government obligation" is any obligation of the United States or any of its possessions, or of a State or any political subdivision thereof, or of the District of Columbia, which is payable at a fixed maturity date not more than 1 year from the issue date. This term does not include short-term tax-exempt obligations.

(3) *Ratable share of acquisition discount.* For purposes of this section, the term "ratable share of acquisition discount" means an amount which bears the same ratio to the total acquisition discount (as defined in section 1271(a)(3)(C)) as—

(i) The number of days which the taxpayer holds the obligation, bears to

(ii) The number of days after the date the taxpayer acquired the obligation and up to (and including) the date of maturity of the obligation.

(4) *Election of computation on constant interest rate basis.* In lieu of computing the ratable share of acquisition discount as described in paragraph (a)(3) of this section, the taxpayer may elect to compute acquisition discount with respect to a short-term government obligation (as defined in paragraph (a)(2) of this section) on the basis of daily compounding. The election shall be made by filing a return for the year of the sale or exchange by reporting the transaction on the basis of daily compounding. This election shall be irrevocable and shall be made on an obligation by obligation basis.

(b) *Short-Term nongovernmental obligations issued or or after July 18, 1984*—(1) *In general.* Gain realized on the sale or exchange of a short-term nongovernmental obligation (as defined in paragraph (b)(2) of this section) issued on or after July 18, 1984, which does not exceed an amount equal to the ratable share of original issue discount described in paragraph (b)(3) of this section shall be treated as ordinary interest income.

(2) *Short-term nongovernmental obligations.* For purposes of this section, the term "short-term nongovernmental obligation" means an obligation other than a short-term government obligation described in paragraph (a)(2) of this section, which has a fixed maturity date not more than 1 year from the issue date. This term does not include short-term tax-exempt obligations.

(3) *Ratable share of original issue discount.* For purposes of this section, the ratable share of original issue discount is an amount which bears the same ratio to the total original issue discount (as defined in section 1273(a)(1)) as—

(i) The number of days which the taxpayer holds the obligation, bears to

(ii) The number of days after the issue date and up to (and including) the date of maturity of the obligation.

(4) *Election of computation on constant interest rate basis.* In lieu of computing the ratable share of original issue discount as described in paragraph (b)(3) of this section, the taxpayer may elect to compute original issue discount with respect to a short-term nongovernmental obligation (as defined in paragraph (b)(2) of this section) on the basis of daily compounding. The election shall be made by filing a return for the year of the sale or exchange reporting the transaction on the basis of daily compounding. This election shall be irrevocable and shall be made on an obligation by obligation basis.

(c) *Examples.* The rules stated in paragraphs (a) and (b) of this section may be illustrated as follows:

Example (1). On January 1, 1985, A purchases at original issue for cash of $9,200 a one-year Treasury bill with a stated redemption price at maturity of $10,000. This obligation is a capital asset in A's hands. The Treasury bill is also a short-term government obligation within the meaning of paragraph (a)(2) of this section and has total acquisition discount of $800 (stated redemption price at maturity, $10,000, minus A's basis, $9,200). On August 1, 1985, A sells the bill to B for $9,700, and A realizes a gain of $500 (amount realized, $9,700 minus A's basis, $9,200). The amount of acquisition discount that has accrued on the bill for all days during the taxable year that A held the note is determined under paragraph (a)(3) of this section as follows:

(1) Total amount of acquisition discount	$800.00
(2) Multiplied by: The number of days A held the bill during the taxable year (210) divided by the total number of days after A acquired bill up to and including the date of maturity (360)	.58333
(3) A's ratable share of acquisition discount	$466.67

Since the amount shown on line (3), $466.67, is less than A's gain of $500, only $466.67 of his gain is includible as interest in gross income. The remaining portion, $33.33, is capital gain.

Example (2). (i) On March 1, 1985, A lends $5,000 to B, an individual, in exchange for B's note with an issue price of $5,000, payable in ten months and calling for interest payable at maturity. B's note is a short-term nongovernmental obligation within the meaning of paragraph (b)(2) of this section and is also a capital asset in A's hands. Interest is to accrue at a rate of 12%, compounded monthly, and totals $523.11 at maturity. The stated redemption price at maturity under § 1.1273–1(b)(1) is $5,523.11. The debt instrument has original issue discount of $523.11 (stated redemption price at maturity, $5,523.11, minus issue price, $5,000). On September 1, 1985, A sells the debt instrument to C for $5,325. A realizes a gain on the sale of $325 (amount realized, $5,325, minus A's basis in the debt instrument, $5,000). A's ratable share of original issue discount is computed as follows:

(1) Total original issue discount	$523.11
(2) Multiplied by: number of days A held the note (180) divided by the number of days after the date A acquired the debt instrument up to and including the date of maturity (300)	.60
(3) A's ratable share of original issue discount	$313.87

Since A's gain, $325, is greater than his ratable share of original issue discount, $313.87, only $313.87 of his gain is includable as interest in gross income. The remaining portion, $11.13, is capital gain.

(ii) The facts are the same as in part (i), except that A elects to compute his original issue discount based on daily compounding. A's share of original issue discount for the 180-day period computed on the basis of daily compounding is $307.60. Since A's gain, $325, is greater than his share of original issue discount, $307.60, only $307.60 of his gain is includable as interest in gross income. The remaining portion, $17.40, is capital gain.

(d) *Short-term nongovernmental obligations issued by a corporation after May 27, 1969, and before July 18, 1984*—(1) *In general.* Gain on the sale or exchange of a short-term nongovernmental obligation described in paragraph (b)(2) of this section issued by a corporation after May 27, 1969, and before July 18, 1984, shall be included in gross income as interest to the extent that the gain does not exceed an amount equal to the ratable monthly portion of original issue discount multiplied by the sum of the number of complete months and any fractional part of a month that the taxpayer held the debt instrument.

(2) *Cross-references.* For definition of the term "ratable monthly portion", see § 1.1232–3A(a)(2). For definition of the term "complete month" and the computation of a fractional part of a month, see § 1.1232–3A(a)(3).

§ 1.1272–1 Current inclusion in income of original issue discount on certain debt instruments issued after July 1, 1982.

(a) *Applicability*—(1) *In general.* Section 1272(a) and this section require a holder of a debt instrument (as defined in section 1275(a) and § 1.1275–1(b)) issued at a discount to include as interest in gross income on a constant interest rate basis the amount of original issue discount (as defined in section 1273(a) and § 1.1273–1(a)) on that debt instrument. Section 1272(a) and this section apply only to the holder of a debt instrument issued at a discount after July 1, 1982. See section 1272(b) and §§ 1.1232–1 through 1.1232–3A for rules relating to debt instruments issued at a discount before July 2, 1982.

(2) *Exceptions.* Section 1272 and this section do not apply to the following:

(i) A holder of a debt instrument issued at a discount where the holder had purchased the debt instrument at a premium (as defined in § 1.1275–1(f));

(ii) A holder that is a life insurance company to which section 811(b) or corresponding provisions of prior law apply;

(iii) A holder of a debt instrument issued at a discount before December 31, 1984, in whose hands the debt instrument is not a capital asset;

(iv) Tax-exempt obligations, as defined in section 1275(a)(3) and § 1.1275–1(d);

(v) United States savings bonds;

(vi) Short-term obligations (as defined in section 1283(b));

(vii) Any debt instrument issued by a natural person (as defined in § 1.1275–1(g)) before March 2, 1984; and

(viii) Any loan made by a natural person to another natural person after March 1, 1984, if (A) the loan is not made in the course of a trade or business of the lender, and (B) the amount of the loan (when increased by the outstanding amount of prior loans between the same parties) does not exceed $10,000. For purposes of this paragraph (a)(2)(viii), the term "loan" does not include a stripped bond or stripped coupon within the meaning of section 1286(e). The aggregate amount of loans between natural persons is the sum of the outstanding principal amounts of loans directly between the individuals regardless of the character of the loans, regardless of the interest rate charged on the loans, and regardless of the date on which the loans were made. This paragraph (a)(2)(viii) shall not apply if one of the principal purposes of the interest arrangements of the loan is the avoidance of any Federal tax by either the borrower or the lender. The determination of whether tax avoidance is one of the principal purposes of the loan shall be made by the Commissioner. For purposes of applying the $10,000 limitation of this paragraph (a)(2)(viii), a husband and wife shall be treated as one person with respect to loans made by either husband or wife to a third person or a spouse of that person. The preceding sentence shall not apply to loans made between a husband and wife, nor to loans where the spouses lived apart at all times during the taxable year in which the loan was made.

(3) *Amounts otherwise includible or deductible.* Nothing in section 1272 or this section shall require the double inclusion or permit the double deduction of any amount from gross income. Thus, for example, payments (or portions of payments) denominated as interest under the debt instrument which are included in the stated redemption price at maturity under § 1.1273–1(b)(2)(ii) because they are not qualified periodic interest payments (as defined in § 1.1273–1(b)(1)(ii)) are not also includible under section 61. See also the rules described in § 1.1271–1(c).

(4) *Cross-references.* See § 1.1275–4 for rules relating to the treatment of debt instruments providing for contingent payments. See § 1.1275–5 for rules relating to debt instruments providing for a variable rate of interest.

(b) *Original issue discount included in income on basis of constant interest rate.* The holder of a debt instrument having original issue discount to which this section applies shall include as interest in gross income an amount equal to the sum of the daily portions of the original issue discount for each day during the taxable year that the holder holds the debt instrument. For this purpose, a person holds a debt instrument on the date of its purchase but not on the date of its disposition. The amount included under this section shall be reduced in the case of a holder who pays an acquisition premium for the debt instrument (as described in paragraph (g) of this section).

(c) *Determination of daily portion*—(1) *In general.* The daily portion of original issue discount on a debt instrument is an amount equal to the total original issue discount allocable to the accrual period (as defined in paragraph (d) of this section) divided by the number of days in the accrual period. See § 1.1275–2(e) for rules relating to counting conventions.

(2) *Amount allocable to an accrual period*—(i) *In general.* The amount of original issue discount allocable to an accrual period (other than a short first accrual period described in paragraph (c)(2)(ii) of this section or a final accrual period described in paragraph (c)(2)(iii) of this section) is—

(A) The product of—

(*1*) The adjusted issue price of the debt instrument (as defined in paragraph (e) of this section) at the beginning of the accrual period, and

(*2*) The yield to maturity of the debt instrument (as defined in paragraph (f) of this section), divided by the number of accrual periods in a year;

(B) Reduced (but not below zero) by the sum of amounts payable as qualified periodic interest (as defined in § 1.1273–1(b)(1)(ii)) on the debt instrument during the accrual period.

(ii) *Special rule for short first accrual periods*—(A) *In general.* If the first accrual period is shorter than a full accrual period, the amount of original issue discount allocable to the first accrual period may be determined by either of the two alternative methods prescribed by this paragraph (c)(2)(ii) or by any other reasonable method. The methods prescribed by this paragraph (c)(2)(ii) are the exact method and the approximate method. As an example of a reasonable method other than the exact or approximate method, a taxpayer may determine the amount of original issue discount allocable to the first accrual period by compounding at monthly intervals with simple interest within a month. The choice of any method permissible under this paragraph (c)(2)(ii) requires a corresponding choice for purposes of calculating yield to maturity described in paragraph (f) of this section. The choice of method shall be reported to the Internal Revenue Service in the time and manner provided in §§ 1.1275–3(a)(1) and 1.1275–3(b)(4). If the taxpayer does not allocate original issue discount to a short first accrual period based on a reasonable method, such discount shall be reallocated based on the exact method.

(B) *Exact method.* Under the exact method, the amount of original issue discount allocable to the first accrual period shall be the product of—

(*1*) The issue price of the debt instrument (as defined in section 1273(b) and § 1.1273–2), and

(*2*) The formula:

$[1+i/k^{f}+1]$

In which: i = The yield to maturity, expressed as a decimal;

k-The number of accrual periods in a year (for example, 12, if the accrual period is one month); and

f + A-fraction whose numerator is the number of days in the short first accrual period, and whose denominator is the number of days in a full accrual period;

reduced (but not below zero) by the sum of amounts payable as qualified periodic interest on the debt instrument during the accrual period.

(C) *Approximate method.* Under the approximate method, the amount of original issue discount allocable to the first accrual period is determined as described in paragraph (c)(2)(i) of this section, except that the yield to maturity described in paragraph (c)(2)(i)(B)(2) shall be multiplied by the fraction f as defined in paragraph (c)(2)(ii)(B)(2).

(iii) *Special rule for final accrual period.* The amount of original issue discount allocable to the final accrual period (including a short final accrual period) shall be the excess of the stated redemption price at maturity (as defined in section 1273(a)(2) and § 1.1273–1(b)) over the adjusted issue price at the beginning of the final accrual period. This paragraph (c)(2)(iii) shall not apply to any debt instrument that is an installment obligation (as defined in § 1.1273–1(b)(2)(i)).

(d) *Accrual period*—(1) *Debt instruments issued after December 31, 1984*—(i) *Regular payment or compounding at intervals of one year or less.* If a debt instrument issued after December 31, 1984, calls for more than one payment or compounding date (other than the issue date) and all dates on which an amount is either paid or compounded occur at regular intervals of one year or less, then the accrual period is this interval. A debt instrument shall not fail to qualify for this rule merely because the interval between the issue date and the first payment or compounding date after the issue date or the interval between the maturity date and the preceding payment or compounding date differs from the interval between other payment or compounding dates.

(ii) *Irregular payment or compounding; intervals of more than one year.* if a debt instrument issued after December 31, 1984, calls for more than one payment or compounding date (other than the issue date) and all dates on which an amount is either paid or compounded do not occur at regular intervals of one year or less, the accrual period is the longest period of not more than one year such that all intervals consist of a whole number of accrual periods. For purposes of this paragraph (d)(1)(ii), the interval between the issue date and the first payment or compounding date after the issue date and the interval between the maturity date and the preceding payment or compounding date are not taken into account unless the debt instrument calls for only one payment or compounding date between the issue date and the maturity date.

(iii) *Debt instruments calling for a single payment.* In the case of a debt instrument issued after December 31, 1984, that provides for a single payment at maturity and for no other payment or compounding dates (other than the issue date), the accrual periods are the six-month periods (or the shorter period from the issue date) that end on the day in the calendar year that corresponds either to the stated maturity date of the debt instrument or to the date that is six months before the stated maturity date.

(iv) *Short accrual period.* (A) If the interval between the issue date of a debt instrument for which the accrual period is determined under paragraph (d)(1) (i) or (ii) of this section and the first payment or compounding date does not consist of a whole number of accrual periods, then the first accrual period shall be the short period such that the remainder, if any, of such interval consists of a whole number of accrual periods.

(B) If the interval between the last date before maturity on which an amount is paid or compounded and the maturity date of the debt instrument for which the accrual period is determined under paragraph (d)(1) (i) or (ii) of this section does not consist of a whole number of accrual periods, then the final accrual period shall be the short period such that the remainder, if any, of such interval consists of a whole number of accrual periods.

(v) *Date accrual period begins.* The first accrual period begins on the issue date (as defined in section 1275(a)(2) and § 1.1275–1(c)). Each subsequent accrual period begins on the day following the last day of the preceding accrual period. The final accrual period ends on the stated maturity date.

(vi) *Examples.* The provisions of paragraph (d)(1) of this section may be illustrated as follows:

Example (1). A bond is issued on November 1, 1985, for cash of $85,000, and matures on October 31, 2000, at a stated redemption price of $100,000. The bond provides for quarterly payments of interest at an annual rate of 10%. Under paragraph (d)(1)(i) of this section, the accrual period is the three-month period ending on October 31, July 31, April 30, and January 31 of each calendar year.

Example (2). A debt instrument is issued for $100,000 cash on November 1, 1985, and matures on December 31, 2005. Interest is compounded semiannually from December 31, 1985, but the debt instrument provides for no interest payments during the first five years. Semiannual interest payments are made thereafter at a rate of 13%, compounded semiannually. The interest payments are due on June 30 and December 31 of each calendar year beginning in 1991. Under paragraph (d)(1)(i) of this section, the accrual period is six months. The accrual periods end on June 30 and December 31 of each calendar year. The period from November 1, 1985, to December 31, 1985, is a short accrual period.

Example (3). The facts are the same as in example (2), except that the debt instrument calls for quarterly interest payments on March 31, June 30, September 30, and December 31 of each year during the first five years and semiannual payments on June 30 and December 31 of each succeeding year. Under paragraph (d)(1)(ii) of this section, the longest period such that all intervals between successive payments consist of a whole number of accrual periods is a calendar quarter. The accrual period is therefore the calendar quarter ending on December 31, September 30, June 30, and March 31 of each year.

Example (4). A bond is issued for $75,000, on October 17, 1985, and matures on September 30, 2015, at a stated redemption price of $90,000 with no payments or compounding of interest until maturity. Under paragraph (d)(1)(iii) of this section, the accrual period is six months. The accrual periods end on September 30 and March 31 of each calendar year. The period from October 17, 1985, to March 31, 1986, is a short accrual period.

(2) *Debt instruments issued after July 1, 1982, and before January 1, 1985.* In the case of debt instruments issued at a discount after July 1, 1982 and before January 1, 1985, an accrual period is the one-year period beginning on the day in the calendar year which corresponds to the date of original issue of the debt instrument. The final accrual period ends on the stated maturity date and may constitute a short accrual period.

(e) *Adjusted issue price*—(1) *First accrual period.* The adjusted issue price of a debt instrument at the beginning of the first accrual period is its issue price.

(2) *Subsequent accrual periods*—(i) *In general.* Except as provided in § 1.1275–4(d), the adjusted issue price of the debt instrument at the beginning of each accrual period subsequent to the first accrual period is equal to the adjusted issue price of the debt instrument as of the beginning of the immediately preceding accrual period increased by the amount of original issue discount allocable to that accrual period as determined under paragraph (c)(2) of this section.

(ii) *Special rule for installment obligations.* In the case of a debt instrument that is an installment obligation (as defined in § 1.1273–1(b)(2)(i)), the adjusted issue price of the debt instrument at the beginning of an accrual period subsequent to the first accrual period is the adjusted issue price at the beginning of the immediately preceding accrual period plus the amount of original issue discount allocable to that accrual period determined under paragraph (c)(2) of this section, reduced by the amount of any payment other than a payment of qualified periodic interest (as defined in § 1.1273–1(b)(1)(ii)) made at the end of or during that accrual period. Each payment other than a payment of qualified periodic interest shall be treated first as a payment of original issue discount to the extent accrued as of the date of the payment and not allocated to prior payments, and second as a payment of principal (and no portion thereof shall be treated as prepaid interest).

(f) *Yield to maturity*—(1) *In general.* The term "yield to maturity" (hereinafter "yield") means that interest rate that when used in computing the present value of all payments of principal and interest to be paid in connection with a debt instrument produces an amount equal to the issue price. For purposes of this section, yield shall be determined on the basis of compounding at the end of each accrual period and shall be expressed as an annual interest rate. Yield is determined on the issue date of the debt instrument, and, except in the case of a variable rate debt instrument described in § 1.1275–5, remains constant over the term of the debt instrument. Yield, when expressed as a percentage, shall be calculated to at least two decimal places.

(2) *Short first accrual periods.* In the case of a debt instrument containing a short first accrual period, the taxpayer shall determine yield in a manner consistent with the method chosen for allocating the amount of original issue discount with respect to the short period under section 1272(a)(3) and paragraph (c)(2)(ii) of this section.

(3) *Special rules*—(i) *Application to debt instruments subject to section 1274.* In the case of a debt instrument to which section 1274 applies (other than a debt instrument issued in a potentially abusive situation within the meaning of section 1274(b)(3)(B) and § 1.1274–4(g)) that does not have adequate stated interest (within the meaning of section 1274(c)(2) and § 1.1274–3), the yield is the imputed interest rate (as defined in section 1274(b)(2)(B) and § 1.1274–4(b)).

For example, if the imputed interest rate applied to determine the issue price of a debt instrument under section 1274 is 12%, compounded semiannually, that interest rate also represents the yield of the debt instrument. In a potentially abusive situation, yield shall be determined under paragraph (f)(1) of this section. See § 1.1274-4(h), Example (1).

(ii) *Certain debt instruments with fixed interest rate.* The yield of a debt instrument that has an issue price equal to its stated principal amount, including a debt instrument that has an indefinite maturity (for example, a loan payable on demand), and that calls for a fixed rate of interest over the entire term of the debt instrument compounded at periodic intervals of one year or less, shall be the stated interest rate. For example, if A lends B $100,000, repayable on demand or at a time that is not ascertainable on the issue date, with interest at 12%, compounded semiannually, all interest to be added to principal and payable at maturity, the yield of this loan is 12%, compounded semiannually. See paragraph (k), Example (14) of this section for an illustration of this rule.

(iii) *Debt instrument providing for contingent payments.* The yield of a debt instrument that provides for contingent payments (as described in § 1.1275-4(b)) generally shall be determined for purposes of section 1272 by reference to only the noncontingent payments under the debt instrument. See § 1.1275-4 for rules relating to the treatment of debt instruments providing for contingent payments.

(iv) *Variable rate debt instruments.* The yield of a debt instrument calling for a variable rate of interest based on an objective interest index (as defined in § 1.1275-5(b)) generally is a variable yield. For rules relating to variable rate debt instruments, see § 1.1275-5.

(4) *Yield of debt instrument subject to certain options*—(i) *In general.* The yield of a debt instrument issued for cash or publicly traded property that is subject to a put or call option described in paragraph (f)(4)(ii) of this section or an option to extend described in paragraph (f)(4)(v) of this section shall be determined in accordance with the rules set forth in paragraph (f)(4)(iii) of this section. The yield of a debt instrument issued for nonpublicly traded property and governed by section 1274 that is subject to an option described in paragraph (f)(4) (ii) or (v) of this section shall be determined in accordance with the rule set forth in § 1.1274-6(f). Paragraph (f)(4) of this section shall not apply in a case in which a put or call option is held by a third party. For purposes of paragraph (f)(4) of this section, the term "issuer" shall include a person bearing a relationship to the issuer described in section 108(e)(4).

(ii) *Described options.* An option that is not separately alienable from a debt instrument and that entitles the holder of the option and of the debt instrument to require the issuer to purchase or retire the debt instrument before its stated maturity date is a put option described in paragraph (f)(4) of this section. An option that is not separately alienable from a debt instrument and that entitles the issuer of the option and debt instrument to purchase or retire the debt instrument before its stated maturity date is a call option described in paragraph (f)(4) of this section.

(iii) *Presumption of exercise of option in debt instrument issued for cash or publicly traded property*—(A) *Holders.* The holder of a debt instrument and put option described in paragraph (f)(4)(ii) of this section shall be presumed to exercise this option for purposes of calculating the yield on the debt instrument if, and only if, either—

(*1*) By utilizing the date of exercise of the put option as the maturity date and the amount for which the debt instrument could be sold or retired in accordance with the terms of the put (the put price) as the stated redemption price at maturity, the yield of the debt instrument is greater than it would be if the put option were not exercised, or, equivalently,

(*2*) The put price is greater than the revised issue price (as defined in § 1.1275-1(h)) would be on the date of exercise.

(B) *Issuers.* The issuer of a debt instrument who holds a call option described in paragraph (f)(4)(ii) of this section shall be presumed to exercise this option if, and only if, either—

(*1*) By utilizing the date of exercise of the call as the maturity date and the amount for which the debt instrument could be purchased or retired in accordance with the terms of the call (the call price) as the stated redemption price at maturity, the yield of the debt instrument is lower than it would be if the call option were not exercised, or, equivalently,

(*2*) The call price is less than the revised issue price would be on the date of exercise.

(iv) *Subsequent adjustments.* If a put or call option described in paragraph (f)(4)(ii) of this section is presumed exercised as set forth in paragraph (f)(4)(iii) of this section or § 1.1274-6(f), and is not exercised in fact, the debt instrument shall be treated solely for purposes of sections 1272 and 1273 as if the put or call option were exercised and a new debt instrument were issued on the presumed exercise date for an amount equal to the put price or call price. If, conversely, a put or call option described in paragraph (f)(4)(ii) of this section is presumed not exercised as set forth in paragraph (f)(4)(iii) of this section or § 1.1274-6(f), and is, in fact, exercised, then the debt instrument shall be considered redeemed prior to maturity.

(v) *Options to extend.* If the holder or issuer of a debt instrument has an option to extend the term of the debt instrument on fixed terms and conditions, the debt instrument shall be treated as having a stated maturity date on the latest date on which the debt instrument could be repaid in accordance with such terms and conditions, and the party who may exercise the option to extend shall be treated as having a put option (in the case of the holder of the debt instrument) or a call option (in the case of the issuer of the debt instrument) on the date upon which the debt instrument would be repaid if the option were not exercised. Such put or call option shall be presumed exercised or not exercised in accordance with the rules of paragraph (f)(4) of this section. If the put or call option is presumed exercised, the corresponding option to extend shall be presumed not to be exercised. Conversely, if the put or call option is presumed not exercised, the corresponding option to extend shall be presumed exercised.

(vi) *Variable interest rates.* In the case of a variable rate debt instrument (as defined in § 1.1275-5(a)), the hypothetical yields (as defined in § 1.1275-5(c)(3)(ii)) shall be used for purposes of paragraph (f)(4) of this section.

(g) *Reduction where holder pays acquisition premium*—(1) *Debt instruments purchased after July 18, 1984*—(i) *In general.* If a debt instrument originally issued at a discount after July 1, 1982, is purchased after July 18, 1984, for an amount less than the stated redemption price at maturity but greater than the revised issue price, the purchaser has paid an acquisition premium for the debt instrument. If a purchaser pays an acquisition premium for a debt instrument, the daily portion for any day that the purchaser holds the debt instrument shall be reduced by an amount which is equal to the daily portion for that day (determined without regard to this paragraph (g)(1)(i)) multiplied by the fraction described in paragraph (g)(1)(ii) of this section. For purposes of paragraph (g) of this section, a holder of a debt instrument that was purchased at an acquisition premium includes an original purchaser who acquires the debt instrument for an amount less than the stated redemption price at maturity but greater than the issue price.

(ii) *Determination of fraction.* For purposes of paragraph (g)(1) of this section—

(A) The numerator of the fraction to be determined is the excess (if any) of—

(*1*) The cost of the debt instrument incurred by the purchaser, over

(*2*) The revised issue price (determined without regard to paragraph (g)(1)(i) of this section) of the debt instrument on the date of purchase; and

(B) The denominator of the fraction is the excess of the stated redemption price at maturity over the revised issue price (determined without regard to paragraph (g)(1)(i) of this section) of the debt instrument on the date of purchase.

(2) *Debt instruments purchased before July 19, 1984*—(i) *In general.* If a debt instrument that was originally issued at a discount after July 1, 1982 is purchased before July 19, 1984, for an acquisition premium, the daily portion for any day that the purchaser holds the debt instrument shall be reduced (but not below zero) by the ratable amount of the acquisition premium, determined at the time of purchase.

(ii) *Ratable amount of acquisition premium.* The ratable amount of acquisition premium is equal to—

(A) The excess (if any) of the purchase price over the revised issue price on the date of purchase, divided by

(B) The number of days beginning on the date of purchase and ending on the day before the stated maturity date.

(h) *Transitional rule; binding commitment.* A debt instrument issued pursuant to a written commitment that was binding on July 1, 1982, and at all times thereafter shall be treated as issued on July 1, 1982, and thus is governed by section 1272(b) and § 1.1232–3A. The written commitment must be enforceable against the issuer of the debt instrument under applicable state law and must contain an enforceable obligation to issue the debt instrument at a particular price. Thus, for example, the rules of section 1272(a) and this section do not apply to the exercise of warrants that were outstanding on July 1, 1982, and that were enforceable against the issuer under state law.

(i) [Reserved]

(j) *Basis adjustment.* For purposes of section 1272 and this section, the basis of a debt instrument in the hands of the holder shall be increased by the amount of original issue discount included in the holder's gross income under paragraph (b) of this section, and decreased by the amount of any payment from the issuer to the holder other than a payment of qualified periodic interest with respect to that debt instrument.

(k) *Examples.* The rules stated in paragraphs (b) through (j) of this section may be illustrated by the following examples:

Example (1). On January 1, 1985, A, a calendar-year taxpayer, purchases at original issue for cash of $55,839.48, M Corporation's 5-year zero-coupon bond maturing on January 1, 1990, at a stated redemption price of $100,000. There is no intention to call the bond before maturity. The bond contains $44,160.52 of original issue discount (states redemption price at maturity, $100,000, less issue price, $55,839.48). Since the debt instrument does not provide for payments at regular intervals, under paragraph (d)(1)(iii) of this section, the accrual period is the six-month period ending on December 31 and June 30 of each calendar year. Yield, as determined under paragraph (f) of this section, is 12%, compounded semiannually. The amount of original issue discount allocable to the first accrual period under paragraph (c)(2)(i) of this section is equal to the adjusted issue price at the beginning of the period, which, under paragraph (e)(1) of this section, is the issue price ($55,839.48), multiplied by the semiannual yield factor of 6% (12% divided by 2, the number of accrual periods in a year, under paragraph (c)(2)(i)(A)(*2*) of this section) less the sum of amounts payable as qualified periodic interest (0), or $3,350.37. The adjusted issue price at the beginning of the second accrual period under paragraph (e)(2) of the this section is equal to the issue price plus the amount of original issue discount includible for the first accrual period ($55,839.48 + $3,350.37) or $59,189.85. Under paragraph (c)(2)(i) of this section, the amount of original issue discount allocable to the second accrual period is equal to the adjusted issue price at the beginning of the period, ($59,189.85), multiplied by the semiannual yield factor (6%), less amounts payable as qualified periodic interest (0), or $3,551.39. Since the first and second accrual periods exactly coincide with A's taxable year, A includes in gross income for 1985 the sum of the original issue discount allocable to the first two accrual periods, or $6,901.76. Under paragraph (j) of this section, A increases his basis in the note by the amount of original issue discount taken into gross income for 1985, $6,901.76. A thus has an adjusted basis of $62,741.24. The table below contains the adjusted issue price at the beginning of each accrual period and the amount of original issue discount allocable to each accrual period derived in the same manner as for the first two accrual periods:

Adjusted issue price at beginning of accrual period		OID per accrual period
Jan. 1, 1985	$55,839.48	$3,350.37
July 1, 1985	59,189.85	3,551.39
Jan. 1, 1986	62,741.24	3,764.47
July 1, 1986	66,505.71	3,990.34
Jan. 1, 1987	70,496.05	4,229.76
July 1, 1987	74,725.81	4,483.55
Jan. 1, 1988	79,209.36	4,752.56
July 1, 1988	83,961.92	5,037.72
Jan. 1, 1989	88,999.64	5,339.98
July 1, 1989	94,339.62	5,660.38
Jan. 1, 1990	100,000.00	44,160.52

The sum of the amounts of original issue discount allocable to each accrual period equals the total amount of original issue discount on the bond. Under paragraph (c)(2)(iii) of this section, the amount of original issue discount allocable to the final accrual period is equal to the excess of the stated redemption price at maturity over the adjusted issue price at the beginning of the final accrual period ($100,000–$94,339.62), or $5,660.38.

Example (2). On October 1, 1985, A, a calendar-year taxpayer, purchases at original issue for cash of $55,000, a note of N Corporation with no stated interest maturing on December 31, 1990, at a stated redemption price of $100,000. The bond has $45,000 of original issue discount (stated redemption price at maturity, $100,000, less issue price, $55,000). There is no intention to call the bond before maturity. Since the note does not provide for any payments prior to maturity under paragraph (d)(1)(iii) of this section, the accrual period is the six-month period ending on December 31 and June 30 of each calendar year. The first accrual period is a short accrual period beginning on October 1, 1985, and ending on December 31, 1985. The yield, determined under paragraph (f)(2) of this section using the exact method, is 11.71779%, compounded semiannually. The adjusted issue price at the beginning of the first accrual period under paragraph (e)(1) of this section is the issue price. The amount of original issue discount that A includes in gross income for 1985 is the amount of original issue discount calculated under paragraph (c)(2)(ii)(A) of this section that is allocable to the first accrual period. Since the exact method was used to calculate yield, the exact method must be used to determine the amount of original issue discount that is allocable to the short period. This amount is determined as follows:

(1) Issue price	$55,000.00
(2) Multiplied by: yield factor, the result of the formula in paragraph (c)(2)(ii)(A) of this section [(1 + .117179/2)90/180 − 1]	0.02888
	1,588.40
(3) Less: amounts payable as qualified periodic interest	0
(4) Original issue discount allocable to first accrual period	1,588.40

A includes $1,588.40 of original issue discount in gross income for 1985. Under paragraph (j) of this section, A increases his basis by that amount. A's adjusted basis thus is $56,588.40 ($55,000 + $1,588.40). This amount is also the adjusted issue price at the beginning of the second accrual period determined under paragraph (e)(2)(i) of this section. The amount of original issue discount allocable to the second accrual period is determined as follows:

(1) Adjusted issue price on January 1, 1986	$56,588.40
(2) Multiplied by: yield factor, (.117179/2)	0.05859
	3,315.51
(3) Less: amounts payable as periodic interest	0
(4) Original issue discount allocable to the second accrual period	3,315.51

The adjusted issue price at the beginning of the third accrual period is $59,903.91 ($56,588.40 + $3,315.51).
The amount of original issue discount allocable to the third accrual period is determined as follows:

(1) Adjusted issue price on July 1, 1986	$59,903.91
(2) Multiplied by: yield factor	0.05859
	3,509.77
(3) Less: amounts payable as periodic interest	0
(4) Original issue discount allocable to the third accrual period	3,509.77

The amount of original issue discount which A includes in gross income for 1986 is $6,825.28 ($3,315.51 + $3,509.77). Under paragraph (j) of this section, A increases his basis by that amount. A's adjusted basis thus is $63,413.68 ($56,588.40 + $6,825.28). The amount of original issue discount allocable to the remaining accrual periods may be determined by repeating steps (1) through (4), above, for each accrual period until the final accrual period. The amount of original issue discount allocable to the final accrual period is the excess of the stated redemption price at maturity over the adjusted issue price at the beginning of that period.

Example (3). Assume the same facts as in Example (2), except that the yield under paragraph (f)(2) of this section is determined using the approximate method for the short first accrual period with a resulting yield of 11.70963%, compounded semiannually. Since the approximate method was used to calculate yield, the amount of original issue discount allocable to the first accrual period is determined under the approximate method of paragraph (c)(2)(ii)(B) of this section as follows:

(1) Issue price	$55,000.00
(2) Multiplied by: yield factor, (.1170963/2)	0.05855
	3,220.25
(3) Multiplied by the fraction f (number of days in the first accrual period over number of days in a full accrual period, 90/180)	.50
	1,610.13
(4) Less: amounts payable as qualified periodic interest	0
(5) Original issue discount allocable to the first accrual period	1,610.13

Thus, using the approximate method, A includes $1,610.13 in gross income for 1985 and increases his basis by that amount to $56,610.13, which is also the adjusted issue price at the beginning of the second accrual period.

Example (4). (i) On November 1, 1985, B, a calendar-year taxpayer, purchases at original issue for cash of $86,235.17, N Corporation's 15-year bond, maturing on October 31, 2000, at a stated redemption price of $100,000. The bond provides for semiannual payments of interest at an annual rate of 10% ($5,000 on May 1 and November 1 of each calendar year). There is no intention to call the bond before maturity. The bond has $13,764.83 of original issue discount (stated redemption price at maturity, $100,000, less issue price, $86,235.17). Under the rule prescribed in § 1.1275–2(e)(3), the interest payments due on May 1 and November 1 of each calendar year may be treated as paid on the last day of the preceding month, or on April 30 and October 31 of each calendar year. Assuming this rule is followed, the accrual period, under paragraph (d)(1)(i) of this section, is the interval between payment dates, or the six-month period ending on October 31 and April 30 of each calendar year. Yield under paragraph (f)(1) of this section is 12%, compounded semiannually.

(ii) The amount of original issue discount allocable to the first accrual period is determined as follows:

(1) Issue price	$86,235.17
(2) Multiplied by: yield factor, (.12/2)	.06
	5,174.11
(3) Less: amounts payable as periodic interest	5,000.00
(4) Original issue discount allocable to the first accrual period	174.11

The daily portion of original issue discount for the first accrual period under paragraph (c)(1) of this section is the amount shown on line (4), above, divided by the number of days in the accrual period. Using the 30-day convention described in § 1.1275–2(e), the number of days in a six-month accrual period is 180; therefore, the daily portion of original issue discount for the first accrual period is equal to $174.11/180, or $0.96728. Since B held the bond in 1985 for 60 days, the amount of original issue discount that B includes in gross income for 1985 is equal to 60x$0.96728, or $58.04. The remainder of the original issue discount allocable to the second accrual period, $116.07, is included in gross income for 1986. Under paragraph (j) of this section, B increases his basis by the amount of original issue discount included in gross income for 1985. B's adjusted basis on January 1, 1986, is thus $86,293.21. The adjusted issue price of the bond at the beginning of the second accrual period under paragraph (e)(2) of this section is $86,409.28 (issue price, $86,235.17, plus original issue discount previously includible, $174.11).

(iii) The amount of original issue discount allocable to the second accrual period is determined as follows:

(1) Adjusted issue price on May 1, 1986	$86,409.28
(2) Multiplied by: yield factor	.06
	5,184.56
(3) Less: amounts payable as periodic interest	5,000.00
(4) Original issue discount allocable to the second accrual period	184.56

The adjusted issue price at the beginning of the third accrual period under paragraph (e)(2) of this section is $86,593.84 ($86,409.28 + $184.56). The amount of original issue discount allocable to the third accrual period is determined as follows:

(1) Adjusted issue price on November 1, 1986	$86,593.84
(2) Multiplied by: yield factor	.06
	5,195.63
(3) Less: amounts payable as periodic interest	5,000.00
(4) Original issue discount allocable to the third accrual period	195.63

The daily portion of original issue discount for the third accrual period is $195.63, the amount shown on line (4), above, divided by the number of days in the accrual period (180, using the 30-day convention described in § 1.1275–2(e)), or $1.08683.
B includes in gross income for 1986 only the sum of the daily portions of original issue discount for the number of days in the third accrual period that fall in 1986 for which B held the bond (60 days). Thus, B includes $65.21 for 1986 (60x$1.08683). The remaining original issue discount allocable to the third accrual period, $130.42, is included in gross income for 1987. The total amount of original issue discount includible by B in gross income for 1986 is $365.84 ($116.07 + $184.56 + $65.21).

Example (5). (i) Assume the same facts as in Example (4), except that B sells the bond to C, a calendar-year taxpayer, on November 1, 1988, for cash of $90,000. The revised issue price (as defined in § 1.1275–1(h)) on that date is $87,449.65. Under paragraph (g)(1)(i) of this section, C has purchased the bond at an acquisition premium of $2,550.35 (cost, $90,000, less revised issue price, $87,449.65). The daily portion for any day that C holds the bond shall be reduced under paragraph (g)(1)(i) of this section by an amount equal to the daily portion multiplied by a fraction, described in paragraph (g)(1)(ii) of this section, the numerator of which is the amount of the acquisition premium paid by C, and the denominator of which is $12,550.35, (the excess of the stated redemption price at maturity, $100,000, over the revised issue price, $87,449.65). C thus reduces his daily portion of original issue discount by an amount equal to that daily portion multiplied by the fraction, $2,550.35/$12,550.35, or 0.20321.

(ii) The amount of original issue discount that C includes in gross income for 1988 is determined as follows:

(1) Adjusted issue price on November 1, 1988	$87,449.65
(2) Multiplied by: yield factor	.06
	5,246.98
(3) Less: amounts payable as qualified periodic interest	5,000.00
(4) Original issue discount allocable to accrual period beginning on November 1, 1988	246.98
(5) Divided by: number of days in the accrual period	180
(6) Daily portion of original issue discount	1.37211
(7) Fraction described in paragraph (g)(1)(ii) of this section	0.20321
(8) Line (6) multiplied by line (7)	0.27883
(9) Daily portion of original issue discount includible by C (line (6) minus line (8))	1.09328

Since C holds the bond for only two months in 1988, the amount of original issue discount that C includes in gross income for 1988 is equal to 60x$1.09328, or $65.60. Under paragraph (j) of this section, C increases his basis, $90,000, by that amount. C's adjusted basis as of January 1, 1989 thus is $90,065.60.

(iii) The amount of original issue discount that C includes in gross income for 1989 includes the original issue discount for the remaining 120 days in the accrual period, $131.19 (120x$1.09328), that began on November 1, 1988. The adjusted issue price at the beginning of the next accrual period, however, is determined under paragraph (e)(2) of this section without regard to any adjustments made under paragraph (g) of this section. In determining that adjusted issue price, the full amount of the original issue discount allocable to the immediately preceding accrual period is added to the adjusted issue price at the beginning of the preceding accrual period. The original issue discount allocable to the preceding accrual period (before adjustment for C's acquisition premium) as shown on line (4), above, is $246.98. The adjusted issue price at the beginning of the accrual period beginning on May 1, 1989, is thus $ 63 ($87,449.65 + $246.98).

(iv) The amount of original issue discount includible by C for the accrual period beginning on May 1, 1989, is determined as follows:

(1) Adjusted issue price on May 1, 1989	$87,696.63
(2) Multiplied by: yield factor	.06
	5,261.80
(3) Less: amounts payable as qualified periodic interest	5,000.00
(4) Original issue discount allocable to accrual period beginning on May 1, 1989	261.80
(5) Divided by: number of days in the accrual period	180
(6) Daily portion of original issue discount	1.45444
(7) Fraction described in paragraph (g)(1)(ii) of this section	0.20321
(8) Line (6) multiplied by line (7)	0.29556
(9) Daily portion of original issue discount includible by C (line (6) minus line (8))	1.15888

The total amount of original issue discount includible by C for the accrual period beginning on May 1, 1989, is $208.60 (180×$1.15888). The total amount of original issue discount allocable to the accrual period beginning on May 1, 1989, as shown on line (4) above, is $261.80. The adjusted issue price at the beginning of the next accrual period is thus $87,958.43 ($87,696.63 + $261.80).

(v) The amount of original issue discount includible by C for the accrual period beginning on November 1, 1989, is determined as follows:

(1) Adjusted issue price on November 1, 1989	$87,958.43
(2) Multiplied by: yield factor	.06
	5,277.51
(3) Less: amounts payable as periodic interest	5,000.00
(4) Original issue discount allocable to accrual period	277.51
(5) Divided by: number of days in the accrual period	180
(6) Daily portion of original issue discount	1.54172
(7) Fraction described in paragraph (g)(1)(ii) of this section	0.20321
(8) Line (6) multiplied by line (7)	0.31329
(9) Daily portion of original issue discount includible by C (line (6) minus line(8))	1.22843

Since C holds the bond in 1989 for only two months of the accrual period beginning on November 1, 1989, C includes 60×$1.22843, or $73.71 of original issue discount for the last two months of 1989. The remainder of the original issue discount includible by C for the accrual period beginning on November 1, 1989, is included by him in gross income for 1990.

(vi) The total amount of original issue discount includible by C in gross income for 1989 is $413.50 ($131.19 + $208.60 + $73.71). Under paragraph (j) of this section, C increases his basis by this amount. C's adjusted basis as of December 31, 1989 is $90,479.10 ($90,065.60 + $413.51). The amount of original issue discount includible by C for the remaining accrual periods, assuming he holds the bond to maturity, may be determined by repeating steps (1) through (9), above, for each accrual period until maturity.

Example (6). (i) On November 19, 1985, A, a calendar-year taxpayer, purchases at original issue for cash of $68,088.77, O Corporation's bond maturing on December 31, 1988, at a stated redemption price of $75,000. The bond has $8,390.69 of original issue discount (stated redemption price at maturity, $75,000, less issue price, $66,609.31). There is no intention to call the bond before maturity. The instrument provides for payments of interest at an annual rate of 8%, paid quarterly ($1,500 per quarter). The first interest payment is made on December 31, 1985, and is a full $1,500 payment even though the first accrual period from November 19, 1985, to December 31, 1985, is a short first accrual period. Yield to maturity, determined under paragraph (f)(2) of this section according to the exact method, is 12% compounded quarterly. The accrual period, under paragraph (d)(1)(i) of this section, is the interval between payment dates, or a three-month period ending on December 31, September 30, June 30, and March 31 of each calendar year.

(ii) Using the 30-day convention described in § 1.1275-2 (e), the short period contains 42 days. Therefore, the portion of the $1,500 payment on December 31, 1985 that constitutes qualified periodic interest is the amount of interest payable for a short period of 42 days under the exact method for a debt instrument with an interest rate of 8%, compounded quarterly. This amount is $696.30, which is the result of the following formula: $[1+.08/4)^{42/90}-1]\times\$75{,}000$.

(iii) Under paragraph (e)(1) of this section, the adjusted issue price at the beginning of the first accrual period is the issue price. The amount of original issue discount allocable to the first accrual periods is determined under paragraph (c)(2)(ii)(A) of this section as follows:

(1) Issue price	$68,088.77
(2) Multiplied by: yield factor, the result of the formula in paragraph (c)(2)(ii)(A) of this section $[(1+.12/4)^{42/90}-1]$	.01389
	945.73
(3) Less: amounts payable as periodic interest	696.30
(4) Original issue discount allocable to the first accrual period	249.43

A includes $249.43 of original issue discount in gross income for 1985. A's adjusted issue price at the beginning of the second accrual period under paragraph (e)(2) of this section is determined by increasing A's issue price, $68,088.77, by the amount of original issue discount allocable to the first accrual period, $249.43, and by reducing this sum by the portion of the payment on December 31, 1985, not treated as qualified periodic interest, $803.70. A's adjusted issue price as of January 1, 1986, is thus $67,534.50 ($68,088.77 + $249.43 − $803.70). Under paragraph (j) of this section, this amount is also A's adjusted basis in the debt instrument.

(iv) The amount of original issue discount allocable to the second accrual period is determined as follows:

(1) Adjusted issue price on January 1, 1986	$67,534.50
(2) Multiplied by: yield factor (.12/4)	.03
	2,026.04
(3) Less: amounts payable as qualified periodic interest	1,500.00
(4) Original issue discount allocable to the second accrual period	526.04

(v) Assume the same facts as in part (i), except that A purchases the bond for cash of $68,081.36 and that the yield, determined under paragraph (e)(2) of this section according to the approximate method, is 12%, compounded quarterly. The amount of original issue discount allocable to the first accrual period is determined under paragraph (c)(2)(ii)(B) as follows:

(1) Issue price	$68,081.36
(2) Multiplied by: yield factor (.12/4)	.03
	2,042.44
(3) Multiplied by: the fraction f (number of days in the first accrual period over the number of days in a full accrual period, 42/90)	.46667
	953.14
(4) Less: amounts payable as qualified periodic interest ($1,500x42/90)	700.00
(5) Original issue discount allocable to the first accrual period	253.14

A includes in gross income for 1985 $253.14 of original issue discount. Both A's adjusted issue price and adjusted basis at the beginning of the second accrual period under paragraph (e)(2) of this section is $67,534.50 ($68,081.36 + 253.14 − $800.00); it is also the same as the adjusted issue price at the beginning of the second accrual period in part (i). The amount of original issue discount allocable to the remaining accrual periods to maturity, assuming A holds the bond to maturity, will thus be identical to the amounts determined in part (i).

Example (7). (i) On January 1, 1983, B, a calendar-year taxpayer, purchases at original issue for cash of $86,757.20, M Corporation's 20-year bond maturing on December 31, 2002, at a stated redemption price of $100,000. The bond provides for annual payments of interest at 12%, compounded annually. The bond has $13,242.80 of original issue discount (stated redemption price at maturity, $100,000, less issue price, $86,757.20). There is no intention to call the bond before maturity. The yield determined under paragraph (f)(1) of this section (accurate to two decimal places) is 14.00%, compounded annually. The accrual period, under paragraph (d)(2) of this section is the one-year period beginning on January 1 and ending on December 31 of each calendar year. The adjusted issue price at the beginning of the first accrual period is, under paragraph (e)(2) of this section, the issue price. The amount of original issue discount allocable to the first accrual period is determined under paragraph (c)(2) of this section as follows:

(1) Issue price	$86,757.20
(2) Multiplied by: yield factor	.14
	12,146.01
(3) Less: amounts payable as qualified periodic interest	12,000.00
(4) Original issue discount allocable to the first accrual period	146.01

B includes $146.01 of original issue discount in gross income for 1983. Under paragraph (j) of this section, B increases his basis by this amount. B's adjusted basis thus becomes $86,903.21 ($86,757.20 + $146.01). This amount is also the adjusted issue price at the beginning of the second accrual period under paragraph (e)(2) of this section. The amount of original issue discount allocable to the remaining accrual periods to maturity, determined as in steps (1) through (4), is set forth in the following table:

Accrual period	Adjusted issue price	Original issue discount
1984	$86,903.21	$166.45
1985	87,069.66	189.75
1986	87,259.41	216.32
1987	87,475.73	246.60
1988	87,722.33	281.13
1989	88,003.46	320.48
1990	88,323.94	365.35
1991	88,689.29	416.50
1992	89,105.79	474.81
1993	89,580.60	541.28
1994	90,121.88	617.06
1995	90,738.94	703.45
1996	91,442.39	801.93
1997	92,244.32	914.21
1998	93,158.53	1,042.19
1999	94,200.72	1,188.10
2000	95,388.82	1,354.43
2001	96,743.26	1,544.06
2002	98,287.32	1,712.68

Under paragraph (c) (2) (iii) of this section, the original issue discount allocable to the final accrual period is determined by subtracting the adjusted issue price on January 1, 2002, $98,287.32, from the stated redemption price at maturity, $100,000, for a result of $1,712.68.

(ii) Assume the same facts as in part (i), except that B sells the bond to C on February 1, 1984, for cash of $87,000. The revised issue price of the bond (as defined in § 1.1275–1(h)) on that date is equal to the adjusted issue price of the bond on January 1, 1984, plus the sum of the daily portions of original issue discount for the month of January. The daily portion under paragraph (c) of this section is equal to the amount of original issue discount allocable to the accural period beginning on January 1, 1984, ($166.45 in the table in part (i)) divided by the number of days in the accrual period, (360, using the 30-day convention described in § 1.1275–2(e)). The daily portion is $0.46236. The sum of the daily portions for the month of January is therefore $13.87 ($0.46236 × 30). The revised issue price on February 1, 1984, is $86,917.08 ($86,903.21 + $13.87). Under paragraph (g) of this section, C has purchased the bond at an acquisition premium of $82.92 (cost, $87,000, less revised issue price, $86,917.08). The daily portion of original issue discount for any day that C holds the bond is reduced under paragraph (g)(2) by the ratable amount of the acquisition premium defined in paragraph (g)(2)(ii) as the total acquisition premium ($82.92), divided by the number of days beginning on the date of purchase and ending on the day before the stated maturity date (6,810) using the 30-day convention and 360-day convention described in § 1.1275–2(e). The ratable amount of acquisition premium is thus $0.01218. The daily portion of original issue discount that is includible in gross income for 1984 ($0.46236) is reduced by this amount to result in a daily portion of $0.45018. The amount of original issue discount includible by C in gross income for 1984 is thus $148.56 ($0.45018 x 330). For the remaining accrual periods in the bond's term, the ratable reduction per year will be $4.38 ($0.01218 x 360). The table below sets forth the amount of original issue discount includible in gross income by C for each remaining year in the bond's term, assuming C holds the bond to maturity:

Accrual period	OID allocable	Ratable amount of acquisition premium	CID includable by C
1984	$166.45	$4.02	$162.43
1985	189.75	4.38	185.37
1986	216.32	4.38	211.94
1987	246.60	4.38	242.22
1988	281.13	4.38	276.75
1989	320.48	4.38	316.10
1990	365.35	4.38	360.97
1991	416.50	4.38	412.12
1992	474.81	4.38	470.43
1993	541.28	4.38	536.90
1994	617.06	4.38	612.68
1995	703.45	4.38	699.07
1996	801.93	4.38	797.55
1997	914.21	4.38	909.83
1998	1,042.19	4.38	1,037.81
1999	1,188.10	4.38	1,183.72
2000	1,354.43	4.38	1,350.05
2001	1,544.06	4.38	1,539.68
2002	1,712.68	4.38	1,708.30

Example (8). Assume C, a calendar-year taxpayer, is the holder of a 3-year publicly offered debt instrument which he purchased at original issue on January 1, 1987, for its issue price of $93,803.81. The debt instrument has a face amount of $100,000, and provides for six equal semiannual payments of $19,076.19, the last of which is due on December 31, 1989. Each payment of $19,076.19 represents the semiannual payment necessary to amortize $100,000 at an annual rate of interest of 8%, compounded semiannually, over a 3-year period. Of each payment of $19,076.19, the amounts which represent qualified periodic interest (as defined in § 1.1273–1(b)(1)(iii) are set forth in the table below. The instrument is an installment obligation within the meaning of §1.1273-1(b)(2)(i), and also is a self-amortizing installment obligation within the meaning of § 1.1273-1(b)(2)(iii) of this section and has $6,196.19 of original issue discount (stated redemption price at maturity, $100,000, less issue price, $93,803.81). Yield determined under paragraph (f)(1) of this section, is 12%, compounded semiannually. The accrual period, under paragraph (d)(1)(i) of this section is a six-month period ending on June 30 and December 31 of each calendar year. The adjusted issue price at the beginning of the first accrual period is, under paragraph (e)(1) of this section, the issue price. The amount of original issue discount allocable to the first accrual period is determined under paragraph (c)(2)(i) of this section as follows:

(1) Issue price	$93,803.81
(2) Multiplied by: yield factor	.06
	5,628.23
(3) Less: amount of first interest payment	4,000.00
(4) Original issue discount allocable to the first accrual period	1,628.23

The adjusted issue price at the beginning of the second accrual period is determined under paragraph (e)(2)(ii) of this section by adding to the adjusted issue price ($93,803.81) the amount of original issue discount allocable to the first accrual period ($1,628.23) for a total of $95,432.04, and then decreasing the sum by the amount of the first payment that does not represent qualified periodic interest ($15,076.19). The adjusted issue price at the beginning of the second accrual period is $80,355.85. Note that the same result is obtained by increasing the adjusted issue price ($93,803.81) by the product of this issue price and yield as shown on line (2), above, ($5,628.23) and then by decreasing that sum by the total amount of the first payment ($19,076.19). The amount of original issue discount allocable to the remaining accrual periods may be determined by repeating steps (1) through (4), above, and then determining the new adjusted issue price. The results are set forth in the following table:

Accrual period	Product of adjusted issue price and yield	Qualified periodic interest	OID	Amounts other than qualified periodic interest	Adjusted issue price
1	$5,628.23	$4,000.00	$1,628.23	$15,076.19	$80,355.85
2	4,821.35	3,396.95	1,424.40	15,679.24	66,101.01
3	3,966.06	2,769.78	1,196.28	16,306.41	50,990.89
4	3,059.45	2,117.53	941.92	16,958.66	34,974.15
5	2,098.45	1,439.18	659.27	17,637.01	17,996.41
6	1,079.78	733.70	346.03	18,342.99	

Example (9). (i) On January 1, 1986, A sells B nonpublicly traded property for a stated purchase price of $3,500,000. B pays A $500,000 and gives A a 10-year note for $3,000,000. B's note calls for no interest in the first two years and interest at a rate of 15%, payable annually over the remaining 8 years of the debt instrument, with the first interest payment of $450,000 due on December 31, 1988 and the last such payment due on December 31, 1995, together with the $3,000,000 of principal. Assume that the debt instrument has adequate stated interest. (See § 1.1274-3 (c)(2), Example (1)). The yield of this debt instrument under paragraph (f)(1) of this section is 10.67837%, compounded annually. Since no interest is payable in 1986 or 1987, the payments of interest in years 1988 through 1995 are not qualified periodic interest payments within the meaning of § 1.1273-1(b)(1)(ii). Hence, B's obligation to A is treated as an installment obligation (within the meaning of § 1.1273-1(b)(2) with an issue price of $3,000,000 and a stated redemption price at maturity of $6,600,000 ($3,000,000 stated principal plus 8 payments of $450,000). As a result, B's obligation has original issue discount of $3,600,000 (stated redemption price at maturity, $6,600,000 less issue price, $3,000,000). The amount of original issue discount allocable to 1986 under paragraph (c)(2) of this section is the issue price of $3,000,000 multiplied by the yield, 10.67837%, or $320,351. This produces an adjusted issue price under paragraph (e)(2) of this section as of January 1, 1987 of $3,320,351 (issue price of $3,000,000 plus original issue discount in 1986 of $320,351). The amount of original issue discount allocable to 1987 is the product of this adjusted issue price and the yield of 10.67837%, or $354,560. The adjusted issue price at the beginning of 1988 is thus $3,674,911 ($3,320,351 + $354,560).

(ii) For the years 1988 through 1995, the amount of original issue discount allocable to each year is equal to the adjusted issue price at the beginning of that year multiplied by the yield. Since the aggregate amount of original issue discount accrued as of the end of any accrual period always exceeds the aggregate amount of stated interest as of the end of that accrual period, each $450,000 payment is treated entirely as a payment of original issue discount. The $450,000 payment has no tax consequences other than to reduce the adjusted issue price for future accrual periods under paragraph (e)(2)(ii) of this section. The amount of original issue discount allocable to 1988 is equal to the adjusted issue price of $3,674,911 multiplied by the yield of 10.67837%, or $392,421. The adjusted issue price at the beginning of 1989 is thus $3,617,331 ($3,674,911 + $392,421 – $450,000). The amounts treated as interest and the adjusted issue price for each year of the transaction are set forth in the following table:

Year	Adjusted issue price at beginning of year	Original issue discount
1986	$3,000,000	$320,351
1987	3,320,351	354,560
1988	3,674,911	392,421
1989	3,617,331	386,272
1990	3,553,604	379,467
1991	3,483,071	371,935
1992	3,405,006	363,599
1993	3,318,605	354,373
1994	3,222,978	344,162
1995	3,117,140	332,860

Example (10). A sells Blackacre to B on July 1, 1985, in exchange for cash of $50,000 and B's purchase money obligation having a stated principal amount of $200,000, maturing on June 10, 2015. B's note provides for 360 equal monthly payments of $1,467.53; this amount represents the monthly payment necessary to amortize a loan of $200,000 at an annual rate of interest of 8%, compounded monthly over a 30-year period. Of each payment of $1,467.53 during 1985, the amounts which represent qualified periodic interest payments (as defined in § 1.1273-1(b)(1)(iii)) are set forth in the table below. The note is an installment obligation within the meaning of § 1.1273-2(b)(2)(i) and is a self-amortizing obligation within the meaning of § 1.1273-2(b)(2)(iii) of this section. The stated redemption price at maturity under § 1.1273-2(b)(2)(iii) is the stated principal amount of the obligation, or $200,000. Assume that the transaction is not potentially abusive within the meaning of section 1274(b)(3)(B). Assume also that under section 1274(c)(2) and the regulations thereunder the note does not have adequate stated interest and that the imputed interest rate is 11%, compounded monthly; this is also the yield of the obligation under paragraph (f)(3) of this section. The issue price of the note is the imputed principal amount determined under § 1.1274-4, which is $154,099.87. The note has $45,900.13 of original issue discount (stated redemption price at maturity, $200,000, less issue price, $154,099.87). The accrual period under paragraph (d)(1)(i) of this section, is one month. The adjusted issue price at the beginning of the first accrual period is, under paragraph (e)(1) of this section, the issue price. The amount of original issue discount allocable to the first accural period is determined under paragraph (c)(2)(i) of this section as follows:

(1) Issue price	$154,099.87
(2) Multiplied by: yield factor (.11/12)	.00917
	$1,412.58
(3) Less: amount of first payment that represents qualified periodic interest	-$1,333.33
(4) Original issue discount allocable to the first accrual period	$79.25

The adjusted issue price at the beginning of the second accrual period is determined under paragraph (e)(2)(ii) of this section by adding to the issue price ($154,099.87) the amount of original issue discount allocable to the first accrual period ($79.25) and then decreasing the sum by the amount of the first payment that does not represent qualified periodic interest designated as principal ($134.20). The adjusted issue price at the beginning of the second accrual period is $154,044.92. As stated in Example (8), the same result may be obtained by adding to the issue price ($154,099.87) the product of the adjusted issue price and yield as shown on line (2), ($1,412.58), and then decreasing that sum by the total monthly payment ($1,467.53). The amount of original issue discount allocable to the remaining accrual periods may be determined by repeating steps (1) through (4), and then determining the new adjusted issue price. The results for the first 12 months are set forth in the following table:

Month	Product of adjusted issue price and yield	Qualified periodic interest	OID	Amount other than qualified periodic interest	Adjusted issue price
1	$1,412.58	$1,333.33	$79.25	$134.20	$154,044.92
2	1,412.08	1,332.44	79.64	135.09	153,989.47
3	1,411.57	1,331.54	80.03	135.99	153,933.51
4	1,411.06	1,330.63	80.43	136.90	153,877.04
5	1,410.54	1,329.72	80.82	137.81	153,820.05
6	1,410.02	1,328.80	81.22	138.73	153,762.54
7	1,409.49	1,327.88	81.61	139.65	153,704.50
8	1,408.96	1,326.94	82.02	140.59	153,645.93
9	1,408.42	1,326.01	82.41	141.52	153,586.82
10	1,407.88	1,325.06	82.82	142.47	153,527.17
11	1,407.33	1,324.11	83.22	143.42	153,466.97
12	1,406.78	1,323.16	83.62	144.37	153,406.22

Example (11). (i) On January 1, 1985, A, a calendar-year taxpayer, purchases at original issue for cash of $70,000, M Corporation's 15-year bond, maturing on December 31, 1999, at a stated redemption price of $100,000. Assume that the debt instrument is a capital asset in A's hands. The instrument provides for semiannual payments of interest at an annual rate of 8% ($4,000 semiannually). The bond further provides a put option entitling the holder to require the issuer to retire the bond on December 31, 1994, at a price of $85,000. Yield determined under paragraph (f)(1) of this section without regard to the existence of a put option is 12.47%, compounded semiannually. Yield determined by using December 31, 1994, as the maturity date and $85,000 as the stated redemption price at maturity is 12.56%, compounded semiannually. The revised issue price (as defined in § 1.1275–1(h)) on that date would be $83,736. Under paragraph (f)(4)(iii) (A) of this section, yield is calculated at the time of issue by assuming that A will excise the put option because exercise of the option would increase the overall yield on the instrument from 12.47% to 12.56%, compounded semiannually, or, alternatively, because the put price exceeds the revised issue price as of the date the put becomes exercisable. Since the put option is assumed exercised, the bond is considered to be a 10-year bond with an issue price of $70,000, a stated redemption price at maturity of $85,000, and yield determined under paragraph (f)(1) of this section of 12.56%, compounded semiannually. If the put option is, in fact, not exercised, then under paragraph (f)(4)(iv) of this section the bond is treated, for purposes of sections 1272 and 1273, as if it were retired on the presumed exercise date, December 31, 1994, and M is treated as having issued a new debt instrument to A for an issue price equal to the put price on that date, $85,000. This new debt instrument is treated as maturing on December 31, 1999, at a stated redemption price of $100,000, with yield of 12.08%, compounded semiannually, and providing for payments of interest at an annual rate of 8%, compounded semiannually.

(ii) Assume the same set of facts as in part (i), except that the put price is $82,000. Exercise of the put would result in a yield of 12.34%, compounded semiannually, calculated by using December 31, 1994, as the maturity date and $82,000 as the stated redemption price at maturity. This yield is lower than the yield of 12.47%, compounded semiannually, calculated for the complete 15-year term. It this is assumed at the time of issue, under paragraph (f)(4)(iii)(A) of this section, that A will not exercise the put option, since exercise of the option will result in a lower overall yield or, alternatively, because the put price is less than the revised issue price as of the date the put is exercisable. If the put option is, in fact, exercised, A realizes a capital loss equal to the excess of the revised issue price on the date of exercise ($83,736) over the put price ($82,000), or $1,736. M Corporation will have cancellation of indebtedness income of $1,736 under section 108 as it has redeemed a liability worth $83,736, for only $82,000.

(iii) Assume the same facts as in part (i), except that instead of providing the holder with an option to put the bond, the instrument provides the issuer with the right to call the bond on December 31, 1994, for a call price of $80,000. Exercise of the call would result in a 10-year term, an issue price of $70,000, a stated redemption price at maturity of $80,000, and yield of 12.20%, compounded semiannually. Under paragraph (f)(4)(iii)(B) of this section, it is assumed at the date of issue that the issuer will exercise the call option as it will result in a lower yield, or, alternatively, because the call price is less than the revised issue price as of the date the call is exercisable. If the call option is, in fact, not exercised, then the bond is treated as if it were retired on the presumed exercise date, December 31, 1994, and M is treated as having issued a new debt instrument to A for an issue price equal to the call price on that date, ($80,000). This new debt instrument is treated as having a term of 5 years, a stated redemption price at maturity of $100,000, and a yield of 13.65%, compounded semiannually.

(iv) Assume the same facts as in part (iii), except that call price is $85,000. Exercise of the call would result in a 10-year term, an issue price of $70,000, a stated redemption price at maturity of $85,000, and yield of 12.56%, compounded seminnually. Under paragraph (f)(4)(iii)(B) of this section, it is assumed at the date of issue that the call will not be exercised because it would result in a higher overall yield, or, alternatively, because the call price exceeds the revised issue price as of the date the call is exercisable. If the call is, in fact, exercised, A realizes a capital gain of $1,264 under section 1001 (amount realized, $85,000, less adjusted basis, $83,736). Under § 1.163–7(f), M Corporation is entitled to deduct as interest the excess of the repurchase price ($85,000) over the revised issue price as of the date the call is exercisable ($83,736), or $1,264.

Example (12). (i) The facts are the same as in Example (11), part (i), except that the debt instrument has an initial term of 10 years, a stated redemption price at maturity of $85,000, and the holder, A has an option to extend the term of the debt instrument (as defined in paragraph (f)(4)(v) of this section) for 5 years for a payment of $100,000 at maturity and semiannual interest payments of 8%. Under paragraph (f)(4)(v) of this section, the debt instrument is treated as if it had a term of 15 years and a stated redemption price at maturity of $100,000, and A is treated as having a put option for $85,000 at the end of 10 years. The analysis of the debt instrument is exactly the same as in part (i) of Example (11). Since it was concluded there that the put option will not be exercised, it is similarly concluded that A will not exerise his option to extewnd, and the debt instrument's stated term of 10 years and stated redemption price at maturity of $85,000 will be respected. If the option to extend is exercised, the debt instrument is treated as retired on the presumed exercise date, December 31, 1994, and a new debt instrument is considered issued on that date for a term of 5 years with an issue price equal to the original stated redemption price at maturity of $85,000, a new stated redemption price at maturity of $100,000.

(ii) The facts are the same as in part (i), except that the stated redemption price at maturity is $82,000. The analysis is the same as in part (ii) of Example (eleven). Since it was concluded there that the put option will not be exercised,it is similarly concluded that A will exercise his option to extend. The debt instrument is treated as having a term of 15 years and a stated redemption price at maturity of $100,000. If the option to extend is not exercised, the debt instrument is treated as retired prior to maturity.

Example (13). (i) A debt instrument is issued on March 1, 1987 for $100,000 cash and is redeemable at any time at the option of the holder. The debt instrument calls for interest to accrue at an annual rate of 11%, compounded quarterly, to be paid when the debt instrument is redeemed. Since the debt instrument calls for quarterly compounding of interest, under paragraph (d)(1)(i) of this section, the accrual period is the three-month period ending on May 31, August 31, November 30, and February 28 (or 29) of each calendar year. Pursuant to paragraph (f)(5)(ii) of this section, the yield of the debt instrument is 11%, compounded quarterly.

(ii) Assume that the debt instrument is not redeemed at any time during 1987. The amount of original issue discount allocable to the first accrual period is, under paragraph (c)(2)(i) of this section, the product of the issue price ($100,000) and the yield factor (.11/4), reduced by the sum of amounts payable as qualified periodic interest (0), $2,750.00. The adjusted issue price at the beginning of the second accrual period is, under paragraph (e)(2)(i) of this section, the sum of the issue price and the amount of original issue discount includible for the first accrual period ($100,000 + $2,750), or $102,750. The original issue discount allocable to the second accrual period is the product of the adjusted issue price at the beginning of the second accrual period and the yield factor ($102,750 × 0.0275), or $2,825.63. The original issue discount allocable to subsequent accrual periods is calculated in the same manner as above.

Example (14). (i) On July 1, 1986, A sells Blackacre to B in exchange for B's debt instrument calling for five annual payments each equal to 10% of the gross yield from Blackacre for the immediately preceding fiscal year ending on March 31, 1987. Each payment is to be made on the following June 30, together with interest at a rate of 11%, compounded annually from the issue date, July 1, 1986, to the date of payment. The terms of the debt instrument further specify that if by June 30, 1990, B has not paid at least $5 million to A (exclusive of interest), the payment due on June 30, 1991 shall consist of the excess of $5 million over the sum of all prior payments (exclusive of interest), plus interest at 11%, compounded annually from the issue date. Assume that on July 1, 1986, the Federal short-term rate is 9%, compounded annually, and the Federal mid-term rate is 11%, compounded annually.

(ii) Since B's debt instrument provides for payments of interest on the unpaid principal balance at a fixed rate, the provisions of § 1.1275–4(d) (relating to certain contingent payments within a fixed period) do not apply. B's debt instrument calls for interest at a rate equal to the Federal mid-term rate on the issue date. Under § 1.1274–3(b), therefore, B's debt instrument has adequate stated interest. The issue price of B's debt instrument under § 1.1274–2(b)(1) is thus the stated principal amount, which is the minimum total of principal payments to be made under the debt instrument ($5 million). The accrual period of the debt instrument under paragraph (d)(2) of this section is the one-year period ending on June 30 of each calendar year, and the yield of the debt instrument under paragraph (f)(3)(ii) of this section is 11%, compounded annually. The amount of original issue discount allocable to each annual accrual period under the debt instrument pursuant to paragraph (c)(2)(i) of this section is equal to 11% of the adjusted issue price at the beginning of the accrual period. (Since B is not required to make payments of interest currently and unconditionally at intervals of one year or less over the entire term of the debt instrument, the actual payments of interest are not qualified periodic interest payments within the meaning of § 1.1273–1(b)(1)(ii), and, thus, are original issue discount.

(iii) The gross yield from Blackacre for the fiscal year ending on March 31, 1987 is $13 million; therefore, a payment of $1,300,000 (plus interest of $143,000) is due on June 30, 1987. The amount of original issue discount allocable to the first accrual period is $550,000 (.11 × $5 million). Since all the interest payments under the debt instrument are original issue discount, this amount includes the interest of $143,000 that is actually payable during the first accrual period. The adjusted issue price of the debt instrument at the beginning of the second accrual period, determined under paragraph (e)(2)(ii) of this section, is $4,107,000 (issue price, $5 million, plus original issue discount for the first accrual period, $550,000, minus a payment of $1,443,000).

(iv) The gross yield from Blackacre for the fiscal year ending on March 31, 1988 is $15 million; therefore, a payment of $1,500,000 (plus interest of $348,150) is due on June 30, 1988. The amount of original issue discount allocable to the second accrual period is $451,770 (.11 × $4,107,000). The adjusted issue price of the debt instrument at the beginning of the third accrual period is $2,710,620 (adjusted issue price at beginning of second accrual period, $4,107,000, plus original issue discount for the second accrual period, $451,700, minus a payment of $1,848,150).

(l) [Reserved]

(m) *Purchase*—(1) *Debt instruments issued at a discount after July 18, 1984.* For purposes of section 1272(a) and this section, the term "purchase" means any acquisition of a debt instrument, in which the basis of the debt instrument is not determined in whole or in part by reference to the adjusted basis of the debt instrument in the hands of the persons from whom acquired.

(2) *Debt instruments issued at a discount before July 19, 1984.* For purposes of section 1272(a) and this section, the term "purchase" shall have the same meaning as in paragraph (m)(1) of this section with the additional requirement that the adjusted basis of the debt instrument also not be determined in whole or in part by reference to the adjusted basis of the debt instrument under section 1014 (relating to property acquired from a decedent).

§ 1.1273-1 Determination of amount of original issue discount.

(a) *Definition of original issue discount*—(1) *General rule.* For purposes of sections 1271 through 1275 and the regulations thereunder, the term "original issue discount" means the excess (if any) of [illegible] stated redemption price at maturity (as defined in paragraph (b) of this section) over the issue price (as defined in §§ 1.1273–2 (b) and 1.1274–2(b)).

(2) *Loans with indefinite maturities.* The total amount of original issue discount with respect to a loan with an indefinite maturity date (including a loan payable on demand) is indeterminate. See § 1.1272–1(f)(5)(ii) for rules relating to the determination of yield on certain loans with indefinite maturity dates for purposes of current inclusion of original issue discount. See also § 1.1275–4(d) for rules relating to certain loans calling for payments within a fixed period.

(3) *De minimis rule*—(i) *In general.* If the original issue discount with respect to a debt instrument (other than an installment obligation within the meaning of paragraph (b)(2)(i) of this section) is less than one-fourth of one percent of the stated redemption price at maturity multiplied by the number of full years from the issue date (as defined in section 1275(a)(2) and § 1.1275-1(c)) to final maturity, then the amount of original issue discount shall be considered to be zero.

(ii) *Installment obligations*—(A) *In general.* In the case of an installment obligation, the rule of paragraph (a)(3)(i) of this section shall be applied with the following substitution: In lieu of the number of full years from the issue date to final maturity, there shall be substituted the weighted average maturity of the debt instrument. The weighted average maturity of an installment obligation is the sum of the following amounts (computed for each payment other than a payment of qualified periodic interest described in paragraph (b)(1)(ii) of this section)—

(*1*) The number of full years until a payment is made, multiplied by

(*2*) A fraction, the numerator of which is the amount of the payment and the denominator of which is the stated redemption price at maturity.

(B) *Safe harbor for certain installment obligations.* In the case of an installment obligation that calls for payments of principal no more rapidly than a self-amortizing installment obligation (as defined in paragraph (b)(2)(iii) of this section), in lieu of the rule set forth in paragraph (a)(3)(ii)(B) of this section, the rule set forth in paragraph (a)(3)(i) of this section may be applied by substituting one-sixth of one percent for one-fourth of one percent.

(iii) *Examples.* The provisions of paragraph (a)(3) of this section may be illustrated by the following examples:

Example (1). Assume that a debt instrument providing for a principal payment after ten years of $100 and annual interest payments of $10 is issued for $98. The general rule of paragraph (a)(3)(i) of this section applies because the debt instrument is not an installment obligation. The original issue discount is considered to be zero because the discount of $2 is less than $2.50, which is one-fourth of one percent of the stated redemption price at maturity ($100) multiplied by the number of full years to maturity (10). If this debt instrument were issued for $97.50 or less, however, the original issue discount would not be considered to be zero.

Example (2). Assume that a debt instrument providing for nine annual principal payments of $100, a principal payment of $600 after ten years, and annual interest payments at a rate of 10% of the unpaid principal balance is issued for $1,475. The rule of paragraph (a)(3)(ii)(A) of this section applies because the debt instrument is an installment obligation. The original issue discount is considered to be zero because the discount of $25 is less than $26.25, which is one-fourth of one percent of the stated redemption price at maturity ($1,500) multiplied by the weighted average maturity of the debt instrument determined under paragraph (a)(3)(ii) of this section (7 years).

Example (3). Assume that A issues a debt instrument to B with a 30-year term and a stated principal amount of $100,000, and provides for monthly payments of $1,028.61 over the entire term of the obligation. B charges A four points ($4,000), which are deducted from the total amount of funds disbursed to A. The issue price of the debt instrument is thus $96,000.

Assume further that the stated redemption price at maturity is equal to the stated principal amount. The parties may use the special rule of paragraph (a)(3)(ii)(B) of this section because the debt instrument is a self-amortizing installment obligation. Under this rule, the original issue discount is considered to be zero because the discount of $4,000 is less than $5,000, which is one-sixth of the percent of the stated redemption price at maturity ($100,000) multiplied by the number of full years to maturity (30 years).

Example (4). Assume that a debt instrument is issued for $100,000, providing for a principal payment of $100,000 after 5 years, and calling for annual interest payments of $10,000 for the first 3 years and annual interest payments of $10,600 for the last 2 years. All of the first three interest payments and $10,000 of each of the last two interest payments are qualified periodic interest within the meaning of paragraph (b)(1)(ii) of this section. The remaining $600 of each of the last two interest payments is included in the stated redemption price at maturity. Thus, the rule of paragraph (a)(3)(ii)(A) of this section applies, since the debt instrument is an installment obligation and has a stated redemption price at maturity of $101,200. Pursuant to paragraph (a)(3)(ii)(A) of this section, the weighted average maturity of the debt instrument is 4.994 years [(4 years × $600/$101,200) + (5 years × $100,600/$101,200)]. One-fourth of one percent of the stated redemption price at maturity multiplied by the weighted average maturity ($101,200 × 4.994) is $1,263.50. Since the actual amount of discount, $1,200, is less than this amount, the discount is considered to be zero.

Example (5). A lends B $100,000 for 10 years in consideration for B's note calling for interest to be paid semiannually at a rate of 10% for the first 5 years ($5,000 per semiannual period) and thereafter at a variable rate equal to the prime rate of a designated bank. On the issue date, the prime rate of the designated bank is 10.5%, compounded semiannually. For purposes of applying the *de minimis* rules of paragraph (a)(3) of this section, the debt instrument is treated as though it called for interest at a fixed rate of 10%, compounded semiannually for the first 5 years ($5,000 per period) and at a fixed rate of 10.5%, compounded semiannually for the second 5 years ($5,250 per period). The additional $250 of interest in each of the last ten semiannual periods is not qualified periodic interest within the meaning of paragraph (b)(1)(ii) of this section. The stated redemption price at maturity is thus $102,500 and the total amount of original issue discount is $2,500. The debt instrument is treated as an installment obligation with a weighted average maturity of 9.94 years, calculated as follows:

$250 × 5	=	$1,250
500 × 6	=	3,000
500 × 7	=	3,500
500 × 8	=	4,000
500 × 9	=	4,500
100,250 × 10	=	1,002,500
Total		$1,018,750

($1,018,750/$102,500) = 9.94

One-quarter of one-percent of the weighted average maturity (0.0025 × 9.94) multiplied by the stated redemption price at maturity ($102,500) is $2,546.88. Since the actual amount of discount, $2,500, is less than this amount, the discount is considered to be zero.

(b) *Stated redemption price at maturity*—(1) *Debt instruments other than installment obligations*—(i) *In general.* The term "stated redemption price at maturity" of a debt instrument other than an installment obligation (as defined in paragraph (b)(2)(i) of this section) means the amount payable at maturity as fixed by the last modification of the purchase agreement, including dividends, interest, and any other amounts payable at that time, however designated, other than a qualified periodic interest payment (as defined in paragraph (b)(1)(ii) of this section).

(ii) *Qualified periodic interest payment*—(A) *In general.* The term "qualified periodic interest payment" means any one of a series of payments equal to the product of the outstanding principal balance of the debt instrument and a single fixed rate of interest, or a variable rate tied to a single objective index of market interest rates governed by § 1.1275–5, that is actually and unconditionally payable (as defined in paragraph (b)(1)(iii) of this section), or will be treated as constructively received under section 451 and the regulations thereunder, at fixed, periodic intervals of one year or less during the entire term of a debt instrument (including short periods). A qualified periodic interest payment is not included in determining the stated redemption price at maturity, whether or not payable at maturity.

(B) *Fixed rate followed by variable rate.* Any one of a series of payments based on one fixed rate followed by a variable rate (or another fixed rate determined by reference to a single objective interest index) shall constitute a qualified periodic interest payment, provided that the variable rate (or other fixed rate) is the same as the initial fixed rate on the issue date or as of the first day on which there is a binding written contract for the sale or exchange, whichever is earlier.

(C) *Short periods.* A portion of any payment due at the end of a short period shall be a qualified periodic interest payment only to the extent interest is properly allocable to such period, using the same rate of interest applicable to full periods under the debt instrument. If the debt instrument has original issue discount, such portion shall be calculated in a manner consistent with the determination of yield for the short period under § 1.1272–1(f). A payment at the end of a short final accrual period shall not fail to constitute qualified periodic interest merely because the interval between such payment and the preceding payment differs from the fixed, periodic interval between other payments under the debt instrument. For an example illustrating the provisions of this paragraph (b)(1)(ii)(C), see § 1.1272–1(k), Example (6).

(D) *Short-term obligations.* In the case of a short-term obligation (as defined in section 1283(a)(1)(A)), no payments of interest shall be considered to be qualified periodic interest payments.

(iii) *Unconditionally payable.* Interest is payable unconditionally only if the amount of interest is certain and the failure to pay the interest timely results in consequences to the borrower that are typical in normal lending transactions. For example, interest is payable unconditionally if the failure to pay interest timely results in an acceleration of all amounts due under the debt instrument or if the unpaid interest compounds at a penalty rate that is significantly higher than the interest rate otherwise payable under the terms of the debt instrument. Interest payable upon the occurrence of a contingency (such as the existence of profits) is not unconditionally payable.

(2) *Installment obligations*—(i) *Installment obligation defined.* The term "installment obligation" means a debt instrument providing for the payment of any amount other than a qualified periodic interest payment (as defined in paragraph (b)(1)(ii)) before the final maturity date of the instrument.

(ii) *Stated redemption price at maturity of installment obligation.* The term "stated redemption price at maturity" of an installment obligation means the total of all payments provided by the obligation other than qualified periodic interest payments.

(iii) *Self-amortizing installment obligation defined.* The term "self-amortizing installment obligation" means an installment obligation that calls for equal payments composed of principal and qualified periodic interest that are actually and unconditionally payable (or that will be treated as constructively received under section 451 and the regulations thereunder) at fixed periodic intervals of one year or less during the entire term of the obligation, with no additional payment required at the maturity date of the obligation other than a de minimis amount to adjust for rounding, the timing of payments, and similar circumstances.

(iv) *Stated redemption price at maturity of self-amortizing installment obligations.* The stated redemption price at maturity of a self-amortizing installment obligation (as defined in paragraph (b)(2)(iii) of this section) is the stated principal (as defined in § 1.1274–2(b)(1)) of the obligation. This amount is the sum of all payments made under the debt instrument other than qualified periodic interest payments.

(3) *Debt instruments subject to certain puts and calls.* If a debt instrument contains a put or call option that is not separately tradable and that is presumed exercised under §§ 1.1272–1(f)(4)(iii) or 1.1274–6(f), then the put or call date shall be treated as the maturity date of that debt instrument and the amount payable upon exercise of the put or call shall be treated as the amount payable at maturity. See § 1.1272–1(k), Example (11).

(4) *Examples.* The provisions of paragraph (b) of this section may be illustrated by the following examples:

Example (1). A debt instrument is issued on October 1, 1985, which provides for a payment of $50,000 on December 31, 1994. Interest is payable currently and unconditionally (within the meaning of paragraph (b)(1)(iii) of this section) at a single fixed rate of 10%, compounded semiannually. The interest payment due on December 1, 1985, is $1,250. This payment and each subsequent payment of $2,500 per semiannual period are qualified periodic interest payments within the meaning of paragraph (b)(1)(ii) of this section. Thus, under § 1.1273–1(b)(1)(i), the stated redemption price at maturity is $50,000.

Example (2). A debt instrument is issued for $100,000, on January 1, 1986. The debt instrument calls for payments of $5,000 of interest on January 1 of each year from 1987 through 1995, and a final payment of $200,000 on January 1, 1996. The $5,000 payments in 1987 through 1995 and $5,000 of final payment in 1996 are qualified periodic interest payments within the meaning of paragraph (b)(1)(ii) of this section. Thus, the stated redemption price at maturity is $195,000.

Example (3). A debt instrument with a term of 5 years is issued on January 1, 1986, for a stated principal amount of $500,000. The debt instrument provides for annual payments of $145,641.77 for each of 5 years. Each payment consists of interest at 14%, compounded annually on the unpaid principal balance, and principal as follows:

Year	Principal	Interest payments	Total
1	$75,641.77	$70,000.00	$145,641.77
2	86,231.62	59,410.15	145,641.77
3	98,304.05	47,337.72	145,641.77
4	112,066.62	33,575.15	145,641.77
5	127,755.94	17,885.83	145,641.77
	$500,000.00	$228,208.85	$728,208.85

The payments of interest are payable currently and unconditionally at fixed, periodic intervals of one year during the entire term of the debt instrument. Therefore, they are qualified periodic interest payments. Because the debt instrument provides for equal payments of principal and qualified periodic interest, and because no additional payment is required at the maturity date, the debt instrument is a self-amortizing installment obligation as defined in paragraph (b)(2)(iii) of this section. The stated redemption price at maturity is equal to the stated principal amount of $500,000. This amount can also be derived by subtracting from the total payments of $728,208.87, the $228,208.87 of qualified periodic interest payments.

Example (4). A debt instrument is issued on January 1, 1986, for cash of $10,000, maturing on December 31, 1989, and providing for payments of principal at the end of the second and fourth years of $5,000 each. Payments of interest are provided currently and unconditionally at the end of the first and second years of $1,200 each, and at the end of the third and fourth years of $600 each. The debt instrument is an installment obligation as defined in paragraph (b)(2)(i) of this section. Each payment of interest represents the product of a single, fixed rate of 5% on the outstanding principal balance. Each such payment is, therefore, a qualified periodic interest payment, and is not included in the stated redemption price at maturity under the definition set forth in paragraph (b)(2)(ii) of this section. Under that definition the stated redemption price of an installment obligation is the total of all payments other than qualified periodic interest payments. That total is $10,000.

§ 1.1273–2 Determination of issue price.

(a) *Definitions*—(1) *Property.* The determination of the issue price of a debt instrument depends on whether it is issued for property. For purposes of section 1273, this section, and § 1.1273–1, the term "property" includes debt instruments, investment units, services and the right to use property, but does not include money.

(2) *Publicly offered debt instruments.* The determination of the issue price of a debt instrument also depends on whether it is publicly offered. An issue of debt instruments is publicly offered if it—

(i) Is registered with the Securities and Exchange Commission;

(ii) Would be required to be registered but for the identity of the issuer; or

(iii) Is exempt from registration under section 3 of the Securities Act of 1933.

(b) *Debt instruments not issued for property*—(1) *Publicly offered debt instruments*—(i) *Debt instruments other than Treasury securities.* In the case of an issue of debt instruments other than Treasury securities that is publicly offered (as defined in paragraph (a)(2) of this section) and not issued for property, the term "issue price" under section 1273(b)(1) means the initial offering price to the public at which price a substantial amount of the debt instruments was sold. For this purpose, the term "the public" does not include bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters or wholesalers. The issue price generally is the first price at which debt instruments included in the issue were sold to the public and the issue price will not change if part of the issue is subsequently sold at a different price.

(ii) *Treasury securities.* In the case of an issue of Treasury securities, the issue price is the average price of the debt instruments sold.

(2) *Debt instruments not publicly offered.* In the case of an issue of debt instruments that is not publicly offered and is not issued for property, the issue price of each debt instrument is the price paid by the first buyer of the particular debt instrument, regardless of the amount paid for the remainder of the issue. The rule stated in this paragraph (b)(2) for determining issue price also applies to loans between natural

persons. For rules relating to the treatment of certain cash payments incident to a lending transaction with respect to the determination of issue price, see paragraph (f) of this section.

(3) *Below-market loans subject to section 7872(b).* (i) *In general.* In the case of a below-market loan subject to section 7872(b) (a term loan other than a gift loan), the issue price otherwise determined under this section shall be reduced by the excess amount determined under section 7872(b)(1).

(ii) *Examples.* The provisions of paragraph (b)(3)(i) of this section may be illustrated by the following example:

Example. (i) B is an employee of X Corporation. On July 1, 1986, X loans $80,000 to B. B gives X a note for $100,000, payable in 5 years. Assume that the Federal mid-term rate for July 1986 is 10%, compounded annually. Under the provisions of section 1273(b)(2) and § 1.1273-2(b)(2), the issue price of the note, but for paragraph (b)(3)(i) of this section, would be $80,000.

(ii) The amount loaned from X to B is $80,000. The present value of the payment that is required to be made under the terms of the loan, discounted at 10%, is $62,092.13. Thus, the excess amount described in section 7872(b)(1) is $17,907.87. The issue price of B's debt instrument is thus $62,092.13 ($80,000 paid by X for the debt instrument minus the excess amount of $17,907.87 determined under section 7872(b)(1)).

(c) *Debt instruments issued for property after May 27, 1969*—(1) *Public trading.* If a debt instrument is issued for property after May 27, 1969, and the debt instrument is part of an issue a portion of which is traded on an established securities market, then the issue price of that debt instrument shall be its fair market value determined as of the first date after the issue date that the debt instrument is traded on an established securities market. If a debt instrument (other than a debt instrument described in the preceding sentence) is issued for property after May 27, 1969, and the property is stock or securities that are traded on an established securities market, the issue price of the debt instrument shall be the fair market value of the stock or securities determined as of the issue date of the debt instrument. The fair market value of property for purposes of this paragraph (c)(1)(i) shall be determined as provided in § 20.2031-2 of this chapter (Estate Tax Regulations). If the trading price of the property fails to reflect accurately the value of a debt instrument issued for publicly traded property after May 8, 1986, because of extraordinary circumstances such as the existence of control premium or blockage discount, the issue price of a debt instrument exchanged for such property is determined under section 1274 and the regulations thereunder. Property shall be treated as traded if it is traded on an established securities market on or within 10 trading days after the date it is issued. Trading days are those days on which an established securities market is open. For purposes of this paragraph (c)(1)(i), the term "established securities market" shall have the same meaning as in § 1.453-3(d)(4) (relating to limitations on installment method for purchaser evidences of indebtedness payable on demand or readily tradable). A debt instrument not traded on an established securities market (and not part of an issue a portion of which is so traded) shall not be treated as property that is so traded even if it is convertible into property which is so traded.

(2) *No public trading*—(i) *Debt instruments issued after December 31, 1984.* If a debt instrument is issued after December 31, 1984 and is neither a debt instrument to which section 1273(b) (1), (2), or (3) or paragraph (b) or (c)(1) of this section applies, nor a debt instrument to which section 1274 applies (see § 1.1274-1), then the issue price of the debt instrument under section 1273(b)(4) and this section shall be its stated redemption price at maturity.

(ii) *Debt instruments issued before January 1, 1985.* If a debt instrument is issued for property before January 1, 1985, and is not a debt instrument to which paragraph (c)(1)(i) of this section applies, the issue price of the debt instrument shall be the stated redemption price at maturity. In this case, however, there may be an amount treated as unstated interest under section 483 as it existed prior to its amendment by section 41(b) of the Tax Reform Act of 1984, 98 Stat. 494, and the regulations thereunder. See 26 CFR 1.483-1 and 1.483-2 (revised as of April 1, 1985).

(3) *Reorganization.* For special rules relating to debt instruments issued in a reorganization, see § 1.1275-2(a).

(d) *Investment units issued after May 8, 1986*—(1) *Definition.* An investment unit consists of a debt instrument and a property right, such as a security or option (other than certain options described in § 1.1272-1(f)(4)).

(2) *Allocation of issue price*—(i) *In general.* The issue price of the investment unit shall be allocated between the debt instrument and the property right on the basis of the fair market value of each element of the unit.

(ii) *Publicly-traded debt instrument.* If the debt instrument issued as part of an investment unit is publicly traded, the issue price of the debt instrument shall equal the initial trading price of the debt instrument.

(iii) *Publicly-traded property right.* If the property right issued as part of an investment unit is publicly traded and the debt instrument is not publicly traded, the issue price of the debt instrument shall equal the price paid for the investment unit less the initial trading price of the property right.

(iv) *Nonpublicly-traded property right and debt instrument.* If neither the property right nor the debt instrument issued as part of an investment unit is publicly traded, the issue price of the debt instrument shall equal the present value of all payments under the debt instrument, discounting at a rate agreed to by the issuer and the holder, based on the original yields of other debt instruments with similar maturities and security issued within the previous six months by the issuer. If no such debt instruments were issued, the issuer and the holder may look to comparable debt instruments of other issuers, taking into account (with respect to both the debt instrument in question and comparable debt instruments) the solvency of the issuer, the nature of the issuer's trade or business, the presence and nature of security for the debt instrument, the geographic area in which the loan is made, and any other factors relevant in the circumstances. A debt instrument which is convertible into stock or another debt instrument must not be used as a comparable debt instrument (except where the investment unit contains a debt instrument convertible into stock or another debt instrument). In no event may the yield agreed to by the issuer and the holder be less than the applicable Federal rate on the issue date of the investment unit.

(e) *Convertible debt instruments.* The issue price of a debt instrument which is convertible into stock or another debt instrument of the issuer shall include any amount paid with respect to the conversion privilege.

(f) *Treatment of certain cash payments incident to lending transactions*—(1) *Applicability.* The provisions of paragraph (f) of this section shall apply with respect to cash payments incident to private lending transactions (including seller financing), other than points that are deductible by the borrower under section 461(g)(2). The tax treatment to the lender of any payment to the lender that, when added to other original issue discount arising from the transaction (determined without regard to such payments), produces a total amount of original issue discount which is *de minimis* under the rules of § 1.1273-1(a)(3), shall be governed by principles of tax law other than sections 1272 and 1273 and the regulations thereunder.

(2) *Payments from borrower to lender.* In a lending transaction to which section 1273(b)(2) applies, a payment from the borrower to the lender (other than a payment for services provided by the lender, such as commitment fees or loan processing costs) shall reduce the issue price of the debt instrument evidencing the loan. In a transaction to which section 1274 applies, a payment from the buyer-borrower to the seller-lender designated as points or as interest shall reduce the stated principal amount of the debt instrument evidencing the loan. In addition, the purchase price of the property shall include the amount of any payment from the buyer-borrower to the seller-lender, regardless of how designated.

(3) *Payments from lender to borrower.* A payment from the lender to the borrower in a lending transaction (including a deemed payment within the meaning of paragraph (f)(4) of this section) shall be treated as an amount loaned.

(4) *Payments between lender and third party.* If, as part of a lending transaction, a party other than the borrower (the third party) makes a payment to the lender, that payment may be treated in appropriate circumstances as made from the third party to the borrower followed by a payment in the same amount from the borrower to the lender and governed by the provisions of paragraph (f)(2) of this section. Section 461(g)(2) shall not apply to any deemed payment from the borrower to the lender. Similarly, if the lender makes a payment to a thrid party, that payment may be treated as an additional amount loaned to the borrower and then paid by the borrower to the third party. The character of the deemed payment between the borrower and the third party shall depend on the substance of the transaction.

(5) *Examples.* The provisions of paragraph (f) of this section may be illustrated by the following examples:

Example (1). A lends $100,000 to B for a term of 10 years. At the time the loan is made, B pays $4,000 in points to A. Assume that the points are not deductible by B under section 461(g)(2). The issue price of B's debt instrument is $96,000. Since the $4,000 constitutes more than a *de minimis* amount of original issue discount, under paragraph (f)(2) of this section, the points are accounted for by both A and B as original issue discount under sections 1272 and 1273 and the regulations thereunder.

Example (2). (i) A sells property to B for $1,000,000. In consideration therefor, B gives A $300,000 cash and a $700,000 debt instrument with a term of 5 years, calling for semiannual payments of interest at a rate of 8.5%. In addition to the cash down payment, B pays A $14,000 designated as points on the loan.

(ii) The stated principal amount of B's debt instrument, under paragraph (f)(2) of this section, is $686,000 ($700,000 minus $14,000). Assuming a test rate of 9%, compounded semiannually, the testing amount for B's debt instrument under § 1.1274–3 is $686,158. Thus, under § 1.1274–2, the issue price of B's debt instrument is the stated principal amount of $686,000. B's basis in the property purchased is thus $1,000,000 ($686,000 debt instrument plus $314,000 cash payments).

Example (3). A sells Blackacre to B for $500,000. B makes a cash down payment of $100,000 and borrows $400,000 of the purchase price from a lender, L, repayable in annual installments over a term of 15 years calling for interest at a rate of 9%. As part of the transaction, A makes a payment of $8,000 to L to facilitate the loan to B. Under the provisions of paragraph (f)(2) and (4) of this section, B is treated as having made an $8,000 payment directly to L and a down payment of only $92,000 to A. The payment to L reduces the issue price of B's debt instrument to $392,000. B's basis in Blackacre is $492,000 ($392,000 debt instrument plus $100,000 cash payments). Since the payment to L represents a *de minimis* amount of original issue discount under § 1.1273–1(a)(3), L must account for $8,000 payment without regard to the original issue discount rules. B, however, must account for the payment as original issue discount pursuant to the provisions of § 1.163–7(d).

Example (4). The facts are the same as in example (3), except that the payment from A to L is $20,000. Under the provisions of paragraph (f)(2) and (4) of this section, B is treated as having made a $20,000 payment to L and an $80,000 down payment to A. The issue price of the debt instrument is thus reduced to $380,000. B's basis in Blackacre is $480,000 ($380,000 debt instrument and $100,000 cash payments). B and L both account for the payment as original issue.

Example (5). The facts are the same as in example (4), except that the $20,000 payment is made from L to A. Under paragraph (f) (3) and (4) of this section, L is treated as having made a loan of $420,000 to B and B is treated as having purchased Blackacre for $520,000. Thus, the issue price of B's debt instrument is, under § 1.1273–2(b)(2), the amount loaned, or $420,000. B's basis in Blackacre is $520,000 ($420,000 debt instrument plus $100,000 cash payment).

Example (6). (i) S owns Blackacre, subject to a mortgage held by L with a remaining principal amount of $1,000,000. S sells Blackacre to B in exchange for $2,000,000 cash and B's agreement to assume S's debt to L. As part of the transaction, S, B, and L jointly agree that the terms of the debt instrument will be modified in such a way as to produce an issue price for the modified debt instrument of $900,000. In addition, L agrees to make a cash payment to B of $100,000.

(ii) Under § 1.1274–7, S's debt to L is treated as having been exchanged for a new debt instrument (in a transaction to which section 1274 applies) immediately prior to the sale to B. B is treted as assuming this new debt instrument. With respect to the exchange of debt instruments, B is a third party. Thus, the $100,000 cash payment from L to B is treated as having been made from L to S and then from S to B. The latter payment reduces the net cash payment from B to S to $1,900,000.

(iii) The new debt instrument is treated as having been issued for the old debt instrument plus $100,000 cash. Since the issue price of the new debt instrument is $900,000, the portion of the issue price of the new debt instrument attributable to the old debt instrument is $800,000. Thus, S is treated as having repaid the old debt instrument for $800,000, and, under section 108, has cancellation of indebtedness income of $200,000.

§ 1.1274–1 Debt instruments to which section 1274 applies.

(a) *Types of debt instruments to which section 1274 applies.*—(1) *In general.* Subject to the exceptions and limitations set forth in paragraph (b) of this section, section 1274 and this section apply to any debt instrument given in consideration for the sale or exchange of property unless (i) the debt instrument provides for interest to be paid currently at a constant rate over its entire term, and (ii) the debt instrument provides for adequate stated interest. For purposes of section 1274, the term "sale or exchange" means any transaction treated as a sale or exchange for tax purposes. For purposes of section 1274, the term "property" includes debt instruments and investment units, but does not include money, services, or the right to use property. For the definition of the term "debt instrument," see section 1275(a)(1) and § 1.1275–1(b). For the treatment of debt instruments to which section

1274 and this section apply, see § 1.1274-2. For the treatment of certain payments for the use of property or services, see sections 404 and 467.

(2) *Interest to be paid currently at a constant rate.* A debt instrument provides for interest to be paid currently at a constant rate if all interest provided for in the debt instrument is payable at a single fixed or variable rate and the interest is payable unconditionally and at least annually. For the meaning of the term "payable unconditionally," see § 1.1273-1(b)(1)(iii).

(3) *Adequate stated interest.* To determine if a debt instrument provides for adequate stated interest, the test rate of interest applicable to the debt instrument must be determined. In general, if a debt instrument calls for interest over its entire term at a stated rate (with an appropriate compounding period) no lower than the test rate of interest, the debt instrument provides for adequate stated interest. Special rules, however, are provided for the application of section 1274 to debt instruments involved in potentially abusive situations. See § 1.1274-4(g) for the meaning of the term "potentially abusive situation." For rules relating to the determination of adequate stated interest, see § 1.1274-3. For special rules relating to debt instruments calling for variable rates of interest or for contingent interest, see § 1.1274-3(d).

(b) *Exceptions and limitations to the application of section 1274*—(1) *Debt instruments maturing in 6 months or less.* Section 1274 does not apply to a debt instrument under which none of the payments are due more than six months after the date of the sale or exchange.

(2) *Sales of farms for $1,000,000 or less by certain sellers*—(i) *In general.* Except as provided in paragraph (b)(2)(ii) of this section, section 1274 does not apply to any debt instrument arising from the sale or exchange of a farm (within the meaning of section 6420(c)(2) and the regulations thereunder)—

(A) By an individual, estate, or testamentary trust,

(B) By a corporation which as of the date of the sale or exchange is a small business corporation as defined in section 1244(c)(3) and the regulations thereunder, or

(C) By a partnership which as of the date of the sale or exchange meets requirements similar to those of section 1244(c)(3).

For the purposes of paragraph (b)(2)(i)(C) of this section, a partnership is considered to have met requirements similar to those of section 1244(c)(3) if the partnership is a domestic partnership, and the equity capital invested in the partnership does not exceed $1,000,000. For purposes of the preceding sentence, the equity capital invested in a partnership is the aggregate of all contributions of money to the partnership by its partners, and of all bases to the partnership of property contributed (reduced by the amount of any liability to which the contributed property is subject or which is assumed by the partnership with respect to the contributed property) to it by its partners as determined under section 723. The amount of the equity capital invested in a partnership is not reduced by the amount of any distribution even though the distribution may be considered a capital distribution.

(ii) *Limitation.* Paragraph (b)(2)(i) of this section applies to a sale or exchange of a farm only if it can be determined at the time of the sale or exchange that the sales price cannot exceed $1,000,000, even if the sales price eventually paid for the farm is less than $1,000,000. The determination whether the sales price cannot exceed $1,000,000 is made without regard to any other exception described in paragraph (b) of this section. In addition, the sales price is determined without regard to section 1274 and without regard to any stated interest. The term "sale price" includes the amount of any liability included in the amount realized from the sale or exchange (see § 1.1001-2). For purposes of the determination whether the sales price of a farm cannot exceed $1,000,000, all sales and exchanges which are part of the same transaction (or are part of a series of related transactions) shall be aggregated in accordance with the rules of § 1.1274A-1(d).

(3) *Sales of principal residences.* Section 1274 does not apply to any debt instrument arising from the sale or exchange by an individual of the individual's principal residence (within the meaning of section 1034). Whether the principal residence sold or exchanged by the individual is to be used as the principal residence of the buyer does not affect this determination.

(4) *Sales involving total payments of $250,000 or less*—(i) *In general.* Section 1274 does not apply to any debt instrument arising from the sale or exchange of property if the sum of the following amounts does not exceed $250,000 (determined without regard to any other exception prescribed in paragraph (b) of this section):

(A) The aggregate amount of the payments (including interest and principal) due under the debt instrument and under all other debt instruments received as consideration for the sale or exchange, and

(B) The aggregate value of any other consideration (including any liability assumed or taken subject to) to be received for the sale or exchange.

(ii) *Value of consideration other than the debt instrument.* For purposes of paragraph (b)(4)(i)(B) of this section, any consideration (other than a liability assumed or taken subject to) is taken into account at its fair market value. In the case of any liability assumed or taken subject to, the outstanding principal balance or revised issue price (in the case of an obligation originally issued at a discount) of the obligation assumed or taken subject to is taken into account.

(iii) *Aggregation of transactions.* For purposes of paragraph (b)(4) of this section, all sales or exchanges which are part of the same transaction (or a series of related transactions) shall be aggregated in accordance with the rules of § 1.1274A-1(d).

(iv) *Time when $250,000 limitation applied.* The determination of the amount of payments due under all debt instruments and the amount of other consideration to be received is made as of the date of the sale or exchange, or, if earlier, the contract date as defined in § 1.1274-8(e)(1)(ii). If the precise amount due under any debt instrument or the precise amount of any other consideration to be received cannot be determined as of the date of the sale or exchange, the exception described by paragraph (b)(4) of this section applies only if it can be determined that the maximum of the aggregate amount of payments due under the debt instruments and other consideration to be received cannot exceed $250,000.

(5) *Publicly traded debt instruments or property.* Section 1274 does not apply to any debt instrument to which section 1273(b)(3) applies. Thus, section 1274 does not apply to any publicly traded debt instrument or to any debt instrument issued in consideration for the sale or exchange of publicly traded property.

(6) *Certain sales of patents.* Section 1274 does not apply to any amount payable with respect to a transfer by an individual holder described in section 1235 (relating to sales or exchanges of patents) that is contingent on the productivity, use, or disposition of the property transferred.

(7) *Transactions involving personal use property*—(i) *Treatment of issuers.* Section 1274 does not apply to any borrower (issuer) under a debt instrument given in consideration for the sale or exchange of property that is personal use property (within the meaning of section 1275(b)(3)) in the

hands of the issuer. Thus, the tax treatment of the issuer of any amount payable under such a debt instrument is determined without regard to the provisions of section 1274 and the regulations thereunder.

(ii) *Treatment of certain holders.* Section 1274 does not apply to any lender (holder) of a debt instrument that (A) is given in consideration for the sale or exchange of property that is personal use property (within the meaning of section 1275(b)(3)) in the hands of the issuer and (B) is also a loan described in section 7872(c)(1)(A) (relating to gift loans), 7872(c)(1)(B) (relating to compensation-related loans), or 7872(c)(1)(C) relating to corporation-shareholder loans). For rules relating to the treatment of loans described in the preceding sentence, see section 7872 and the regulations thereunder.

(8) *Transactions involving certain demand loans.* Section 1274 does not apply to any debt instrument that evidences a demand loan (within the meaning of section 7872(f)(5) described in section 7872(c)(1)(A) (rlating to gift loans), 7872(c)(1)(B) (relating to compensation-related loans), or 7872(c)(1)(C) (relating to corporation-shareholder loans). For rules relating to the treatment of loans described in the preceding sentence, see section 7872 and the regulations thereunder.

(9) *Sales or exchanges to which section 483(e) and § 1.483–4(b)(2) apply.* Section 1274 does not apply to any debt instrument to which section 483(e) and § 1.483–4(b)(2) (relating to qualified sales) apply.

(10) *Certain transfers subject to section 1041.* Section 1274 does not apply to any debt instrument issued in consideration for a transfer of property subject to section 1041 (relating to transfers of property between spouses or incident to divorce).

(c) *Modified debt instruments*—(1) *In general.* For purposes of section 1274, if the issuer and holder (or a successor to either) modify a debt instrument, the modified debt instrument shall be treated as a new debt instrument given in consideration for the unmodified debt instrument (the old debt instrument). Thus, for purposes of section 1274 and the regulations thereunder, the old debt instrument is treated as property. A new debt instrument shall not be eligible for the election to use the cash method of accounting described in § 1.1274A–1(c) unless the old debt instrument was a cash method debt instrument. A debt instrument has been modified if the terms of the new debt instrument differ "materially either in kind or in extent," within the meaning of § 1.1001–1(a), from the terms of the old debt instrument. For this purpose, a payment to or from the lender (or a successor) not provided for in the debt instrument shall be treated as a modification of the debt instrument. For rules governing the treatment of payments made in connection with the issuance of a debt instrument, see § 1.1273–2(f). This paragraph (c)(1) shall not apply to modifications described in section 106 of Pub. L. No. 99–121.

(2) *Example.* The provisions of paragraph (c)(1) of this section may be further illustrated by the following example:

Example: On January 1, 1985, B issues a ten-year debt instrument to A for $8,000,000. The debt instrument, as originally issued, provides for annual interest payments at 15 percent. On January 1, 1986, A and B agree to modify the debt instrument by lowering the interest rate to 9 percent. The change in interest rate constitutes a modification under § 1.1001–1(a). Because the debt instrument has been modified, the modified debt instrument is treated as a new debt instrument given by B in consideration for the old debt instrument.

(d) *Excessive interest.* If a debt instrument given in consideration for the sale or exchange of property calls for interest at a rate that, in light of the terms of the debt instrument and the creditworthiness of the borrower, is clearly greater than the arm's-length rate of interest that would have been charged in a cash lending transaction (that is, one not involving a sale of property) between the same two parties, the Commissioner may recharacterize a portion of the stated interest as additional purchase price. The portion of interest to be recharterized as additional purchase price shall be determined in a manner consistent with section 1274 and may be based either on the fair market value of the property sold or on the arm's-length rate described in the preceding sentence. In determining whether recharacterization is appropriate, the Commissioner may consider the relation between the tax advantage derived by the borrower from the overstatement of interest and the tax detriment (if any) to the seller from such overstatement.

(e) *Effective date: transitional rule*—(1) *General rule.* Section 1274 and the regulations thereunder apply, except as otherwise provided in this paragraph (e), to any debt instrument given in consideration for a sale or exchange of property if the sale or exchange occurs after December 31, 1984, unless the sale or exchange is made pursuant to a written contract (including an irrevocable written option) which was binding on March 1, 1984. For this purpose, a sale or exchange is not made pursuant to a written contract which was binding on March 1, 1984, if a substantial modification (within the meaning of § 1.1274–6(e)(1)(iii)) in the terms of the contract occurs after March 1, 1984 and before the sale or exchange. Section 1274 and the regulations thereunder shall not apply to any modifications of a debt instrument arising from a sale or exchange unless the debt instrument arises from a sale or exchange to which section 1274 and the regulations thereunder apply (within the meaning of this paragraph (e)) or the debt instrument is assumed or taken subject to in connection with, and the modification is part of, such a sale. For rules relating to sales or exchanges occurring before January 1, 1985, and sales or exchanges pursuant to a written contract (including an irrevocable written option) which was binding on March 1, 1984, and modification of debt instruments to which section 1274 and the regulations thereunder do not apply by reason of the preceding sentence, see section 44(b)(3) of the Tax Reform Act of 1984, section 483 as in effect before its amendment by section 41(b) of the Tax Reform Act of 1984, and 26 CFR 1.483–1 and 1.483–2 (revised as of April 1, 1985).

(2) *Certain sales or exchanges occurring before July 1, 1985 by cash method buyers and sellers.* Section 1274 does not apply to any debt instrument arising from a sale or exchange of property (other than new section 38 property within the meaning of section 48(b) and the regulations thereunder) occurring before July 1, 1985, if—

(i) The property was used in the active business of farming,

(ii) The stated principal amount of the debt instrument does not exceed $2,000,000, and

(iii) The interest (including unstated interest under section 483) on the debt instrument arising from the sale or exchange is taken into account by the buyer and the seller on the cash receipts and disbursements method of accounting.

All sales or exchanges (other than sales or exchanges of new section 38 property) which are part of the same transaction (or a series of related transactions) shall be aggregated in accordance with the rules of § 1.1274A–1(d), and all debt instruments arising from aggregated sales or exchange shall be treated as one debt instrument. The term "farming" has the same meaning as that term has in section 464(e)(1).

(f) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). On July 1, 1985, A, an individual, sells to B land used as a farm within the meaning of section 6420(c)(2). In consideration for the sale, B makes a $250,000 down payment and issues a debt instrument calling for a single $500,000 payment due in 10 years unless profits from the land in each of the 10 years preceding maturity of the debt instrument exceeds a specified amount, in which case B is to make a payment of $800,000. No interest is provided for in the debt instrument. Even though the total payments ultimately payable under the contract may be less than $1,000,000, at the time of the sale or exchange it cannot be determined that the sales price cannot exceed $1,000,000. Thus, the sale of the land used as a farm is not an excepted transaction described in paragraph (b)(2) of this section.

Example (2). On July 1, 1985, A, an individual, sells land (not used as a farm within the meaning of section 6420(c)(2) and the regulations thereunder) to A's child B for $650,000. In consideration for the sale, B issues a debt instrument to A that calls for a payment of $500,000 and a second debt instrument that calls for a payment of $150,000. No other consideration is given. Both debt instruments are due in 10 years. The debt instruments do not provide for interest. The $500,000 debt instrument is subject to section 483(e) and § 1.483–4(b)(2), and is accordingly covered by the exception from section 1274 described in paragraph (b)(9) of this section. Since the exception from section 1274 for debt instruments subject to section 483(e) and § 1.483–4(b)(2) apply to the extent of $500,000, the $150,000 debt instrument is subject to section 1274 even though the total payments under this debt instrument do not exceed $250,000 because the aggregate amount of payments due under the sale, determined without regard to the exception described in paragraph (b)(9) of this section, exceeds $250,000.

Example (3). The facts are the same as in example (2), except that the land sold was land used as a farm within the meaning of section 6420(c)(2) and the regulations thereunder, and was sold for a debt instrument calling for a single payment of $500,000 and a second debt instrument calling for a single payment of $700,000. Both debt instruments are due in 10 years. In this case, the $500,000 debt instrument is subject to section 483(e) and § 1.483–4(b)(2), and is accordingly covered by the exception from section 1274 described in paragraph (b)(9) of this section. Nevertheless, section 1274 applies to the $700,000 debt instrument because this debt instrument arose from a sale of a farm the sales price of which exceeds $1,000,000.

Example (4). F is an entity that is exempt from taxation under section 501(c) of the Code. F holds stock in X Corporation, a privately held company. On July 1, 1986, F sells its stock in X corporation to A, an individual with a regular income flow and a high credit rating who is subject to the highest rate of taxation. In partial consideration for the sale, A gives F a debt instrument with a principal amount of $600,000, calling for interest at a rate of 22 percent. The Commissioner may determine that interest at 22 percent is excessive and recharacterize a portion of the stated interest as additional purchase price.

§ 1.1274-2 Treatment of debt instruments to which section 1274 applies.

(a) *In general.* If section 1274 applies to a debt instrument as provided in § 1.1274–1, section 1274 and this section determine the issue price of the debt instrument for the purpose of sections 1271, 1272, and 1273. The issue price as determined under section 1274 and these regulations generally determines the sales price (in whole or in part) of any property acquired for the debt instrument. Thus, in determining the amount realized from the sale or exchange of property, the amount realized that is attributable to the debt instrument is generally the issue price of the debt instrument. Similarly, in determining the cost basis of property acquired for the debt instrument, the amount of the cost basis of the property attributable to the debt instrument is generally the issue price of the debt instrument. For rules relating to the determination of basis of property in certain transactions between related parties, see § 1.1012–2.

(b) *Issue price*—(1) *Debt instruments that provide for adequate stated interest; stated principal amount.* If section 1274 applies to a debt instrument that provides for adequate stated interest, the issue price of the debt instrument is the stated principal amount of the debt instrument. For purposes of section 1274, the stated principal amount of a debt instrument is the aggregate amount of all payments due under the debt instrument excluding any amount of interest provided for in the debt instrument.

(2) *Debt instruments that do not provide for adequate stated interest; imputed principal amount.* If section 1274 applies to a debt instrument that does not provide for adequate stated interest, the issue price of the debt instrument is the imputed principal amount of the debt instrument. For rules relating to the determination of the imputed principal amount of a debt instrument, see § 1.1274–4.

§ 1.1274-3 Determination whether a debt instrument provides for adequate stated interest.

(a) *In general.* This section prescribes rules for determining whether a debt instrument provides for adequate stated interest. The rules prescribed by this section apply to any debt instrument whether the debt instrument calls for the payment of principal at maturity, the periodic payment of principal, or irregular payments of principal. A debt instrument generally provides for adequate stated interest if it calls for interest on the outstanding principal balance at a rate (with an appropriate compounding period) at least equal to the test rate of interest. For rules relating to the determination of the test rate of interest and rules relating to an appropriate compounding period, see paragraph (e) of this section. Paragraph (b) of this section provides rules for determining adequate stated interest (except with respect to debt instruments involved in a potentially abusive situation) if the debt instrument provides for a stated rate of interest. Paragraph (c) of this section provides rules for determining adequate stated interest in the case of debt instruments that do not satisfy the requirements of paragraph (b) of this section. For special rules relating to debt instruments calling for variable rates of interest or for contingent interest, see paragraph (d) of this section.

(b) *Certain debt instruments that provide for a stated rate of interest)*—(1) *In general.* A debt instrument provides for adequate stated interest if—

(i) The debt instrument provides for interest on the outstanding principal balance of the debt instrument (the stated rate of interest) at a fixed rate;

(ii) The stated rate of interest is no lower than the test rate of interest (based on the appropriate compounding period);

(iii) The debt instrument requires interest to be paid or compounded at the end of each compounding period for the entire term of the debt instrument, and

(iv) The debt instrument is not issued in a potentially abusive situation as defined in § 1.1274–4(g).

For rules relating to debt instruments that do not satisfy the requirements of this paragraph (b)(1), see paragraph (c) of this section.

(2) *Interest payable for a short period*—(i) *In general.* The stated rate of interest is a fixed rate within the meaning of paragraph (a)(1) of this section only if it also applies for short periods (that is, any period shorter than the compounding period on which the test rate of interest is based). For this purpose, adequate stated interest for a short period may be determined by either of the two alternative methods prescribed by this paragraph (b)(2)(i) or by any other reasonable method. The methods prescribed by this paragraph (b)(2)(i) are the exact method and the approximate method. An example of another reasonable method is monthly compounding which reflects compounding at intervals of one month with simple interest within a month. If a debt instrument has original issue discount, the choice of any method

permissible under this paragraph (b)(2) requires a corresponding choice for purposes of determining the amount of original issue discount includible under section 1272 for the short period.

(ii) *Exact method.* The exact method reflects daily compounding of interest. Under this method, an amount of interest payable on an outstanding principal amount (P) for a short period is equal to the result of the following formula:

$I = P \times [(1 + i/k)^f - 1]$

In which:

I = Interest payable for the short period

i = The stated rate of interest expressed as a decimal

k = The number of compounding periods on which the test rate of interest is based contained in a year

f = A fraction, the numerator of which is the length of the short period, and the denominator of which is the length of the compounding period on which the test rate of interest is based

For illustrations of the application of the formula for the exact method, see examples (3) and (5) of paragraph (b)(3) of this section.

(iii) *Approximate method.* The approximate method is also provided for the convenience of taxpayers who do not desire to use the exact method. The approximate method reflects simple interest within any compounding period and always produces an amount of interest for the short period that is slightly higher than that produced under the exact method. Under this method, the amount of interest payable on an outstanding principal amount for a short period is determined by multiplying the amount of stated interest for a full period by a fraction, and numerator of which is equal to the length of the short period and the denominator of which is the length of a full period. Thus, the amount of interest payable on an outstanding principal amount (P) for a short period is equal to the result of the following formula:

$I = P \times (i/k) \times f$

In which:

I = Interest payable for the short period

i = The stated rate of interest expressed as a decimal

k = The number of compounding periods on which the test rate of interest is based contained in a year

f = A fraction, the numerator of which is the length of the short period, and the denominator of which is the length of the compounding period on which the test rate of interest is based

For illustrations of the application of the formula for the approximate method, see examples (4), (6) and (7) of paragraph (b)(3) of this section.

(3) *Examples.* The provisions of paragraph (b) of this section may be illustrated by the following examples:

Example (1). Assume that a debt instrument issued in consideration for the sale of nonpublicly traded property calls for the payment of a principal amount of $1,000,000 at the end of a 10-year term and 20 semiannual interest payments of $60,000 each on the principal balance of the debt instrument. The appropriate compounding period is semiannual. Assume that the test rate of interest is 12 percent, compounded semiannually. The debt instrument provides for adequate stated interest because the debt instrument provides for interest equal to the test rate of 12 percent payable semiannually, the compounding period for the test rate.

Example (2). The facts are the same as in example (1), except that the debt instrument calls for 10 annual interest payments of $123,600 each. The appropriate compounding period for the test rate is annual. The debt instrument provides for adequate stated interest because the debt instrument provides for interest equal to 12.36 percent, the rate of interest based on an annual compounding period equivalent to 12 percent, compounded semiannually, and the interest is payable annually, the compounding period for the test rate.

Example (3). Assume that on May 1, 1986, in consideration for the sale of nonpublicly traded property A issues a debt instrument to B calling for a principal payment of $10,000,000 due December 31, 1996, and 10 percent annual interest, $500,000 payable on June 30 and December 31 of each year, beginning on December 31, 1986. In addition, the debt instrument calls for A to make a payment of interest on June 30, 1986, of $163,963.60 for the period from May 1, 1986, to June 30, 1986. The appropriate compounding period is semiannual. Assume that the test rate of interest is 10 percent, compounded semiannually. Further, assume that a convention that assumes a year consists of 12 30-day months is adopted. The debt instrument provides for adequate stated interest. For each semiannual period beginning on July 1, 1986, the debt instrument provides for interest equal to the test rate of 10 percent payable semiannually, the compounding period for the test rate. For the short period from May 1, 1986, through June 30, 1986 (one-third of a full semiannual period), the amount of stated interest payable on June 30, 1986, under the exact method would be $163,963.60, determined as follows:

$\$10{,}000{,}000 \times [(1 + .10/2)^{1/3} - 1] = \$163{,}963.60$

Example (4). The facts are the same as in example (3), except that the amount of interest payable for the short period is determined under the approximate method. Under the approximate method, the amount of stated interest payable for the short period would be $166,666.70 determined as follows:

$\$10{,}000{,}000 \times (.10/2) \times (1/3) = \$166{,}666.70$

Example (5). The facts are the same as in example (3), except that the debt instrument is issued on May 19, 1986. Assume that a convention that assumes that a year consists of 12 30-day months is adopted. Thus, the short period is 42/180 of the semiannual period. The amount of stated interest payable on June 30, 1986, under the exact method would be $114,494.20 determined as follows:

$\$10{,}000{,}000 \times [(1 + .10/2)^{42/180} - 1] = \$114{,}494.20$

Example (6). The facts are the same as in example (5), except that the amount of interest payable for the short period (May 19, 1986, through June 30, 1986) is determined under the approximate method. Under the approximate method, the amount of stated interest payable for the short period would be $116,666.70 determined as follows:

$\$10{,}000{,}000 \times (.10/2) \times (42/180) = \$116{,}666.70$

Example (7). (i) Assume that on July 4, 1985, A sells nonpublicly traded property to B for $1,400,000. In consideration for the sale, B makes a $400,000 down payment, and issues a debt instrument with a stated principal amount of $1,000,000 with interest payable at 8.84 percent on the unpaid balance of the debt instrument. The debt instrument calls for monthly payments of $7,931.37 (consisting of interest at an annual rate of 8.84 percent on the unpaid balance of the principal amount of the debt instrument, and a partial payment of principal) due on the the first of each month for a period of 30 years beginning on September 1, 1985. The appropriate compounding period is one month. Interest is payable on the first of the month for the preceding month. In addition, on July 4, 1985, B makes an advance payment of interest of $6,875.56 for the period from July 4, 1985, through July 31, 1985.

(ii) Since the sale occurs after June 30, 1985, and the stated principal amount of the debt instrument is less than $2,800,000, the test rate of interest based on a monthly compounding period is 8.84 percent. Assume that a convention that assumes that a year consists of 12 30-day months is adopted. The debt instrument provides for adequate stated interest. For the whole-month periods beginning on August 1, 1985, the debt instrument provides for interest payable at a stated rate of interest equal to the test rate based on monthly compounding (8.84 percent) and the interest is payable monthly, the compounding period for the test rate.

For the short period (the period from July 4, 1985, through July 31, 1985), the amount of stated interest payable under the approximate method is $6,875.56 ($1,000,000 \times (.0884/12) \times (28/30)$).

Example (8). Assume that a debt instrument issued in consideration for the sale of nonpublicly traded property calls for two installment payments of principal, one due in 5 years in the amount of $5,000,000 and a second due in 10 years in the amount of $5,000,000. In addition, the debt instrument calls for 10 semiannual payments of interest of $600,000 each for the first five years, and 10 semiannual payments of interest of $300,000 each for the final five years. The appropriate compounding period is semiannual. Assume that the test rate of interest is 12 percent, compounded semiannually. The debt instrument provides for adequate stated interest because the debt instrument calls for interest on the outstanding principal balance at a rate equal to the test rate of 12 percent payable semiannually, the compounding period for the test rate of interest.

(c) *Debt instruments that do not meet the requirements of paragraph (b) of this section*—(1) In *general.* A debt instrument that does not meet the requirements of paragraph (b) of this section provides for adequate stated interest if the stated principal amount of the debt instrument (as defined in § 1.1274-2(b)) is less than or equal to the testing amount. For this purpose, the term "testing amount" means—

(i) The sum of the present values of all payments (including interest) due under the debt instrument determined by using a discount rate of interest equal to the test rate of interest as determined in paragraph (e) of this section, or

(ii) In the case of a potentially abusive situation (as defined in § 1.1274-4(g)(2)), the fair market value of the property (reduced in the manner prescribed in § 1.1274-4(g)(1)) received in exchange for the debt instrument.

For rules relating to the determination of present value, see § 1.1274-5.

(2) *Examples.* The provisions of paragraph (c) of this section may be illustrated by the following examples:

Example (1). Assume that a debt instrument issued in consideration for the sale of nonpublicly traded property calls for a single payment of $12,100,000 due in two years ($10,000,000 principal and $2,100,000 interest payment). Assume that an annual compounding period is selected. Further, assume that the test rate of interest based on semiannual compounding is 10 percent. The test rate of interest based on an annual compounding period equivalent to 10 percent, compounded semiannually, is 10.25 percent. Since the debt instrument does not call for a fixed rate of interest no lower than the test rate of interest for its entire term, the debt instrument has adequate stated interest if the stated principal amount is less than or equal to the testing amount. The present value of the payment of $12,100,000 (discounted at 10.25 percent, compounded annually) is equal to $9,954,699.95. Thus, since the testing amount is less than the stated principal amount of $10,000,000, the debt instrument does not provide for adequate stated interest.

For the debt instrument to provide for adequate stated interest, the debt instrument must call for a payment of at least $12,155,062.50 at maturity ($10,000,000 principal and $2,155,062.50 interest payment).

Example (2). (i) On January 1, 1986, A sells B nonpublicly traded property for a stated purchase price of $3,500,000. In consideration for the sale, B makes a down payment of $500,000 and issues a 10-year debt instrument with a stated principal amount of $3,000,000. The debt instrument calls for no interest in the first two years and interest at a rate of 15 percent payable annually over the remaining 8 years of the debt instrument. The first interest payment of $450,000 is due on December 31, 1988, and the last such payment is due on December 31, 1995, together with the $3,000,000 payment of principal. Assume that the test rate of interest applicable to the debt instrument is 10.5 percent, compounded annually.

(ii) Since the debt instrument does not call for a fixed rate of interest no lower than the test rate of interest for its entire term, the debt instrument has adequate stated interest if the stated principal amount is less than or equal to the testing amount. To compute the testing amount, all payments due under the debt instrument must be discounted at 10.5 percent, compounded annually, as follows:

(A) The present value of the $3,000,000 principal payment payable on December 31, 1995, is $1,105,347, determined as follows:

$$\$1{,}105{,}347 = \frac{\$3{,}000{,}000}{(1 + .105/1)^{10}}$$

(B)(1) The present value of the eight interest payments of $450,000 as of January 1, 1988, (the interim date) is $2,357,635, determined as follows:

$$\$2{,}357{,}635 = \$450{,}000 \times \frac{1-(1+.105/1)^{-8}}{(.105/1)}$$

(2) The present value of this interim amount as of the January 1, 1986, the computation date, is $1,930,865, determined as follows:

$$\$1{,}930{,}865 = \frac{\$2{,}357{,}635}{(1+.105/1)^{2}}$$

(iii) Thus, the testing amount (that is, the total present value of all payments due under the debt instrument) is $3,036,212 ($1,105,347 + $1,930,865). Since the stated principal amount is less than the testing amount, the debt instrument provides for adequate stated interest. However, since the debt instrument does not call for interest at a constant rate over its entire term, it is subject to section 1274. For the treatment of this debt instrument under section 1272 and the regulations thereunder, see § 1.1272-1(k) example (9).

Example (3). In a transaction that is a potentially abusive situation, nonpublicly traded property is sold for a $1,000,000 down payment and a debt instrument with a stated principal amount of $7,000,000. The debt instrument calls for annual interest payments at 11 percent, the test rate of interest applicable to the debt instrument. The fair market value of the property is $7,000,000. Since the debt instrument is involved in a potentially abusive situation, the debt instrument is tested for adequate stated interest by determining whether the stated principal amount is less than or equal to the testing amount. Thus, the debt instrument does not provide for adequate stated interest because the stated principal amount of the debt instrument ($7,000,000) exceeds the testing amount ($6,000,000), the fair market value of the property reduced by the amount of the down payment.

(d) *Treatment of debt instruments calling for variable rate of interest or contingent interest*—(1) *Variable rates of interest based on an index*—(i) *In general.* Except as provided in paragraph (d)(1) (ii) and (iii) of this section, a variable rate debt instrument (within the meaning of § 1.1275-5) shall be treated for purposes of determining whether the debt instrument provides for adequate stated interest as if the rate of interest determined under the index were a fixed rate equal to the rate of interest determined under the index as of the date when the test rate of interest is determined (within the meaning of §1.1274-6(e)). Thus, for any period in which interest is payable at a rate determined under the index, the rate of interest fixed by the index as of the date the test rate of interest is determined is treated for purposes of paragraph (b) of this section as the stated rate of interest, and is used to determine the amount of any stated interest payment for purposes of paragraph (c) of this section.

(ii) *Limitation on inceases in rate.* In the case of a debt instrument that limits the number of percentage or basis points by which the rate of interest can vary from one period to the next—

(A) Paragraph (d)(1)(i) of this section shall apply only if, for each period, the limitation permits the rate of interest to increase by at least as many percentage or basis points as such rate is permitted to decrease; and

(B) Section 1.1274-6(a)(2) shall not apply if, by reason of such limitation, the number of percentage points by which the rate (based on annual compounding) can increase for any period is less than 1/12 of the number of months in the adjustment interval preceding such period.

(iii) *Ceiling on variable rate of interest.* Paragraph (d)(1)(i) of this section shall not apply to any debt instrument that places a ceiling on the maximum rate of interest payable under the debt instrument unless—

(A) The excess of the rate initially fixed by the index over the test rate of interest plus the excess of the maximum rate permitted by the ceiling over the test rate is at least equal to 5 percentage points; and

(B) In the case of a debt instrument with a term that exceeds 3 years, the maximum rate permitted by the ceiling is at least equal to the test rate of interest determined without regard to § 1.1274–6(a)(2) plus the difference between such rate and the actual test rate of interest.

(iv) *Treatment of payment if variable rate of interest rules do not apply.* If paragraph (d)(1)(i) of this section does not apply to a debt instrument, variable payments of interest under the debt instrument are contingent payments of interest subject to the rules of § 1.1275–4, but only to the extent such variable payments exceed the minimum payments of interest permitted under the debt instrument. For this purpose, the minimum payment of interest permitted under the debt instrument for any period shall be determined by taking into account any floor on the minimum rate of interest payable under the debt instrument and, in the case of a debt instrument described in paragraph (d)(1)(ii) of this section, the maximum permissible decrease in the interest rate for each period during the term of the debt instrument.

(v) *Examples.* The provisions of paragraph (d)(1) of this section may be further illustrated by the following examples:

Example (1). On January 1, 1986, A sells B nonpubliciy traded property. In partial consideration for the sale, B issues a debt instrument in the principal amount of $1,000,000 payable in 5 years. The debt instrument calls for interest payable monthly at a rate of one percentage point above the average prime lending rate of a major bank for the month proceeding the month of the interest payment. Thus, the debt instrument is a variable rate debt instrument within the meaning of § 1.1275–5. Assume that the test rate of interest applicable to the debt instrument is 11.5 percent, compounded monthly. Further, assume that on the date the test rate of interest is determined, one percentage point above the prime lending rate of the designated bank is 12.5 percent. Since the test rate of interest is 11.5 percent, compounded monthly, the debt instrument provides for adequate stated interest.

Example (2). (i) On July 1, 1987, A sells B nonpublicly traded property for a stated purchase price of $5,000,000. In consideration for the sale, B makes a $1,000,000 down payment, and issues a debt instrument calling for a single payment of principal of $4,000,000 due in 10 years. Interest on a debt instrument is payable semiannually on December 31 and June 30 of each year until June 30, 1997. For the first semiannual period, interest is payable at a rate of 9 percent. For subsequent semiannual periods, interest is payable at a rate equal to 3 percentage points above the yield on 6-month Treasury bills for the midpoint of the semiannual period of the interest payment, except that the interest rate cannot increase or decrease by more than one percentage point from the rate payable in the preceding semiannual period. Assume that as of the date the interest rate is determined, the yield on 6-month Treasury bills is 10 percent, compounded semiannually. Further, assume that the Federal short-term rate is 12 percent, compounded semiannually.

(ii) The debt instrument is tested for adequate stated interest by assuming that the index provided in the instrument will remain fixed at the 13 percent rate in effect as of the date the interest rate is determined. Based on this assumption, interest would be payable on the debt instrument as follows:

Semiannual period	Interest rate (percent)	Interest amount
1	9	$180,000
2	10	200,000
3	11	220,000
4	12	240,000
5–20	13	260,000

The testing amount, the sum of the present values (using a discount rate of 12 percent, compounded semiannually) of the assumed interest payments and of the $4,000,000 principal payment due at the end of year 10, is $4,051,100. Since the stated principal amount of $4,000,000 is less than the testing amount, the debt instrument provides for adequate stated interest. Since the interest rate limitation permits rate increases of at least 1 percentage point for each annual adjustment interval, the applicable Federal rate with respect to the debt instrument is determined under § 1.274–6 (a)(2), even though the initial interest rate is fixed at a level below the rate established by the index. Thus, the applicable Federal rate is the Federal short-term rate.

Example (3). On July 1, 1986, A sells nonpublicly traded property to B for $3,000,000. In partial consideration for the sale, B issues a debt instrument that calls for payments of $1,500,000 on July 1, 1989, and July 1, 1992, plus annual interest payments on the outstanding loan balance on July 1 of each year (beginning on July 1, 1987) at 90 percent of the prime rate of a local bank on June 15 of the year of the payment. The debt instrument provides, however, that the rate determined with reference to the bank's prime rate cannot increase or decrease from one year to the next by more than 1 percentage point (100 basis points). Paragraph (d)(l)(i) of this section applies to the debt instrument because the interest rate limitation provided in the debt instrument permits interest rate increases by at least as many percentage points as it permits interest rate decreases. In addition, since the debt instrument permits at least one percentage point increase for each annual adjustment interval, the applicable Federal rate with respect to the debt instrument is determined under § 1.1274–6(a)(2). Thus, the applicable Federal rate is the Federal short-term rate.

Example (4). The facts are the same as in example (3), except that the limitation on the variable rate permits only a one-half percentage point (50 basis point) increase or decrease in the interest rate for each one year adjustment period. Paragraph (d)(l)(i) applies to the debt instrument. However, since the limitation on increases in the interest rate does not permit at least a one percentage point adjustment for each annual adjustment interval, the applicable Federal rate with respect to the debt instrument is determined without regard to § 1.1274–6(a)(2). Thus, the applicable Federal rate is the Federal mid-term rate.

Example (5). The facts are the same as in example (3), except that the limitation on the variable rate applies only to increases in the interest rate. Paragraph (d)(1)(i) of this section does not apply to the debt instrument because the limitation does not permit the interest rate to increase by at least as many percentage points as it permits the interest rate to decrease. Thus, the variable payments of interest are treated in accordance with the rules of paragraph (d)(l)(iv) of this section.

Example (6). On July 1, 1987, A sells nonpublicly traded property to B for $11,000,000. Assume that as the debt instrument is determined, the Federal short-term rate is 10 percent and the Federal long-term rate is 12 percent. In partial consideration for the sale, B issues a debt instrument that calls for payments of $1,000,000 on July 1, 1988, and on each subsequent July 1 until July 1, 1987. Interest on the outstanding principal balance is payable on July 1 of each year at the Federal short-term rate of June of the same year. The debt instrument provides, however, that the interest rate cannot rise above 15 percent. The ceiling provided in the debt instrument satisfies paragraph (d)(l)(iii) of this section because (i) the excess of the rate initially fixed by the index over the test rate (0 percentage points) plus the excess of the maximum rate permitted by the ceiling over the test (5 percentage points) is at least 5 percentage points, and (ii) the maximum rate permitted by the ceiling (15 percent) is greater than the sum of the Federal long-term rate (12 percent) and the difference between that rate and the Federal short-term rate (2-percent). Thus, paragraph (d) (l) (i) of this section applies to this debt instrument.

Example (7). The facts are the same as in example (6), except that the debt instrument calls for interest at a rate equal to 110 percent of the Federal short-term rate for June of the same year and the ceiling specified in the debt instrument is 14 percent. This debt instrument satisfies paragraph (d)(l)(iii) of this section because (i) the excess of the rate initially fixed by the index over the test rate (1 percentage point) plus the excess of the maximum rate permitted by the cap over the test rate (4 percentage points) is at least 5 percentage points, and (ii) the maximum rate permitted by the ceiling (14 percent) is at least equal to the sum of the Federal long-term rate and the difference between such rate and the Federal short-term difference between such rate and the Federal short-term rate. Thus, paragraph (d)(l)(i) of this section applies to the debt instrument.

Example (8). The facts are the same as in example (7), except that the Federal long-term rate is 13 percent. Although the excess of the rate initially fixed by the index over the test rate plus the excess of the maximum rate permitted by the cap over the test rate is at least 5 percentage points, the debt instrument does not satisfy paragraph (d)(1)(iii) of this section because the maximum rate permitted by the ceiling (14 percent) is less than the sum of the Federal long-term rate (13 percent) and the difference between such rate and the Federal short-term rate (3 percent). Thus, paragraph (d)(1)(i) does not apply to this debt instrument and the variable payments of interest are treated in accordance with the rules of paragraph (d)(1)(iv) of this section.

(2) *Contingent payments of interest*—(i) *General rule.* Except as provided in paragraph (d)(2)(ii) of this section, contingent payments of interest are not taken into account in determining whether a debt instrument provides for adequate stated interest.
For additional rules relating to contingent payments, see § 1.1275-4.

(ii) *Special rule.* A debt instrument provides for adequate stated interest if all or part of the contingent payments of interest provided for in the debt instrument are of a nature described in paragraph (d)(2)(iii), and the debt instrument meets the requirements of paragraph (d)(2)(iv) of this section.

(iii) *Nature of contingent interest taken into account in determining adequate stated interest.* Paragraph (d)(2)(ii) of this section applies only to payments of contingent interest if the payments are conditioned on a return from the exploitation of the property acquired for the debt instrument. Such contingent interest payments include payments conditioned on profits, sales, rents, production, or royalties from the property acquired for the debt instrument.

(iv) *Contingent interest as adequate stated interest.* (A) *In general.* A debt instrument given in consideration for property that does not include any recovery property (within the meaning of section 168(c)(1)) or any property described in section 1221(1) (relating to stock in trade, inventories, and other property held for sale to customers) provides for adequate stated interest if—

(*1*) The debt instrument would satisfy paragraph (b) or (c) of this section (taking into account the rule of paragraph (d)(1) of this section) at a test rate of interest equal to 80 percent of the test rate applicable to the debt instrument, and

(*2*) It is reasonable to expect (as of the date the test rate of interest is determined) that contingent payments of interest described in paragraph (d)(2)(iii) will raise the total yield on the debt instrument to at least the test rate of interest applicable to the debt instrument.

(B) *Depreciable or inventoriable property.* A debt instrument given in consideration for property that includes any recovery property or any property described in section 1221(1) provides for adequate stated interest if—

(*1*) The debt instrument satisfies the requirements of paragraph (d)(2)(iv)(A) of this section, and

(*2*) The term of the debt instrument does not exceed 12 years (4 years in the case of a sale or exchange that includes any 3-year or 5-year property (within the meaning of section 168(c)), or any property described in section 1221(1)).

(C) *Entity look-through rule.* For purposes of paragraph (d)(2)(iv) of this section, the purchase of an interest in an entity shall be treated as a purchase of the underlying assets of the entity if the bases of the assets are determined, in whole or in part, by reference to the amount paid for such interest. If the entity owns any recovery property or property described in section 1221(1), paragraph (d)(2)(iv)(B) of this section shall apply even with respect to that portion of the purchase price attributable to nonrecovery property that is not described in section 1221(1). For example, if one corporation purchases stock of another corporation owning nonrecovery property that is not described in section 1221(1) and at least one item of 3-year or 5-year property and makes an election under section 338 (relating to certain stock purchases treated as asset acquisitions), the stock purchase shall be treated as a purchase of 3-year or 5-year property for purposes of paragraph (d)(2)(iv)(B)(*2*) of this section.

(v) *Examples.* The provisions of paragraph (d)(2) of this section may be further illustrated by the following examples:

Example (1). (i) On January 1, 1986, A sells a newly-constructed office building to B for $1,000,000 in cash and a debt instrument with a face amount of $5,000,000. The debt instrument provides for a payment of $5,000,000 on December 31, 1995, plus an interest payment of $400,000 on December 31 of each year. In addition, the debt instrument provides for an additional payment on December 31 of each year equal to 5 percent of the gross rentals derived from the property during the first eleven months of the year. Assume that the test rate of interest (based on annual compounding) applicable to the sale is 10 percent. Thus, under paragraph (d)(2)(i) of this section, the debt instrument does not provide for adequate stated interest.

(ii) Under paragraph (d)(2)(iii) of this section, however, the debt instrument will be deemed to provide adequate interest if (A) the debt instrument states fixed interest at a rate at least equal to 8 percent, (B) it is reasonable to expect the contingent interest will raise the total yield on the debt instrument to at least 10 percent and (C) the term of the debt instrument does not exceed 12 years. The debt instrument satisfies requirements (A) and (C) on its face. It is reasonable to expect the contingent payments to raise the yield of the debt instrument to 10 percent, the debt instrument is deemed to state adequate interest.

(iii) Based on the fair market value of the building, the terms being offered for comparable office space in the vicinity of the building and expectations (based on previous experience with respect to office buildings in the area) as to future vacancy rates, future rentals and initial delays in leasing space in the building, the issuer and holder expect that the contingent payment provisions will result in the following additional payments under the debt instrument:

1986	$30,000
1987	80,000
1988	115,000
1989	125,000
1990	130,000
1991	135,000
1992	140,000
1993	145,000
1994	150,000
1995	155,000

Assuming the contingent payment provision results in these additional payments, the yield of the debt instrument will be 10.23 percent. Because the expectations of the issuer and holder as to future payments under the contingent payment provision are based on an analysis of relevant existing information and reasonable estimates of future events, it is reasonable to expect that the contingent payments will raise the yield on the debt instrument to a rate at least equal to the test rate of interest (10 percent). Thus, under paragraph (d)(2)(iii) of this section, this debt instrument provides for adequate interest.

Example (2). On January 1, 1986, A sells 3-year property to B that is to be held for rent. In partial consideration for the sale, B issues a debt instrument with a term of 3 years in the principal amount of $700,000 calling for fixed payments of interest at 8 percent payable annually, and contingent payments of interest payable annually in an amount equal to 3 percent of the gross rents from the property. Assume that the test rate of interest is 9.2 percent, compounded annually. Further, assume that the contingent payments of interest are such that it is reasonable to expect that the contingent interest payments will raise the total yield on the debt instrument to at least 9.2 percent, compounded annually (taking into account the 8 percent fixed interest payments). Thus, the debt instrument provides for adequate stated interest because the debt instrument calls for stated interest payable at a rate at least equal to 80 percent of the test rate (7.36 percent), and the term of the debt instrument does not exceed 4 years (the appropriate measuring period for a debt instrument given in consideration for the sale of 3-year property).

Example (3). The facts are the same as in example (2), except that the terms of the debt instrument is 5 years. Since, the term of the debt instrument exceeds 4 years and since considering only the fixed payments of interest, the debt instrument does not call for interest at a rate at least equal to the test rate of 9.2 percent, compounded annually, it does not provide for adequate stated interest.

Example (4). The facts are the same as in example (2), except that the rental property is depreciable real property that is 19-year property (within the meaning of section 168 (c)(2)(D)), and the term of the debt instrument is 10 years. The debt instrument provides for adequate stated interest because it calls for stated interest at a rate at least equal to 80 percent of the test rate of interest and the term of the debt instrument does not exceed 12 years.

(e) *Determination of test rate of interest*—(1) *Sales or exchanges occurring after June 30, 1985*—(i) *General rule.* Except as otherwise provided in paragraph (e) of this section, if a sale or exchange occurs after June 30, 1985, the test rate of interest is 100 percent of the applicable Federal rate based on semiannual compounding or an equivalent rate based on an appropriate compounding period (for example, one year, a quarter, or a month). For rules relating to the appropriate compounding period, see paragraph (e)(3) of this section. For rules relating to the determination of the applicable Federal rate, see § 1.1274–6.

(ii) *Qualified debt instruments.* In the case of a qualified debt instrument as defined in § 1.1274A–1(b) the test rate of interest is the lower of—

(*A*) 100 percent of the applicable Federal rate (based on an appropriate compounding period), or

(*B*) 9 percent, compounded semiannually, or an equivalent rate based on an appropriate compounding period.
The rates equivalent to 9 percent, compounded semiannually, for annual, quarterly and monthly compounding periods are as follows:

Compounding period	Equivalent rate
Annual	9.20 percent
Quarterly	8.90 percent
Monthly	8.84 percent

(iii) *Sale-leaseback transactions.* In the case of a debt instrument given in consideration for the sale or exchange of property all or a portion of which, pursuant to a plan, is leased by the transferor of the property or a person related to the transferor (within the meaning of section 168(e)(4)(D)) after the sale or exchange, the test rate of interest is 110 percent of the applicable Federal rate.

(2) *Sales or exchanges occurring before July 1, 1985*—(i) *General rule*—(A) *In general.* In the case of any sale or exchange of property (other than new section 38 property within the meaning of section 48(b) and the regulations thereunder) occurring after December 31, 1984, and before July 1, 1985, the test rate of interest is—

(*1*) If the sale or exchange involves a borrowed amount (within the meaning of paragraph (e)(2)(i)(C) of this section) that does not exceed $2,000,000, 9 percent, compounded semiannually, or an equivalent rate based on an appropriate compounding period, or

(*2*) If the sale or exchange involves a borrowed amount in excess of $2,000,000—

(*i*) The percent set forth in paragraph (e)(i)(A)(1) of this section, plus

(ii) The percent applicable to the borrowed amount in excess of $2,000,000.

(B) *The percent applicable to a borrowed amount in excess of $2,000,000.* The percent applicable to the borrowed amount in excess of $2,000,000 is equal to—

(*1*) The excess of 110 percent of the applicable Federal rate (based on the appropriate compounding period) over the percent set forth in paragraph (e)(2)(i)(A)(1) of this section, multiplied by

(*2*) A fraction, the numerator of which is the excess of the borrowed amount over $2,000,000, and the denominator of which is the borrowed amount.

(C) *Meaning of borrowed amount.* For purposes of paragraph (e)(2)(i) of this section, the term "borrowed amount" means the stated principal amount of a debt instrument as that term is defined in § 1.1274–2(b).

(ii) *New section 38 property.* In the case of any sale or exchange of new section 38 property (within the meaning of section 48(b) and the regulations thereunder) occurring after December 31, 1984, and before July 1, 1985, the test rate of interest is 110 percent of the applicable Federal rate.

(iii) *Special rules for sales or exchanges calling for contingent principal.* If some or all the consideration involved in a sale or exchange taking place before July 1, 1985, consists of contingent payments of principal, then the test rate of interest shall be determined as follows. A stated principal amount shall first be determined by assuming that no contingent principal payments will be made. The test rate of interest for noncontingent payments of principal is then determined in accordance with paragraph (e)(2)(i)(A) of this section. This test rate of interest as so determined shall apply to all fixed payments under the debt instrument. If the fixed stated principal amount is not less than $2,000,000, the test rate of interest that applies to any contingent payment shall be 110 percent of the applicable Federal rate. If $2,000,000 exceeds the fixed stated principal amount, then the test rate of interest that applies to the contingent payments shall be 9 percent, compounded semiannually (or an equivalent rate based on an appropriate compounding period) until the stated principal amount attributable to contingent payments equals this excess. As of the time the stated principal amount equals this excess, the test rate of interest applicable to any subsequent contingent payment is 110 percent of the applicable Federal rate with respect to the contingent payment. For additional rules relating to contingent payments, see § 1.1275–4.

(3) *Selection of the appropriate compounding period*—(i) *In general.* The test rate of interest applicable to a debt instrument must be based on an appropriate compounding period. The longer the compounding period, the higher the annual stated rate of interest. For example, a rate based on annual compounding is slightly higher than the equivalent rate based on semiannual compounding, which in turn is slightly higher than the equivalent rate based on quarterly compounding, monthly compounding, etc.

(ii) *Debt instruments calling for more than one payment or compounding date*—(A) *Regular payment or compounding at intervals of one year or less.* If a debt instrument calls for more than one payment or compounding date (other than the issue date) and all dates on which an amount is either paid or compounded under the debt instrument occur at regular intervals of one year or less, the appropriate compounding period is such interval even if the interval between the issue date and the first payment or compounding date after the issue date or the interval between the maturity date and the preceding payment or compounding date differs from the interval between other payment or compounding dates.

(B) *Irregular payment or compounding; intervals of more than one year.* If a debt instrument calls for more than one payment or compounding date (other than the issue date) and all dates on which an amount is either paid or compounded do not occur at regular intervals of one year or less, the appropriate compounding period is the longest period of not more than one year such that all intervals consist of a whole number of compounding periods. For purposes of this paragraph (e)(3)(ii)(B), the interval between the issue date and the first payment or compounding date after the issue date and the interval between the maturity date and the preceding payment or compounding date are not taken into account unless the debt instrument calls for only one payment or compounding date between the issue date and the maturity date.

(iii) *Debt instruments calling for a single payment.* If a debt instrument calls for a single payment at maturity and for no other payment or compounding dates (other than the issue date), any compounding period of not more than one year may be selected.

(4) *Conversion of a test rate to appropriate compounding period*—(i) *In general.* If the test rate of interest based on an appropriate compounding period (as determined under paragraph (e)(3) of this section) is not provided under paragraph (e) (1) or (2) of this section (as applicable) or § 1.1274–6 (relating to the applicable Federal rate), or if a test rate accurate to more than 2 decimal places is desired by both parties to the transaction, the test rate of interest shall be determined by first determining a test rate of interest based on semiannual compounding, then converting that rate to a rate based on an appropriate compounding period using the procedures prescribed in paragraph (e)(4) (ii) or (iii) of this section (as applicable).

(ii) *Conversion of semiannual test rate of interest to an equivalent rate based on annual compounding.* A test rate of interest based on annual compounding that is equivalent to the test rate based on semiannual compounding may be determined by the application of the following formula:

$r = i + i^2/4$

In which:

r = The equivalent rate of interest based on annual compounding expressed as a decimal

i = The test rate of interest based on semiannual compounding expressed as a decimal

For example, assume that the test rate of interest based on semiannual compounding, is exactly 10 percent. The equivalent rate based on annual compounding is 10.25 percent determined as follows:

$.1025 = .10 + [(.10)^2/4]$

(iii) *Conversion of semiannual test rate of interest to an equivalent rate based on compounding more frequently than semiannually.* A test rate of interest based on compounding more frequently than semiannually that is equivalent to the test rate based on semiannual compounding may be determined by the application of the following formula:

$r = k[(1 + i/2)^{2/k} - 1]$

In which:

r = The equivalent rate based on compounding more frequently than semiannually expressed as a decimal

i = The test rate based on semiannual compounding expressed as a decimal

k = The number of compounding periods in a year on which the annual equivalent rate is to be based (for example, 12, if the equivalent rate is to be based on monthly compounding)

For example, assume that the test rate of interest based on semiannual compounding is exactly 10 percent. The equivalent rate based on quarterly compounding would be 9.8780308 percent determined as follows:

$.098780308 = 4[(1 + .10/2)^{2/4} - 1]$

The equivalent rate based on monthly compounding would be 9.7978152 percent determined as follows:

$.097978152 = 12[(1 + .10/2)^{2/12} - 1]$

The equivalent rate based on semimonthly compounding would be 9.78 percent (accurate to two decimal places) determined as follows:

$.0978 = 24[(1 + .10/2)^{2/24} - 1]$

(5) *Examples.* The provisions of paragraph (e) of this section may be illustrated by the following examples:

Example (1). On January 1, 1985, A sells nonpublicly traded property (other than new section 38 property) to B for $2,300,000. In consideration for the sale, B makes a down payment of $300,000 and issues a debt instrument due in 3 years with a stated principal amount of $2,000,000 calling for annual payments of interest. Thus, the appropriate compounding period for the test rate is annual. The test applicable to the debt instrument is 9.20 percent, compounded annually, since the sale occurred before July 1, 1985, and the borrowed amount (the stated principal amount of the debt instrument) does not exceed $2,000,000.

Example (2). On January 1, 1986, A sells nonpublicly traded property (other than new section 38 property) to B for $3,500,000. In consideration for the sale, B makes a $1,000,000 down payment and issues a debt instrument with a stated principal amount of $2,500,000 due in 10 years and that calls for twenty semiannual payments of interest. Assume that the debt instrument is a qualified debt instrument within the meaning is the lower of 100 percent of the applicable of § 1.1274A–1(b). Thus, the test rate of interest Federal rate or 9 percent, compounded semiannually. Assume that 100 percent of the applicable Federal rate (the Federal long-term rate) is 9.69 percent, compounded semiannually. Thus, the test rate of interest is 9 percent, compounded semiannually.

Example (3). The facts are the same as in example (2), except that the sale takes place on January 1, 1985. On that date, 110 percent of the Federal long-term rate was 12.74, compounded semiannually. Thus, the excess of 110 percent of the applicable Federal rate over 9 percent is 3.74 percent. Since the sale occurred before July 1, 1985, the test rate of interest applicable to the debt instrument is 9.75 percent, compounded semiannually, that is, 9 percent plus the 0.75 percent applicable to the borrowed amount in excess of $2,000,000 ($500,000/$2,500,000 × 3.74 (percent) = 0.75 percent).

Example (4). (i) On April 1, 1985, A sells rental property to B. In consideration for the sale, B issues a debt instrument calling for annual payments of $500,000 for each of the next five years payable on March 31, 1986, through March 31, 1990, plus contingent payments equal to 2 percent of gross rents from the property. The debt instrument has an internal interest clause that calls for each payment (including the noncontingent payments) to be characterized as interest in the smallest amount that would constitute adequate stated interest within the meaning of section 1274. The test rate of interest is determined as follows:

(ii) The borrowed amount (the stated principal amount of the debt instrument) is first determined by assuming that contingent payments will not be made. Pursuant to the internal interest clause, the borrowed amount attributable to the fixed payments is the present value of the 5 payments of $500,000 determined tentatively by using a test rate of 9.20 percent, compounded annually. At that discount rate of interest, the present value of the 5 payments is $1,934,775. Since $2,000,000 exceeds the fixed borrowed amount, the test rate of interest that applies to the fixed payments is 9.20 percent and the tentative calculation of the borrowed amount may be used. (If the tentative calculation of the borrowed amount exceeded $2,000,000, an interrelated calculation would be necessary to compute the actual test rate and borrowed amount.)

(iii) Assume that a contingent payment in the amount of $50,000 is made on March 31, 1986. Pursuant to the internal interest clause, the tentative borrowed amount attributable to that payment is $45,788, the present value of the payment determined by using a discount rate of interest of 9.2 percent. Since this amount is less than $65,225 (the excess of $2,000,000 over the fixed stated principal amount), the test rate applicable to the contingent payment is 9.2 percent, compounded annually and the tentative calculation of the borrowed amount may be used. Thus, the payment is treated as a payment of principal of $45,788 (which gives the buyer additional basis of this amount) and a payment of interest of $4,212.

(iv) Assume that a contingent payment of $30,000 is made on March 31, 1987. Using a discount rate of interest of 9.20 percent, compounded annually, the present value of the payment is $25,158. This amount exceeds $19,437 (the excess of $2,000,000 over the sum of the stated principal amount attributable to the fixed payments and the stated principal amount attributable to the first contingent payment). Thus, the test rate of interest applicable to the payment is 9.20 percent, compounded annually, only with respect to that portion of the payment having a present value of $19,437, and 110 percent of the applicable Federal rate with respect to the remaining portion of the payment (that is, the total amount of the payment less the portion of the payment having a present value of $19,437). The portion of the contingent payment having a present value of $19,437 is $23,178. Thus, the remaining $6,822 of the payment is subject to 110 percent of the applicable Federal rate. One hundred ten percent of the applicable Federal rate (the Federal short-term rate) in effect on April 1, 1985, was 11.43 percent, compounded annually. At the rate of interest pursuant to the internal interest clause, $5,494 of the payment is treated as a payment of principal, and $1,328 of the payment is treated as interest.

(v) Since, as of March 31, 1987, the stated principal amount involved in the transaction is in excess of $2,000,000, all subsequent contingent payments will be subject to a test rate of interest equal to 110 percent of the applicable Federal rate.

§ 1.1274-4 Debt instruments without adequate stated interest.

(a) *In general.* If section 1274 applies to a debt instrument because it does not provide for adequate stated interest (within the meaning of § 1.1274-3), the issue price of the debt instrument is the imputed principal amount of the debt instrument. Except as provided in paragraph (g) of this section, the imputed principal amount of a debt instrument is the sum of the present values of all payments (including interest) due under the debt instrument, determined by using a discount rate equal to the imputed rate of interest as determined under paragraph (b) of this section. For rules relating to the determination of the present value of a payment, see § 1.1274-5.

(b) *Determination of imputed rate of interest*—(1) *General rule.* Except as provided in paragraphs (b) (2) and (3) of this section, the imputed rate of interest applicable to the debt instrument is the same as the test rate of interest as determined in § 1.1274-3(e).

(2) *Special rate for certain sales or exchanges occurring before July 1, 1985*—(i) *In general.* If the test rate of interest applicable to a debt instrument is prescribed in § 1.1274-3(e)(2)(i), the imputed rate of interest is—

(A) If the sale or exchange involves a borrowed amount (as defined in § 1.1274-3(e)(2)(i)(C)) that does not exceed $2,000,000—

(1) 10.00 percent, compounded semiannually, or

(2) An equivalent rate based on an appropriate compounding period. The rates equivalent to 10.00 percent, compounded semiannually, for annual, quarterly and monthly compounding periods are as follows:

Compounding period	Equivalent rate
Annual	10.25 percent
Quarterly	9.88 percent
Monthly	9.80 percent

(B) If the sale or exchange involves a borrowed amount that exceeds $2,000,000—

(1) The percent determined under paragraph (b)(2)(i)(A) of this section, plus

(2) The percent applicable to the borrowed amount in excess of $2,000,000.

(ii) *Percent applicable to the borrowed amount in excess of $2,000,000.* The percent applicable to the borrowed amount in excess of $2,000,000 is equal to—

(A) The excess of 120 percent of the applicable Federal rate (based on the appropriate compounding period) over the percent determined under paragraph (b)(2)(i)(A) of this section, multiplied by

(B) A fraction, the numerator of which is the excess of the borrowed amount over $2,000,000 and the denominator of which is the borrowed amount.

(iii) *Sales calling for contingent principal.* If some or all the consideration involved in a sale or exchange taking place before July 1, 1985, consists of contingent payments of principal, then in determining the imputed rate of interest under paragraph (b)(2) of this section, the rules of § 1.1274-3(e)(2)(iii) shall apply, except that 120 percent shall be substituted for 110 percent in each place it appears.

(3) *Rate applicable to sales or exchanges of new section 38 property occurring after December 31, 1984, and before July 1, 1985.* The imputed rate of interest applicable to a sale or exchange of new section 38 property (within the meaning of section 48(b) and the regulations thereunder) occurring after December 31, 1984, and before July 1, 1985, is 120 percent of the applicable Federal rate.

(c) *Appropriate compounding period; conversion of imputed rate to appropriate compounding period.* The imputed rate of interest must be based on an appropriate compounding period. An appropriate compounding period depends on the intervals between payments or compounding of interest and shall be determined in accordance with the rules of § 1.1274-3(e)(3) except that if a debt instrument calls for a single payment at maturity and for no other payment or compounding dates, the appropriate compounding periods are the six-month periods (or the shorter period from the issue date of the debt instrument) that end on the day in the calendar year that corresponds either to the maturity date or to the date that is six months before the maturity date. Rules analogous to those set forth in § 1.1274-3(e)(4) shall also apply to convert an imputed rate to a rate based on an appropriate compounding period if not otherwise provided, or to a rate accurate to more than two decimal places if such accuracy is desired by both parties to the transaction.

(d) *Determining imputed principal amount with short period.* In determining the imputed principal amount of a debt instrument when there is a short period, the exact method as prescribed in § 1.1274-5(d)(2)(ii) shall be used to discount a payment or a stream of payments for the short period. The exact method shall also be used for purposes of determining the amount of original issue discount includible under section 1272 for the short period (see § 1272-1(c)(2)(ii)(B)). In addition, for purposes of determining the fraction I with respect to a short period, a convention that assumes that a year consists of 12 30-day months shall be used.

(e) *Treatment of variable rate of interest in determining imputed principal amount.* If § 1.1274-3(d)(1) (relating to payments of interest based on an objective interest index) applies to a debt instrument, the rate of interest fixed by the index as of the date the imputed rate of interest is determined is treated for purposes of determining the imputed principal amound of the debt instrument as the stated rate of interest. If § 1.1274-3(d)(1) does not apply to a debt instrument (either because the debt instrument is not a variable rate debt instrument (within the meaning of § 1.1275-5) or, because, for example, the variable rate debt instrument places a nonqualifying ceiling on the variable rate), the payments of interest shall be treated as contingent payments to the extent provided in § 1.1274-3(d)(1)(iv) and shall be subject to the provisions of paragraph (f) of this section and § 1.1275-4.

(f) *Treatment of contingent payments in determining imputed principal amount.* In the case of a debt instrument calling for any contingent payment, the imputed principal amount of the debt instrument shall be determined solely by reference to the noncontingent payments. Thus, the imputed principal amount of a debt instrument calling for contingent payments is the present value of all noncontingent payments. For additional rules relating to contingent payments, see § 1.1275-4.

(g) *Imputed principal amount of a debt instrument equal to fair market value in potentially abusive situations*—(1) *In* *general.* In the case of any potentially abusive situation, the imputed principal amount of a debt instrument issued in consideration for the sale or exchange of property shall be the fair market value of the property reduced by the fair market value of any consideration, other than the debt instrument (for example, a down payment) given in consideration for the sale or exchange.

(2) *Potentially abusive situation defined*—(i) *In general.* For purposes of paragraph (g)(1) of this section, the term "potentially abusive situation" means—

(A) A tax shelter (as defined in section 6661(b)(2)(C)(ii)), or

(B) Any other situation having potential for tax avoidance (within the meaning of paragraph (g)(2)(ii) of this section).

(ii) *Situations having potential for tax avoidance.* For purposes of paragraph (g)(2)(i)(B) of this section, a situation having potential for tax avoidance means a situation involving—

(A) A recent sales transaction,

(B) Nonrecourse financing,

(C) Financing with a term in excess of the economic life of the property, or

(D) A sale in which the purchase price or the interest thereon is denominated in a currency other than U.S. dollar.

(iii) *Sale between related parties.* Notwithstanding paragraph (g)(2) (i) and (ii) of this section, a sale between related parties governed by § 1.1012–2 involving a situation described in paragraph (g)(2) (i) or (ii) of this section shall not be considered a potentially abusive situation. If, however, a sale of property was the subject of a recent sales transaction, the purchase price of the property in the recent sale shall be relevant in determining the value of the property for purposes of § 1.1012–2.

(h) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). (i) On April 1, 1986, A sells nonpublicly traded property to B in a transaction that is not excepted under the provisions of section 1274 (c)(3) and § 1.1274–1(b) and is not a potentially abusive situation. As part of the consideration for the sale, B issues a debt instrument calling for a $1,000,000 payment of principal due on December 31, 1995, with an interest payment of $20,000 due on June 30, 1986, and semiannual interest payments of $40,000 due at the end of each semiannual period, beginning with the period ending on December 31, 1986, and terminating with the period ending on December 31, 1995. The appropriate compounding period for the test rate is semiannual.

(ii) Assume that the debt instrument does not provide for adequate stated interest within the meaning of § 1.1274–3. Since the debt instrument does not provide for adequate stated interest, the issue price of the debt instrument is the imputed principal amount of the debt instrument. Further, assume that the imputed rate of interest at which the payments due under the debt instrument are to be discounted is 12 percent, compounded semiannually.

(iii) The present value of all the payments due under the debt instrument may be determined as follows:

(A) The payment of principal of $1,000,000 due on December 31, 1995, is due 9 years and 9 months from the computation date of April 1, 1986. Based on a semiannual compounding period, the payment is due 19 and one-half compounding periods from the computation date. Using the exact method to determine present value for the short period (one-half a compounding period) the present value of the payment is $321,022.61 determined as follows:

$$\$321{,}022.61 = \frac{\$1{,}000{,}000}{(1+.12/2)^{19.5}}$$

(B) The interest payment of $20,000 due on June 30, 1986, is due three months from the April 1, 1986, computation date. Since the compounding period is semiannual, the payment is due on a date that represents one-half a compounding period from the computation date. Using the exact method to determine the present value of the payment, the present value of the payment is $19,425.72 determined as follows:

$$\$19{,}425.72 = \frac{\$20{,}000}{(1+.12/2)^{.5}}$$

(C) The interest payments of $40,000 due at the end of each semiannual period beginning with the period ending December 31, 1986, and ending on December 31, 1995, from the computation date of April 1, 1986, represent of a stream of payments that continues for 19 compounding periods preceded by a short period consisting of one-half of a compounding period. Thus, the present value of the stream of payments is determined by first discounting the stream of payments for the 19 compounding periods to determine an interim amount, and then discounting that interim amount for the short period. The present value of the stream of payments, using the exact method to determine present value for the short period, is determined as follows:

(*1*) The interim amount is determined as follows:

$$\$446{,}324.66 = \$40.000 \times \frac{1-(1+.12/2)^{-19}}{(.12/2)}$$

(*2*) The present value of a single payment of $446,324.66 on June 30, 1986, as of the computation date of April 1, 1986, is determined as follows:

$$\$433{,}508.83 = \frac{\$446.324.66}{(1+.12/2)^{.5}}$$

Thus, the present value of the stream of the $40,000 interest payments on the computation date of April 1, 1986, is $433,508.83.

(iv) The imputed principal amount of the debt instrument is $773,957.16, the sum of the amounts determined under (iii) ($321,022.61 + 19,425.72 + $433,508.83).

Example (2). The facts are the same as in § 1.1274–3(c)(2), example (3). Since the debt instrument was received in a transaction that is a potentially abusive situation, the imputed principal amount of the debt instrument is $6,000,000, the fair market value of the property ($7,000,000) reduced by the amount of the down payment ($1,000,000).

§ 1.1274–5 Determination of present value.

(a) *In general.* This section prescribes rules for the determination of the present value of a payment. The present value of a payment is the amount that, if invested on the computation date at a compound rate of interest equal to the discount rate of interest, would increase in value to the amount of the future payment on the payment date. Paragraph (d) of this section prescribes formulas for determining present value. For purposes of these formulas, a compounding period must be selected, and the rate of interest at which the payment or payments are to be discounted must be based on the same compounding period. See paragraph (b) of this section for rules relating to the selection of a compounding period. The formulas are prescribed for determining the present value of a single payment or a stream of payments. A stream of payments means payments of equal amounts due at the end of each full compounding period for a specified period of time. The formulas for determining the present value of a stream of payments yield the same result as the sum of the separately computed present values of each single payment in the stream.

(b) *Compounding period: compounding period for the discount rate of interest.* To determine the present value of a payment or a stream of payments, a compounding period must be established. A compounding period is established depending on the intervals between payment or compounding dates and is determined in accordance with the rules of § 1.1274-3(e)(3), or, if applicable, § 1.1274-4(c). Whatever the compounding period, the rate of interest used to discount a payment or a stream of payments must be based on the same compounding period. For example, if the compounding period is one month, the discount rate of interest must be based on a monthly compounding period. For rules relating to the conversion of interest rates based on semiannual compounding to equivalent rates based on different compounding periods, see § 1.1274-3(e)(4).

(c) *Meaning of symbols used in formulas.* For the purposes of applying the formulas prescribed in paragraph (d) of this section, the following symbols are assigned the following meanings:

PV = The present value of a payment or a stream of payments to be made in the future.

i = The interest rate (expressed as a decimal) at which the payment, or the stream of payments, is to be discounted.

k = The number of compounding periods contained in a year.

FV = The amount of any single payment to be made in the future.

PMT = The amount of any payment that is one of a stream of equal payments to be made in the future.

n = The number of full compounding periods until a single payment is made, or for which a stream of payments continues.

f = A fraction, the numerator of which is the length of a short period (that is, a period less than a full compounding period) and the denominator of which is the length of a compounding period.

(d) *Formulas for determining present value*—(1) *Single payment; no short period.* The present value of a single payment due on a date in the future that is a whole number of compounding periods from the computation date is determined by application of the following formula:

$$PV = \frac{FV}{(1+i/k)^{n}}$$

(2) *Single payment; short period*—(i) *In general.* The present value of a single payment due on a date in the future that is not a whole number of compounding periods from the computation date (that is, a payment due on a date that marks the end of a short period or on a date that marks the end of a whole number of compounding periods preceded by a short period) is determined under either the exact method or the approximate method as prescribed in paragraph (d)(2) (ii) and (iii) of this section, or under any other reasonable method. For example, it is permissible to use monthly compounding of interest (which reflects compounding at monthly intervals with simple interest within a month).

(ii) *Exact method.* The exact method assumes daily compounding of interest. Under this method, the present value of a payment due on a date in the future that is not a whole number of compounding periods from the computation date is determined by application of the following formula:

$$PV = \frac{FV}{(1+i/k)^{n+f}}$$

If the payment is due on a date that marks the end of only a short period (that is, the payment is due on a date that is less than one whole compounding period from the computation date), the value of "n" is zero.

(iii) *Approximate method.* The approximate method assumes simple interest within a compounding period. Thus, the present value of a payment is determined by discounting the payment to the beginning of the first full compounding period, and then further discounting that amount on a simple interest basis for the short period. Under this method, the present value of a payment due on a date in the future that is not a whole number of compounding periods from the computation date is determined by application of the following formula:

$$PV = \frac{FV}{(1+fxi/k)^{n}\times[(1+fxi)/k]}$$

If the payment is due on a date that marks the end of only a short period (that is, the payment is due on a date that is less than one whole compounding period from the computation date), the value of "n" is zero and the formula is:

$$PV = \frac{FV}{(1+fxi)/k}$$

(3) *Stream of payments; no short period, payment at the end of each full compounding period.* The present value of a stream of payments due on dates in the future that mark intervals equal to full compounding periods from the computation date may be determined by application of the following formula:

$$PV = \frac{PMT\times 1-(1+i/k)^{-n}}{(i/k)}$$

(4) *Stream of payments; short period, full compounding period for which no payment is made.* If a stream of payments due on dates in the future that mark intervals equal to full compounding periods is preceded by an interval other than a full compounding period, the present value of such stream of payments is determined as follows. First, the payments are discounted for the number of full compounding periods for which the stream of payments continues to the date that begins the first such compounding period for which the stream of payments continues (the interim date), as set forth in paragraph (d)(3) of this section. Second, this interim amount is then further discounted to the computation date, as if that amount were a single payment due on the interim date.

(e) *Examples.* The provisions of this section may be further illustrated by the following examples:

Example (1). Assume that a single payment of $1,000,000 is due 15 years from the computation date. Further, assume that an annual compounding period is selected, and that the discount rate of interest based on an annual compounding period is 12 percent. Since the payment is due in 15 years and the compounding period is one year, the payment is due on a date that is 15 whole compounding periods from the computation date. The present value of the payment is $182,696.26 determined as follows:

$$\$182{,}696.26 = \frac{\$1{,}000{,}000}{(1+.12/1)^{15}}$$

Example (2). Assume that a single payment of $1,000,000 is due 2 years and 9 months from the computation date. Further, assume that a monthly compounding period is selected and that the discount rate of interest based on a monthly compounding period is 9 percent. Since the payment is due in 2 years and 9 months, and the compounding period is one month, the payment is due on a date that is 33 whole compounding periods from the computation date. The present value of the payment is $781,471.58 determined as follows:

$$\$781{,}471.58 = \frac{\$1{,}000{,}000}{(1+.09/12)^{33}}$$

Example (3). Assume that a single payment of $1,000,000 is due 3 years, 4 months and 15 days from the computation date. Further, assume that an annual compounding period is selected, and that the discount rate of interest is 10 percent based on an annual compounding period. Since the payment is due in 3 years, 4 months and 15 days, and the compounding period is one year, the payment is due on a date in the future that is not a whole number of compounding periods from the computation date. Thus, the payment is due on a date in the future that is preceded by three full compounding periods and a short period. Assume a convention that assumes that a year consists of 12 30-day months is adopted. Thus, the short period is equal to 135 days (four 30-day months plus 15 days). The short period is .375 of a full compounding period (135 days/360 days). Assume that the exact method is used to discount for the short period. Under the exact method, the present value of the payment is $724,936.03 determined as follows:

$$\$724{,}936.03 = \frac{\$1{,}000{,}000}{(1+.10/1)^{3.375}}$$

Example (4). The facts are the same as in example (3), except that tne approximate method is used to discount for the short period. Under the approximate method, the present value of the payment is $724,158.84 determined as follows:

$$\$724{,}158.84 = \frac{\$1{,}000{,}000}{(1+.10/1)^{3}\times[1+(.375\times.10)/1]}$$

Example (5). Assume that on the computation date, January 1, 1986, a payment schedule calls for payments of $10,000 due at the end of each of the next 5 years. Thus, the first $10,000 payment is due on January 1, 1987, and $10,000 on January 1 of each year thereafter with a final payment on January 1, 1991. The compounding period is one year. Further, assume that the discount rate of interest based on an annual compounding period is 12 percent. Since the payment schedule calls for payments due at the end of full compounding periods, the payment schedule consists of a stream of payments which continues for 5 full compounding periods. The present value of the stream of payments is $36,047.76 determined as follows:

$$\$36{,}047.76 = \$10{,}000 \times \frac{1-(1+.12/1)^{-5}}{(.12/1)}$$

Example (6). Assume that on the computation date, January 1, 1986, a payment schedule calls for payments of $1,000 for 360 months. The first payment is due on February 1, 1986, with a final payment on January 1, 2016. The compounding period is one month. Further, assume that the discount rate of interest based on a monthly compounding period is 12 percent. Since the payment schedule calls for payments due at the end of full compounding periods, the payment schedule consists of a stream of payments which continues for 360 full compounding periods. The present value of the stream of payments is $97,218.33 determined as follows:

$$\$97{,}218.33 = \$1{,}000 \times \frac{1-(1+.12/12)^{-360}}{(.12/12)}$$

Example (7). The facts are the same as in example (6), except that the computation date is November 24, 1985. The present value of the stream of payments is determined by discounting the stream to January 1, 1986, and then further discounting that interim amount for the period consisting of the full compounding period at the end of which no payment is due (December 1985) and the short period (the period beginning after November 24, 1985, and ending on December 1, 1985). In example (6), it was determined that the present value as of January 1, 1986, of this stream of payments is $97,218.33. Assume that the exact method is used to discount the stream of payments for the short period. The present value as of November 24, 1985, of the stream of payments is $96,032.55 determined as follows:

$$\$96{,}032.55 = \frac{\$97{,}218.33}{(1+.12/12)^{1.23333}}$$

Example (8). The facts are the same as in example (7), except that the approximate method is used to discount for the short period. The present value of the stream of payments is $96,031.70 determined as follows:

$$\$96{,}031.70 = \frac{\$97{,}218.33}{(1+.12/12)^{1}\times[1+(.23333\times.12)12]}$$

Example (9). The facts are the same as in example (7), except that the computation date is December 23, 1985. Thus, there is no full compounding period at the end of which no payment is made preceding the compounding period for which the stream of payments begins. Only a short period of seven days precedes the compounding period for which the stream of payments begins. Under the exact method, the present value of the stream of payments is $96,992.88 determined as follows:

$$\$96{,}992.88 = \frac{\$97{,}218.33}{(1+.12/12)\ .23333}$$

Example (10). The facts are the same as in example (9), except that the approximate method is used to discount for the short period. The present value of the stream of payment is $96,992.02 determined as follows:

$$\$96{,}992.02 = \frac{\$97{,}218.33}{[1+(.23333 \times .12)/12]}$$

§ 1.1274-6 Applicable Federal rate.

(a) *Applicable Federal rate defined*—(1) *In general.* Except as otherwise provided in paragraphs (a)(2) or (3) and (d) of this section, the applicable Federal rate means—

(i) The Federal short-term rate if the term of the debt instrument is not over 3 years,

(ii) The Federal mid-term rate if the term of the debt instrument is over 3 years but not over 9 years, or

(iii) The Federal long-term rate if the term of the debt instrument is over 9 years.

The Federal rates are annual rates of interest based on semiannual compounding. Nevertheless, the Commissioner may prescribe equivalent rates based on compounding periods other than a semiannual period (for example, annual compounding, quarterly compounding and monthly compounding). The Federal rates shall be published in Revenue Rulings.

(2) *Variable rate debt instruments.* Except as otherwise provided in § 1.1274-3(d)(1)(ii), in the case of a variable rate debt instrument (within the meaning of § 1.1275-5), the applicable Federal rate shall be determined by reference to the longest adjustment interval of the objective interest index rather than the term of the debt instrument. For this purpose, the period from the issue date to the first adjustment shall be treated as an adjustment interval. Thus, for example, if a debt instrument provides for a rate of interest based on the prime rate and the rate is adjusted annually, the applicable Federal rate is the Federal short-term rate. Similarly, if the rate of interest is adjustable every 5 years, the applicable Federal rate is the Federal mid-term rate.

(3) *Lower rate permitted in certain cases*— (i) *In general.* the applicable Federal rate with respect to a debt instrument shall be the allowable Treasury index rate (within the meaning of paragraph (a)(3)(ii) of this section) if it is demonstrated that—

(A) The yield of the debt instrument (based on semiannual compounding) is not less than such allowable Treasury index rate, and

(B) The issuer of the debt instrument could obtain a loan in the same stated principal amount and with the same yield and terms from a lender not related to the borrower within the meaning of section 168(e)(4)(D) (nor, in a sale transaction subject to section 483 or 1274, to the seller).

This paragraph (a)(3)(i) shall not apply unless it is stated on the face of the debt instrument that it is intended that the debt instrument qualify as having adequate stated interest under section 1274(d)(1)(D) and paragraph (a)(3) of this section, and that the issuer and all successors and assignees thereof agree to treat the debt instrument as having adquate stated interest on all tax returns for which the determination of adequate stated interest is relevant.

(ii) *Allowable Treasury index rates.* The allowable Treasury index rates are rates published weekly in Federal Reserve Statistical Releases G.13 and H.15. The allowable Treasury index rate at any given time shall include the rate (determined under the following rules) for any day within the preceding 15 days or for any weekly period ending within the preceding 15 days. The allowable Treasury index rates shall be—

(A) In the case of debt instruments having a maturity of one year or more for which a rate is published with the same maturity as the debt instrument, the yield on Treasury constant maturities of that maturity as a debt instrument, and

(B) In the case of debt instruments having a maturity of 3 or 6 months, the auction average yield (investment) on the most recently auctioned U.S. Treasury bills of the same maturity as the debt instrument.

If an allowable Treasury index rate is not published for the exact maturity of the debt instrument, the applicable Federal rate shall be a linear interpolation of the allowable Treasury index rates for the next shortest and the next longest maturities for which rates are published. For maturities of 3 months or less, the allowable Treasury index shall be the auction average yield for the most recently auctioned 3-month Treasury bills.

(b) *Determination of the applicable Federal rate*—(1) *In general.* The Federal short-term, mid-term, and long-term rates shall be computed monthly and shall be based on the yield to maturity of outstanding marketable obligations of the United States of similar maturities during the one month period ending on the 14th day of the month preceding the month for which the rates are applicable. Thus, for example, the Federal rates for April 1985 are determined on the basis of yields of obligations outstanding during the one-month period from February 15, 1985, to March 14, 1985.

(2) *Federal rates for January 1985.* For the month of January 1985 the Federal rates shall be the Federal rates in effect for the month of February 1985.

(3) *Special rules for periods before March 1, 1985*—(i) *Period before January 1, 1985.* If the period as of which the applicable Federal rate is determined (within the meaning of 1.1274-6(e)) is before January 1, 1985, the applicable Federal rate shall be determined by reference to Table II as set forth in Rev. Rul. 84-163, 1984-2 C.B. 179.

(ii) *Period after December 31, 1984, and before March 1, 1985*—(A) *Election of higher applicable rate.* If the period as of which the applicable Federal rate is determined (within the meaning of § 1.1274-6(e)) is after December 31, 1984, and before March 1, 1985, the issuer and holder may file a joint election in the manner prescribed in paragraph (b)(3)(ii)(B) of this section to use the higher applicable Federal rate determined by reference to Table I as set forth in Rev. Rul. 84-163, 1984-2 C.B. 179. The election shall be irrevocable and shall be binding on all successors of the issuer and holder.

(B) *Time and manner of election.* The issuer and holder shall make the election described in paragraph (b)(3)(ii)(A) on or before the last day for filing (including extensions) the returns of the issuer and holder for the taxable year of issue of the debt instrument. The election shall be made by attaching to the returns of the issuer and the holder a statement signed by the issuer and holder that includes the following information—

(*1*) The names, addresses and taxpayer identification numbers of the issuer and holder,

(*2*) A clear indication that the statement relates to a joint election to use the higher applicable Federal rate of interest as determined by reference to Table I as set forth in Rev. Rul. 84–163, 1984–2 C.B. 179, and

(*3*) Any other information necessary to establish that the borrower and lender are entitled to make the election.

For sales or exchanges occurring in 1985, the election may be made by filing an amended return if either the borrower or lender filed their returns for the taxable year which includes the date of the sale or exchange prior to May 8, 1986.

(c) *Foreign currency loans.* In the case of a debt instrument the proceeds or repayment of which is denominated in a foreign currency, the applicable Federal rate shall be a foreign currency rate of interest analogous to the applicable Federal rate described in paragraphs (a) and (b) of this section. For purposes of the preceding sentence, an analogous foreign currency rate of interest is a rate of interest based on yields (with an appropriate compounding period) of the highest grade of outstanding marketable obligations denomiated in such currency (excluding any obligations that benefit from special tax exemptions or preferential tax rates not available to debt instruments generally) with due consideration given to the maturities of the obligations.

(d) *Installment obligations*—(1) *Determining adequate stated interest*—(i) *In general.* Except as provided in paragraph (d)(2) of this section, for purposes of applying § 1.1274–3(b) (relating to the determination of adequate stated interest) to an installment obligation (within the meaning of § 1.1273–1(b)(2)(i) and § 1.1275–2(d)), the term of the obligation shall be determined by reference to the last payment of principal. The Commissioner, however, may disregard nominal payments of principal. Paragraph (d)(2) of this section prescribes special rules for determining adequate stated interest in the manner prescribed in § 1.1274–3(b) for certain types of installment obligations. If, in applying the rule of this paragraph (d)(1)(i) or the rule of paragraph (d)(2) of this section, an installment obligation (including an obligation that has a principal payment that is treated as a nominal payment) does not provide for adequate stated interest, the determination of adequate stated interest with respect to the obligation is governed by § 1.1274–3(c) and paragraph (d)(3) of this section. For circumstances in which multiple debt instruments are not treated as an installment obligation, see § 1.1275–2(d).

(ii) *Examples.* The provisions of paragraph (d)(1)(i) of this section may be further illustrated by the following examples:

Example (1). On July 1, 1986, A sells B nonpublicly traded property for $4,500,000. B agrees to pay the principal in 5 annual installments of $300,000 followed by 5 annual installments of $600,000. B is to pay interest semiannually on the outstanding principal balance. For purposes of applying § 1.1274–3(b) to this debt instrument, the test rate of interest is the Federal long-term rate.

Example (2). At a time when the Federal short-term rate is 15 percent and the Federal long-term rate is 12 percent, A sells B nonpublicly traded property for $5,000,000. B agrees to pay the principal in two installments. The first installment consists of $4,750,000 of principal and is payable at the end of 3 years. The second installment of $250,000 is payable at the end of 10 years. The second payment of principal may be treated as nominal by the Commissioner.

(2) *Special rule for certain installment obligations*—(i) *In general.* In the case of a self-amortizing installment obligation (as defined in § 1.1273–1(b)(2)(iii)) or a level-principal obligation (as defined in paragraph (d)(2)(iv) of this section), § 1.1274–3(b) may be applied by using a test rate that is a weighted average of the Federal short-term, mid-term, and long-term rates determined under the table set forth in paragraph (d)(2)(ii) (for self-amortizing installment obligations) or (iii) (for level-principal obligations) of this section. The weighted average is the sum of—

(A) The product of the Federal short-term rate and the short-term percent set forth in column (1) of the applicable table;

(B) The product of the Federal mid-term rate and the mid-term percent set forth in column (2) of the applicable table; and

(C) The product of the Federal long-term rate and the long-term percent set forth in column (3) of the applicable table.

For purposes of applying the tables, the term of a self-amortizing installment or level-principal obligation that is not a whole number of years shall be considered to be equal to the next largest whole number of years.

(ii) *Table for self-amortizing installment obligations.* The table referred to in paragraph (d)(2)(i) for self-amortizing installment obligations is as follows:

Term (years)	(1) Short-term percent	(2) Mid-term percent	(3) Long-term percent
4	59	41	0
5	38	62	0
6	26	74	0
7	19	81	0
8	15	85	0
9	11	89	0
10	8	71	21
11	7	58	35
12	6	47	47
13	5	39	56
14	4	33	63
15	3	28	69
16	3	23	74
17	2	20	78
18	2	17	81
19	1	15	84
20	1	13	86
21	1	11	88
22	1	9	90
23	1	8	91
24	0	8	92
25	0	7	93
26	0	6	94
27	0	5	95
28–29	0	4	96
30–31	0	3	97
32–37	0	2	98
38–47	0	1	99
48 or more	0	0	100

(iii) *Table for level-principal obligations.* The table referred to in paragraph (d)(2)(i) for level-principal obligations is as follows:

Term (years)	(1) Short-term percent	(2) Mid-term percent	(3) Long-term percent
4	61	39	0
5	42	58	0
6	31	69	0
7	24	76	0
8	19	81	0
9	16	84	0
10	14	70	16
11	12	60	28
12	11	52	37
13	10	45	45
14	9	40	51
15	8	36	56
16	7	33	60
17	6	30	64
18	6	27	67
19	5	26	69
20	5	24	71
21	4	23	73
22	4	21	75
23	4	19	77
24	4	18	78
25	3	18	79
26	3	17	80
27	3	16	81
28	3	15	82
29	3	14	83
30	3	13	84
31	2	13	85
32	2	12	86
33	2	12	86
34	2	12	86
35	2	11	87
36	2	11	87
37	2	10	88
38	2	10	88
39	2	10	88
40	2	9	89

(iv) *Meaning of level-principal obligation.* For purposes of paragraph (d)(2) of this section, the term "level-principal obligation" means an obligation calling for (*1*) equal payments of principal at regular intervals of one year or less over the entire term of the obligation and (*2*) each payment of principal to be accompanied by a payment of interest at a fixed rate on the outstanding principal balance.

(v) *Balloon payments.* The special rule of paragraph (d)(2) of this section may be applied to a debt instrument that would constitute a self-amortizing obligation or a level-principal obligation but for the fact that the debt instrument calls for a lump sum or balloon payment of principal at maturity. In applying this paragraph to such a debt instrument, the balloon payment shall be ignored and the term of the debt instrument shall be determined as if the initial payment pattern continued until the principal were fully repaid. If, however, the debt instrument has a maturity of more than 3 years but not more than 9 years (taking into account the balloon), in applying paragraph (d)(2)(i)(C) of this section, the Federal mid-term rate shall be substituted for the Federal long-term rate.

(vi) *Authority to adjust percent table.* The Commissioner may by Revenue Ruling adjust or replace the tables prescribed in paragraph (d)(2) (ii) and (iii) of this section. Any adjustment or replacement shall become effective no earlier than 30 days after publication of the adjusted or replacement table in the Internal Revenue Bulletin.

(vii) *Examples.* The provisions of this paragraph (d)(2) of this section may be illustrated by the following examples:

Example (1). On July 1, 1986, A sells B nonpublicly traded property for $3,000,000. B issues a debt instrument that calls for 15 years of equal monthly payments of $31,617.03, each representing a partial payment of principal and interest at a rate of 9.66 percent on the outstanding principal balance. Assume that as of the date when the test rate of interest is determined the Federal short-term rate is 8 percent compounded monthly, the Federal mid-term rate is 9 percent compounded monthly, and the Federal long-term rate is 10 percent compounded monthly. Using the table prescribed in paragraph (d)(2)(ii) of this section for a self-amortizing installment obligation with a term of 15 years, the test rate of interest for the debt instrument, based on monthly compounding, is 9.66 percent ((.03)(.08) + (.28)(.09) + (.69)(.10)). Since B's debt instrument calls for interest at a rate of 9.66 percent, payable monthly, it provides for adequate stated interest.

Example (2). The facts are the same as in example (1), except that the debt instrument calls for 5 annual payments of $770,677.10 on June 30 of each year from 1987 through 1991. Each payment represents a partial payment of principal and interest a rate of 8.97 percent. Assume that the Federal short-term rate is 8.30 percent, compounded annually, and the Federal mid-term rate is 9.38 percent, compounded annually. The test rate of interest for the debt instrument, based on annual compounding, is 8.9696 percent ((.38)(.0830) + (.62)(.0938)). Since the debt instrument calls for interest at 8.97 percent payable annually, it provides for adequate stated interest.

Example (3). The facts are the same as in example (2), except that the debt instrument calls for 5 equal annual payments of principal of $600,000. Each payment of principal is accompanied by interest at a rate of 8.93 percent on the outstanding principal balance. The payment schedule for the debt instrument is as follows:

Year	Principal	Interest	Total
1987	$600,000	$267,900	$867,900
1988	600,000	214,320	814,320
1989	600,000	160,740	760,740
1990	600,000	107,160	707,160
1991	600,600	53,580	653,580

Using the table prescribed in paragraph (d)(2)(iii) of this section for a level-principal obligation with a term of 5 years, the test rate for the debt instrument, based on annual compounding, is 8.9264 percent ((.42)(.083) + (.58)(.0938)). Since the debt instrument calls for interest payable annually at a rate of 8.93 percent, it provides adequate stated interest.

Example (4). The facts are the same as in example (1), except that, in lieu of the last 5 years of monthly payments, B's debt instrument calls for a balloon payment on June 30, 1996, of $1,499,849.16 (in addition to the regular payment of $31,617.03 due on that date). This balloon payment is equal to the outstanding principal balance on June 30, 1996 (after taking into account the payment of $31,617.03). For purposes of applying paragraph (d)(2) of this section, the debt instrument is treated as a 15-year self-amortizing installment obligation. Thus, the debt instrument, which calls for interest to be paid monthly at a rate of 9.66 percent, provides for adequate stated interest.

Example (5). (i) On July 1, 1986, A sells B nonpublicly traded property for $3,600,000. B issues a debt instrument that calls for semiannual principal payments of $150,000 on January 1, and July 1 of each year from 1987 through 1992. On January 1, 1993, the remaining principal balance of $1,800,000 is required to be paid. The debt instrument calls for interest to be paid semiannually at a rate of 9.89 percent on the outstanding principal balance. Assume that the Federal short-term and mid-term rates applicable to the transaction, based on semiannual compounding, are 9 and 10 percent, respectively.

(ii) In applying paragraph (d)(2) of this section, the debt instrument is treated as a 12-year level principal obligation with a balloon payment after 6 and one-half years. Under paragraph (d)(2)(iii) and (v) of this section, the test rate for the debt instrument is 9.89 percent ((.11)(.09) + (.52)(.10) + (.37)(.10)). Thus, the debt instrument provides for adequate stated interest.

(3) *Obligations not providing for adequate stated interest under paragraph (d) (1) or (2) of this section*—(i) *Testing amount for installment obligations.* An installment obligation that does not provide for adequate stated interest under paragraph (d) (1) or (2) of this section may nevertheless have adequate stated interest under the rules of § 1.1274–3(c) if the stated principal amount of the debt instrument is less than or equal to the testing amount. For purposes of computing the testing amount for an installment obligation, in determining the present values under § 1.1274–3(c)(1), the discount rate shall be—

(A) In the case of principal payments made not more than 3 years from the issue date and interest payments attributable to such principal payments, the Federal short-term rate;

(B) In the case of principal payments made more than 3 years but not more than 9 years from the issue date and interest payments attributable to such principal payments, the Federal mid-term rate; and

(C) In all other cases, the Federal long-term rate.

(iii) *Examples.* The provisions of paragraph (d)(3) of this section may be illustrated by the following examples:

Example (1). (i) On July 1, 1986, A sells B nonpublicly traded property for $5,000,000. The principal is due in two installments: $2,000,000 due on June 30, 1989, and the remaining $3,000,000 due on June 30, 1991. The debt instrument calls for semiannual payments of interest on the outstanding principal balance at a rate of 8.04 percent. Assume that the Federal short-term and mid-term rates applicable to this transaction are 7 percent compounded semiannually and 8.5 percent, compounded semiannually, respectively.

(ii) The debt instrument does not provide for adequate stated interest under the rule of paragraph (d)(1) of this section because interest is not provided at a rate at least equal to the Federal mid-term rate. The debt instrument cannot satisfy the provisions of paragraph (d)(2) of this section because it is neither a self-amortizing installment obligation nor a level-principal obligation. Thus, under paragraph (d)(3) of this section, the determination of adequate stated interest is made under § 1.1274–3(c). The debt instrument provides for adequate stated interest if the stated principal amount of the debt instrument is less than or equal to the testing amount of the debt instrument (the sum of the present values of the payments determined in the manner provided in paragraph (d)(3) of this section).

(iii) The present value of the $2,000,000 principal payment due on June 30, 1989, discounted at the Federal short-term rate of 7.0 percent compounded semiannually, is

$1,627,001.29. Six semiannual interest payments of $80,400 (one-half of 8.04 percent of $2,000,000) are attributable to this first payment of principal. The present value of this stream of 6 interest payments is $428,415.66.

(iv) The present value of the $3,000,000 principal payment due on June 30, 1991, discounted at the mid-term rate of 8.5 percent compounded semiannually is $1,978,611.91. Ten semiannual interest payments of $120,600 are attributable to this second payment of principal. The present value of this stream of 10 interest payments is $966,112.97.

(v) The testing amount of the debt instrument is $5,000,141.84 ($1,627,001.29 + $428,415.66 + $1,978,611.91 + $966,112.97). Since the testing amount exceeds the stated principal amount of $5,000,000, the debt instrument provides for adequate stated interest.

Example (2). (i) On July 1, 1987, A sells B nonpublicly traded property for $4,000,000. B issues a debt instrument that calls for 9 annual principal payments of $200,000 on June 30 of each year from 1988 through 1996 and a principal payment on June 30, 1997, of $2,200,000. The debt instrument also calls for annual payments of interest at a rate of 9.62 percent on the outstanding principal balance. Assume that the Federal short-term, mid-term and long-term rates, based on annual compounding, are 8 percent, 9 percent, and 10 percent, respectively.

(ii) The debt instrument does not provide for adequate stated interest under the rule of paragraph (d)(1) of this section because it calls for interest at a rate lower than the Federal long-term rate. The debt instrument also does not satisfy the provisions of paragraph (d)(2) of this section because, under those provisions, the test rate of interest (using the weighting factors for a 20-year level principal obligation) is 9.65 percent ((.06) (.08) + (.23) (.09) + (.71) (.10)). Thus, under paragraph (d)(3) of this section, the determination of adequate stated interest is made under § 1.1274–3(c). The debt instrument provides for adequate stated interest if the stated principal amount of the debt instrument is less than or equal to the testing amount of the debt instrument (the sum of the present values of the payments determined in the manner provided in paragraph (d)(3) of this section).

(iii) The present values of the first three principal payments, using a discount rate equal to the Federal short-term rate of 8 percent, is $515,419.40. The portions of the interest payments in the years 1988, 1989 and 1990 attributable to these three principal payments are $57,720 (9.62 percent of $600,000), $38,480 (9.62 percent of $400,000) and $19,240 (9.62 percent of $200,000), respectively. The sum of the present values of these three payments is $101,708.17.

(iv) The sum of the present values of the six principal payments in the years 1991 through 1996, using a discount rate equal to the Federal mid-term rate of 9 percent, is $692,790.45. The interest payments attributable to these principal payments and their present values are as follows:

Year	Interest payment	Present value
1988	$115,440	$105,908.26
1989	115,440	97,163.54
1990	115,440	89,140.86
1991	115,440	81,780.61
1992	96,200	62,523.40
1993	76,960	45,888.73
1994	57,720	31,574.82
1995	38,480	19,311.81
1996	19,240	8,858.63
Total		$542,150.66

(v) The balloon principal payment of $2,200,000 due on June 30, 1997, when discounted at the Federal long-term rate of 10 percent, has a present value of $848,195.24. Interest payments of $211,640 (9.62 percent of $2,200,000) in each year from 1988 through 1997 are attributable to the last principal payment. The present value of this stream of payments is $1,300,436.18.

(vi) The testing amount (the sum of the foregoing present values) is $4,000,700.10:

$515,419.40
107,708.17
692,790.45
542,150.66
848,195.24
1,300,436.18

4,000,700.10

Since the stated principal amount of $4,000,000 is less than the testing amount of $4,000,700.10, the debt instrument provides for adequate stated interest.

(4) *Coordination with other provisions*—(i) *Nine percent interest rate.* In the case of a qualified debt instrument (as defined in 1274A(b) and §1,1274A–1(b)), the provisions of paragraph (d)(2) of this section may be applied to determine if the test rate is lower than 9 percent, compounded semiannually. If so, this lower test rate may be used. Similarly, the provisions of paragraph (d)(3) of this section may be applied to determine if the testing amount using the Federal rates is larger than the testing amount computed by using a discount rate of 9 percent, compounded semiannually. If so, the larger testing amount may be used. However, paragraphs (d) (2) and (3) of this section shall not be applied by substituting 9 percent selectively for those Federal rates that exceed 9 percent.

(ii) *Three-month rule.* In applying section 1274 (d)(1) and paragraph (e)(1)(i) of this section (relating to date as of which applicable Federal rate is determined) in conjunction with paragraph (d) (2) or (3) of this section, the test rate of interest or testing amount for each of the months must be computed separately. However, paragraph (d) (2) or (3) of this section shall not be applied by making a single calculation using the lowest Federal short-term rate during the 3-month period, the lowest Federal mid-term rate during this period and the lowest Federal long-term rate during this period if those rates do not all occur in the same month.

(5) *Installment obligations not stating adequate interest.* For purposes of applying §1.1274–4 (relating to the determination of the imputed principal of a debt instrument), the imputed rate of interest shall be determined by reference to the last payment of principal. The Commissioner, however, may disregard nominal payments of principal.

(e) *Rate of interest applicable to a sale or exchange*—(1) *Date as of which applicable Federal rate of interest determined*—(i) *General rule.* Except as provided in paragraph (e)(2) of this section, for purposes of § 1.1274–3 and § 1.1274–4, the applicable Federal rate with respect to a debt instrument is the lowest of the applicable Federal rates in effect during the three-month period ending with the month in which the earlier of the following dates occur—

(A) The contract date, or

(B) The date of the sale or exchange.

(ii) *Contract date.* The contract date is the first day on which there is a binding contract (including an irrevocable option) in writing for the sale or exchange. If there is a substantial modification (as defined in paragraph (e)(1)(iii) of this section) of the terms of the contract before the date of the sale or exchange, the date of the last substantial modification is the contract date.

(iii) *Substantial modification.* For the purposes of paragraph (e)(1)(ii) of this section, the term "substantial modification" means any substantial change in the terms of the contract, including any change in the sales price other than a change in the sales price arising from an independent appraisal, mechanical formula or contingency provided for in the contract.

(iv) *Example.* The provisions of paragraph (e)(1) of this section may be illustrated by the following example:

Example. In April 1985, A enters into a binding written contract to sell nonpublicly traded property to B. The contract calls for B to issue, in partial consideration for sale, a 15-year debt instrument calling for semiannual payments of interest. One hundred ten percent of the Federal long-term rates for February, March and April 1985 are 12.74 percent, compounded semiannually, 12.54 percent, compounded semiannually, and 13.06 percent, compounded semiannually, respectively. For purposes of determining whether the debt instrument has adequate stated interest, the applicable Federal rate is 12.54 percent (the lower of the Federal long-term rates for February, March and April 1985).

(2) *Special rules for determining rates for certain contracts*—(i) *In general.* In the case of contracts to which the special rules of paragraph (e)(2) of this section apply, the applicable Federal rate with respect to a debt instrument is that rate in effect on the earlier of—

(A) The contract date, or

(B) The date of the sale or exchange.

(ii) *Contracts to which special rules apply.* The special rules of paragraph (e)(2) of this section apply—

(A) To any contract with a contract date occurring before January 1, 1985, and

(B) For purposes of determining the imputed principal amount of a debt instrument (within the meaning of § 1.1274–4), to any contract with a contract date occurring after December 31, 1984, and before July 1, 1985.

(f) *Treatment of certain options*—(1) *In general.* Paragraph (f) of this section governs whether a put or call option described in § 1.1272–1(f)(4)(ii) or an option to extend described in § 1.1272–1(f)(4)(v) is presumed exercised for purposes of section 1274 and the regulations thereunder. In the case of an option to which paragraph (f) of this section does not apply (for example, an option to extend with an uncertain maturity date), the option is a contingency to which the payments under the debt instrument are subject. For rules relating to contingent payments, see § 1.1275–4.

(2) *Seller's options.* The holder of a debt instrument (the seller) with a put option or option to extend shall be presumed to exercise the option if the testing amount (determined under § 1.1274–3(c)(1)) of the debt instrument, assuming exercise of the option, exceeds the testing amount of the debt instrument, assuming the option is not exercised.

(3) *Buyer's options.* The issuer of a debt instrument (the buyer) with a call option or an option to extend shall be presumed to exercise the option if the testing amount of the debt instrument, assuming exercise of the option, is less than the testing amount of the debt instrument, assuming the option is not exercised.

(4) *Examples.* Paragraph (f) of this section may be illustrated by the following examples:

Example (1). In partial consideration for the sale on nonpublicly traded property, a debt instrument (other than a debt instrument issued in a potentially abusive situation) with a stated principal amount of $1,000,000 is issued. The debt instrument is due in 10 years and calls for annual payments of interest at 8 percent for the first 5 years and 14 percent for the final five years. In addition, the debt instrument provides the buyer (issuer) with the option to call (prepay) the debt instrument at the end of 5 years for its full face amount of $1,000,000. Assume that the applicable Federal mid-term and long-term rates applicable to the sale based on annual compounding are 9 percent and 10 percent, respectively. Assuming exercise of the call option the testing amount that would be determined under § 1.1274–3(c)(1)(i) of this section is $981,103.49 (the present value of all of the payments due within a 5-year term discounted at a test rate of 9 percent, compounded annually). Assuming nonexercise of the call option the testing amount that would be determined under § 1.1274–3(c)(1)(i) of this section is $1,018,335.46 (the present value of all the payments due within a 10-year term discounted at a test rate of 10 percent, compounded annually). Thus, under paragraph (f)(3) of this section, because the testing amount determined under §1.1274–3(c)(1)(i), assuming exercise of the option, is less than the testing amount determined under § 1.1274–3(c)(1)(i), assuming nonexercise of the option, the option is presumed exercised. The presumption applies for purposes of section 1274 including, for example, whether the debt instrument provides for adequate stated interest. Thus, in this example, the debt instrument does not provide for adequate stated interest.

Example (2). The facts are the same as in example (1), except that the seller (holder) has an option to put the debt instrument and require the buyer to retire the debt instrument at the end of 5 years. Because the testing amount determined under § 1.1274–3(c)(1)(i), assuming nonexercise of the option exceeds the amount determined under § 1.1274–3(c)(1)(i), assuming exercise, the option is presumed not to be exercised for purposes of section 1274. Thus, in this example, the debt instrument provides for adequate stated interest.

§ 1.1274–7 **Assumptions.**

(a) *Assumptions in connection with sales or exchanges after June 30, 1985*—(1) *In general.* Section 1274 shall not apply to a debt instrument assumed or taken subject to in connection with a sale or exchange which occurs after June 30, 1985, unless the debt instrument is modified (within the meaning of § 1.1274–1(c)) as part of the sale or exchange.

(2) *Modifications.* If a debt instrument assumed or taken subject to is modified as part of a sale or exchange, the modification shall be treated as a separate transaction taking place either immediately before or immediately after the sale or exchange. The modification of a debt instrument that is attributable to the seller of the property shall be treated as occurring immediately before the sale or exchange. For this purpose, the modification of the debt instrument shall be attributed to the seller of the property unless the seller of the property neither consents to nor participates in the modification. If a modification is treated as taking place immediately before the sale or exchange, the buyer shall be treated as assuming or taking subject to the modified debt instrument. For rules governing the treatment of modifications of debt instruments, see § 1.1274–1(c).

(3) *Examples.* The provisions of paragraph (a) of this section may be illustrated by example (6) of § 1.1273–2(f) and by the following examples:

Example (1). On July 1, 1986, B sells Blackacre to C for $4,000,000, subject to an existing debt instrument with a face amount of $1,000,000. The terms of the debt instrument are not modified as part of the sale or exchange. Under paragraph (a)(1) of this section, the debt instrument is not subject to section 1274.

Example (2). On July 1, 1986, B sells Blackacre to C for $40,000,000 subject to an existing debt instrument held by A with a face amount of $10,000,000 and a remaining term of 7 years that provides for annual interest payments at 10 percent. The debt instrument by its terms is not assumable. However, A desires to raise the rate of interest on the debt instrument. Thus, as part of the sale or exchange, C and A agree (without B's consent) to raise the interest rate to 11 percent. The change in interest rate constitutes a modification under § 1.1001–1(a). Because the debt instrument has been modified, under § 1.1274–1(c) the modified debt instrument is treated as a new debt instrument given in consideration for the old debt instrument. Because B did not consent to or participate in the modification, the modification is treated as taking place immediately after the sale of the property in a transaction involving C and A.

Example (3). On July 1, 1986, B sells Blackacre to C for $40,000,000 subject to an existing debt instrument held by A with a face amount of $10,000,000 and a remaining term of 10 years. This debt instrument provides for annual interest payments at 8 percent. As part of the sale or exchange, A, B, and C jointly agree that the interest rate will be raised to 11 percent and that payment of the interest which accrues during the two years following the assumption will be deferred until maturity. The change in interest rate and deferral of payments constitute a modification under § 1.1001–1(a). Because the debt instrument has been modified, under § 1.1274–1(c) the modified debt instrument is treated as a new debt instrument given in consideration for the old debt instrument. Because B consented to the modification, the modification is treated as taking place immediately before the sale in a transaction involving B and A. C is treated as having assumed the modified debt instrument.

(b) *Assumptions in connection with sales or exchanges occurring after December 31, 1984, and before July 1, 1985*—(1) *Debt instruments that are modified.* If a debt instrument assumed or taken subject to in connection with a sale or exchange that occurs after

December 31, 1984, and before July 1, 1985, is modified (within the meaning of § 1.1274–1(c)) as part of the sale or exchange, the modification shall be treated in accordance with the rules of paragraph (a)(2) of this section.

(2) *Debt instruments that are not modified*—(i) *Sales price in excess of $100,000,000.* Except as provided in paragraph (b)(3) of this section, if a debt instrument is assumed or taken subject to in connection with a sale or exchange that occurs after December 31, 1984, and before July 1, 1985, in which the sales price exceeds $100,000,000 and the debt instrument is not modified as part of the sale or exchange, section 1274 shall apply to the debt instrument solely for purposes of determining the tax consequences of the sale or exchange to the buyer. The sales price in a sale or exchange shall be determined under rules analogous to those set forth in § 1.1274–1(b)(4) (i), (ii), and (iii).

(ii) *Sales price less than or equal to $100,000,000*—(A) *Debt instruments issued after October 15, 1984.* Except as provided in paragraph (b)(3) of this section and section 44(b)(7) of the Tax Reform Act of 1984 (as amended by Pub. L. No. 98–612), if a debt instrument issued after October 15, 1984, is assumed or taken subject to in connection with a sale or exchange that occurs after December 31, 1984, and before July 1, 1985, in which the sales price is less than or equal to $100,000,000 and the debt instrument is not modified as part of the sale or exchange, section 1274 shall apply to the debt instrument solely for purposes of determining the tax consequences of the sale or exchange to the buyer.

(B) *Debt instruments issued before October 16, 1984.* If a debt instrument issued before October 16, 1984, is assumed or taken subject to in connection with a sale or exchange that occurs after December 31, 1984, and before July 1, 1985, in which the sales price is less than or equal to $100,000,000 and the debt instrument is not modified as part of the sale or exchange, section 1274 shall not apply to the debt instrument.

(3) *Exception.* Notwithstanding paragraph (b)(2) of this section, section 1274 shall not apply to any debt instrument assumed or taken subject to in a sale or exchange that occurs after December 31, 1984, and before July 1, 1985, and in which the debt instrument is not modified, if—

(A) The property is not 3-year or 5-year property (within the meaning of section 168(c)(2)) or property described in section 1221(1) (relating to stock in trade, inventories, and other property held for sale to customers) to the buyer, or

(B) In the case of recovery property (within the meaning of section 168(c)(1)) other than 3 year or 5-year property, the remaining term of the debt instrument exceeds two-thirds of the recovery period for such property.

This paragraph (b)(3) shall not apply to the purchase of an interest in an entity if the bases of the underlying assets of the entity are determined, in whole or in part, by reference to the amount paid for such interest and the underlying assets include a more than nominal amount of recovery property or property described in section 1221(1). For example, if a corporation purchases stock in another corporation owning a more than nominal amount of recovery property or property described in section 1221(1) and makes an election under section 338 (relating to certain stock purchases treated as asset acquisitions), the exception contained in this paragraph (b)(3) shall not apply.

(c) *Wraparound indebtedness.* For purposes of this section, a debt instrument originally issued by the buyer of property to the seller in consideration for the sale of the property shall not be treated as a debt instrument assumed or taken subject to, even if the seller is liable to a third party with respect to an indebtedness secured by the property.

(d) *Consideration attributable to assumed debt*—(1) *In general.* If, as part of the consideration for the sale or exchange of property, the buyer assumes or takes subject to an indebtedness that was issued at a discount (including a debt instrument issued in a prior sale or exchange to which section 1274 applied), the portion of the buyer's basis in the property and the seller's amount realized attributable to the debt instrument shall be equal to the revised issue price of the debt instrument (as defined in § 1.1275–1(h)) as of the date of the sale or exchange.

(2) *Example.* The provisions of paragraph (d)(1) of this section may be further illustrated by the following example:

Example. On July 1, 1986, X sells real property to Y in exchange for $3,500,000 in cash and Y's agreement to assume an existing debt instrument secured by the property. The debt instrument was originally issued at a discount. The face amount of the debt instrument is $1,000,000 and its revised issue price under section 1272 as of the date of the sale is $850,000. The debt instrument is not modified as part of the sale or exchange. Thus, the debt instrument is not subject to section 1274. Y's basis in the property is $4,350,000 (the sum of the cash payment ($3,500,000) and the revised issue price of the debt instrument ($850,000)).

§ 1.1274A–1 Special rules for certain transactions where stated principal amount does not exceed $2,800,000.

(a) *In general.* This section provides special rules applicable to a qualified debt instrument as defined in paragraph (b) of this section. For rules relating to the test and imputed rates of interest applicable to a qualified debt instrument, see § 1.1274–3(e)(1)(ii) and § 1.1274–4(b)(1) (or, in the case of a qualified debt instrument subject to section 483, § 1.483–4(a)).

(b) *Definition of qualified debt instrument*—(1) *In general.* The term "qualified debt instrument" means any debt instrument given in consideration for the sale or exchange of property after June 30, 1985, whose stated principal amount does not exceed the qualified amount as defined in paragraph (b)(2) of this section. The term "qualified debt instrument," however, does not include a debt instrument issued in exchange for new section 38 property (within the meaning of section 48(b) and the regulations thereunder) or a debt instrument issued in a sale-leaseback transaction (within the meaning of § 1.1274–3(e)(1)(iii)).

(2) *Qualified amount.* The term "qualified amount" means—

(i) $2,800,000, or

(ii) In each calendar year after 1989, $2,800,000 increased for inflation in the manner prescribed in paragraph (e) of this section.

(3) *Debt instruments calling for contingent payments.* If all or part of the consideration given in a sale or exchange consists of contingent payments, a debt instrument is a qualified debt instrument only if it can be determined at the time of the sale or exchange that the maximum amount of the stated principal due under the debt instrument cannot exceed the qualified amount as defined in paragraph (b)(2) of this section. For example, assume the facts as in § 1.1274–3(e)(5) example (4) except that the sale takes place in April 1, 1986. Since it cannot be determined at the time of the sale or exchange that the maximum stated principal amount cannot exceed $2,800,000, the debt instrument is not a qualified debt instrument. Thus, the test rate of interest applicable to the sale is the applicable Federal rate as determined under § 1.1274–3(e)(1)(i).

(c) *Election to use cash method in certain cases*—(1) *In general.* Section 1274 does not apply to any cash method debt instrument (within the meaning of paragraph (c)(2) of this section). The interest (including unstated interest under section 483) on a cash method debt instrument shall be taken into account by both the borrower and the lender under the cash receipts and disbursements method of accounting. See § 1.446–2.

(2) *Meaning of cash method debt instrument.* For purposes of paragraph (c) of this section, the term "cash method debt instrument" means a qualified debt instrument as defined in paragraph (b) of this section if—

(i) The stated principal amount of the qualified debt instrument does not exceed the cash method amount as defined in paragraph (c)(3) of this section,

(ii) The lender does not use an accrual method of accounting and is not a dealer with respect to the type of property sold or exchanged,

(iii) Section 1274 would have applied to the debt instrument but for the application of section 1274A(c) and paragraph (c) of this section, and

(iv) An election described in paragraph (c)(4) of this section is made with respect to the debt instrument.

For purposes of this paragraph (c)(2), all sales or exchanges which are part of the same transaction (or a series of related transactions) shall be aggregated in accordance with the rules of paragraph (d) of this section, and all debt instruments arising from the aggregated sales or exchanges shall be treated as one debt instrument.

(3) *Cash method amount.* The term "cash method amount" means—

(i) $2,000,000, or

(ii) In each calendar year after 1989, $2,000,000 increased for inflation in the manner prescribed in paragraph (e) of this section.

(4) *Debt instruments calling for contingent principal.* If all or part of the consideration given in a sale or exchange consists of contingent payments, a debt instrument cannot be a cash method debt instrument unless it can be determined at the time of the sale or exchange that the maximum amount of the stated principal due under the debt instrument cannot exceed the cash method amount as defined in paragraph (c)(3) of this section.

(5) *Election*—(i) *In general.* An election is described in this paragraph (c)(4) if both the borrower (issuer) and the lender (holder) jointly elect to treat the debt instrument as a cash method debt instrument.

(ii) *Time and manner of making election.* The borrower and lender shall make the election described in paragraph (c)(4)(i) on or before the last day for filing (including extensions) the returns of the borrower and the lender for the taxable year of issue of the debt instrument. The election shall be made by attaching to the returns a statement signed by the borrower and lender that includes the following information—

(A) The names, addresses and taxpayer identification numbers of the borrower and lender,

(B) A clear indication that an election is being made under paragraph (c)(4) of this section, and

(C) A statement that the debt instrument with respect to which the election is being made fulfills the requirements of a cash method debt instrument.

For sales or exchanges in 1985, the election may be made by filing an amended return if either the borrower or lender filed their returns for the taxable year which includes the date of the sale or exchange prior to May 8, 1986.

(6) *Successors of electing parties.* Except as otherwise provided in this paragraph (c)(5), paragraph (c)(1) of this section shall apply to any successor of the electing lender or borrower (or any transferee thereof). Thus, for any period after the transfer of a cash method debt instrument, the successor shall take into account the interest (including unstated interest) thereon under the cash receipts and disbursements method of accounting. Nevertheless, if the lender (or any successor thereof) transfers the cash debt instrument to a taxpayer who uses an accrual method of accounting, then paragraph (c)(1) of this section shall not apply to the successor of the lender (or a successor thereof) with respect to the cash method debt instrument for any period after the date of the transfer and section 1272 shall apply.

(7) *Special rules.* [Reserved]

(d) *Aggregation of transactions*—(1) *General rule.* All sales or exchanges which are part of the same transaction or a series of related transactions shall be treated as a single sale or exchange. Whether two or more sales or exchanges are treated as a single sale or exchange depends on all the facts and circumstances surrounding the sales or exchanges.

(2) *Examples.* The following examples illustrate the rules of paragaraph (d) of this section:

Example (1). In two transactions evidenced by separate sales agreements, A sells undivided half interests in Blackacre to B. The sales are pursuant to a plan for the sale of a 100 percent interest in Blackacre to B. These sales or exchanges are part of a series of related transactions and, thus, are treated as a single sale or exchange.

Example (2). Pursuant to a plan, unrelated individuals X and Y purchase undivided half interests in Blackacre from A and subsequently contribute these interests to a partnership in exchange for equal interests in the partnership. These purchases are treated as part of the same transaction and, thus, are treated as a single sale or exchange.

Example (3). Fifteen unrelated individuals own all the stock of X Corporation. Y Corporation makes a tender offer to these 15 shareholders. The terms offered to each shareholder are identical. Shareholders holding a majority of the shares of X Corporation elect to tender their shares pursuant to Y Corporation's offer. These sales are part of the same transaction and, thus, are treated as a single sale or exchange.

Example (4). Pursuant to a newspaper advertisement, X Corporation offers for sale similar condominiums in a single building. The prices of the units vary due to a variety of factors, but the financing terms offered by X Corporation to all buyers are identical. The units are purchased by unrelated buyers who decided whether to purchase units in the building at the price and on the terms offered by X Corporation, without regard to the actions of other buyers. Because each buyer acts individually, the sales are not part of the same transaction or a series of related transactions and, thus, are treated as separate sales or exchanges.

(e) *Inflation adjustment of dollar amounts*—(1) *In general.* For each calendar year after 1989, the qualified amount as defined in paragraph (b)(2) of this section and the cash method amount as defined in paragraph (c)(3) of this section shall be determined by multiplying each of those amounts for the year 1988 by the inflation adjustment for the calendar year. Any amount determined under paragraph (e) of this section shall be rounded to the nearest multiple of $100 (or, if the increase is an odd multiple of $50, the increase shall be increased to the nearest multiple of $100).

(2) *Inflation adjustment.* For purposes of paragraph (e)(1) of this section, the inflation adjustment for any calendar year is the ratio of—

(i) The CPI for the preceding calendar year, to

(ii) The CPI for calendar year 1988.

For purposes of this paragraph (e)(2), the CPI for any calendar year is the average of the Consumer Price Index as of the close of the 12-month period ending on September 30 of the calendar year.

(3) *Publication of increased dollar amounts.* The dollar amounts adjusted for inflation as provided in paragraph (e)(1) and (e)(2) of this section shall be determined after the close of the 12-month period ending on September 30, 1988, and each succeeding calendar year. The increased dollar amount shall be published in Revenue Rulings.

§ 1.1275–1 Definitions relating to treatment of debt instruments.

(a) *Applicability.* The definitions contained in this section are applicable for purposes of sections 163(e) and 1271 through 1275 and the regulations thereunder.

(b) *Debt instrument*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, the term "debt instrument" means a bond, debenture, note, certificate, or other evidence of indebtedness, including all rights to deferred payments under a contract, whether or not evidenced by a formal instrument. The term "debt instrument" also includes face-amount certificates as defined in sections 2(a)(15) and (4) of the Investment Company Act of 1940 (15 U.S.C. 80a–2 and 80a–4) as well as certificates of deposit, time deposits, bonus plans, and other deposit arrangements with banks, domestic building and loan associations, and similar financial institutions. A debt instrument includes an instrument calling for payments in the form of cash, stock, securities, or any other property (other than a debt instrument issued by the same obligor).

(2) *Exception.* The term "debt instrument" does not include any annuity contract to which section 72 applies and which—

(i) Depends (in whole or in substantial part) on the life expectancy of one or more individuals, or

(ii) Is issued by an insurance company subject to tax under subchapter L—

(A) In a transaction in which there is no consideration other than cash or another annuity contract meeting the requirements of paragraph (b)(2)(ii) of this section,

(B) Pursuant to the exercise of an election under an insurance contract by a beneficiary thereof on the death of the insured party under the contract, or

(C) In a transaction involving a qualified pension or employee benefit plan.

(c) *Issue date*—(1) *Publicly offered debt instruments.* In the case of debt instruments that are publicly offered (as described in § 1.1273–2(a)(2)), the term "issue date" means the settlement date.

(2) *Non-publicly offered debt instruments not issued for property.* In the case of debt instruments to which section 1273(b)(2) applies, the term "issue date" means the date on which the debt instrument was sold by the issuer. For purposes of this paragraph (c)(2), this date shall be considered to be the settlement date.

(3) *Other debt instruments.* In the case of debt instruments not described in paragraphs (c)(1) or (c)(2) of this section, the term "issue date" means the date on which the debt instrument is exchanged for property.

(d) *Tax-exempt obligations.* The term "tax-exempt obligation" means a debt instrument with respect to which all of the interest—

(1) Is not included in gross income under section 103, or

(2) Is exempt from tax (without regard to the identity of the holder) under any other provision of law.

(e) *Issue.* Two or more publicly offered debt instruments (as described in § 1.1273–2(a)(2)) are part of the same issue if they have the same credit and payment terms, and are sold at substantially the same time pursuant to a common plan of marketing. Two or more debt instruments that are not publicly offered are part of the same issue if they are issued as part of a single transaction or a series of related transactions.

(f) *Premium.* A debt instrument is purchased at a premium if its purchase price exceeds its stated redemption price at maturity. If, under chapter 1 of the Code, the basis of a debt instrument in the hands of the holder is determined, in whole or in part, by reference to the basis of the debt instrument in the hands of another person who purchased the debt instrument at a premium, then the holder shall be considered to have purchased the debt instrument at a premium. Thus, for example, the donee of a debt instrument purchased at a premium by the donor shall be considered to have purchased the debt instrument at a premium.

(g) *Debt instruments issued by a natural person.* A debt instrument issued by an entity other than a natural person shall not be considered to be issued by a natural person merely because a natural person may be a co-maker and may be jointly liable for the debt instrument's repayment. A debt instrument issued by a partnership is considered to be issued by the partnership as an entity even if the partnership is composed entirely of natural persons.

(h) *Revised issue price.* The term "revised issue price" (as defined in section 1278(a)(4)) means the sum of—

(1) The issue price of the debt instrument (as defined in section 1273(b) and § 1.1273–2), and

(2) The aggregate amount of the original issue discount previously includable in the gross income of all holders (determined without regard to sections 1272 (a)(6) or (b)(4) or § 1.1272–1(g)).

§ 1.1275-2 Special rules relating to debt instruments.

(a) *Reorganizations.* (1) *Debt instruments issued after December 13, 1982.* If a debt instrument (referred to in paragraph (a) of this section as the new debt instrument) is issued after December 13, 1982, pursuant to a plan of reorganization as described in paragraph (a)(3) of this section for another debt instrument (referred to in paragraph (a) of this section as the old debt instrument), and the amount which (but for this paragraph (a)(1)) would have been the issue price of the new debt instrument is less than the revised issue price of the old debt instrument, then the issue price of the new debt instrument shall be treated as equal to the revised issue price of the old debt instrument. For purposes of paragraph (a) of this section, the term "debt instrument" includes an investment unit. See § 1.1273–2(d) for rules relating to the allocation of issue price to an investment unit. For a special rule regarding deductibility of original issue discount by the issuer under paragraph (a) of this section, see section 1275(a)(4)(B)(ii)(II).

(2) *Debt instruments issued before December 14, 1982.* If a new debt instrument is issued before December 14, 1982, pursuant to a plan of reorganization, the issue price of the new debt instrument is equal to its stated redemption price at maturity.

(3) *Reorganization.* For purposes of paragraph (a) of this section, a reorganization includes a reorganization within the meaning of section 368(a)(1) or an insolvency reorganization within the meaning of section 371, 373, or 374. A reorganization does not include a transfer pursuant to section 351.

(4) *Example.* The rule set forth in paragraph (a) of this section may be illustrated by the following example:

Example. On January 1, 1986, in a reorganization transaction (within the meaning of paragraph (a)(3) of this section), N Corporation issues a series of 20-year bonds in exchange for an outstanding issue of original issue discount bonds having a revised issue price on that date of $8,750 and a fair market value of $8,600. The 20-year bonds issued pursuant to the reorganization call for a payment of $10,000 at maturity and for annual payments of interest at a rate of 10%, compounded annually ($1,000). Assume that the outstanding issue of original issue discount bonds is publicly traded. The issue price of the newly issued bonds under paragraph (a)(1) of this section is the revised issue price of the outstanding bonds, $8,750.

(b) [Reserved]

(c) *Debt instruments distributed by corporations with respect to stock*—(1) *In general.* In the case of a debt instrument issued by a corporation with respect to its stock, such debt instrument shall be treated as if it had been issued by the corporation for property.

(2) *Examples.* The rule set forth in paragraph (c)(1) of this section may be illustrated by the following examples:

Example (1). On January 1, 1986, M Corporation distributes to A, a shareholder of the corporation, a bond paying $10,000 at maturity on December 31, 1990, and calling for semiannual interest payments at a rate of 10%, compounded semiannually ($500). Assume that the bond is publicly traded and has a fair market value on that date of $10,000. The issue price of the M Corporation bond is, under section 1273(b)(3) and § 1.1273-2(c)(1), $10,000. A has a dividend of $10,000 upon receipt of the bond.

Example (2). The facts are the same as in example (1), except that the bond is not publicly traded. Assume that the test rate of interest is 11%, compounded semiannually. The issue price of the bond is its imputed principal amount under § 1.1274-4 of $9,273.31, discounting at the test rate of 11%, compounded semiannually. A has a dividend of $9,273.31 upon receipt of the bond.

(d) *Aggregation of debt instruments*—(1) *General rule.* All debt instruments, whether or not issued for property, issued in connection with the same transaction or a series of related transactions or as part of the same issue shall be treated together as a single debt instrument with a single issue price, maturity date, yield, and stated redemption price at maturity for purposes of sections 1271 through 1275 and the regulations thereunder, except as provided in paragraph (d)(2) of this section. A single installment obligation (as defined in § 1.1273-1(b)(2)(i)) shall be subject to the rule described in the preceding sentence. Whether debt instruments are issued in connection with the same transaction or a series of related transactions shall be determined in accordance with all the facts and circumstances surrounding the issuance of the debt instrument. See § 1.1274A-1(d).

(2) *Exception.* Paragraph (d)(1) of this section shall not apply if—

(i) Each debt instrument held by the taxpayer is part of a series that is separately traded on an established securities market, or

(ii) (A) Each debt instrument held by the taxpayer is issued in exchange for property; (B) each instrument calls for interest at the lowest rate (or fixed multiple thereof) that constitutes adequate stated interest within the meaning of section 1274(c)(2) and § 1.1274-3; and (C) all interest under each debt instrument is qualified periodic interest within the meaning of § 1.1273-1(b)(1)(ii).

(3) *Effective date.* In general, the rules stated in paragraph (d) of this section shall apply to all installment obligations issued after December 31, 1984, and to all other debt instruments that are issued on or after May 8, 1986. The issuer and holder may elect jointly, however, to apply these rules to serial debt instruments issued after December 31, 1984. Conversely, the issuer and the holder may elect to treat each payment of principal made under an installment obligation issued after December 31, 1984, and before May 8, 1986, as a separate debt instrument maturing serially. The issuer and the holder shall notify the Secretary of this election on their tax returns for their respective taxable years in which the debt instrument(s) is (are) issued. If no election is made, the rules of paragraph (d) of this section shall apply unless the parties have provided for two or more debt instruments maturing serially, in which case the rules of § 1.1232-3(b)(2)((iv)(e) shall apply.

(4) *Example.* The rules set forth in paragraph (d) of this section may be illustrated by the following example:

Example. On January 1, 1987, A sells property to B in exchange for two debt instruments. The first debt instrument has a stated principal amount (as defined in § 1.1274-2) of $500,000, payable in two years. The debt instrument calls for annual payments of interest at a rate of 20%. The second debt instrument also has a stated principal amount of $500,000, and is payable in 10 years. That debt instrument calls for annual payments of interest at a rate of 10%, compounded annually. Assume that the Federal short-term rate on January 1, 1987 is 8%, compounded annually, and that the Federal long-term rate on that date is 10%, compounded annually. Thus, both instruments have adequate stated interest within the meaning of section 1274 and § 1.1274-3. Under paragraph (d)(1) of this section, the two debt instruments will be treated as a single installment obligation because they are part of a single issue and the debt instruments do not satisfy the requirements of paragraph (d)(2) of this section. The combined debt instrument has an issue price of $1,000,000 and a yield of 12.32%, compounded annually. The debt instrument has $100,000 of original issue discount since one-half ($50,000) of each payment of interest on the 2-year debt instrument is not qualified periodic interest within the meaning of § 1.1273-1(b)(1)(ii) when the two debt instruments are aggregated.

The allocation of original issue discount and principal to each of the ten annual accrual periods under the single installment obligation is set forth in the table below:

Year	Payment	Principal	Interest accrued	Qualified periodic interest	OID
1	$150,000	$26,819.35	$123,180.65	$100,000	$23,180.65
2	650,000	530,122.97	119,877.03	100,000	19,877.03
3	50,000	0	54,576.11	50,000	4,576.11
4	50,000	0	55,139.82	50,000	5,139.82
5	50,000	0	55,772.95	50,000	5,772.95
6	50,000	0	56,484.07	50,000	6,484.07
7	50,000	0	57,282.78	50,000	7,282.78
8	50,000	0	58,179.87	50,000	8,179.87
9	50,000	0	59,187.48	50,000	9,187.48
10	550,000	443,057.68	60,319.20	50,000	10,319.20
	1,700,000	1,000,000.00	700,000.00	600,000	100,000.00

(e) *Counting conventions*—(1) *Whole accrual periods.* All whole accrual periods, whether expressed annually, semiannually, quarterly, or monthly, or with reference to any other time period, shall be treated as having equal length. For example, a leap year shall be treated as having the same number of days as a non-leap year; all whole months shall be treated as having the same number of days.

(2) *Short accural periods.* In computing the length of a short accural period, any reasonable convention may be used. Common conventions are "30 days per month/360 days per year", "actual days per month/actual days per year", and "actual days per month/360 days per year". The examples in the regulations under sections 1271 through 1275 use the "30 days per month/360 days per year" convention.

(3) *Amounts payable on the first day of a month*—(i) *In general.* If a debt instrument calls for amounts payable on the first day or the first business day of a month either party to the debt instrument may treat such amounts as payable on the last day of the preceding month. This treatment shall be applied consistently throughout the entire term of the debt instrument and applies for all Federal tax purposes.

(ii) *Example.* A debt instrument is issued on January 1, 1986, providing for payments of interest on July 1 and January 1 of each calendar year through January 1, 2016. Either party may treat the debt instrument as providing for payments of interest on June 30 and December 31 of each calendar year through December 31, 2015.

(f) *Treatment of certain loans for personal use*—(1) *Sections 1274 and 483 not to apply.* In the case of the obligor under any debt instrument given in consideration for the sale or exchange of property, sections 1274 and 483 shall not apply if such property is personal use property (as defined in paragraph (f)(3) of this section). Sections 1274 and 483 shall not apply to either the obligor or the obligee of a debt instrument described in paragraph (f)(1)(i) of this section if the debt instrument is also described in section 7872(c)(1) (A) through (C) and the regulations thereunder. See §§ 1.1274–1(b)(7) and 1.483–1(c)(3)(iii).

(2) *Original issue discount deducted on cash basis in certain cases*—(i) *In general.* In the case in which—

(A) A debt instrument is incurred in connection with the acquisition or carrying of personal use property.

(B) This debt instrument has original issue discount (determined after the application of paragraph (f)(1) of this section), and

(C) The obligor under this debt instrument uses the cash receipts and disbursements method of accounting.

then notwithstanding section 163(e) and the regulations thereunder, the original issue discount on such debt instrument shall not be deductible prior to the time when the original issue discount is paid. The preceding sentence notwithstanding, if the amount of original issue discount is *de minimis*, the rule of § 1.163–7(d) shall apply.

(ii) *Time when original issue discount treated as paid.* For purposes of section 1275(b) and paragraph (f)(2) of this section, any amount designated as interest by the parties with respect to a debt instrument described in paragraph (f)(2)(i) of this section but treated as original issue discount because this interest is not qualified periodic interest (as defined in § 1.1273–1(b)(1)(ii)) shall be treated as paid solely by reference to the terms of the debt instrument.

(3) *Definition of personal use property.* The term "personal use property" means any property substantially all of the use of which by the taxpayer is not in connection with a trade or business of the taxpayer or an activity described in section 212. The determination whether property is described in the preceding sentence shall be made as of the issue date of the debt instrument.

(4) *Examples.* The provisions of this paragraph (f) may be illustrated by the following examples:

Example (1). The facts are the same as in § 1.1272–1(k), Example (9), except that the property sold is personal use property in B's hands. Accordingly, B is not entitled to deduct original issue discount until paid. Thus, B may not deduct any amount as interest for 1986 or 1987 because no amount of interest is paid during those years. In each of the years 1988 through 1995, the amount B may deduct as interest is the stated interest amount of $450,000.

Example (2). (i) A borrows $100,000 from bank B to purchase a residence. As part of the condition for obtaining the loan, B charges A $4,000 in points. A chooses not to pay the points at closing, but instead borrows the $4,000 from B on the same terms as the $100,000. Accordingly, A becomes obligated to B for a total amount of $104,000. The $104,000 is payable in 360 monthly installments of $1,069.76, each payment consisting of a partial payment of principal and interest at a rate of 12% on the outstanding principal balance. A's debt instrument is a self-amortizing installment obligation (within the meaning of § 1.1273–1(b)(2)(iii)).

(ii) A's debt instrument has a stated redemption price at maturity of $104,000 and an issue price of $100,000. Accordingly, the points that A is obligated to pay to B take the form of original issue discount. Under the safe harbor test of § 1.1273–1(a)(3)(ii)(B), A's debt instrument has a *de minimis* amount of original issue discount. Therefore, under § 1.163–7(d), the amount of original issue discount allocable to each principal payment is $4,000/360=$11.11 (notwithstanding the fact that the earlier principal payments are less than $11.11). In a year in which A makes 12 monthly payments, the amount of original issue discount deductible by A is $133.33.

§ 1.1275–3 Original issue discount information reporting requirements.

(a) *Information required to be set forth on face of debt instrument.* In the case of any debt instrument issued after May 8, 1986, that has original issue discount and is not described in section 1272(a)(2) or § 1.1272–1(a)(2), the issuer shall set forth on the face of the debt instrument the amount of the original issue discount (as defined in section 1273(a)(1) and § 1.1273–1(a)), the issue date (as defined in section 1275(a)(2) and § 1.1275–1(c)), the yield to maturity (as defined in § 1.1272–1(f)) as well as the method used to determine yield where there is a short accrual period, and the amount of original issue discount allocable to the short accrual period. In cases where it is not possible to set forth the information required by this paragraph (a) on the face of the instrument by the issue date, the issuer shall deliver to the holder of the debt instrument a sticker containing this information within 10 days of the issue date. In the case of any debt instrument that is not publicly offered (within the meaning of § 1.1273–1(a)(2)), however, the requirements stated in this paragraph (a) shall apply only upon a disposition of the debt instrument that occurs after May 8, 1986, by the first holder. For rules relating to the penalty imposed for failure to show the information required by this section on the debt instrument, see section 6706(a) and the regulations thereunder.

(b) *Information required to be reported to Secretary*—(1) *In general.* In the case of any issue of publicly offered debt instruments issued after August 16, 1984, that have original issue discount, the issuer (as defined in paragraph (c) of this section) shall make an information return on Form 8281. The preceding sentence shall not apply to: (i) An issue of debt instruments described in section 1272(a)(2), (ii) certificates of deposit, and (iii) unless otherwise required by the Commissioner pursuant to a Revenue Procedure, stripped bonds and coupons (within the meaning of section 1286).

(2) *Information required to be reported.* The following information shall be reported to the Secretary on Form 8281—

(i) The name, address, and taxpayer identification number of the issuer;

(ii) The issue date (as defined in section 1275(a)(2)), maturity date, and CUSIP number of the issue;

(iii) The amount of original issue discount for the entire issue (as defined in section 1273(a));

(iv) The issue price (as defined in section 1273(b)) expressed as a percentage of the principal amount;

(v) The stated redemption price at maturity of the entire issue, or of each debt instrument within the issue if in denominations of other than $1,000;

(vi) The stated interest rate and the interest payment dates;

(vii) A description of the debt instrument, or, in place of the description, a copy of the offering circular or prospectus, which description shall include a statement of any terms and conditions of the instrument that govern—

(A) Whether payments of principal may be made prior to maturity of the debt instrument;

(B) Whether the debt instrument is part of an investment unit;

(C) Whether the debt instrument is issued in an exchange described in section 368(a);

(D) Whether the debt instrument is part of a serial issue; and

(E) Whether the debt instrument is a stripped bond or stripped coupon.

(viii) The method selected for computing the amount of original issue discount allocable to a short accrual period; and

(ix) Such other information as is required by the form.

(3) *Time and manner of filing of information return*—(i) The information return required by paragraph (b)(1) of this section shall be filed on Form 8281 with the Internal Revenue Service at the address specified on the form. This return must be made on Form 8281 regardless of whether other information

returns are filed by use of electronic media.

(ii) Form 8281 shall be filed with respect to each issue of publicly offered debt instruments—

(A) For debt instruments issued after May 31, 1985, within 30 days after the issue date; and

(B) For debt instruments issued after August 16, 1984, and before June 1, 1985, on or before July 1, 1985.

(4) *Penalty.* For rules relating to the penalty provided for failure to make an information return under paragraph (b) of this section, see section 6706 (b) and the regulations under that section.

(c) *Issuer.* For purposes of this section, the term "issuer" includes not only domestic issuers but also any foreign issuer who is otherwise subject to United States income tax law, unless the issue is neither listed on an established securities market (as defined in § 1.453-3(d)(4)) in the United States nor offered for sale or resale in the United States in connection with its original issuance.

§ 1.1275-4 Contingent payments.

(a) *Applicability.* The rules of this section apply to debt instruments that provide for one or more contingent payments (as defined in paragraph (b) of this section). Contingent payments under a debt instrument subject to section 1274 are governed by the provisions of paragraphs (c) or (d), whichever is applicable. Contingent payments under a debt instrument issued for cash or publicly traded property are governed by the provisions of paragraphs (e) or (f) whichever is applicable. Nothing in this section or in the regulations under sections 1271 through 1274 shall influence whether an instrument calling for contingent payments is properly treated as debt or equity, or whether such instrument evidences a valid indebtedness for Federal income tax purposes.

(b) *Definition of contingent payment*—(1) *In general.* In determining whether a payment called for under a debt instrument is a contingent payment, remote and incidental contingencies may be disregarded by the Commissioner. The parties to the transaction, however, are bound by its form. Thus, neither party may treat any amount under a debt instrument whose payment is subject to a stated contingency as noncontingent. A payment shall not be considered a contingent payment merely because the amount of or the liability for the payment may be impaired by insolvency or default. Variable payments of interest based on current values of an objective interest index (as defined in § 1.1275-5), if made under a debt instrument issued for cash or publicly traded property to which § 1.1275-5(a) applies or if made under a debt instrument to which § 1.1274-3(d)(1)(i) applies, shall not be treated as contingent payments, and if made under a debt instrument to which § 1.1274-3(d)(1)(i) does not apply, shall be treated as contingent payments to the extent provided in § 1.1274-3(d)(1)(iv).

(2) *Certain debt instruments providing for payments contingent only as to time.* In the case of a debt instrument that calls for fixed or minimum payments of principal uncertain as to the time of payment, and that calls for payments of interest on the unpaid principal balance at a fixed or variable rate (which, in a transaction subject to section 1274, constitutes adequate stated interest), such payments shall not be treated as contingent payments (within the meaning of paragraph (b) of this section) and the provisions of § 1.1272-1(c) (in the case of a fixed rate) or §§ 1.1272-1(f)(3)(ii) and 1.1275-5(d) (in the case of a variable rate) shall apply to determine the amount of original issue discount allocable to each accrual period under the debt instrument. See §1.1272-1(k), Example (14). Payments of principal in excess of the minimum amount of principal (other than payments of principal accompanied by adequate stated interest), however, shall be treated as contingent payments.

(c) *Debt instruments subject to section 1274*—(1) *Separation into noncontingent and contingent components.* Except as otherwise provided in section 1274 and the regulations thereunder, in the case of a debt instrument (the "overall debt instrument") subject to section 1274 that calls for one or more contingent payments (other than a debt instrument described in paragraph (d) of this section), the noncontingent payments shall be subject to the rules described in paragraph (c)(2) of this section, and the contingent payments shall be accounted for separately under the provisions of paragraph (c)(3) of this section.

(2) *Treatment of noncontingent payments.* The noncontingent payments under an overall debt instrument described in paragraph (c)(1) of this section shall be treated under sections 1271 through 1275 and the regulations thereunder as a separate noncontingent debt instrument. The issue price of this separate noncontingent debt instrument is the issue price of the overall debt instrument, determined under §§ 1.1274-2(b) and 1.1274-3(d)(2) (if applicable). The stated redemption price at maturity is determined under § 1.1273-1(b)(1), and yield is determined under § 1.1272-1(f), both without reference to the contingent payments. The *de minimis* rule of section 1273(a)(3) and § 1.1273-1(a)(3) shall not apply to the noncontingent debt instrument.

(3) *Treatment of contingent payments*—(i) *In general.* Except as provided in paragraph (c)(3)(iii) of this section, the portion of the payment treated as interest is includible in gross income by the holder and deductible from gross income by the issuer in their respective taxable years in which the amount of the payment becomes fixed.

(ii) *Recharacterization of certain contingent payments.* Any contingent payment made under a debt instrument to which section 1274 applies, other than a contingent principal payment accompanied by a payment of adequate stated interest, shall be treated as consisting of—

(A) A payment of principal in an amount equal to the present value of the payment, determined by discounting the payment at the test rate (using the exact method for short periods) from the date that the amount of the payment becomes fixed to the issue date, and

(B) A payment of interest in an amount equal to the excess of the total amount of the payment over the amount treated as principal.

The preceding sentence notwithstanding, the total amount treated as principal under an overall debt instrument to which section 1274 applies that calls for a fixed or a maximum stated principal amount shall not exceed this fixed or maximum stated principal amount. Once the total of the noncontingent principal payments due under the debt instrument and the portion of the contingent payments treated as principal exceeds the amount described in the preceding sentence, any additional contingent payments shall be treated entirely as interest.

(iii) *Certain delayed contingent payments*—(A) *In general.* In the case in which a contingent payment is not due within six months of the date on which the amount of the payment becomes fixed, the parties shall be treated as if the borrower had issued a separate debt instrument on the date the amount of the payment becomes fixed, maturing on the date that the payment is due. This separate debt instrument shall be treated as a debt instrument to which section 1274 applies. The stated principal amount of this separate debt instrument shall be the amount of the payment that becomes fixed. An amount equal to the issue price of this debt instrument shall be characterized as interest or principal under the rules of paragraph (c)(3)(ii) of this section and accounted for under paragraph (c)(3)(i) of this section, as if an amount equal to the issue price had been paid by the borrower to the lender on the date that the amount of the payment becomes fixed. To determine the issue price of the separate debt instrument, all payments under the debt instrument shall be discounted from the maturity date to the date that the amount of the payment becomes fixed. The amount of a contingent payment shall be treated as fixed even if, once fixed, the payment is payable in the future together with interest that is subject to further contingencies.

(B) *Special rules.* In applying section 1274 to a separate debt instrument described in paragraph (c)(3)(iii)(A) of this section, any provision calling for a test rate other than the applicable Federal rate shall apply if, and only if, such provision applies to the overall debt instrument. (For example, the 9 percent maximum discount rate of section 1274A (a) and § 1.1274A–1(a) applies if the overall debt instrument satisfies the test of § 1.1274A–1(b)(3)). The test rates under paragraphs (c)(3)(ii) and (c)(3)(iii)(A) of this section shall be based on the applicable Federal rates in effect on the date of the sale or exchange (or, if applicable, the contract date), and shall be based on a term beginning on the date the overall debt instrument is issued and ending on the date the contingent payment is due.

(4) *Examples.* The provisions of paragraph (c) of this section may be illustrated by the following examples:

Example (1). (i) A owns Blackacre, unencumbered depreciable real estate. On April 1, 1986, A sells Blackacre to B for a stated purchase price of $6,000,000. B makes a down payment of $1,000,000 and issues to A a debt instrument calling for $5,000,000 to be paid in 5 years, with fixed interest of 6% and contingent interest of up to an additional 8%. Both fixed and contingent interest are payable annually on March 31 of each year from 1987 to 1991. The contingent interest payment in each year is calculated according to a formula that depends on the gross rents B receives from Blackacre during the preceding calendar year. Assume that B's debt instrument does not have adequate stated interest under § 1.1274–3, that the Federal short-term rate is 10%, compounded annually, and that the Federal mid-term rate is 11%, compounded annually.

(ii) The issue price of B's noncontingent debt instrument under paragraph (c)(2) of this section is determined by considering only the five fixed interest payments of $300,000 and the principal payment of $5,000,000. The present value, under § 1.1274–5, of the fixed payments under the overall debt instrument, using a discount rate equal to the Federal mid-term rate of 11%, compounded annually, is $4,076,025.75. This amount is also the issue price of the noncontingent debt instrument. B's basis in Blackacre is thus initially limited to $5,076,025.75 ($1,000,000 down payment plus $4,076,025.75 issue price of the noncontingent debt instrument). B's noncontingent debt instrument has imputed interest of $923,974.25 under section 1274, which is treated as original issue discount subject to current inclusion under section 1272 and the regulations thereunder.

(iii) Assume that the amount of contingent interest that becomes fixed as of December 31, 1986, is $100,000. This amount is treated under paragraph (c)(3)(ii)(A) of this section as a payment of principal to the extent of its present value (using a discount rate equal to the Federal short-term rate of 10%, compounded annually, and the exact method for the short period), discounting from December 31, 1986, (the date the amount of the payment becomes fixed) to April 1, 1986 (the issue date of B's debt instrument) which, under § 1.1274–5, is $93,101.24. The remainder of the $100,000 payment, $6,898.76, is treated under paragraph (c)(3)(ii)(B) of this section as interest. The additional amount treated as principal gives B additional basis in Blackacre on December 31, 1986, and, if A is reporting his gain on the installment method under section 453, is an additional amount realized by A when paid. The portion of the payment treated as interest is includible in gross income by A and deductible from gross income by B in their respective taxable years in which December 31, 1986 occurs.

(iv) Assume that the actual amounts of contingent interest that become fixed in years 1986 through 1989, and the amounts recharacterized as principal using a discount rate equal to the short-term rate (10%) for the first three payments and the mid-term rate (11%) for the fourth payment (and the exact method for the short period) under paragraph (c)(3)(ii) of this section are as follows:

Year	Contingent amounts	Amount treated as principal
1986	$100,000	$93,101.24
1987	200,000	169,274.99
1988	400,000	307,772.71
1989	400,000	279,793.37
		$849,942.32

The total amount recharacterized as principal as of December 31, 1989, is $849,942.32. Assume that the contingent amount fixed on December 31, 1990 is $400,000. The present value of this amount (using a discount rate of 11%, compounded annually and the exact method for the short period) as of April 1, 1986, is $254,357.61. Under paragraph (c)(3)(ii)(A) of this section, this amount would be treated as additional principal. However, the maximum amount of this payment that can be characterized as principal under the limitation of paragraph (c)(3)(ii) of this section is $74,031.94, which is the excess of the stated principal amount of the debt instrument ($5,000,000) over the sum of the testing amount of the debt instrument ($4,076,025.75) and amounts previously characterized as principal ($849,942.32). Thus, only $74,031.94 of the last $400,000 payment is treated as principal; the remainder, $325,968.07, is treated as interest which is includible in gross income by A and deductible from gross income by B in their respective taxable years in which December 31, 1990 occurs.

Example (2). (i) The facts are the same as in example (1), except that all contingent interest is payable at maturity on March 31, 1991. The contingent interest amounts bear interest from the time they become fixed until they are due at a rate of 13%, compounded quarterly. Assume that a rate of 13%, compounded quarterly constitutes adequate stated interest for all purposes of this example. The analysis of the noncontingent payments under the noncontingent debt instrument is the same as in part (ii) of example (1). Thus, B's noncontingent debt instrument has $923,974.25 of original issue discount subject to current inclusion under section 1272 and the regulations thereunder.

(ii) Assume that a $100,000 payment of contingent interest becomes fixed as of December 31, 1986. Since this amount is not due within six months of the time it becomes fixed, under paragraph (c)(3)(iii)(A) of this section, a separate debt instrument subject to the provisions of section 1274 is treated as issued by B on the date the payment becomes fixed, December 31, 1986. This debt instrument has a stated principal amount equal to the amount of the payment that becomes fixed, $100,000, and matures on the date the payment is due, March 31, 1991. The separate debt instrument has a stated redemption price at maturity under § 1.1273–1(b)(1) of $172,238.81 ($100,000 principal plus $72,238.81 of deferred interest). Since the payment bears adequate stated interest, under section 1274(a)(1), the issue price of this separate debt instrument is the stated principal amount of $100,000.

(iii) The $100,000 issue price of B's separate debt instrument is treated under paragraph (c)(3)(ii) of this section as principal to the extent of the present value of the payment as of April 1, 1986. Since the contingent payment is due 4 years and 3 months after it becomes fixed, the Federal mid-term rate of 11%, compounded annually, is used in determining its present value under the exact method (even though the $100,000 amount becomes fixed 9 months after the issue date). This present value is $92,471.47. The remainder of the payment, $7,528.53, is treated as interest. The $92,471.47 of principal gives B additional basis in Blackacre on December 31, 1986. The $7,528.53 payment of interest is includible in gross income by A and deductible from gross income by B for their respective taxable years in which December 31, 1986 occurs.

(iv) Since the interest on B's separate debt instrument to A is not payable currently, it is treated as original issue discount under section 1273 and is subject to current inclusion under section 1272 and the regulations thereunder. The accrual period under §1.1272–1(d)(1)(i) of B's separate debt instrument, is a calendar quarter. The amount of original issue discount on B's separate debt instrument allocable to each year under § 1.1272–1(c) is as follows:

Year	Original issue discount
1987	$13,647.60
1988	15,510.17
1989	17,626.93
1990	20,032.57
1991	5,421.54

Year	Original issue discount
	$72,236.81

Example (3). The facts are the same as in example (2), except that the contingent interest amounts do not bear additional interest from the time they become fixed until they are due. Assume that on December 31, 1986, a contingent interest payment of $100,000 becomes fixed; thus, on this date, B is obligated to pay A $100,000 on March 31, 1991. Since the contingent payment is not due within six months after it becomes fixed, under paragraph (c)(3)(iii)(A) of this section, the payment is treated as a separate debt instrument issued by B on December 31, 1986, for a stated principal amount of $100,000, maturing on March 31, 1991, with a stated redemption price at maturity of $100,000. Since this separate debt instrument bears no interest, it does not have adequate stated interest within the meaning of § 1.1274–3. The issue price of the separate debt instrument is the testing amount under § 1.1274–3, which is arrived at, under paragraph (c)(3)(iii)(B) of this section, by discounting all payments under the separate debt instrument at the test rate in effect on April 1, 1986 (the issue date) from the date the payment is due to the date the payment becomes fixed. Discounting $100,000 from March 31, 1991 to December 31, 1986, (using a discount rate of 11%, compounded annually and the exact method for the short period) yields a present value of $64,176.69. B is thus treated as having issued a separate debt instrument to A with an issue price of $64,176.69, bearing interest at a rate of 11%, compounded annually. The issue price of this debt instrument is treated under paragraph (c)(3)(ii) of this section as principal in an amount equal to the present value of $64,176.69, discounting from December 31, 1986 to April 1, 1986, (using a discount rate of 11%, compounded annually and the exact method for the short period), which is $59,345.13. This principal gives B additional basis in Blackacre on December 31, 1986. The remainder of the payment, $4,831.56, is treated as a payment of interest which is includible in gross income by A and deductible from gross income by B in their respective taxable years in which December 31, 1986 occurs. The $35,923.31 of imputed interest on B's separate debt instrument is original issue discount under section 1273 and is subject to the current inclusion rules of section 1272 and the regulations thereunder.

Example (4). The facts are the same as in example (3), except that the amount of contingent interest payable at maturity depends upon a formula relating to B's average profit or loss from Blackacre during the years 1987 through 1990. Because profits in earlier years may be offset by losses in later years, no amount becomes fixed until December 31, 1990. Since the total amount of contingent interest is due within six months from the date that the amount becomes fixed, the payment is not treated as a separate debt instrument once it becomes fixed under paragraph (c)(3)(iii)(A) of this section. Instead, the amount payable at maturity is treated under paragraph (c)(3)(ii) of this section as a payment of principal in an amount equal to the present value of the payment (using a discount rate of 11%, compounded annually) as of April 1, 1986, and as a payment of interest in an amount equal to the remainder. B is not entitled to deduct the amount of this interest payment from gross income until the date that the payment becomes fixed, December 31, 1990, nor does he receive any additional basis in Blackacre until that date. A is not required to include any interest in gross income until the date that the payment becomes fixed, December 31, 1990, and A has no additional amounts realized until maturity, March 31, 1991.

(d) *Certain contingent payments within a fixed period*—(1) *Applicability.* In the case of an overall debt instrument issued in a transaction to which section 1274 applies that—

(i) Calls for fixed or minimum payments within a specified time period, and

(ii) Either—

(A) Does not provide for adequate stated interest, or

(B) Contains a provision that recharacterizes a portion of each payment as interest to an extent sufficient to constitute adequate stated interest, the buyer's basis in the property purchased and the allocation of interest under the debt instrument given in consideration of the sale or exchange of the property, shall be determined pursuant to the provisions of paragraph (d)(2) of this section. Any payments in excess of the minimum payments provided for under the debt instrument shall be treated as contingent payments subject to the provisions of paragraph (c)(3) of this section.

(2) *Determination of buyer's basis and allocation of interest*—(i) *General rule.* For purposes of determining the buyer's basis in the property purchased and the allocation of interest (whether stated or imputed) to the proper accrual periods under the debt instrument, all future payments to be made under the debt instrument shall be presumed to be made at the latest possible date that is permitted under the terms of the debt instrument (taking into account all prior payments), and in the smallest amount permitted (excluding contemporaneous payments of stated interest). The preceding sentence shall not apply for purposes of determining the recovery of basis to the seller as a result of the sale or exchange of the property.

(ii) *Buyer's basis in property purchased*—(A) *Initial basis.* The buyer's basis in the property purchased at the time of the sale or exchange shall be the issue price of the debt instrument (determined pursuant to the general rule of paragraph (d)(2)(i) of this section).

(B) *Subsequent additions to basis.* When a fixed or minimum payment under the debt instrument is made, the buyer's basis in the property purchased shall be increased on that date by the excess of—

(*1*) The present value as of the issue date of the debt instrument of the amount of the payment, including any stated interest (determined under the provisions of paragraph (d)(2)(v) of this section), over

(*2*) The present value as of the issue date of the amount of the payment, including any stated interest (determined pursuant to the rules of paragraph (d)(2)(i) and (v) of this section).

(iii) *Adjusted issue price of the debt instrument.* For purposes of paragraph (d) of this section, the adjusted issue price at the end of an accrual period (as well as at the beginning of the next succeeding accrual period) is the present value as of that date of all future payments to be made under the debt instrument (determined pursuant to the rules of paragraph (d)(2)(i) and (v) of this section).

(iv) *Amount of original issue discount allocable to an accrual period.* The amount of original issue discount allocable to an accrual period shall be the excess of—

(A) The total amount of original issue discount that would have accrued through the end of that accrual period (determined by taking into account the timing of payments that have been made by the end of that accrual period and by treating all remaining future payments as subject to the general rule of paragraph (d)(2)(i) of this section), over

(B) The total amount of original issue discount allocated to prior accrual periods.

An alternate formulation for the amount of original issue discount allocable to an accrual period is the excess of—

(C) The sum of—

(*1*) The amount of the payment (if any) at the end of the accrual period, and

(*2*) The adjusted issue price of the debt instrument at the end of that accrual period, over

(D) The sum of—

(*1*) The amount by which the buyer's basis is increased as result of the payment, if any, (determined pursuant to paragraph (d)(2)(ii)(B) and (v) of this section), and

(*2*) The adjsuted issue price of the debt instrument at the beginning of the accrual period.

(v) *Special rules.* In applying the provisions of paragraph (d)(2)(ii)(B) and (iii) of this section, any provision calling for a test rate other than the applicable

Federal rate shall apply if, and only if, such provision applies to the overall debt instrument. The test rates under paragraph (d)(2)(ii)(B)(*2*) and (iii) of this section shall be based on the term of the overall debt instrument. The test rate under paragraph (d)(2)(ii)(B)(*1*) of this section shall be based on a term beginning on the date the overall debt instrument is issued and ending on the date the contingent payment is made.

(3) *Example.* The provisions of paragraph (d) of this section may be illustrated as follows:

Example. (i) On July 1, 1986, A sells Blackacre to B in exchange for B's debt instrument calling for five annual payments, each payment equal to 10% of the gross yield from Blackacre for the immediately preceding fiscal year ending on March 31. Each payment is to be made on the following June 30. The debt instrument does not provide for any stated interest. The terms of the debt instrument further specify that if by June 30, 1990, B has not paid at least $5 million to A, the payment due on June 30, 1991 shall consist of the excess of $5 million over the sum of all prior payments. Assume that on July 1, 1986, the Federal short-term rate is 9%, compounded annually, and the Federal mid-term rate is 11%, compounded annually.

(ii) Because no portion of the $5 million payment is unconditionally payable prior to June 30, 1991, the issue price of the debt instrument under § 1.1274–4 and paragraph (d)(2)(i) of this section is its imputed principal amount, determined by taking the present value of $5 million payable at the end of the 5-year term and using a discount rate of 11%, compounded annually. This present value is $2,967,257. B's basis in Blackacre is limited initially to this amount.

(iii) The gross yield from Blackacre for the fiscal year ending on March 31, 1987 is $13 million; therefore, a payment of $1,300,000 is due on June 30, 1987. The present value of this payment as of July 1, 1986, using a discount rate equal to the Federal short-term rate of 9%, compounded annually, is $1,192,660. The present value as of July 1, 1986 of a payment of $1,300,000 due on June 30, 1991, discounted at the Federal mid-term rate of 12%, compounded annually, is $771,487. Since the payment of $1,300,000 is actually made at an earlier date than that presumed under the general rule of paragraph (d)(2)(i) of this section, the buyer's basis is increased on the date of the payment under paragraph (d)(2)(ii)(B) of this section by the excess of the present value of the payment actually made over the present value of that amount. Thus, B receives additional basis in Blackacre as a result of the June 30, 1987 payment equal to $421,173 ($1,192,660 – $771,487).

(iv) The adjusted issue price of B's debt instrument at the end of the first accrual period, June 30, 1987, pursuant to paragraph (d)(2)(iii) of this section, is equal to the present value as of June 30, 1987 of a payment of $3,700,000 ($5,000,000 – $1,300,000) due on June 30, 1991, using a discount rate of 11%, compounded annually. This present value is $2,437,305.

(v) The amount of original issue discount allocable to the first accrual period, pursuant to paragraph (d)(2)(iv) of this section, is the sum of the payment actually made at the end of that accrual period ($1,300,000) and the adjusted issue price of the debt instrument at the end of the accrual period ($2,437,305) minus the sum of the amount of additional basis B receives as a result of the payment ($421,173) and the issue price of the obligation ($2,967,257). This amount is $348,875 [($1,300,000 + $2,437,305) – ($421,173 + $2,967,257)].

(vi) Assume that the gross yield from Blackacre for the fiscal year ending March 31, 1988 is $15 million; therefore, a payment of $1,500,000 is due on June 30, 1988. Pursuant to the provisions of paragraph (d)(2)(ii)(B) of this section, B receives additional basis in Blackacre of $372,343, calculated as follows:

Present value of actual $1,500,000 payment at end of second accrual period, using a discount rate of 9%, compounded annually	$1,262,520
Reduced by:	
Present value of a hypothetical $1,500,000 payment at maturity, using a discount rate of 11%, compounded annually	(890,177)
	$372,343

(vii) The adjusted issue price of B's debt instrument at the end of the second accrual period is equal to the present value as of June 30, 1988, of a payment of $2,200,000 ($3,700,000 – $1,500,000) due on June 30, 1991, using a discount rate of 11%, compounded annually. This present value is $1,608,621.

(viii) The amount of original issue discount allocable to the second accrual period is the sum of the payment actually made at the end of that accrual period ($1,500,000) and the adjusted issue price of the debt instrument at the end of the accrual period ($1,608,621) minus the sum of the amount of additional basis B receives as a result of the payment ($372,343) and the adjusted issue price at the beginning of the accrual period ($2,437,305). The amount of original issue discount allocable to the second accrual period is thus $298,973 [($1,500,000 + $1,608,621) – ($372,343 + $2,437,305)].

(ix) Assume that the gross yield from Blackacre for the fiscal year ending on March 31, 1989 is $14 million, and a payment of $1,400,000 is due on June 30, 1989. Assume further that B receives additional basis of $250,225 as a result of that payment, and that the amount of original issue discount allocable to the third accrual period is $190,452. Therefore, by June 30, 1989, B has made total payments to A of exactly $4,200,000 (including the $1,400,000 payment made on that date). The adjusted issue price of B's debt instrument on June 30, 1989 is equal to the present value as of that date of the $800,000 remaining minimum payment (assuming that the payment will be made on June 30, 1991). This present value is $649,298.

(x) Assume that the gross yield from Blackacre for the fiscal year ending on March 31, 1990 is $18 million; therefore, a payment of $1,800,000 is due on June 30, 1990. Since the remaining minimum payment is only $800,000, this payment is subject to the rules of paragraph (d) of this section only to the extent of that minimum payment. The remainder of the payment, $1,000,000, is characterized as interest or principal under the rules of paragraph (c)(3)(ii) of this section. The present value of $800,000 as of the issue date, July 1, 1986, using a discount rate equal to the Federal mid-term rate of 11%, compounded annually, is $526,985. The present value of a payment of $800,000 due on June 30, 1991, using a discount rate of 11%, compounded annually, is $474,761. B thus receives additional basis in Blackacre attributable to the remaining $800,000 minimum payment of $52,224 ($526,985 – $474,761). B also receives additional basis on March 31, 1990, under paragraph (c)(3)(ii) of this section, equal to the present value of the $1,000,000 excess payment, or $658,731. B's total increase in basis is thus $710,955 ($52,224 + $658,731).

(xi) Since the minimum payment requirements of the debt instrument have been satisfied, the adjusted issue price of the debt instrument as of June 30, 1990, defined in paragraph (d)(2)(iii) of this section as the present value of all future fixed or minimum payments to be made under the debt instrument, is zero. The amount of original issue discount allocable to the accrual period beginning on July 1, 1989 and ending on June 30, 1990 is equal to the excess of the minimum payment made at the end of that accrual period ($800,000) over the sum of the additional basis B receives as a result of that portion of the payment ($52,224) and the adjusted issue price of the debt instrument at the beginning of the accrual period ($649,298). The amount of original issue discount allocable to the accrual period ending on June 30, 1990 is thus $98,478 [$800,000 + $649,298)]. The excess of the $1,000,000 portion of the payment over the portion treated as principal, $658,731, which excess is $341,269, is treated as interest and is accounted for on June 30, 1990.

(xii) Assuming that there is an additional payment during the one remaining accrual period, the amount of additional basis received by B is that portion of the payment due at the end of the accrual period that is treated as principal (as determined under paragraph (c)(3)(ii) of this section). This amount is the present value of the payment as of the issue date, using a discount rate of 11%, compounded annually. The amount of original issue discount allocable to that accrual period is that portion of the payment treated as interest. This amount is equal to the excess of the amount of the payment over the portion that is treated as principal.

(e) *Certain debt instruments issued for cash or publicly traded property*—(1) *Separation into noncontingent and contingent components.* In the case of an overall debt instrument issued for cash or publicly traded property in which the sum of all the noncontingent payments under the debt instrument (regardless of whether designated as interest or

principal) is greater than or equal to the issue price of the overall debt instrument, the noncontingent payments shall be subject to the rules described in paragraph (e)(2) of this section, and the contingent payments shall be subject to the rules described in paragraph (e)(3) of this section.

(2) *Treatment of noncontingent payments.* The noncontingent payments under an overall debt instrument described in paragraph (e)(1) of this section shall be treated under sections 1271 through 1275 and the regulations thereunder as a separate noncontingent debt instrument. The issue price of this separate noncontingent debt instrument is the issue price of the overall debt instrument. The stated redemption price at maturity is determined under § 1.1273–1(b)(1); and yield is determined under § 1.1272–1(f), all without reference to the contingent payments. The *de minimis* rule of section 1273(a)(3) and §1.1273–1(a)(3) shall not apply to the noncontingent debt instrument.

(3) *Treatment of contingent payments*—(i) *In general.* The contingent payments under an overall debt instrument described in paragraph (e)(1) of this section shall be treated entirely as interest and, except as provided in paragraph (e)(3)(ii) of this section, shall be includible in gross income by the holder and deductible from gross income by the issuer in their respective taxable years in which the amount of the payment becomes fixed.

(ii) *Certain delayed contingent payments*—(A) *In general.* In the case in which a contingent payment is not due within six months of the date on which the amount of the payment becomes fixed, the parties shall be treated as if the borrower had issued a separate debt instrument on the date the amount of the payment becomes fixed, maturing on the date that the payment is due. The stated principal amount of this separate debt instrument shall be the amount of the payment that becomes fixed. An amount equal to the issue price of this separate debt instrument shall be accounted for as if an amount of interest equal to such issue price had been paid by the borrower to the lender on the date that the amount of the payment becomes fixed. To determine the issue price of the separate debt instrument, all payments under the debt instrument shall be discounted from the date that the payment is due to the date that the payment becomes fixed. The amount of a contingent payment shall be treated as fixed even if, once fixed, the payment is payable in the future together with interest that is subject to further contingencies.

(B) *Special rules.* In applying section 1274 to a separate debt instrument described in paragraph (e)(3)(ii) of this section, (*1*) the test rate shall be based on the term of the overall debt instrument, and (*2*) any provision calling for a test rate other than the applicable Federal rate shall apply if, and only if, such provision would have been applied to the overall debt instrument if it had been issued for nonpublicly traded property.

(4) *Examples.* The provisions of paragraph (e) of this section may be illustrated by the following examples:

Example (1). On April 1, 1986, A sells publicly traded property to B in exchange for B's debt instrument calling for a payment of $5,000,000 in five years with fixed interest of 6% and contingent interest of up to an additional 8% payable annually on March 31 of each year from 1987 to 1991. Assume that the fair market value of the property on April 1, 1986, is $5,000,000. The issue price of the overall debt instrument under section 1273 (b)(3) and § 1.1273 2(c)(1) is $5,000,000. Applying the rules of section 1273 and the regulations, thereunder to only the noncontingent payments under the debt instrument in accordance with paragraph (e)(2) of this section, the issue price of the noncontingent debt instrument is $5,000,000, and its stated redemption price at maturity (under § 1.1273–1(b)(1)) is $5,000,000. Thus, the noncontingent debt instrument has no original issue discount under section 1273(a)(1). Under paragraph (e)(3) of this section, each contingent payment is treated entirely as interest which is accounted for by both A and B in their respective taxable years in which the amount of the payment becomes fixed.

Example (2). (i) The facts are the same as in example (1), except that the contingent interest which becomes fixed on March 31 of each year is not payable until maturity. However, these deferred amounts bear interest at a rate of 13%, compounded quarterly. The analysis of the noncontingent payments under the debt instrument is the same as in example (1).

(ii) Assume that a contingent payment of $100,000 becomes fixed as of December 31, 1986, and is payable on March 31, 1991. Since this amount is not due within six months of the date it becomes fixed, under paragraph (e) (3)(ii)(A) of this section, a separate debt instrument subject to the provisions of section 1274 is treated as issued by B on the date the payment becomes fixed, December 31, 1986. This separate debt instrument has a stated principal amount equal to the amount of the payment as fixed, $100,000, and matures on the date the payment is due, March 31, 1991. The separate debt instrument has a stated redemption price at maturity under § 1.1273–1(b)(1) of $172,238.81 ($100,000 principal plus $72,238.81 of deferred interest). Since the payment bears adequate stated interest, under section 1274(a)(1), the issue price of this separate debt instrument is the stated principal amount of $100,000. The $100,000 issue price of B's separate debt instrument is treated entirely as interest under paragraph (e)(3) of this section, and is accounted for by both A and B in their respective taxable years in which December 31, 1986 occurs.

Example (3). The facts are the same as in example (3), except that the contingent interest amounts do not bear additional interest from the time they become fixed until they are due. Assume that, on December 31, 1986, a contingent interest payment of $100,000 becomes fixed; thus, on this date, B is obligated to pay A $100,000 on March 31, 1991. Since the contingent payment is not due within six months after it becomes fixed, under paragraph (e)(3)(ii)(A) of this section, the payment is treated as a separate debt instrument issued by B on December 31, 1986, for a stated principal amount of $100,000, maturing on March 31, 1991, with a stated redemption price at maturity of $100,000. Since this separate debt instrument bears no interest, it does not have adequate stated interest within the meaning of § 1.1274–3. The issue price of the separate debt instrument is the testing amount under § 1.1274–4, which is calculated, under paragraph (e)(3)(ii)(B) of this section, by discounting all payments under the separate debt instrument at the test rate in effect on April 1, 1986 (the issue date) from the date the payment is due to the date the payment becomes fixed. Discounting $100,000 from March 31, 1991 to December 31, 1986, (using a discount rate of 11%, compounded annually and the exact method for the short period) yields a present value of $64,176.69. B is treated as having issued a separate debt instrument to A with an issue price of $64,176.69, bearing interest at a rate of 11% compounded annually. This issue price is treated entirely as interest under paragraph (e)(3) of this section and the interest on the separate debt instrument is original issue discount.

Example (4). (i) C lends D $1,000,000 for use in D's business on July 1, 1986. D gives C a 5-years debt instrument calling for fixed interest payable semiannually at a rate of 10%, and a repayment of the $1,000,000 principal on June 30, 1991. In addition, the debt instrument calls for an additional contingent interest payment at maturity equal to one percent of the average annual gross sales from D's business during the 5-year period ending on December 31, 1990.

(ii) Analyzing only the noncontingent payments under the debt instrument pursuant to paragraph (e)(2) of this section, the debt instrument has an issue price of $1,000,000 under section 1273(b)(2) and § 1.1273–2(b)(2), and a stated redemption price at maturity under § 1.1273–2(b)(1) of $1,000,000. Thus, the noncontingent debt instrument has no original issue discount under section 1273(a)(1) since the issue price and the stated redemption price at maturity are the same.

(iii) The sales from D's business during 1986 are $3,000,000. Thus, the average annual gross sales during the 5-year period must be at least $600,000 (sales in future years may all be zero but will never be less than zero), and the contingent interest payment at maturity is, therefore, at least $6,000. This amount is the contingent interest payment that becomes fixed as of December 31, 1986. Since the payment is not due within six months of the date that the amount becomes fixed, under paragraph (e)(3)(ii) of this section it is treated as a separate debt instrument subject to section 1274, issued on December 31, 1986, for a stated principal amount of $6,000, and maturing on June 30, 1991 with a stated redemption price at maturity of $6,000. Assume that the test rate of interest on April 1, 1986, is 12%, compounded semiannually. Since the separate debt instrument bears no interest, it does not have adequate stated interest within the meaning of § 1.1274–3. The issue price of the separate debt instrument is, therefore, the testing amount of $3,551.39, determined under § 1.1274–3 using a rate of 12%, compounded semiannually, to discount the $6,000 payment from the date it is due, June 30, 1991, to the date it becomes fixed, December 31, 1986. B's separate debt instrument has a yield of 12%, compounded semiannually. The difference between the stated redemption price at maturity and the issue price of the separate debt instrument is original issue discount. The entire amount of the issue price of B's separate debt instrument, $3,551.39, is treated as interest pursuant to paragraph (e)(3) of this section, and is accounted for by both C and D in their respective taxable years in which December 31, 1986, occurs.

(iv) The sales from D's business during 1987 are $4,000,000. Thus, as of December 31, 1987, it is established that the average annual gross sales from D's business during the 5-year period will be at least $1,400,000 yielding a total payment at maturity of at least $14,000. This represents an additional payment of $8,000 to be made at maturity that becomes fixed on December 31, 1987. The analysis of this payment is the same as in part (iii), except that the testing amount is determined by discounting the $8,000 payment at a rate of 12%, compounded semiannually, from June 30, 1991 to December 31, 1987. This amount is $5,320.46. The entire amount of the issue price of B's separate debt instrument is treated as interest under paragraph (e)(3) of this section and is includible in gross income by C and deductible from gross income by D in their respective taxable years in which December 31, 1987 occurs.

(f) *Certain debt instruments issued for cash or publicly traded property that provide for contingent principal*—(1) *In general.* In the case of a debt instrument issued for cash or publicly traded property that provides for contingent payments, and that fails to provide for total noncontingent payments at least equal to the issue price of the debt instrument (as determined under section 1273(b) and § 1.1273–2), the noncontingent payments shall be treated as payments of principal (without regard to whether designated as interest or principal), and the contingent payments shall be subject to the rules of paragraph (f) (2) and (3) of this section.

(2) *Treatment of contingent payments*—(i) *In general.* Except as provided in paragraph (f)(2)(v) of this section, the portion of the contingent payment treated as interest shall be includible in gross income by the holder and deductible from gross income by the issuer in their respective taxable years in which the amount of the payment becomes fixed.

(ii) *Recharacterization of contingent payments.* Any contingent payment under a debt instrument described in paragraph (f)(1) of this section (other than a contingent payment made at the maturity date) shall be treated as consisting of—

(A) A payment of interest to the extent of interest deemed accrued for the current and all prior accrual periods (as determined under paragraph (f)(2)(iii) of this section) and not allocated to prior payments, and

(B) A payment of principal to the extent of the excess of such payment over the portion treated as interest under paragraph (f)(2)(ii)(A) of this section.

Notwithstanding the preceding sentence, the total amount treated as principal shall be no greater than the excess of the issue price of the debt instrument over the sum of all noncontingent payments to be made under the debt instrument. Once the total of the contingent payments characterized as principal under paragraph (f)(2)(ii)(B) of this section equals this excess, any additional contingent payments shall be treated entirely as interest.

(iii) *Interest deemed accrued.* For purposes of paragraph (f)(2)(ii) of this section, the amount of interest deemed accrued during an accrual period is equal to the product of—

(A) The adjusted issue price (as determined under paragraph (f)(2)(iv) of this section) at the beginning of the accrual period, and

(B) The applicable Federal rate, based upon the due date of the final payment (regardless of whether contingent or noncontingent) under the debt instrument.

For purposes of paragraph (f)(2)(iii)(B) of this section, the applicable Federal rate is that Federal rate that would apply to the debt instrument had it been issued for nonpublicly traded property. In the case of a debt instrument described in paragraph (f)(1) of this section that contains a short accrual period, interest deemed accrued shall be determined according to the exact method under § 1.1272–1(c)(2)(ii)(B).

(iv) *Adjusted issue price.* For purposes of paragraph (f)(2)(iii) of this section, the adjusted issue price of a debt instrument at the beginning of the first accrual period is its issue price. The adjusted issue price of the debt instrument at the beginning of each subsequent accrual period is equal to—

(A) The sum of—

(*1*) The adjusted issue price at the beginning of the immediately preceding accrual period, and

(*2*) The amount of total interest deemed accrued during that accrual period,

(B) Reduced by the amount of all payments (both noncontingent and contingent) due during the immediately preceding accrual period.

(v) *Certain delayed contingent payments*—(A) *In general.* If a contingent payment is not due within six months of the date on which the amount of the payment is fixed, the parties shall be treated as if the borrower had issued a separate debt instrument on the date the amount of the payment becomes fixed, maturing on the date that the payment is due. This separate debt instrument shall be treated as a debt instrument to which section 1274 applies. The stated principal amount of this separate debt instrument shall be the amount of the payment that becomes fixed. An amount equal to the issue price of this debt instrument shall be characterized as interest or principal under the rules of paragraph (f)(2)(ii) of this section and accounted for under paragraph (f)(2)(i) of this section as if an amount equal to the issue price had been paid by the borrower to the lender on the date that the amount of the payment becomes fixed. To determine the issue price of the separate debt instrument, all payments under the debt instrument shall be discounted from the maturity date to the date that the payment becomes fixed. The amount of a contingent payment shall be treated as fixed even if, once fixed, the payment is payable in the future together with interest that is subject to further contingencies.

(B) *Special rules.* In applying section 1274 to a separate debt instrument described in paragraph (f)(2)(iv)(A) of this section, (*1*) the test rate shall be based on the term of the debt instrument described in paragraph (f)(1) of this section, and (*2*) any provision calling for a test rate other than the applicable Federal rate shall apply if, and only if, such provision would have been applied to a debt instrument described in paragraph (f)(1) of this section if it had been issued for nonpublicly traded property.

(3) *Payments at maturity.* If, at the time of final maturity, the outstanding principal balance (issue price less the sum of all prior payments treated as principal under paragraph (f) (1) and (2)(ii) of this section) exceeds the total

amount of the final payment (whether contingent or noncontingent), the entire amount of the final payment shall be treated as principal and the debt instrument shall be treated as retired for such amount. If, conversely, at that time, the total amount of the final payment exceeds the outstanding principal balance, the debt instrument shall be treated as retired for an amount equal to such outstanding principal balance, and the final payment shall be treated as interest to the extent of such excess.

(4) *Examples.* The provisions of paragraph (f) of this section may be illustrated by the following examples:

Example (1). (i) On January 1, 1990, A sells to B publicly traded property having a fair market value on that date of $1,000,000. In exchange therefor, B issues to A a debt instrument maturing on June 30, 1991 for $900,000. The debt instrument also provides for an additional contingent payment at maturity of up to $500,000.

(ii) The issue price of the debt instrument, under section 1273(b)(3) and §1.1273–2(c)(1), is $1,000,000, the fair market value of the property. The sum of the noncontingent payments under the debt instrument is $900,000. Since the sum of the noncontingent payments under the debt instrument is less than its issue price, the noncontingent payments are treated as payments of principal under paragraph (f)(1) of this section, and the contingent payments are characterized as interest or principal under paragraph (f)(2)(ii) of this section.

(iii) Assume that the amount of the contingent payment at maturity is equal to the maximum amount of $500,000. The total payment at maturity is, therefore, $1,400,000. The outstanding principal balance at maturity is equal to the issue price of $1,000,000, since no other payments of principal have been made. Since the amount of the final payment exceeds the outstanding principal balance at maturity, under paragraph (f)(3) of this section, it is treated as a payment of principal to the extent of $1,000,000. The remainder of the final payment, $400,000, is treated as interest and is includible in gross income by A and deductible from gross income by B, under paragraph (f)(1) of this section, in their respective taxable years in which June 30, 1991 occurs.

Example (2). The facts are the same as in example (1), except that the amount of the contingent payment actually made at maturity is $50,000. Under paragraph (f)(3) of this section, since the outstanding principal balance of $1,000,000, exceeds the amount of the $950,000 payment at maturity, the entire $950,000 is treated as principal and the debt instrument is treated as redeemed for this amount. A's basis in B's debt instrument is equal to the amount loaned, $1,000,000, and A's amount realized upon maturity of the debt instrument is $950,000. A, therefore, realizes a loss of $50,000 on the retirement of B's debt instrument on June 30, 1991.

Example (3). (i) On January 1, 1988, C loans D $2,000,000 in exchange for D's 18-month debt instrument maturing on June 30, 1989. The debt instrument provides for three semiannual payments on June 30 and December 31 of $600,000 in addition to three contingent payments in amounts based upon profits from D's business. Assume that the Federal short-term rate on January 1, 1988 is 10%, compounded semiannually. Assume further that the contingent payments, when made on June 30, 1988, December 31, 1988, and June 30, 1989, are in the amounts of 0, $350,000, and $75,000, respectively.

(ii) The issue price of the debt instrument, under section 1273(b)(2) and §1.1273–2(b)(2), is the amount loaned, or $2,000,000. The sum of the noncontingent payments under the debt instrument is $1,800,000. Under paragraph (f)(1) of this section, all of the noncontingent payments are treated as principal. The accrual period, under §1.1272–1(d)(1)(i), is the six-month interval between payment dates, ending on June 30 and December 31 of both years. Total interest deemed accrued, under paragraph (f)(2)(iii) of this section, during the first accrual period is equal to the product of the issue price, $2,000,000, and one-half of the Federal short-term rate, .05, or $100,000. No contingent payment is made as of the end of the accrual period. Therefore, under paragraph (f)(2)(iv) of this section, the adjusted issue price of the debt instrument at the beginning of the second accrual period is equal to the sum of the issue price and the total interest deemed accrued ($2,000,000 + $100,000), reduced by the amount of the noncontingent payment made during the accrual period ($600,000). This amount is $1,500,000.

(iii) Total interest deemed accrued during the second accrual period is equal to the product of the adjusted issue price at the beginning of the accrual period, $1,500,000, and one-half of the Federl short-term rate, .05, or $75,000. The contingent payment of $350,000 is treated, under paragraph (f)(2)(ii)(A) of this section, as a payment of interest to the extent of the total interest deemed accrued as of the end of the accrual period that was not allocated to a previous payment, or $175,000. This amount is includible in gross income by C and deductible from gross income by D, under paragraph (f)(1) of this section, in their respective taxable years in which December 31, 1988 occurs. The remainder of the contingent payment, $175,000, is treated as a payment of principal under paragraph (f)(2)(ii)(B) of this section. The adjusted issue price at the beginning of the third accrual period, under paragraph (f)(2)(iv) of this section, is equal to the sum of the adjusted issue price at the beginning of the second accrual period, $1,500,000, and the total interest deemed accrued during the accrual period, $75,000, reduced by the sum of the payments made during the accrual period, $950,000. This amount is $625,000.

(v) The contingent payment of $75,000 increases the final payment at maturity to $675,000. The outstanding principal balance at maturity is equal to the issue price, $2,000,000, less the sum of amounts previously characterized as principal, $1,375,000, or $625,000. This amount is less than the $675,000 final payment at maturity. Therefore, under paragraph (f)(3) of this section, the debt instrument is deemed retired for an amount equal to the outstanding principal balance of $625,000. The remainder of the final payment, $50,000, is treated as a payment of interest which is includible in gross income by C and deductible from gross income by D in their respective taxable years in which June 30, 1989 occurs.

Example (4). The facts are the same as in example (3), except that the amount of the contingent payment on December 31, 1988 is $500,000. This payment is initially treated, under paragraph (f)(2)(ii)(A) of this section, as interest to the extent of $175,000, which is the interest deemed accrued as of that date under paragraph (f)(2)(iii) of this section. The remainder of the payment, $325,000, is treated as a payment of principal to the extent of the excess of the issue price of the debt instrument, $2,000,000, over the sum of the noncontingent payments under the debt instrument, $1,800,000, or $200,000. The remaining $125,000 is treated as a payment of interest, under paragraph (f)(2)(ii) of this section. The total amount of the second contingent payment treated as interest is, therefore, $300,000 ($175,000 + $125,000). The contingent payment at maturity is treated entirely as interest, since the portion of the contingent payment made at the end of the second accrual period that was treated as principal exactly equals the difference between the issue price and the sum of all noncontingent payments under the debt instrument.

Example (5). (i) The facts are the same as in example (3), except that the contingent amounts under the debt instrument are all payable at maturity, and a contingent amount of $250,000 becomes fixed at the end of the first accrual period. Assume that the contingent payments bear interest from the date they become fixed until they are due at a rate that constitutes adequate stated interest within the meaning of § 1.1274–3, and that such interest is payable at maturity.

(ii) Since the $250,000 contingent amount that becomes fixed on June 30, 1988 is not due within six months of the date it becomes fixed, under paragraph (f)(7)(iii) of this section, a separate debt instrument is treated as issued by D on that date. This debt instrument has a stated principal amount equal to the amount of the payment as fixed, $250,000, and matures on June 30, 1989, the date the payment is due. Since the separate debt instrument provides for adequate stated interest, the issue price is its stated principal amount of $250,000. An amount equal to the issue price is recharacterized under paragraph (f)(7)(ii)(A) of this section as a payment of interest equal to total interest deemed accrued during the first accrual period of $100,000. Thus, the issue price of D's separate debt instrument is treated as a payment of interest to the extent of $100,000. This amount is includible in gross income by C and deductible from gross income by D in their respective taxable years in which June 30, 1988 occurs. The remainder of the issue price, $150,000, is treated as principal. The interest on D's separate debt instrument is original issue discount subject to the inclusion rules of section 1272 and the regulations thereunder.

(iii) The facts are the same as in part (i), except that the contingent payments do not bear interest from the date they become fixed to the date they are due. The stated redemption price at maturity of the separate debt instrument is, therefore, $250,000, under § 1.1273–1(b)(1)(i). Since the separate debt instrument does not have adequate stated interest, its issue price is the testing amount under § 1.1274–3, determined, under paragraph (f)(2)(iv)(B) of this section, by discounting all payments under the separate debt instrument by the test rate of 10%, compounded semiannually. This issue price is $226,757.37. The issue price of the separate debt instrument is recharacterized under paragraph (f)(7)(ii)(A) of this section as a payment of interest equal to the total interest deemed accrued during the first accrual period, $100,000. The issue price is thus treated as a payment of interest of $100,000, which is includible by C and deductible by B in their respective taxable years in which June 30, 1986 occurs. The remainder of the issue price, $126,757.37, is treated as principal.

(g) *Special rules for certain debt instruments*—(1) *In general.* In the case of a debt instrument calling for one or more contingent payments, if the contingent payments are computed in a manner that can be reasonably expected to produce a front-loading or back-loading of interest deductions and, if a principal purpose for such front-loading or back-loading of interest deductions is the avoidance of Federal income tax, then the Commissioner may reallocate interest under the debt instrument in a manner consistent with section 1272 and the regulations thereunder. In determining whether such a purpose exists, the Commissioner shall give considerable weight to whether one of the parties is exempt from Federal income taxation or, if both parties are subject to tax, to the relative tax brackets of the parties. In making a reallocation under this paragraph (g)(1), the Commissioner may make reasonable assumptions as to the amounts of contingent interest that will accrue under the terms of the debt instrument. For example, the Commissioner may look to the actual accruals of contingent interest prior to the date such reallocation is made as a guide to future amounts of contingent interest that will accrue.

(2) *Examples.* The provisions of paragraph (g)(1) of this section may be illustrated by the following examples:

Example (1). (i) X is a public charity not subject to Federal income tax pursuant to section 510(a). On July 1, 1986, X lends $1,000,000 to M, a taxable corporation, in exchange for M's 5-year debt instrument having an issue price, under section 1273(b)(2) and § 1.1273–2(b)(2), of $1,000,000. All of the interest under the debt instrument is contingent upon the profits from M's business, and accrues annually and is payable at maturity. The interest that accrues for each year under the debt instrument is equal to a specified percentage of the profits from M's business during that calendar year. The specified percentages for each year are as follows:

Year	Percentage
1986	4.0
1987	3.2
1988	2.4
1989	1.6
1990	0.8

(ii) Assume that paragraph (g)(1) of this section applies to the debt instrument by virtue of the fact that X is not subject to Federal income taxation. The Commissioner may, therefore, reallocate the interest that accrues under M's debt instrument in a manner consistent with section 1272 and the regulations thereunder. Assume that M's profits for 1986 are $5,000,000. Accordingly, the amount of interest that accrues as of December 31, 1986, is $200,000. Absent special circumstances, the Commissioner may assume that A's profits for the years 1987 through 1990 will remain at $5,000,000. Under this assumption, the amount of interest payable at maturity would be $600,000 ($200,000 + $160,000 + $120,000 + $ 80,000 + $40,000), the stated redemption price at maturity of M's debt instrument would be, under § 1.1273–1(b)(1), $1,600,000, and the yield, under § 1.1272–1(f), would be 9.85615, compounded annually. The Commissioner may, therefore, limit M's interest deduction for M's taxable year in which December 31, 1986 occurs, to $98,561 (the product of this issue price, $1,000,000, and the yield, .098561).

Example (2). The facts are the same as in example (1), except that M lends $1,000,000 to X for a term of 5 years, and the specified percentages of M's profits for each year that are payable as contingent interest are as follows:

Year	Percentage
1986	0
1987	0
1988	5
1989	5
1990	5

Assume that paragraph (g)(1) of this section applies to X's debt instrument, and that M's profits for 1986 are $5,000,000. Assuming that M's profits will remain at this level, the amount of interest payable at maturity would be $750,000 (3x.05x$5,000,000). The yield of the debt instrument under this assumption would be 11.8427%, compounded annually. The Commissioner may, therefore, require M to include in gross income for its taxable year in which December 31, 1986 occurs, $118,427 ($1,000,000x.118427).

§ 1.1275–5 Variable rate debt instruments.

(a) *Applicability.* The rules of this section shall apply to variable rate debt instruments. For purposes of sections 1271 through 1275, a variable rate debt instrument is a debt instrument which states interest based on current values (within the meaning of paragraph (c) of this section) of an objective interest index (within the meaning of paragraph (b) of this section). Payments of interest under a debt instrument that provides for a variable rate of interest that is not based on current values of an objective interest index described in paragraph (b) of this section shall be treated as contingent payments in accordance with the rules of §§1.1274–3(d)(2) and 1.1275–4.

(b) *Objective interest index.* The term "objective interest index" means either—

(1) A rate which, as of the issue date of the debt instrument, is made known publicly and offered currently to unrelated borrowers in private lending transactions by a financial institution, or

(2) A rate reflecting an average (based on a statistically significant sample) of current yields on a class of publicly traded debt instruments.

Examples of objective interest indices include the prime rate of a designated financial institution, LIBOR (London Interbank Offered Rate), the applicable Federal rate, and the average yield on Treasury securities as published in Federal Reserve bulletins. For purposes of this section, interest expressed as a fixed multiple of an objective interest index or as a constant number of percentage or basis points more or less than an objective interest index shall constitute interest based on an objective interest index. However, interest expressed as a fixed multiple of an objective interest index plus or minus a constant number of percentage or basis points shall not constitute interest based on an objective interest index.

(c) *Current values*—(1) *Debt instruments issued after May 8, 1986.* In the case of a debt instrument issued after May 8, 1986, an interest rate shall not be considered to be based on current values of an index unless the rate in effect during any accrual period is based on values of the index in effect—

(i) No later than the close of that accrual period, and

(ii) No earlier than three months prior to the beginning of the first accrual period during which such rate was in effect.

(2) *Debt instruments issued after July 1, 1982, and before May 8, 1986.* In the case of a debt instrument issued after July 1, 1982, and before May 8, 1986, an interest rate shall not be considered to be based on current values of an index unless the rate in effect during any accrual period is based on values of the index in effect—

(i) No later than the close of that accrual period, and

(ii) No earlier than one year prior to the beginning of the first accrual period during which such rate was in effect.

(d) *Original issue discount on variable rate debt instrument*—(1) *Debt instruments for which the issue price equals the stated principal amount*. Except as provided in paragraph (d)(4) of this section, in the case of a variable rate debt instrument for which the issue price equals the stated principal amount but which has original issue discount because some or all of the stated interest under the debt instrument is not qualified periodic interest, the excess of the amount of interest that actually accrues under the terms of the debt instrument during an accrual period over any qualified periodic interest shall constitute original issue discount for this period.

(2) *Debt instruments for which the issue price is less than the stated principal amount*. In the case of a variable rate debt instrument for which the issue price is less than the stated principal amount, the amount of original issue discount allocable to each accrual period shall be equal to the sum of—

(i) The amount of original issue discount allocable to the period as set forth in paragraph (d)(1) of this section (if any), and

(ii) The excess of—

(A) The product of the hypothetical adjusted issue price (as defined in paragraph (d)(3)(i) of this section) at the beginning of the accrual period and the hypothetical yield of the debt instrument (as defined in paragraph (d)(3)(ii) of this section), over

(B) The amount of hypothetical interest (as defined in paragraph (d)(3)(iii) of this section).

(3) *Definitions*—(i) *Hypothetical adjusted issue price*. The hypothetical adjusted issue price of a variable rate debt instrument at the beginning of an accrual period is the amount that would have been the adjusted issue price of the debt instrument under § 1.1272–1(e) had the debt instrument called for fixed interest at a rate equal to the rate established by the objective interest index on the issue date, or, in a transaction to which section 1274 applies and for which there was a binding written contract prior to the issue date, the contract date. See § 1.1274–6(e).

(ii) *Hypothetical yield*—(A) *In general*. The hypothetical yield of a debt instrument (other than a debt instrument to which section 1274 applies that does not have adequate stated interest) is the interest rate that would be the yield if the debt instrument called for a fixed rate of interest equal to the rate established by the objective interest index on the issue date or, if applicable, the contract date.

(B) *Debt instruments to which section 1274 applies that do not have adequate stated interest*. In the case of a variable rate debt instrument to which section 1274 applies that does not have adequate stated interest, the hypothetical yield shall be the imputed interest rate determined under § 1.1274–4.

(iii) *Hypothetical interest*. The hypothetical interest for an accrual period is the amount of interest that would have been paid or accrued with respect to that accrual period had the debt instrument called for a fixed rate of interest equal to the rate established by the objective interest index on the issue date or, if applicable, the contract date.

(4) *Special rule*. In cases in which a debt instrument provides for—

(i) A fixed rate of interest during some accrual periods and a variable rate in other accrual periods, or,

(ii) One variable rate during some accrual periods and one or more variable rates based on a different index or formula in other accrual periods,

any original issue discount on the debt instrument shall be reallocated in a manner consistent with the rules of sections 1272 and 1275 and the regulations thereunder to prevent the front-loading or back-loading of interest.

(5) *Examples*. The provisions of paragraphs (a) through (d) of this section may be illustrated by the following examples:

Example (1). Assume that on January 1, 1986, A lends B $100,000 in exchange for B's note having an issue price of $100,000 repayable in 10 years. A and B are unrelated, cash-method, calendar-year taxpayers. All interest is payable at maturity, compounded on June 30 and December 31 of each year, at a rate equal to the Federal short-term rate in effect on the compounding date. Assume that on June 30, 1986, the Federal short-term rate for that date is 8%, compounded semiannually. The amount of interest that accrues under that debt instrument for the first six-month accrual period is $4,000. This is the amount of original issue discount allocable to the first accrual period under paragraph (d)(1) of this section.

Example (2). (i) On July 1, 1986, A lends B $100,000 in return for B's note to A calling for a payment of $100,000 on June 30, 1990. Interest accrues on the outstanding loan balance at a variable rate based on current values of an objective interest index. The interest rate established is determined on June 30 and December 31 of each year for the preceding semiannual accrual period, and interest calculated under this rate is added to the outstanding loan balance. On each of those same dates, B agrees to make a payment of $9,000 to A (or the entire outstanding loan balance if less) in reduction of the outstanding loan balance. If the loan has not been repaid at the end of 15 years, B is obligated to repay the entire outstanding loan balance at that time.

(ii) None of the interest payments under B's note are qualified periodic interest (within the meaning of § 1.1273–2(b)(1)(ii) (since they are not payable at a fixed or variable rate of interest. The amount of original issue discount thus attributable to each semiannual accrual period is the amount of interest that accrues for that period under the terms of the debt instrument. The semiannual payments of $9,000 are payments other than qualified periodic interest and thus reduce the adjusted issue price at the beginning of the next succeeding accrual period pursuant to § 1.1272–1(e)(2)(ii). The adjusted issue price at the beginning of each accrual period represents the outstanding loan balance at the beginning of that period.

(iii) Assume that the rate of interest established by the index for the semiannual accrual period ending on January 1, 1987 is 10%, compounded semiannually. Thus, $5,000 of interest accrues for the first accrual period and constitutes the amount of original issue discount attributable to that period. The adjusted issue price of the debt instrument at the beginning of the second accrual period is, pursuant to § 1.1272–1(e)(2), $96,000, calculated as follows:

(1) Issue price	$100,000
(2) Original issue discount for the first accrual period	5,000
(3) Line (1) plus line (2)	$105,000
(4) Interest payment at end of first accural period	9,000
(5) Line (3) minus line (4)	$96,000

Example (3). (i) On January 1, 1986, A purchases nonpublicly traded property from B. A and B are cash-method taxpayers. In consideration for the sale, A gives B a 5–year debt instrument, maturing on December 31, 1990, with a stated principal amount of $500,000, calling for annual payments of interest on December 31 of each year, at a rate equal to two points less than the prime rate of a designated bank in effect at the time of payment. The annual payments of interest are qualified periodic interest payments (as defined in § 1.1273–2(b)(1)(ii)). The stated redemption price at maturity determined under § 1.1273–2(b)(1) is $500,000. The accrual period under § 1.1272–1(d)(1) coincides with the calendar year. Assume that on January 1, 1986, the prime rate of the designated bank expressed in terms of a rate based on annual compounding is 12%, and that therefore, the index rate on the issue date is 10%, compounded annually. Assume further that the test rate for this 5–year debt instrument is 12%, compounded annually. Thus, the debt instrument does not provide adequate stated interest under the provisions of § 1.1274–3(d)(1). The issue price is $463,952.24, the imputed principal amount determined under § 1.1274–4(e) by discounting at a rate of 12%, compounded annually, all payments that would be made under the debt instrument if the index rate were to remain constant at 10%, compounded annually. The debt instrument has $36,047.76 of original issue discount (stated redemption price at maturity, $500,000, less issue price, $463,952.24). The hypothetical yield, under paragraph (d)(3)(ii)(B) of this section, is 12%, compounded annually. The hypothetical adjusted issue price at the beginning of the first accrual period is, under § 1.1272–1(e)(1), the issue price.

(ii) The amount of original issue discount allocable to the first accrual period under paragraph (d)(2) of this section is determined as follows:

(1) Issue price	$463,952.24
(2) Hypothetical yield	.12
(3) Line (1) multiplied by line (2)	$55,674.27
(4) Less: hypothetical interest	50,000.00
(5) Line (3) minus line (4) (amount of original issue discount allocable to the first accrual period)	$5,674.27

The hypothetical adjusted issue price at the beginning of the second accrual period is $469,626.51, the sum of the issue price ($463,952.24) and the amount of original issue discount allocable to the first accrual period ($5,674.27). The amount actually paid as interest is includible as interest in gross income by B when received and deductible as interest from gross income by A when paid.

(iii) The amount of original issue discount allocable to the second accrual period is determined as follows:

(1) Hypothetical adjusted issue price on 1/1/87	$469,626.51
(2) Hypothetical yield	.12
(3) Line (1) multiplied by line (2)	$56,355.18
(4) Less: hypothetical interest	50,000.00
(5) Line (3) minus line (4) (amount of original issue discount allocable to the second accrual period)	$6,355.18

The hypothetical adjusted issue price at the beginning of the third accrual period is $475,981.69 ($469,626.51 + $6,355.18).

(iv) The amount of original issue discount attributable to the remaining three accrual periods is determined in a similar manner. The amount of original issue discount attributable to each of the five accrual periods is set forth in the table below:

Accrual period	Original issue discount
1986	$5,674.27
1987	6,355.18
1988	7,117.80
1989	7,971.94
1990	8,928.57

Example (4). (i) The facts are the same as in example (3), except that all interest is compounded annually on December 31 and paid at maturity. Based upon an interest rate of 10%, compounded annually, the amount payable at maturity will be $805,255, composed of $500,000 principal and $305,255 of deferred interest. The issue price is $456,923.31, which is the imputed principal amount determined under §§ 1.1274–3(d)(1) and 1.274–4 (the present value of $805,255, discounting at 12%, compounded annually). The hypothetical yield is 12%, compounded annually.

(ii) Assume that the actual amounts accured as interest under the debt instrument are as follows:

Year	Index rate (percent)	Interest accrued	Loan balance at end of year
1	14	$70,000.00	$570,000.00
2	11	62,700.00	632,700.00
3	9	56,943.00	689,643.00
4	13	89,653.59	779,296.59
5	11	85,722.62	865,019.21

The amount of original issue discount allocable to the first accrual period is determined under paragraph (d)(2) of this section as follows:

(1) Issue price	$456,923.31
(2) Hypothetical yield	.12
(3) Line (1) multiplied by line (2)	$54,830.80
(4) Less: hypothetical interest	50,000.00
(5) Line (3) minus line (4)	$4,830.80
(6) Amount of interest actually accrued	$70,000.00
(7) Line (5) plus line (6) (amount of original issue discount allocable to the first accrual period)	$74,830.80

The hypothetical adjusted issue price at the beginning of the second accrual period is $511,754.11, the sum of the issue price ($456,923.31) and the product of the price and the hypothetical yield of 12% ($54,830.80). The amount of original issue discount allocable to each of the five annual accrual periods is set forth in the following table:

Year	(1) Hypothetical adjusted issue price (HAIP)	(2) Yield × HAIP	(3) Hypothetical interest	(4) Column (2) minus column (3)	(5) Interest accrued	(6) OID column (4) plus column (5)
1	$456,923.31	$54,830.80	$50,000.00	$4,830.80	$70,000.00	$74,830.80
2	511,754.11	61,410.49	55,000.00	6,410.49	62,700.00	69,110.49
3	573,164.60	68,779.75	60,500.00	8,279.75	56,943.00	65,722.75
4	641,944.36	77,033.32	66,550.00	10,483.32	89,653.59	100,136.91
5	718,977.68	86,277.32	73,205.00	13,072.32	85,722.62	98,794.94

Example (5). (i) C lends $1,000,000 to D in exchange for D's 10-year note calling for semiannual payments of interest at a rate equal to the prime rate of a designated bank for the first 5 years, and semiannual payments of interest at a rate equal to 150% of the prime rate of the same bank for the second 5 years. All of the stated interest during the first 5 years and interest during the second 5 years, to the extent it does not exceed the prime rate of the designated bank, is qualified periodic interest within the meaning of § 1.1273–1(b)(1)(ii), and is therefore not subject to reallocation under paragraph (d)(4)(i) of this section. The additional interest of 50% of the prime rate payable in each of the last 5 years is treated as original issue discount and shall be reallocated and accounted for over the entire 10-year term of the debt instrument in a manner consistent with sections 1272 and 1275 and the regulations thereunder.

(ii) Assume that the prime rate of the designated bank on the issue date is 10%, compounded semiannually. If the prime rate were to remain at this rate over the entire term of D's debt instrument, the yield of the debt instrument, under § 1.1272–1(f), would be 11.802%, compounded semiannually, and the debt instrument would have $250,000 of original issue discount. The original issue discount allocable to the first ten semiannual accrual periods would be as follows:

Accrual period	Original issue discount
1	$9,012
2	9,543
3	10,107
4	10,703
5	11,334
6	12,003
7	12,712
8	13,462
9	14,256
10	15,098

C and D must account for these amounts of original issue discount during each of the first 5 years of the debt instrument. For each of the remaining ten accrual periods, the amount of original issue discount allocable to each such period is the amount of interest actually payable for the accrual period, reduced by the portion of the payment treated as qualified periodic interest and by the amount of original issue discount allocated to the corresponding semiannual accrual period during the first 5 years. For example, if the amount of interest payable with respect to the eleventh semiannual accrual period were $70,000, $50,000 would be treated as qualified periodic interest, $9,012 would be treated as a payment of original issue discount already accounted for during the first accrual period, and the remainder, $10,988, would be treated as original issue discount allocable to the eleventh accrual period.

§ 1.6045-1 [Amended]

Par. 29. Paragraph (c) of § 1.6045-1 is amended by removing the phrase "section 1232(b)(1)" every place it appears and adding in its place the phrase "section 1273(a)(1)".

§ 1.6049-4 [Amended]

Par. 30. Paragraph (e)(2) of § 1.6049-4 is amended by removing the phrase "section 1232 (a)(3)" and adding in its place the phrase "section 1271(a)(3)(A)".

Par. 31. Section 1.6049-5 is amended as follows:

1. In paragraph (b)(1)(vi)(B) (*4*) by removing the phrase "section 1232 (b)(1)" and adding in its place the phrase "section 1273 (a)(1)".

2. In paragraph (c) by removing the ninth sentence thereof and by revising the second, fourth and seventh sentences to read as follows:

§ 1.6049-5 Interest and original issue discount subject to reporting after December 31, 1982.

* * * * *

(c) *Original issue discount treated as payment of interest.* * * * In the case of an obligation as to which there is during any calendar year an amount of original issue discount includible in the gross income of any holder (as determined under section 1272 and the regulations thereunder), the issuer of the obligation or a middleman (as defined in § 1.6049-4(f)(4)) shall be treated as having an amount of interest equal to the amount of original issue discount so includible without regard to any reduction by reason of an acquisition premium under section 1272(a)(6) and (b)(4) or a purchase at a premium under section 1272(c)(1) and § 1.1275-1(f). * * * In the case of (1) an obligation to which section 1272 does not apply (for example, a short-term government obligation as defined in section 1271(a)(3)(A)) and (2) an obligation issued on or before December 31, 1982, in bearer form, the amount of original issue discount includible in gross income shall be treated as if paid in the calendar year in which the date of maturity occurs or in which the date of redemption occurs if redemption occurs before maturity. * * * Discount on short term government obligations as defined in section 1271(a)(3)(B), such as Treasury bills, and discount on other obligations with a maturity at the date of issue of not more than 1 year (a short term obligation), including commerical paper, when paid at maturity or redemption if redemption occurs before maturity, shall constitute a payment of interest for purposes of section 6049. * * *

§ 1.6049-6 [Amended]

Par 32. Paragraph (d) of § 1.6049-6 is amended by removing the phrase "section 1232A" and adding in its place the phrase "section 1272 (a)".

Par. 33. Paragraph (e) of § 1.7872-4, as proposed in the **Federal Register** for August 20, 1985, (50 FR 33561) is revised to read as follows:

§ 1.7872-4 Types of below-market loans.

* * * * *

(e) *Tax avoidance loan*—(1) *In general.* A tax avoidance loan is any below-market loan one of the principal purposes for the interest arrangements of which is the avoidance of Federal tax with respect to either the borrower or the lender, or both. For purposes of this rule, tax avoidance is a principal purpose of the interest arrangements if a principal factor in the decision to structure the transaction as a below-market loan (rather than, for example, as a market interest rate loan and a payment by the lender to the borrower) is to reduce the Federal tax liability of the borrower or the lender or both. The purpose for entering into the transaction (for example, to make a gift or to pay compensation) is irrelevant in determining whether a principal purpose of the interest arrangements of the loan is the avoidance of Federal tax.

(2) *Certain loans incident to sales or exchanges.* If, pursuant to a plan that is incident to a sale or exchange of property, a party who is related (within the meaning of section 168(e)(4)(D)) to the seller—

(i) Makes a below-market loan to the buyer of the property, or

(ii) Makes a below-market loan to the seller that is assumed by the buyer in connection with the sale or exchange, then the loan shall be treated as a tax avoidance loan within the meaning of paragraph (e)(1) of this section. There shall be an irrebuttable presumption that such a plan exists if such a loan is made within one year of the sale or exchange.

(3) *Examples.* The provisions of paragraph (e) of this section may be illustrated by the following examples:

Example (1). (i) S and T are each wholly-owned subsidiaries of P. S sells property to an individual, A, for cash of $3,000,000. Three months after the sale, T loans to A $2,000,000 for 10 years at an interest rate of 6%, payable semiannually. On the date the loan is made, the Federal long-term rate is 12%, compounded semiannually.

(ii) The loan from T to A is a tax avoidance loan pursuant to paragraph (e)(2) of this section. The issue price of the debt instrument given in exchange for the loan is $1,311,805, and the total amount of foregone interest is $688,195. On the date the loan is made, A is treated as having received a refund of $688,195 of the purchase price of the property from S, thereby reducing A's basis in the property by this amount. T is treated as having paid a dividend of $688,195 to P, and P is treated as having made a contribution to the capital of S in the same amount.

Example (2). The facts are the same as in example (1), except that T loans the $2,000,000 to S immediately before the sale. A purchases the property for cash of $1,000,000 and assumes S's debt to T. On the date of the sale, the Federal long-term rate is 12%, compounded semiannually. The loan from T to S is a tax-avoidance loan. The issue price of the debt instrument and the amount of foregone interest are the same as in example (1). A's basis in the property is limited to $2,311,805 (see § 1.1274-7(d)). T is treated as having paid a dividend of $688,195 to P, and P is treated as having made a contribution to the capital of S in the same amount.

§ 1.9006-1 [Amended]

Par. 34. Paragraph (c)(1)(vii) of § 1.9006-1 is amended by removing the phrase "May 27, 1969." and adding in its place the phrase "May 27, 1969, and before July 18, 1984."

PART 3—CAPITAL CONSTRUCTION FUND

Par. 35. The authority citation for Part 3 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 3.2 [Amended]

Par. 36. Paragraph (d) of § 3.2 is amended by removing the phrase "ratable monthly portion" every place it appears and adding in its place the word "amount", and by removing the phrase "section 1232(a)(3)" every place it appears and adding in its place the phrase "section 1272".

§ 3.3 [Amended]

Par. 37. Paragraph (b) of § 3.3 is amended by removing the phrase "section 1232(a)(3)(E)" every place it appears and adding in its place the phrase "section 1272(d)(2)", and by removing the phrase "ratable monthly portion" every place it appears and adding in its place the word "amount".

PART 5f—TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982

Par. 38. The authority citation for Part 5f continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 5f.163-1 [Amended]

Par. 39. Paragraph (f) of § 5f.163-1 is amended by removing the word "1232(d)" from each place that it appears and adding in its place the word "1287", and by removing the phrase "section 1232B" from each place that it appears and adding in its place the phrase "section 1286".

PART 6a—TEMPORARY REGULATIONS UNDER TITLE II OF THE OMNIBUS RECONCILIATION ACT OF 1980

Par. 40. The authority citation for Part 6a continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 6a.103A-2 [Amended]

Par. 41. Paragraph (i)(2)(vi)(B) of § 6a.103A-2 is amended by removing the phrase "section 1232(b)(2)" and adding in its place the phrase "section 1273(b)".

PART 25—GIFT TAX; GIFTS MADE AFTER DECEMBER 31, 1954

Par. 42. The authority for Part 25 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 25.2512-8 also issued under 26 U.S.C. 483(g) and 26 U.S.C. 1275(d).

Par. 43. Section 25.2512-4 is revised to read as follows:

§ 25.2512-4 Valuation of notes.

The fair market value of notes, secured or unsecured, is presumed to be the amount of unpaid principal, plus accrued interest to the date of the gift, unless the donor establishes a lower value. The fair market value of a debt instrument (as defined in § 1.1275-1(b)) whose issue price is determined under section 1273(b) (1), (2), or (3), or section 1274 is presumed to be its revised issue price (as defined in § 1.1275-1(h)). Unless returned at this value, it must be shown by satisfactory evidence that the note is worth less than the unpaid amount (because of the interest rate, or date of maturity, or other cause), or that the note is uncollectible in part (by reason of the insolvency of the party or parties liable, or for other cause), and that the property, if any, pledged or mortgaged as security is insufficient to satisfy it. See § 25.2512-8 and § 1.1012-2 for special rules relating to certain sales or exchanges of property. See § 25.7872-1 for special rules in the case of gift loans (within the meaning of § 1.7872-4(b)) made after June 6, 1984.

Par. 44. Section 25.2512-8 is revised to read as follows:

§ 25.2512-8 Transfers for insufficient or excessive consideration.

Transfers reached by the gift tax are not confined to those only which, being without a valuable consideration, accord with the common law concept of gifts, but embrace as well sales, exchanges, and other dispositions of property for a consideration to the extent that the value of the property transferred by the donor differs from the value in money or money's worth of the consideration given therefor. However, a sale, exchange, or other transfer of property made in the ordinary course of business (a transaction which is bona fide, at arm's length, and free from any donative intent), will be considered as made for consideration in money or money's worth equal to the value of the property transferred. If the buyer issues one or more debt instruments as all or a part of the consideration for the property, then the property and the debt instruments shall be valued in accordance with the rules set forth in § 1.1012-2. A consideration not reducible to a value in money or money's worth, as love and affection, promise of marriage, etc., is to be wholly disregarded, and the entire value of the property transferred constitutes the amount of the gift. Similarly, a relinquishment or promised relinquishment of dower or curtesy, or of a statutory estate created in lieu of dower or curtesy, or of other material rights in the spouse's property or estate, shall not be considered to any extent a consideration "in money or money's worth." See, however, section 2516 and the regulations thereunder with respect to certain transfers incident to a divorce.

PART 514—FRANCE

Par. 45. The authority citation for Part 514 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 514.23 [Amended]

Par. 46. Section 514.23 is amended by removing the phrase "section 1232(b)" from paragraph (b) every place it appears and adding in its place the phrase "section 1273".

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on April 2, 1986, 8:45 a.m., and published in the issue of the Federal Register for April 8, 1986, 51 F.R. 12022)

Announcement of the Disbarment, Suspension, or Consent to Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents and Enrolled Actuaries from Practice Before the Internal Revenue Service

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Revenue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletin for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

The following individuals have been placed under consent suspension from practice before the Internal Revenue Service:

Name	Address	Designation	Term of Suspension
Louis Crown	Bayside, NY	Certified Public Accountant	Indefinite from March 14, 1986
David H. Heilman	Council Grove, KS	Attorney	Indefinite from March 14, 1986
Beryl W. Markwell	Elmhurst, IL	Certified Public Accountant	Twenty-four Months from March 20, 1986
Marc Pozner	Tenafly, NJ	Certified Public Accountant	Indefinite from March 14, 1986
A. Russel Lucid	Norwell, MA	Attorney	Indefinite from March 26, 1986
Gary E. Borushko	Grosse Pointe Wood, MI	Certified Public Accountant	Indefinite from April 7, 1986
Paul Skulsky	Spring Valley, NY	Certified Public Accountant	Indefinite from April 1, 1986

Under Section 330, Title 31 of the United States Code (1970 ed.), the Secretary of the Treasury, after due notice and opportunity for hearing, is authorized to suspend or disbar from practice before the Internal Revenue Service any attorney, certified public accountant, enrolled agent, or enrolled actuary who has violated the rules and regulations governing such practice.

Attorneys, certified public accountants, enrolled agents and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before their Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify such disbarred or suspended practitioners, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been disbarred or suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date of disbarment or period of suspension. This announcement will continue to appear in the weekly Bulletin for five successive weeks for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended or disbarred and will later be consolidated and published in the Cumulative Bulletin.

After due notice and opportunity for hearing, the following individuals have been disbarred from further practice before the Internal Revenue Service:

Name	Address	Designation	Effective Date
Thomas G. Abernethy, Jr.	Jackson, MS	Attorney	March 7, 1986
Thomas H. Foxhill, Jr.	Pemberton, NJ	Enrolled Agent	April 12, 1986
Peter Parker	Baltimore, MD	Attorney	April 12, 1986

Announcement of the Suspension, Termination, or Consent to Voluntary Suspension or Termination of Enrollment to Perform Actuarial Services Under the Employee Retirement Income Security Act of 1974

Under 20 Code of Federal Regulations, Part 901, an enrolled actuary, in order to avoid the initiation or conclusion of a suspension or termination proceeding, may offer his/her consent to suspension of enrollment. The Executive Director, Joint Board for the Enrollment of Actuaries, may suspend enrollment in accordance with the consent offered. An enrolled actuary whose enrollment is suspended is prohibited from performing actuarial services under the Employee Retirement Income Security Act of 1974 (ERISA) during the period of suspension.

To enable employees of the Internal Revenue Service and others to indentify enrolled actuaries under suspension, the Executive Director will announce in the Internal Revenue Bulletin the names and addresses of enrolled actuaries who have been suspended. This announcement will appear in the weekly Bulletin at the earliest practicable date following suspension and will continue to appear in the weekly Bulletin for at least three successive weeks for each enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

Name of Enrolled Actuary	Address	Term of Suspension
Robert E. Nemann	Cincinnati, OH	For three months effective April 9, 1986

Announcement Relating to Proposed Regulations Published With Notice of Proposed Rulemaking

Changes in regulations as announced below have been published in the Federal Register in tentative or proposed form to provide interested parties with an opportunity to file their objections or suggestions for consideration prior to final adoption of such regulations. These announcements will appear in the Bulletin during the period which has been prescribed for the submission and consideration of any views, arguments, or suggestions pertaining to the proposed regulations so published. Statement of such views, arguments or suggestions should be submitted in writing, preferably six copies, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

Section affected	Subject	Published in the Bulletin	Expiration date for submission of views
26 CFR 1.72-4, 1.72-5, 1.72-6, 1.72-7, 1.72-9, 1.72-11, 1.403(b)-1(d)(4), 1.403(b)-1(d)(4)(ii), amended; 1.403(b)-1(d)(4)(iv), 1.401(a)-18, 1.401(j)-1 through 1.401(j)-6, removed; 1.403(b)-1(d)(4)(iv), added.	Unisex annuity tables	1986-16 I.R.B. 9	May 8, 1986

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as "rulings") that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with *modified, below*).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with *amplified* and *clarified*, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in law or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in the new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1954 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, *modified and superseded* describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.

[1] A cumulative finding list for previously published rulings mentioned in Internal Revenue Bulletins 1985-26 through 1985-52 will be found in Internal Revenue Bulletin 1986-1, dated January 6, 1986.

Index

Internal Revenue Bulletins 1986-14 Through 1986-17

For index of items published during the last six months of 1985, see I.R.B. 1986-1, dated January 6, 1986.

The abbreviation and number in parentheses following the index entry refer to the specific item; numbers in roman and italic type following the parentheses refer to the Internal Revenue Bulletin in which the item may be found and the page number on which it appears.

Key to Abbreviations:

RR	Revenue Ruling
RP	Revenue Procedure
TD	Treasury Decision
CD	Court Decision
PL	Public Law
EO	Executive Order
DO	Delegation Order
TDO	Treasury Department Order
TC	Tax Convention
SPR	Statement of Procedural Rules
PTE	Prohibited Transaction Exemption

EMPLOYMENT TAXES

- Books and records:
  - ADP systems, guidelines (RP 19) 14, *10*
- Deficiencies:
  - Adjusted interest rate (RR 59) 16, *6*
- Forms:

INTERNAL REVENUE BULLETIN

The Introduction on page 3 describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of the weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and *are not* included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

BULLETIN INDEX-DIGEST SYSTEM

The Bulletin Index-Digest System provides a fast and easy way to research Revenue Rulings, Revenue Procedures, Public Laws, Treasury Decisions, and other matters of a permanent nature published in the weekly Internal Revenue Bulletin, or Cumulative Bulletin from 1953 on. It is a comprehensive and up-to-date research tool that requires no filing or other clerical maintenance. The current revision consists of four Services, available on a subscription basis, each including a basic volume that covers the period 1953-1983/1984 and a cumulative supplement covering material published in subsequent Bulletins for the following two-year period. Cumulative supplements are issued quarterly for the Income Tax Service and semiannually for the Estate and Gift, Employment, and Excise Tax Service.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Please allow two to six weeks, plus mailing time, for delivery.

SPECIAL ANNOUNCEMENTS

Announcement 86-61, page 18.
A public hearing will be held on June 12, 1986, on proposed regulations relating to information returns, statements, and notifications required when there is a sale or exchange of partnership interests.

Announcement 86-62, page 19.
A public hearing will be held on June 5, 1986, on proposed regulations relating to the recapture of overall foreign losses.

INCOME TAX

Rev. Rul. 86-64, page 6.
Federal short-term, mid-term, and long-term rates. For purposes of section 1274(d) of the Code, relating to certain transactions in which a debt instrument is issued for property, a table sets forth the applicable federal short-term, mid-term, and long-term rates for May 1986.

Rev. Rul. 86-65, page 5.
Fringe benefits; aircraft valuation formula. For purposes of section 1.61-2T(g) of the temporary regulations, relating to the rule for valuing noncommercial flights on employer-provided aircraft, the Standard Industry Fare Level (SIFL) cents-per-mile rates and the terminal charge in effect on December 31, 1985, are set forth.

Rev. Rul. 86-66, page 5.
Gross income; industrial project; leasing arrangement between corporation and political subdivision. A corporation described in Rev. Rul. 68-590 must include in its gross income amounts received by the bond trustee from the investment of the net bond proceeds during a temporary period and from the investment of the reserve fund if the investment income inures to the benefit of the corporation. Rev. Rul. 68-590 amplified.

Rev. Rul. 86-67, page 6.
Deductions; balance of a decedent's unamortized loan costs. The balance of unamortized loan costs incurred by a taxpayer may be deducted on the final income tax return for the year of the taxpayer's death.

Announcement 86-59, page 16.
Guidance is provided to taxpayers who make an election to accrue vacation pay under section 463 of the Code.

Announcement 86-65, page 19.
The Service will not follow the Tax Court's decision in *Orange and Rockland Utilities*, filed February 18, 1986, and *Public Service Co. of New Hampshire*, 78 T.C. 445 (1982), relating to the accrual of income of utilities.

EMPLOYEE PLANS

Announcement 86-60, page 17.
The dates for application of the provisions of Notice 86-3, relating to relief for certain employee plans that were not timely amended, have been extended. A straight 10-percent-per-month reduction in the number-of-months factor after the applicable compliance date has passed now applies to employer deductions, and additional provisions relate to the scope of relief provided to tax credit ESOP's.

EXCISE TAXES

Rev. Rul. 86-68, page 7.
Taxable sale price; excludability of certain transportation and delivery expenses. The actual transportation and delivery charges for shipping a truck directly from a manufacturer to a retail dealer's customer are includable in the dealer's taxable sale price to the extent that such charges do not exceed the charges that would have been incurred to ship the truck from the manufacturer to the retail dealer through whom the truck was ordered.

Announcement 86-63, page 19.
Taxpayers liable for the manufacturers excise tax on coal should start to report and pay the tax at the increased rate provided in Pub. L. 99-272 for the quarter ending June 30, 1986.

ADMINISTRATIVE

Rev. Proc. 86-22, page 9.
Penalties; substantial understatement; adequate disclosure. For returns required to be filed and that are actually filed in 1986, circumstances are identified under which the disclosure on a taxpayer's return of an item or a position taken, with no specific reference to sec-

Department of the Treasury
Internal Revenue Service

T22.23:

1986-17

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenues at the least cost to the public, and in a manner that warrants the highest degree of public confidence in our integrity, efficiency and fairness. To achieve that purpose, we will:

—Encourage and achieve the highest possible degree of voluntary compliance in accordance with the tax law and regulations;

—Advise the public of their rights and responsibilities;

—Determine the extent of compliance and the causes of noncompliance;

—Do all things needed for the proper administration and enforcement of the tax laws;

—Continually search for and implement new, more efficient and effective ways of accomplishing our Mission.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

T22.23:

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents of a permanent nature are consolidated semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

Part I.—1954 Code.

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1954.

Part II.—Treaties and Tax Legislation.

This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.

To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts.

Part IV.—Items of General Interest.

With the exception of the disbarment and suspension list included in this part, none of these announcements is consolidated in the Cumulative Bulletins.

The first Bulletin for each month includes an index for the matters published during the preceding month. These monthly indexes are cumulated on a quarterly and semiannual basis, and are published in the first Bulletin of the succeeding quarterly and semi-annual period, respectively.

The Bulletin Index-Digest System, a research and reference service supplementing the Bulletin, may be obtained from the Superintendent of Documents on a subscription basis. It consists of four Services: Service No. 1, Income Tax; Service No. 2, Estate and Gift Taxes; Service No. 3, Employment Taxes; Service No. 4, Excise Taxes. Each Service consists of a basic volume and a cumulative supplement that provide (1) finding lists of items published in the Bulletin, (2) digests of revenue rulings, revenue procedures, and other published items, and (3) indexes of Public Laws, Treasury Decisions, and Tax Conventions.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Prices: Domestic—$1.75 a single copy, $82.00 a year subscription. Foreign—$2.19 a single copy, $102.50 a year for subscription.

Part I. Rulings and Decisions Under the Internal Revenue Code of 1954

Section 61.—Gross Income Defined

Fringe benefits; aircraft valuation formula. For purposes of section 1.61-2T(g) of the temporary regulations, relating to the rule for valuing noncommercial flights on employer-provided aircraft, the Standard Industry Fare Level (SIFL) cents-per-mile rates and the terminal charge in effect on December 31, 1985, are set forth.

Rev. Rul. 86-65

For purposes of fringe benefit taxation under section 61 of the Internal Revenue Code, section 1.61-2T(g) of the Temporary Income Tax Regulations provides a rule for valuing noncommercial flights on employer-provided aircraft. Section 1.61-2T(g)(5) of the temporary regulations sets forth an aircraft valuation formula to determine the value of such flights. The value of a flight is determined by multiplying the base aircraft valuation formula for the period during which the flight was taken by the appropriate aircraft multiple provided in section 1.61-2T(g)(7) and then adding the applicable terminal charge. The value of a particular flight during the first 6 months of a calendar year is determined by using the base aircraft valuation formula (also known as the Standard Industry Fare Level formula or SIFL) and the terminal charge in effect on December 31 of the preceding year. The value of a particular flight during the last 6 months of a calendar year is determined by using the SIFL formula and terminal charge in effect on June 30 of that year. The SIFL cents-per-mile rates in the formula and the terminal charge are calculated by the Department of Transportation and are revised semi-annually.

The Department of Transportation has determined that the terminal charge in effect on December 31, 1985, is $26.19 and the SIFL formula in effect on December 31, 1985, is $.1433 per mile for the first 500 miles, $.1092 per mile for miles between 501 and 1500, and $.1050 per mile for miles over 1500.

26 CFR 1.61-1: Gross income.
(Also Section 103; 1.103-1.)

Gross income; industrial project; leasing arrangement between corporation and political subdivision. A corporation described in Rev. Rul. 68-590 must include in its gross income amounts received by the bond trustee from the investment of the net bond proceeds during a temporary period and from the investment of the reserve fund if the investment income inures to the benefit of the corportion. Rev. Rul. 68-590 amplified.

Rev. Rul. 86-66

ISSUE

Will the corporation described in Rev. Rul. 68-590, 1968-2 C.B. 66, be required to include in its gross income, under section 61 of the Internal Revenue Code, income received by the bond trustee from the investment of the net bond proceeds during a construction period and from the investment of the reserve fund where the investment income inures to the benefit of the corporation?

FACTS

Rev. Rul. 68-590 describes a typical industrial development bond financing arrangement involving the use of tax-exempt bonds to finance the purchase or construction of a project for a private industrial corporation. The revenue ruling treats the corporation as the owner of the project for federal income tax purposes.

Rev. Rul. 68-590 sets forth eight tax consequences of treating the corporation as owner of the project for federal income tax purposes. However, an additional question has arisen regarding the federal income tax treatment of any investment income received by the bond trustee when the trustee invests the net bond proceeds during the construction period or invests the portion of bond proceeds placed in a reserve fund, where the investment income is used to redeem bonds.

LAW AND ANALYSIS

Section 61(a) of the Code provides that, except as otherwise provided by law, gross income means all income from whatever source derived.

Rev. Rul. 68-590 concludes that the corporation described therein must take into account any premium or discount on the bonds under section 61 of the Code. The ruling also concludes that the corporation may deduct the trustee's fees pursuant to section 162. Thus, the corporation is treated as the owner of the net bond proceeds as well as the owner of the project financed with the bond proceeds. Accordingly, any investment income received by the bond trustee when the trustee invests the net bond proceeds during a temporary period, or invests the portion of bond proceeds placed in a reserve fund, under circumstances in which the investment income inures to the benefit of the corporation, will be considered the gross income of the corporation.

HOLDING

The corporation must include in its gross income, under section 61 of the Code, income received by the bond trustee from the investment of the net bond proceeds during a construction period and from the investment of the reserve fund. However, for industrial development bonds issued after December 31, 1984, an amount required to be paid to the United States under section 103(c)(6)(D) is not gross income and no deduction is allowed for any amount paid to the United States under section 103(c)(6)(D). *See* section 103(c)(6)(G).

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 68-590 is amplified.

Section 103.—Interest on Certain Government Obligations

26 CFR 1.103-1: Interest upon obligations of a State, Territory, etc.

Whether, for industrial development bonds issued after December 31, 1984, an amount required to be paid to the United States under section 103(c)(6)(D) of the Code is gross income. See Rev. Rul. 86-66, this page.

Section 461.—General Rule for Taxable Year of Deduction

26 CFR 1.461-1: General rule for taxable year of deduction.

Deductions; balance of a decedent's unamortized loan costs. The balance of unamortized loan costs incurred by a taxpayer may be deducted on the final income tax return for the year of the taxpayer's death.

Rev. Rul. 86-67

ISSUE

Whether the balance of unamortized mortgage loan costs incurred by a taxpayer may be deducted on the income tax return for the year of the taxpayer's death.

FACTS

A died in 1983. During *A*'s lifetime, *A* purchased a number of single-family homes, townhouses, and condominiums that *A* leased to others. *A* financed each purchase by obtaining a mortgage loan from a financial institution. In order to obtain the mortgages, *A* incurred various loan costs for services provided by the lender, such as appraisal fees, settlement fees, and notary fees. *A* also incurred other expenses in connection with obtaining the mortgages including commissions, abstract fees, and recording fees. None of these expenses were in the nature of "points," that is, charges made for the use or forbearance of money that are considered to be interest. These various expenses were capitalized and amortized over the terms of the mortgage loans to which such expenses related. When *A* died in 1983, there was a total balance of *x* dollars of unamortized loan costs with respect to the mortgages. *A*'s estate continued to make payments on the loans. The balance of the unamortized mortgage loan costs was deducted on *A*'s final income tax return for 1983.

LAW AND ANALYSIS

Expenses incurred to obtain a loan are capital expenditures that must be amortized over the period of the loan. *See Enoch v. Commissioner*, 57 T.C. 781, 794-95 (1972), *acq.* on this issue, 1974-1 C.B. 1, in which the United States Tax Court held that loan expenses must be capitalized and cannot be deducted in the year paid. *See also* Rev. Rul. 70-360, 1970-2 C.B. 103.

In *S. & L. Building Corp. v. Commissioner*, 19 B.T.A. 788 (1930), *acq.* X-1 C.B. 60 (1931), a corporation was allowed to deduct the balance of unamortized loan costs in the year mortgaged property was sold and the mortgage assumed by the purchaser. The court said the mortgage fees were a cost of the use of the borrowed money, rather than a cost of the property securing the mortgage. When a taxpayer no longer bears the burden of a mortgage, a deduction should be allowed for the remaining portion of the associated unamortized mortgage loan fees. In *Longview Hilton Hotel Company v. Commissioner*, 9 T.C. 180 (1947), *acq.* 1947-2 C.B. 3, the taxpayer corporation was allowed a deduction for similar costs upon its dissolution when it transferred the mortgaged property to its eight shareholders who assumed the mortgage indebtedness. In *Anover Realty Corporation v. Commissioner*, 33 T.C. 671 (1960), a transferee corporation that assumed a mortgage on transferred property argued that loan expenses that were incurred by the transferor for the sole purpose of acquiring a business asset (the mortgaged property) should follow the asset when it was transferred. The court stated that the loan expenses were made to obtain the use of the money; the purpose of the loan itself did not matter. "If the debt is assumed by the transferee it merely marks an earlier end to the period for which the borrower had the use of the money, which means the borrower . . . can take the unamortized balance as a deduction in the year of transfer." 33 T.C. at 675.

Expenses incurred to obtain a loan are distinguishable from expenses incurred in connection with the acquisition of an income-producing asset, such as a lease. For example, in *Plaza Investment Co. v. Commissioner*, 5 T.C. 1295 (1945), the taxpayer corporation had paid a commission to a broker who had secured a tenant for a long term lease. Upon dissolution, the corporation transferred the lease to its shareholders and deducted the balance of the commission on its final return. The court indicated that the commission was a capital expenditure to acquire an income-producing asset. The dissolution of the corporation did not terminate the lease, so the benefit of the expense continued until the lease expired resulting in the expense being amortized over the remainder of the lease term. The court distinguished *S. & L. Building Corp.* by pointing out that payments to obtain a loan do not add value to the mortgaged property and do not result in acquiring an income-producing asset; they are expenses in connection with the creation of a liability. *Accord, Wolan v. Commissioner*, 184 F.2d. 101 (10th Cir. 1950), *aff'g* No. 17,250 (T.C.M. 1949). *See also* Rev. Rul. 81-161, 1981-1 C.B. 313.

Although none of the above cited authorities concerns the deduction of unamortized loan costs of a decedent, the principles set forth in these authorities are applicable to the facts here. A taxpayer's death, a corporation's dissolution, or an arm's length sale of mortgaged property—all terminate the use of loan proceeds and mark the appropriate time to deduct the balance of unamortized loan costs. The authorities cited above are not concerned with the nature of the termination of the taxpayer's liability. Here, *A*'s death ends the period during which *A* benefited from the expenses incurred to obtain the loans.

HOLDING

The *x* dollars of unamortized mortgage loan costs *A* incurred is deductible on *A*'s final income tax return for 1983.

Section 467.—Certain Payments for the Use of Property or Services

Federal short-term, mid-term and long-term rates are set forth for the month of May 1986. See Rev. Rul. 86-64, below.

Section 483.—Interest on Certain Deferred Payments

Federal short-term, mid-term and long-term rates are set forth for the month of May 1986. See Rev. Rul. 86-64, below.

Section 1274.—Determination of Issue Price in the Case of Certain Debt Instruments Issued for Property

(Also Sections 467, 483, 7872.)

Rev. Rul. 86-64

For purposes of section 1274(d) of the Internal Revenue Code, the short-term, mid-term, and long-term applicable federal rates (AFR) for the month of May 1986 are as follows:

	Period for Compounding			
	Annual	Semiannual	Quarterly	Monthly
Short-Term				
AFR	6.95%	6.83%	6.77%	6.73%
110% AFR	7.65%	7.51%	7.44%	7.40%
120% AFR	8.37%	8.20%	8.12%	8.06%
Mid-Term				
AFR	7.43%	7.30%	7.23%	7.19%
110% AFR	8.19%	8.03%	7.95%	7.90%
120% AFR	8.95%	8.76%	8.67%	8.60%
Long-Term				
AFR	7.81%	7.66%	7.59%	7.54%
110% AFR	8.61%	8.43%	8.34%	8.29%
120% AFR	9.40%	9.19%	9.09%	9.02%

Section 4051.—Imposition of Tax on Heavy Trucks and Trailers Sold at Retail

26 CFR 145.4051-1: Imposition of tax on heavy trucks and trailers sold at retail.

Whether certain delivery expenses are includable in taxable sale price as defined in section 4216(a) of the Code for purposes of the retailers excise tax on trucks imposed by section 4051(a)(1) of the Code. See Rev. Rul. 86-68, below.

Section 4052.—Definitions and Special Rules

26 CFR 145.4052-1: Special rules and definitions.
(Also Sections 4051; 4216; 145.4051-1, 48.4216(a)-2.)

Taxable sale price; excludability of certain transportation and delivery expenses. The actual transportation and delivery charges for shipping a truck directly from a manufacturer to a retail dealer's customer are includable in the dealer's taxable sale price to the extent that such charges do not exceed the charges that would have been incurred to ship the truck from the manufacturer to the retail dealer through whom the truck was ordered.

Rev. Rul. 86-68

ISSUE

If a taxable heavy truck is shipped by the manufacturer to a dealer's business location for pickup by the customer, what transportation and delivery expenses are excludable from the price for which the truck is sold by the dealer for purposes of the retailers excise tax imposed on heavy trucks and trailers by section 4051(a)(1) of the Internal Revenue Code? What expenses are excludable by the dealer if the truck is shipped by the manufacturer directly to the customer's location?

FACTS

Situation 1. A trucking company orders a taxable truck from a retail truck dealer. The truck is thereafter shipped by the truck manufacturer to the dealer's business location, where it is picked up by the trucking company. The usual business practice of the dealer is to have trucks delivered to its business premises for eventual customer pickup.

Situation 2. A trucking company orders a taxable truck from a retail truck dealer. Under the contractual arrangement between that dealer and its customer, the trucking company, the truck is shipped by the truck manufacturer from the manufacturer's factory directly to the customer.

LAW AND ANALYSIS

Section 4051(a)(1) of the Code imposes a tax on the first retail sale of certain enumerated articles, including truck chassis and bodies that have a gross vehicle weight of more than 33,000 pounds. The tax is 12 percent of the amount for which the article is sold.

Section 4052(b)(1)(A) of the Code provides that, in determining the price of an article for purposes of the tax on the retail sale of trucks, there shall be included any charge incident to placing the article in condition ready for use.

Section 145.4052-1(d)(1) of the Temporary Excise Tax Regulations provides that the price for which an article is sold includes the total consideration paid for the article, whether the consideration is paid in money, services, or other forms. In addition, there shall be included any charge incident to placing the article in condition ready for use. Similar rules to section 4216(a) of the Code and the regulations thereunder, relating to charges to be included in the price and excluded from the price, shall apply. For example, charges for transportation, delivery, insurance, and installation (other than installation charges to which section 4051(b) applies), and other expenses actually incurred in connection with the delivery of an article to a purchaser pursuant to a bona fide sale, shall be excluded from the price in computing the tax.

Under section 4216(a) of the Code (which defines "price" for purposes of the Chapter 32 manufacturers excise taxes) and section 48.4216(a)-2(b) of the Manufacturers and Retailers Excise Tax Regulations, charges for transportation, delivery, and other expenses actually incurred in connection with the delivery of an article to a purchaser pursuant to a bona fide sale shall be excluded from the sale price in computing the tax. Such charges include all items of transportation, delivery, and similar expense incurred after shipment to a customer begins, in response to the customer's order, pursuant to a bona fide sale. However, costs of such nature incurred by a manufacturer in transporting, in the normal course of business and for its benefit and convenience, articles from a factory or port of entry to a warehouse or other facility (regardless of the location of such warehouse or other facility) are not considered as being incurred in connection with the delivery of an article to a purchaser pursuant to a bona fide sale, and charges therefor cannot be excluded from the sale price in computing tax liability.

Section 48.4216(a)-2(b)(3) of the regulations provides that for purposes of computing the taxable sale price of articles, it is immaterial whether the transportation, delivery, or other services of the type to which that section has application are performed by a common carrier or independent agency for, or on behalf of, the manufacturer, producer, or importer, or are performed by the manufacturer, producer, or importer with the use of its own vehicles or other facilities. In determining whether an expense is an excludable transportation or delivery expense, "only those expenses incurred by reason of the fact that the purchaser accepts delivery at some point other than the manufacturer's place of business shall be considered excludable transportation or delivery expenses."

The rules under section 4216(a) of the Code, and the regulations thereunder, generally apply to determination of price in connection with a sale subject to a manufacturers excise tax, as opposed to a retailer's excise tax. However, as noted above, section 145.4052-1(d)(1) of the temporary regulations provides that similar rules shall apply to determination of price in connection with a sale subject to the retailers excise tax on heavy trucks and trailers.

Most of the concepts employed under section 4216(a) of the Code are directly applicable to the retailer's tax imposed by section 4051. For instance, the "purchaser" under the manufacturers tax plays the same role as the "purchaser" under the retailers tax. On the other hand, other concepts are applicable only in analogue. Thus the taxpayer retailer's place of business takes the place of the taxpayer manufacturer's place of business.

When a customer places a truck order with a retail dealer and the truck is thereafter shipped from the manufacturer to the dealer, all charges for delivery and transportation to the dealer are includable in the taxable sale price of the truck. The exclusion of charges for transportation and delivery under section 145.4052-1(d)(1) of the temporary regulations is not applicable in *Situation 1* because the charges are incurred to deliver the truck to the taxpayer retailer's place of business. *See* section 48.4216(a)-2(b)(3) of the regulations.

Although in *Situation 2* the shipment of the truck is directly from the truck manufacturer to the retail dealer's customer, the exclusion for transportation and delivery charges provided in section 145.4052-1(d)(1) of the temporary regulations and section 48.4216(a)-2(b) of the regulations applies only with respect to actual or constructive shipments *from the taxpayer* (the retailer in the case of section 4051 of the Code, and the manufacturer in the case of section 4216), and not with respect to actual or constructive shipments *to the taxpayer*.

Therefore, in computing the portion of the transportation and delivery charges in *Situation 2* includable in the taxable sale price for purposes of the section 4051(a)(1) retailers excise tax, there is deemed to be an initial constructive shipment of the truck from the manufacturer to the retailer through whom the trucking company customer placed the order. If the actual charge for transportation between the manufacturer and the trucking company customer is greater than the charge would have been for transportation between the manufacturer and the retailer, then only a portion of the actual transportation charge is includable in the sale price. The includable amount is the charge that would have been incurred if the truck had been shipped from the manufacturer to the retailer instead of directly from the manufacturer to the customer. The balance of the actual transportation charge is excludable from the taxable sale price because it was "incurred by reason of the fact that the purchaser accepts delivery at some point other than" the retailer's place of business. If the actual charge for transportation between the maufacturer and the trucking company customer is less than the charge would have been if the truck had been shipped from the manufacturer to the retailer through whom the order was placed, then the entire actual transportation charge for the shipment of the truck from the manufacturer to the customer is includable in the taxable sale price.

HOLDING

In *Situation 1*, the transportation and delivery charges for shipping the truck from the manufacturer to the retail dealer are includable in the taxable sale price.

In *Situation 2*, the actual transportation and delivery charges for shipping the truck directly from the manufacturer to the retail dealer's customer are includable in the taxable sale price to the extent that such charges do not exceed the charges that would have been incurred to ship the truck from the manufacturer to the retail dealer through whom the truck was ordered. The balance (if any) of the actual transportation and delivery charges would be excludable from the taxable sale price.

Section 4216.—Definition of Price

26 CFR 48.4216(a)-2: Charges to be included in sale price.

Whether certain delivery expenses are includable in taxable sale price as defined in section 4261(a) of the Code for purposes of the retailers excise tax on trucks imposed by section 4051(a)(1) of the Code. See Rev. Rul. 86-68, page 7.

Section 6661.—Substantial Understatement of Liability

26 CFR 1.6661-4: Disclosure of certain information.

Guidance is provided, for returns filed in 1986, under which the disclosure on a taxpayer's return of an item or a position taken is adequate disclosure for the purposes of reducing the understatement under section 6661 of the Code. See Rev. Proc. 86-22, page 9.

Section 7872.—Treatment of Loans with Below-Market Interest Rates

Federal short-term, mid-term and long-term rates are set forth for the month of May 1986. See Rev. Rul. 86-64, page 6.

Part III. Administrative, Procedural, and Miscellaneous

26 CFR 601.105: Examination of returns and claims for refund, credit or abatement; determination of correct tax liability.
(Also Part I, Section 6661; 1.6661-4.)

Rev. Proc. 86-22

SECTION 1. PURPOSE

.01 The purpose of this revenue procedure is to identify, for returns filed in 1986, circumstances under which the disclosure on a taxpayer's return of an item or a position taken, with no specific reference to section 6661 of the Internal Revenue Code, is adequate disclosure for the purpose of reducing the understatement under section 6661.

SEC. 2. BACKGROUND

.01 Section 6661(a) of the Code imposes an addition to tax in situations where there is substantial understatement. A substantial understatement is defined as an understatement of liability for income tax which exceeds the greater of 10 percent of the amount required to be shown on the return or $5,000 ($10,000 in the case of a corporation other than an S corporation or a personal holding company). Under section 6661(b)(2) an understatement is defined as the excess of the amount of tax required to be shown on the return for the taxable year over the amount of the tax imposed which is shown on the return (reduced by any rebate within the meaning of section 6211(b)(2)).

.02 In the case of an item not attributable to a tax shelter, the amount of the understatement is reduced if the taxpayer discloses in the return or an attachment thereto the identity and amount of the item as well as the specific facts or the position taken relevant to the tax treatment of the item. Disclosure on a return of items attributable to a tax shelter does not reduce an understatement.

.03 Under section 6661(c) of the Code, the Secretary may waive all or part of the addition to tax provided by section 6661(a) if the taxpayer shows that there was reasonable cause for the understatement and that the taxpayer acted in good faith.

.04 In general, rules providing guidance on the adequacy of disclosure for purposes of reducing an understatement under section 6661 of the Code are set forth in regulations. Under section 1.6661-4(c) of the Income Tax Regulations, the Commissioner may by revenue procedure prescribe the circumstances in which information provided on the return in accordance with the applicable forms and instructions is adequate disclosure for purposes of section 6661 of the Code. The taxpayer must furnish all required information in accordance with the applicable forms and instructions, and the money amounts entered on these forms must be verifiable. This revenue procedure provides guidelines as to when such disclosure is adequate. Guidance for returns filed in 1983, 1984, and 1985 was provided by Rev. Proc. 83-21, 1983-1 C.B. 680, Rev. Proc. 84-19, 1984-1 C.B. 433, and Rev. Proc. 85-19, 1985-1 C.B. 520.

SEC. 3. PROCEDURE

Additional disclosure of facts relevant to, or positions with respect to, issues involving any of the items set forth below is unnecessary for purposes of reducing any understatement of tax under section 6661 of the Code provided, however, that the forms and attachments are completed in a clear manner and in accordance with the instructions thereto, the money amounts entered on the forms are verifiable, and the information on the return is disclosed in the manner described below. For purposes of this revenue procedure, a number is verifiable if, on audit, the taxpayer can demonstrate the origin of the number (even if that number is not ultimately accepted by the Internal Revenue Service).

(a) Schedule A, Form 1040, Itemized Deductions:

(1) Medical Expenses: Complete lines 1-5 supplying all required information. Line 2c must be itemized listing each item and its cost.

(2) Taxes: Complete lines 6-10 supplying all required information. Line 9 must list each type of tax and amount paid.

(3) Interest Expense: Complete lines 11-14 supplying all required information. Line 13 must list the type of expense and the amount paid. This section 3(a)(3) does not apply to amounts disclosed under section 163(d) of the Code unless Form 4952, Investment Interest Expense Deduction, is completed, or to any amounts disallowed under section 265.

(4) Contributions: Complete lines 15-18 supplying all required information. If a contribution of property other than cash is made, and the claimed value of the contribution exceeds $500, a properly completed Form 8283, Noncash Charitable Contributions, must be attached to the return.

(5) Casualty and Theft Losses: Form 4684, Casualties and Thefts, must be completed and attached to the return; Each item or article for which a casualty or theft loss is claimed must be listed on Form 4684.

(b) Trade or Business Expenses:

(1) Casualty and Theft Losses: The procedure outlined in Section 3(a)(5) above, must be followed.

(2) Legal Fees: The amount paid must be stated.

(3) Specific Bad Debt Charge-off: The amount written off must be stated.

(4) Reserve for Bad Debts: Question K, Form 1120A; Schedule F, Form 1120; or required attached statement, Form 1120S; must be completed, supplying all required information.

(5) Reasonableness of Officers' Compensation: Schedule E, Form 1120 must be completed where required by instructions. The time devoted to business must be expressed as a percentage as opposed to "part" or "as needed". This section 3(b)(5) does not apply to "golden parachute" compensation prohibited by section 280G of the Code.

(6) Repair as Opposed to Capital Expenditure: The amount of repairs stated.

(7) Taxes (other than foreign taxes): The amount of taxes stated.

(c) Schedule M-1, Form 1120, Reconciliation of Income Per Books With Income Per Return:

An item clearly identified on Schedule M-1, Form 1120, but only if—

(1) The amount of the deviation from the financial books and records is not the result of a computation that includes the netting of several items; and

(2) The information provided reasonably may be expected to apprise the Service of the nature of the potential controversy concerning the tax treatment of the item.

(d) Other:

(1) Sale or Exchange of Principal Residence: Complete Form 2119, Sale of Exchange of Principal Residence, or similar statement containing the same information, and attach to the return.

(2) Employee Business Expenses: Complete Form 2106, Employee Business Expenses, or similar statement containing the same information, and attach to the return.

(3) Moving Exenses: Complete Form 3903, Moving Expense Adjustment, or similar statement containing the same information, and attach to the return.

(4) Jobs Credits and WIN credit carryovers: Amounts shown on Line 6, Form 3800, General Business Credit.

(5) Gasoline and special fuels credit: Amounts shown on Form 4136, Computation of Credit for Federal Tax on Gasoline and Special Fuels.

(e) Foreign Tax Items:

(1) International boycott transactions: Transactions disclosed on Form 5713, International Boycott Report.

(2) Subpart F income: Amounts shown on Form 5471, Information Return with Respect to a Foreign Corporation, and Schedule J.

(3) Intercompany transactions: Transactions and amounts shown on Form 5471, Schedule M.

(4) With respect to foreign taxes paid or accrued, additional disclosure is unnecessary if Form 1116, Computation of Foreign Tax Credit, Part II, in the case of individuals, and Form 1118, Computation of Foreign Tax Credit—Corporations, Schedule B, Part I, Item 4, and Schedule C, Item 6, Schedules D, and E, Item 5, as appropriate, are completed, supplying all information called for *and* attaching the evidence required by section 1.905-2 of the regulations (receipts for the payment of the foreign tax or a copy of the foreign tax return).

SEC. 4. EFFECTIVE DATE

This revenue procedure is effective for returns filed in 1986, the due date (regardless of extensions) for filing of which is after December 31, 1985.

Treasury Department Order 150-01[1]

Designation of Internal Revenue Districts

Dated: February 27, 1986

Under the authority given to the President to establish and alter Internal Revenue Districts by section 7621 of the Internal Revenue Code of 1954, as amended, and vested in me as Secretary of the Treasury by Executive Order 10289, approved September 17, 1951, as made applicable to the Internal Revenue Code of 1954 by Executive Order 10574, approved November 5, 1954 [1954-2 C.B. 732], and pursuant to the authority vested in me by section 321(b) of 31 U.S.C., and Reorganization Plan No. 1 of 1952 as made applicable to the Internal Revenue Code of 1954 by section 7804(a) of such Code and by Executive Order 10574, the following Internal Revenue Districts continue as they existed prior to this order, with the changes noted below.

1. Designation of Internal Revenue Districts That Comprise an Entire State

Alabama, headquarters located in Birmingham, Alabama
Alaska, headquarters located in Anchorage, Alaska
Arizona, headquarters located in Phoenix, Arizona
Arkansas, headquarters located in Little Rock, Arkansas
Colorado, headquarters located in Denver, Colorado
Connecticut, headquarters located in Hartford, Connecticut
Delaware, headquarters located in Wilmington, Delaware
Florida, headquarters located in Jacksonville, Florida
Georgia, headquarters located in Atlanta, Georgia
Hawaii, headquarters located in Honolulu, Hawaii
Idaho, headquarters located in Boise, Idaho
Indiana, headquarters located in Indianapolis, Indiana
Iowa, headquarters located in Des Moines, Iowa
Kansas, headquarters located in Wichita, Kansas
Kentucky, headquarters located in Louisville, Kentucky
Louisiana, headquarters located in New Orleans, Louisiana
Maine, headquarters located in Augusta, Maine
Maryland (including the District of Columbia), with headquarters located in Baltimore, Maryland
Massachusetts, headquarters located in Boston, Massachusetts
Michigan, headquarters located in Detroit, Michigan
Minnesota, headquarters located in St. Paul, Minnesota
Mississippi, headquarters located in Jackson, Mississippi
Missouri, headquarters located in St. Louis, Missouri
Montana, headquarters located in Helena, Montana
Nebraska, headquarters located in Omaha, Nebraska
Nevada, headquarters located in Las Vegas, Nevada
New Hampshire, headquarters located in Portsmouth, New Hampshire
New Jersey, headquarters located in Newark, New Jersey
New Mexico, headquarters located in Albuquerque, New Mexico
North Dakota, headquarters located in Fargo, North Dakota
North Carolina, headquarters located in Greensboro, North Carolina
Oklahoma, headquarters located in Oklahoma City, Oklahoma
Oregon, headquarters located in Portland, Oregon
Rhode Island, headquarters located in Providence, Rhode Island
South Dakota, headquarters located in Aberdeen, South Dakota
South Carolina, headquarters located in Columbia, South Carolina
Tennessee, headquarters located in Nashville, Tennessee
Utah, headquarters located in Salt Lake City, Utah
Vermont, headquarters located in Burlington, Vermont
Virginia, headquarters located in Richmond, Virginia
Washington, headquarters located in Seattle, Washington
West Virginia, headquarters located in Parkersburg, West Virginia
Wisconsin, headquarters located in Milwaukee, Wisconsin
Wyoming, headquarters located in Cheyenne, Wyoming

---

[1] Filed by the Office of the Federal Register on March 18, 1986, 8:45 a.m., and published in the issue of the Federal Register for March 19, 1986, 51 F.R. 9571.

2. Designation of Internal Revenue Districts Within Certain States

a. California

(1) *Laguna Niguel District.* Shall include the Counties of Imperial, Orange Riverside, San Bernardino, San Diego, and that portion of Los Angeles County serviced by the Carson post of duty, in the State of California, with the headquarters office located in Laguna Niguel, California. (The Carson post of duty services the area of Los Angeles County which is generally bordered by the Artesia Freeway on the north, the Pacific Ocean on the west and south, and the Orange County line on the east, and includes in total the following 1982 zip code areas: 90254, 90274, 90277, 90278, 90501, 90502, 90503, 90504, 90505, 90507, 90508, 90509, 90510, 90701, 90706, 90710, 90712, 90713, 90714, 90715, 90716, 90717, 90731, 90732, 9073, 90744, 90745, 90746, 90747, 90749, 90802, 90803, 90804, 90805, 90806, 90807, 90808, 90809, 90810, 90813, 90814, 90815, 90822, and 90840).

(2) *Los Angeles District.* Shall include the County of Los Angeles, except for that portion serviced by the Carson post of duty, in the State of California, with the headquarters office located in Los Angeles, California.

(3) *San Jose District.* Shall include the Counties of Fresno, Inyo, Kern, Kings, Madera, Mariposa, Merced, Mono, Monterey, San Benito, San Luis Obispo, Santa Barbara, Santa Clara, Santa Cruz, Stanislaus, Tulare, Tuolumne, and Ventura, in the State of California, with the headquarters office located in San Jose, California.

(4) *Sacramento District.* Shall include the Counties of Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa, Del Norte, El Dorado, Glenn, Humboldt, Lake, Lassen, Marin, Mendocino, Modoc, Napa, Nevada, Placer, Plumas, Sacramento, San Joaquin, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Tehama, Trinity, Yolo, and Yuba in the State of California, with the headquarters office located in Sacramento, California.

(5) *San Francisco District.* Shall include the Counties of Alameda, San Francisco and San Mateo, in the State of California, with the headquarters office located in San Francisco, California.

b. Illinois

(1) *Chicago District.* Shall include the Counties of Boone, Bureau, Carroll, Cook, De Kalb, Du Page, Grundy, Henry, Jo Daviess, Kane, Kankakee, Kendall, Lake, La Salle, Lee, McHenry, Marshall, Mercer, Ogle, Putnam, Rock Island, Stark, Stephenson, Whiteside, Will, and Winnebago within the State of Illinois, with the headquarters office located in Chicago, Illinois.

(2) *Springfield District.* Shall include the Counties of Adams, Alexander, Bond, Brown, Calhoun, Cass, Champaign, Christian, Clark, Clay, Clinton, Coles, Crawford, Cumberland, DeWitt, Douglas, Edgar, Edwards, Effingham, Fayette, Ford, Franklin, Fulton, Gallatin, Greene, Hamilton, Hancock, Hardin, Henderson, Iroquois, Jackson, Jasper, Jefferson, Jersey, Johnson, Knox, Lawrence, Livingston, Logan, McDonough, McLean, Macon, Macoupin, Madison, Marion, Mason, Massac, Menard, Monroe, Montgomery, Morgan, Moultrie, Peoria, Perry, Piatt, Pike, Pope, Pulaski, Randolph, Richland, St. Clair, Saline, Sangamon, Schuyler, Scott, Shelby, Tazewell, Union, Vermilion, Wabash, Warren, Washington, Wayne, White, Williamson, and Woodford within the State of Illinois, with the headquarters office located in Springfield, Illinois.

c. New York

(1) *Brooklyn District.* Shall include the Counties of Kings, Nassau, Queens, and Suffolk within the State of New York, with the headquarters office located in Brooklyn, New York.

(2) *Manhattan District.* Shall include Blackwells Island, Manhattan Island, Staten Island, Randalls Island, and Wards Island; and the Counties of Bronx, Richmond, Rockland, and Westchester within the State of New York, with the headquarters office located in New York, New York.

(3) *Albany District.* Shall include the Counties of Albany, Clinton, Columbia, Dutchess, Essex, Franklin, Fulton, Greene, Hamilton, Montgomery, Orange, Putnam, Rensselaer, Saratoga, Schenectady, Schoharie, St. Lawrence, Sullivan, Ulster, Warren, and Washington within the State of New York, with the headquarters office located in Albany, New York.

(4) *Buffalo District.* Shall include the Counties of Allegany, Broome, Cattaraugus, Cayuga, Chautauque, Chemung, Chenango, Cortland, Delaware, Erie, Genesee, Herkimer, Jefferson, Lewis, Livingston, Madison, Monroe, Niagara, Oneida, Onondaga, Ontario, Orleans, Oswego, Otsego, Schuyler, Seneca, Steuben, Tioga, Tompkins, Wayne, Wyoming, and Yates, within the State of New York with the headquarters office located in Buffalo, New York.

d. Ohio

(1) *Cleveland District.* Shall include the Counties of Allen, Ashland, Ashtabula, Auglaize, Belmont, Carroll, Champaign, Columbiana, Crawford, Cuyahoga, Darke, Defiance, Erie, Fulton, Geauga, Hancock, Hardin, Harrison, Henry, Holmes, Huron, Jefferson, Lake, Logan, Lorain, Lucas, Mahoning, Medina, Mercer, Monroe, Ottawa, Paulding, Portage, Putnam, Richland, Sandusky, Seneca, Shelby, Stark, Summit, Trumbull, Tuscarawas, Van Wert, Wayne, Williams, Wood, and Wyandot within the State of Ohio, with the headquarters office located in Cleveland, Ohio.

(2) *Cincinnati District.* Shall include the Counties of Adams, Athens, Brown, Butler, Clark, Clermont, Clinton, Coshocton, Delaware, Fairfield, Fayette, Franklin, Gallia, Greene, Guernsey, Hamilton, Highland, Hocking, Jackson, Knox, Lawrence, Licking, Madison, Marion, Meigs, Miami, Montgomery, Morgan, Morrow, Muskingum, Noble, Perry, Pickaway, Pike, Preble, Ross, Scioto, Union, Vinton, Warren, and Washington within the State of Ohio, with the headquarters office located in Cincinnati, Ohio.

e. Pennsylvania

(1) *Philadelphia District.* Shall include the Counties of Adams, Berks, Bradford, Bucks, Carbon, Chester, Columbia, Cumberland, Dauphin, Delaware, Juniata, Lackawanna, Lancaster, Lebanon, Lehigh, Luzerne, Lycoming, Monroe, Montgomery, Montour, Northampton, Northumberland, Perry, Philadelphia, Pike, Schuylkill, Snyder, Sullivan, Susquehanna, Tioga, Union, Wayne, Wyoming, and York within the State of Pennsylvania, with the head-

quarters office located in Philadelphia, Pennsylvania.

(2) *Pittsburgh District.* Shall include the Counties of Allegheny, Armstrong, Beaver, Bedford, Blair, Butler, Cambria, Cameron, Centre, Clarion, Clearfield, Clinton, Crawford, Elk, Erie, Fayette, Forest, Franklin, Fulton, Greene, Huntingdon, Indiana, Jefferson, Lawrence, McKean, Mercer, Mifflin, Potter, Somerset, Venango, Warren, Washington, and Westmoreland within the State of Pennsylvania, with the headquarters office located in Pittsburgh, Pennsylvania.

f. Texas

(1) *Austin District.* Shall include the Counties of Aransas, Atascosa, Austin, Bandera, Bastrop, Bee, Bell, Bexar, Blanco, Bosque, Brazos, Brewster, Brooks, Burleson, Burnet, Caldwell, Calhoun, Cameron, Colorado, Comal, Coryell, Culberson, DeWitt, Dimmitt, Duval, Edwards, El Paso, Falls, Fayette, Freestone, Frio, Gillespie, Goliad, Gonzales, Grimes, Guadalupe, Hamilton, Hays, Hidalgo, Hill, Hudspeth, Jackson, Jeff Davis, Jim Hogg, Jim Wells, Karnes, Kendall, Kenedy, Kerr, Kimble, Kinney, Kleberg, Lampasas, LaSalle, Lavaca, Lee, Leon, Limestone, Live Oak, Llano, McCulloch, McLennan, McMullen, Madison, Mason, Matagorda, Maverick, Medina, Milam, Nueces, Pecos, Presidio, Real, Reeves, Refugio, Robertson, San Patricio, San Saba, Somervell, Starr, Terrell, Travis, Uvalde, Val Verde, Victoria, Waller, Washington, Webb, Wharton, Willacy, Williamson, Wilson, Zapata, and Zavala within the State of Texas, with the headquarters office located in Austin, Texas.

(2) *Dallas District.* Shall include the Counties of Anderson, Andrews, Angelina, Archer, Armstrong, Bailey, Baylor, Borden, Bowie, Briscoe, Brown, Callahan, Camp, Carson, Cass, Castro, Cherokee, Childress, Clay, Cochran, Coke, Coleman, Collin, Collingsworth, Comanche, Concho, Cooke, Cottle, Crane, Crockett, Crosby, Dallam, Dallas, Dawson, Deaf Smith, Delta, Denton, Dickens, Donley, Eastland, Ector, Ellis, Erath, Fannin, Fisher, Floyd, Foard, Franklin, Gaines, Garza, Glasscock, Gray, Grayson, Gregg, Hale, Hall, Hansford, Hardeman, Harrison, Hartley, Haskell, Hemphill, Henderson, Hockley, Hood, Hopkins, Houston, Howard, Hunt, Hutchinson, Irion, Jack, Johnson, Jones, Kaufman, Kent, King, Knox, Lamar, Lamb, Lipscomb, Loving, Lubbock, Lynn, Marion, Martin, Menard, Midland, Mills, Mitchell, Montague, Moore, Morris, Motley, Nacogdoches, Navarro, Nolan, Ochiltree, Oldham, Palo Pinto, Panola, Parker, Parmer, Potter, Rains, Randall, Reagan, Red River, Roberts, Rockwall, Runnels, Rusk, Sabine, San Augustine, Schleicher, Scurry, Shackelford, Shelby, Sherman, Smith, Stephens, Sterling, Stonewall, Sutton, Swisher, Tarrant, Taylor, Terry, Throckmorton, Titus, Tom Green, Upshur, Upton, Van Zandt, Ward, Wheeler, Wichita, Wilbarger, Winkler, Wise, Wood, Yoakum, and Young within the State of Texas, with the headquarters office located in Dallas, Texas.

(3) *Houston District.* Shall include the Counties of Brazoria, Chambers, Fort Bend, Galveston, Hardin, Harris, Jasper, Jefferson, Liberty, Montgomery, Newton, Orange, Polk, San Jacinto, Trinity, Tyler, and Walker within the State of Texas, with the headquarters office located in Houston, Texas.

3. The Foreign Operations District is abolished and the functions transferred primarily to the newly established Assistant Commissioner (International). This change shall be implemented upon such date as the Commissioner of Internal Revenue may determine. Effective immediately, the Commissioner of Internal Revenue is authorized to effect, at appropriate times and in an orderly manner, such transfers of functions, personnel, positions, equipment and funds as may be necessary to implement the provisions of this order.

4. *Internal Revenue Districts.* Each district established pursuant to Section 7621 of the Internal Revenue Code of 1954, as amended, shall be known as an internal revenue district and shall be identified by the name of the city or subdivision thereof in which the headquarters office of the District of Internal Revenue is located.

5. *District Director of Internal Revenue.* The title of each District office *shall bear the title "District Director* of Internal Revenue" identified by the name of the city or subdivision thereof, in which the headquarters office is located.

6. *U.S. Territories and Insular Possessions.* The Commissioner shall, to the extent of authority otherwise vested in him, provide for the administration of the United States internal revenue laws in the U.S. territories and insular possessions and other authorized areas of the world.

7. *Effect on Prior Treasury Department Orders.* This order supersedes Treasury Department Orders: 150-105, January 24, 1985, and 150-106, February 8, 1985 [1985-31 I.R.B. 24].

JAMES A. BAKER III,
Secretary of the Treasury.

Treasury Department Order 150-02[1]

Organization of the Internal Revenue Service

Dated: February 27, 1986

By the authority vested in me as Secretary of the Treasury by section 1002 of 31 U.S.C.; section 7801(a) and 7803 of the Internal Revenue Code of 1954, as amended; section 321(b) of 31 U.S.C., and Reorganization Plan No. 1 of 1952 as made applicable to the Internal Revenue Code of 1954 by section 7804(a) of such Code and by Executive Order No. 10574 [1954-2 C.B. 732], approved November 5, 1954; and as provided by section 7802(b) of the Internal Revenue Code of 1954, the following offices continue uninterrupted as they existed prior to this order, with the changes noted below:

1. Establishment and Continuation.

a. Office of the Associate Commissioner (Operations)

The Associate Commissioner (Operations) is the principal advisor to the Commissioner on policy matters affecting operations.

(1) The Associate Commissioner (Operations) is responsible for the following activities:

(a) Serves as the spokesperson for the operating functions, which are: Collection of delinquent accounts and securing of delinquent returns; investigation of criminal fraud involving any internal revenue laws (except those concerning alcohol, tobacco, or firearms); examination of tax returns; approval and subsequent examination of Employee Plans and Exempt Organizations. With this order, also provides guidance on tax treaty administration, international compliance, and foreign tax administration assistance.

---

[1] Filed by the Office of the Federal Register on March 18, 1986, 8:45 a.m., and published in the issue of the Federal Register for March 19, 1986, 51 F.R. 9573.

(b) Provides policy guidance and direction to the Assistant Commissioner (Collection), Assistant Commissioner (Examination), Assistant Commissioner (Criminal Investigation), Assistant Commissioner (Employee Plans and Exempt Organizations) and, with this order, the Assistant Commissioner (International).

(c) Represents the Service, as designated by the Commissioner, to the Department of the Treasury, Office of Management and Budget, Congress, foreign tax authorities and the public on major cross-functional issues and discusses or explains the Service's policy formulation and long-term plans.

(2) Under the supervision of the Associate Commissioner (Operations) are the following organizations:

(a) Office of the Assistant Commissioner (Collection)

(b) Office of the Assistant Commissioner (Examination)

(c) Office of the Assistant Commissioner (Criminal Investigation)

(d) Office of the Assistant Commissioner (Employee Plans and Exempt Organizations)

(e) Office of the Assistant Commissioner (International), established with this Order.

b. Office of Associate Commissioner (Policy and Management)

The Associate Commissioner (Policy and Management) is the principal advisor to the Commissioner on policy matters affecting agency administration.

(1) The Associate Commissioner (Policy and Management) is responsible for the following activities:

(a) Serves as the spokesperson for the management functions, which are: Personnel administration; financial management; planning; research; training and employee development; management information systems; management of the Service's physical plant, equipment, property, and support services; disclosure and security; tax forms and publication design printing, and distribution; and operation of the IRS Data Center (payroll and non-tax data processing).

(b) Provides policy guidance and direction to the Assistant Commissioner (Support and Services), the Assistant Commissioner (Human Resources), and the Assistant Commissioner (Planning, Finance, and Research).

(c) Represents the Service, as designated by the Commissioner, to the Department of the Treasury, Office of Management and Budget, Congress and the public on major policy and management issues, and discusses or explains the Service's policy formulation and long-term plans.

(2) Under the supervision of the Associate Commissioner (Policy and Management) are the following organizations:

(a) Office of the Assistant Commissioner (Support and Services)

(b) Office of the Assistant Commissioner (Human Resources)

(c) Office of the Assistant Commissioner (Planning, Finance, and Research)

c. Office of Associate Commissioner (Data Processing)

The Associate Commissioner (Data Processing) is the principal advisor to the Commissioner on policy matters affecting data processing.

(1) The Associate Commissioner (Data Processing) is responsible for the following activities:

(a) Serves as the spokesperson for the data processing functions, which are: processing of tax returns and information documents; accounting for all revenues collected by the Service; maintaining master files of all taxpayer accounts; managing all large-scale tax-processing computers in the Service; the tax information program; and, designing, developing, testing, and maintaining computer software used on large-scale tax-processing computers in the Service.

(b) Provides policy guidance and direction to the Assistant Commissioner (Computer Services), the Assistant Commissioner (Returns and Information Processing), and the Assistant Commissioner (Tax System Redesign).

(c) Represents the Service, as designated by the Commissioner, to the Department of the Treasury, Office of Management and Budget, Congress, and the public on major data processing issues, and discusses or explains the Service's policy formulation and long-term plans.

(2) Under the supervision of the Associate Commissioner (Data Processing) are the following organizations:

(a) Office of the Assistant Commissioner (Computer Services)

(b) Office of the Assistant Commissioner (Returns and Information Processing)

(c) Office of the Assistant Commissioner (Tax System Redesign)

d. Office of Assistant to the Commissioner (Legislative Liaison)

The Assistant to the Commissioner (Legislative Liaison) is the principal advisor to the Commissioner, Deputy Commissioner, and top executives of the Service on all Congressional and legislative matters except those involving appropriation hearings, and is responsible for planning, developing, directing, and evaluating the Congressional Affairs program and activities of the Service.

e. The Assistant Commissioner (Inspection) and the Deputy Assistant Commissioner (Inspection)

The Assistant Commissioner (Inspection) and the Deputy Assistant Commissioner (Inspection) will, to ensure objectivity and integrity, continue to report directly to the Commissioner and Deputy Commissioner.

2. The Appeals Division is transferred to the Chief Counsel, and the Commissioner of Internal Revenue will exercise line supervision over the Chief Counsel for this function. The transfer of such personnel, records, equipment and funds will be determined by the Commissioner of Internal Revenue and Chief Counsel, as appropriate.

3. The Corporation Tax and Individual Tax Divisions are transferred to the Chief Counsel, with the authority to supervise and evaluate the work of all officers and employees of the functions transferred. The transfer of such personnel, records, equipment and funds will be determined by the Commissioner of Internal Revenue and Chief Counsel, as appropriate.

4. The Chief Counsel, pursuant to delegated authority from the General Counsel, is authorized to take necessary action on all personnel and administrative matters pertaining to the Office of Chief Counsel, including but not limited to those for the appointment, classification, promotion, demotion, reassignment, transfer or separation of officers or employees; however, all personnel and administrative matters concerning Senior Executive Service or Performance Management Recognition System employees in the Office of Associate Chief Counsel (International) whose primary duties do not involve litigation or in the Office of Associate Chief Counsel (Technical), shall be approved by the Commissioner of Internal Revenue prior to implementation.

5. The Commissioner will exercise the Service's final authority concerning substantive interpretation of the tax laws as reflected in legislative and regulatory proposals, revenue rulings, letter rulings, and technical advice memoranda.

6. The Office of the Commissioner shall consist of the Commissioner, Deputy Commissioner, Assistants to the Commissioner, Assistant to the Commissioner (Public Affairs), Assistant to the Commissioner (Legislative Liaison), Assistant to the Commissioner (Taxpayer Ombudsman), the Assistant to the Commissioner (Equal Opportunity), and the Assistant to the Deputy Commissioner.

7. Except for the specific positions and titles in Sections 1 and 6 of this order, the Commissioner, Internal Revenue Service, may create, abolish, or modify offices and positions within the Internal Revenue Service as may be necessary to effectively and efficiently provide for the administration of tax laws or other responsibilities assigned to the Internal Revenue Service. The authority of the Commissioner, Internal Revenue Service, to create, abolish, or modify offices under this delegation is subject only to limitations that exist by law or Department of the Treasury rules and regulations.

8. The above changes shall be implemented upon such date as the Commissioner of Internal Revenue may determine. Effective immediately, the Commissioner of Internal Revenue is authorized to effect, at appropriate times and in an orderly manner, such transfers of functions, personnel, positions, equipment and funds as may be necessary to implement the provisions of this order.

9. All offices in existence within the Internal Revenue Service but not mentioned in this order are continued without interruption.

10. *Effect on Other Treasury Department Orders.* This order supersedes Treasury Department Order: 150-103, October 3, 1985.

James A. Baker,
Assistant Secretary
of the Treasury.

Part IV. Items of General Interest

Notice of Proposed Rulemaking

Disclosure of Return Information to the Bureau of the Census

LR-4-86

SUMMARY: The Internal Revenue Service is proposing amendments to the Regulations on Procedure and Administration to authorize the disclosure of an additional item of return information to the Bureau of the Census for use in statutory statistical programs, to delete the authority to disclose those items of return information which the Bureau no longer needs for such programs, and to delete the authority of the Federal Trade Commission to obtain return information for certain statistical purposes and transfer such authority to the Bureau of the Census. The amendments to the regulations will provide guidance to Internal Revenue Service personnel responsible for disclosure of this information.

DATES: Written comments and requests for a public hearing must be delivered by May 27, 1986. The amendments to the regulations are proposed to be effective as of the date on which the Treasury decision adopting them is published in the FEDERAL REGISTER.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-4-86), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: David E. Dickinson of the Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., N.W., Washington, D.C. 20224, Attention: CC:LR:T, (202) 566-6655 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Under section 6103(j)(1) of the Internal Revenue Code of 1954, upon written request from the Secretary of Commerce, the Internal Revenue Service is to furnish the Bureau of the Census such tax return information as may be prescribed by Treasury regulations for statutorily authorized statistical activities. An itemized description of such return information is currently provided by §301.6103(j)(1)-1 of the Regulations on Procedure and Administration. Similar disclosures to the Federal Trade Commission for a limited statistical purpose are authorized by section 6103(j)(2) of the Code and §301.6103(j)(2)-1 of the regulations.

Further, because employment tax returns and employment tax return information are filed initially with the Social Security Administration rather than the Internal Revenue Service under the combined annual wage reporting system, the regulations also authorize the Social Security Administration to disclose directly to the Census Bureau and FTC certain employment tax return information, subject to statutory restrictions designed to protect the confidentiality of such information.

Periodically, the disclosure regulations are amended to reflect the changing statistical needs of the Census Bureau for tax information, and this notice of proposed rulemaking updates the regulations.

DESCRIPTION OF PROPOSED AMENDMENTS OF REGULATIONS

In properly conducting economic censuses as part of its economic statistics programs, the Census Bureau needs the employer identification number of each affiliated corporation listed on Form 851.

On the other hand, the Census Bureau no longer uses certain information from employment tax returns.

This notice of proposed rulemaking would amend §301.6103(j)(1)-1 of present regulations to add the above item to the list of disclosable tax return information while deleting those employment tax return items no longer required.

Also, because responsibility for preparation of the Quarterly Financial Report has been shifted from the FTC to the Census Bureau, this notice of proposed rulemaking reflects this shift by deleting present regulatory authority to disclose certain corporation tax return information to the FTC and moving it to the Census Bureau.

NON-APPLICABILITY OF EXECUTIVE ORDER 12291

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

REGULATORY FLEXIBILITY ANALYSIS

Although this document is a notice of proposed rulemaking that solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply.

Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of these proposed regulations is David E. Dickinson of the Office of the Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing these regulations both on matters of substance and style.

* * * * *

Proposed amendments to the regulations

The proposed amendments to 26 CFR Part 301 are as follows:

Paragraph 1. The authority for Part 301 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 301.6103(j)(1)-1 also issued under 26 U.S.C. 6103(j).

Par. 2. Section 301.6103(j)(1)-1 is amended by revising paragraph (b)(2)(iii), by revising paragraph (b)(3)(xi) and (xii) and adding a new paragraph (b)(3)(xiii) immediately thereafter, and by revising paragraph, (b)(5) and adding a new paragraph (b)(6) immediately thereafter. The revised and added provisions read as follows:

§301.6103(j)(1)-1 Disclosures of return information to officers and employees of the Department of Commerce for certain statistical purposes and related activities.

* * * * *

(b) *Disclosure of return information to officers and employees of the Bureau of the Census.* * * *

(2) Officers or employees of the Service will disclose to officers and employees of the Bureau of the Census for purposes of, but only to the extent necessary in, conducting, as authorized by chapter 5 of Title 13, United States Code, demographic, economic, and agricultural statistics programs and censuses and related program evaluation—* * *

(iii) From an employment tax return—

(A) Taxpayer identifying number (as described in section 6109) of the employer,

(B) Total compensation reported,

(C) Master file tax account number,

(D) Taxable period covered by such return,

(E) Employment code,

(F) Document locator number,

(G) Record code,

(H) Total number of individuals employed in the taxable period covered by the return,

(I) Total taxable wages paid for purposes of chapter 21, and

(J) Total taxable tip income reported for purposes of chapter 21; and * * *

(3) * * *

(xi) From Form 1065, including Schedule F, if any, total sales of livestock and produce raised and other farm income and gross and net profits from farming;

(xii) From Form 1120S, the names and taxpayer identifying numbers of, and the number of shares of stock owned by, no more than 10 shareholders of the corporation; and

(xiii) From Form 851, the employer identification number of each corporation named on such return.

* * * * *

(5) Subject to the requirements of paragraph (d) of this section and §301.6103(p)(2)(B)-1, officers or employees of the Social Security Administration to whom the following return information has been disclosed as provided by section 6103(l)(1)(A) or (5) may disclose such return information to officers and employees of the Bureau of the Census for necessary purposes described in paragraph (b)(2) or (3) of this section—

(i) From Form SS-4, all information reflected on such return; and

(ii) From Form 1040, Schedule SE—

(A) Taxpayer identifying number of self-employed individual,

(B) Business activities subject to the tax imposed by chapter 21,

(C) Net earnings from farming,

(D) Net earnings from nonfarming activities,

(E) Total net earnings from self-employment, and

(F) Taxable self-employment income for purposes of chapter 2.

(6) (i) Officers or employees of the Service will disclose the following return information (but not including return information described in section 6103(o)(2)) reflected on the return of a corporation with respect to the tax imposed by chapter 1 to officers and employees of the Bureau of the Census for purposes of, but only to the extent necessary in, developing and preparing, as authorized by law, the Quarterly Financial Report—

(A) From the business master files of the Service—

(1) Taxpayer identity information (as defined in section 6103(b)(6)),

(2) Consolidated return and final return indicators,

(3) Principal industrial activity code,

(4) Partial year indicator,

(5) Annual accounting period,

(6) Gross receipts less returns and allowances,

(7) Net income or loss, and

(8) Total assets; and

(B) From Form SS-4—

(1) Month and year in which such return was executed,

(2) Taxpayer identity information,

(3) Principal industrial activity, geographic, firm size, and reason for application codes.

(ii) Subject to the requirements of paragraph (d) of this section and §301.6103(p)(2)(B)-1, officers or employees of the Social Security Administration to whom return information described in paragraph (b)(6)(i)(B) of this section with respect to a corporation has been disclosed as provided by section 6103(l)(1)(A) may disclose such return information to officers and employees of the Bureau of the Census for a purpose described in this paragraph (b)(6).

* * * * *

Par. 3. Section 301.6103(j)(2)-1 is removed.

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Filed by the Office of the Federal Register on March 27, 1986, 8:45 a.m., and published in the issue of the Federal Register for March 28, 1986, 51 F.R 10635)

Election Under Section 463 Regarding Vested Accrued Vacation Pay

Announcement 86-59

Section 91(i) of the Tax Reform Act of 1984, 1983-1 (Vol. 1) C.B. 117, provides a transitional rule for an election under section 463 of the Internal Revenue Code, relating to the accrual of vacation pay. Only taxpayers to whom a deduction was allowable (other than under section 463) for vested accrued vacation pay for the last taxable year ending on or before July 18, 1984, are eligible to use the section 91(i) transitional rule.

Generally, taxpayers who make an election to accrue vacation pay under section 463 must compute the opening balances in their accrual and suspense accounts under section 463(b). However, eligible taxpayers who make an election under section 463 for the first taxable year ending after July 18, 1984, must compute the opening balance in their accrual and suspense accounts under a special rule provided in section 91(i).

The Internal Revenue Service published temporary regulations on February 4, 1986, that explain how eligible taxpayers make an election under section 463 for their first taxable year ending after July 18, 1984 (51 FR 4329). The regulations also provide guidance on the computation of opening balances in accrual and suspense accounts under the special transitional rule.

This announcement concerns eligible taxpayers who on an income tax return filed on or before May 5, 1986, for the first taxable year ending after July 18, 1984, deducted vested accrued vacation pay under section 463 and computed the opening balances in their accrual and suspense accounts using the section 91(i) transitional rule but who did not make the section 463 election in the manner prescribed by section 1.463-1T(e) of the Temporary Income Tax Regulations. These taxpayers are considered to have elected to accrue vacation pay under section 463, and thus are subject to the section 91(i) transitional rule, if they attached a statement to their income tax return filed for the first taxable year ending after July 18, 1984, clearly indicating their intention to elect to accrue vacation pay under section 463. For example, an eligible taxpayer who made an election consistent with section 10.2 of the Temporary Income Tax Regulations is considered to have elected under section 463 and thus is subject to the section 91(i) transitional rule. Taxpayers must also retain in their books and records all of the information specified by section 1.463-1T(e) of the regulations so that the Service may, upon examination, obtain all of the information necessary to verify the correctness of the taxpayer's deduction.

Eligible taxpayers who attempt after May 5, 1986, to make a section 463 election under the section 91(i) transitional rule may not take advantage of the relief in this announcement but must fully comply with the provisions of section 1.463-1T of the temporary regulations.

Employee Plans Not Timely Amended—7805(b) Relief

Announcement 86-60

In News Release IR-85-89, dated August 30, 1985, the Internal Revenue Service announced an extension, until Nov. 1, 1985, of the time for compliance with the requirements of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), the Tax Reform Act of 1984 (TRA), and the Retirement Equity Act of 1984 (REA), applicable to pension, profit-sharing, stock bonus, and annuity plans. The extension applied to all such plans whose compliance date was before Nov. 1, 1985.

Notice 86-3, 1986-9 I.R.B. 21, described procedures established by the Service for granting partial relief from the sanctions for failure to satisfy the requirements of section 401(a) of the Internal Revenue Code in the case of certain employee plans that were not timely amended to comply with TEFRA, TRA or REA. In the absence of this relief, the applicable sanctions would include the disallowance of the current deduction for employer contributions, the inclusion of such contributions in employees' current income, the loss of the tax-exempt status of the plans' trusts, the loss of favorable tax treatment of distributions from plans, and, in the case of certain employee stock ownership plans, the disallowance of the applicable tax credits. Under Notice 86-3 the extent of the relief from sanctions with respect to (1) deductions or credits for employer contributions was determined by reference to the amount of time that had elapsed between the applicable compliance date and the time of filing a request for a determination letter, and (2) the inclusion of employer contributions in employees' current income and the tax treatment of plan distributions was determined in part by an employee's relative ownership interest in the employer and status as a key employee. Also, under Notice 86-3 the tax-exempt status of the trust was preserved.

This announcement revises Notice 86-3 to (1) provide that, for all plans to which Notice 86-3 applies and whose applicable compliance date is before June 30, 1986, the applicable compliance date is now June 30, 1986; (2) extend the compliance date for certain master or prototype plans as described in the following paragraph; (3) provide for a straight 10-percent-per-month reduction in the number-of-months factor after the applicable compliance date has passed; (4) include additional provisions describing the scope of relief applicable with respect to tax credit employee stock ownership plans that, if they had continued to meet the requirements of section 409 of the Code, would have entitled the employers to the credit provided for in section 41; and (5) correct a printing error.

This announcement extends the compliance date for most master or prototype plans adopted by employers after March 19, 1984, by extending section 12 of Rev. Proc. 84-23, 1984-1 C.B. 457, to those plans.

This is the last extension of compliance dates for TEFRA, TRA and REA, and there will be no further liberalization of the relief provided by Notice 86-3 as herein revised. The absence of a request for a determination letter for a plan with respect to TEFRA, TRA or REA (including a submission in accordance with Notice 86-3 as herein revised) may increase the potential for an examination of the plan by the Service.

The revision of Notice 86-3 will be accomplished by:

1. Replacing, in the first paragraph under *Eligibility*, the connective "and" with "or," immediately before "(3)".

2. Replacing in the second paragraph under *Eligibility*, the last five sentences with:

The compliance date for an individually designed plan (or a master or prototype plan for which continued reliance is not granted pursuant to section 12 of Rev. Proc. 84-23, 1984-1 C.B. 457, or which was adopted after March 19, 1984, and for which the extended compliance date permitted below in this paragraph does not apply) is the last day of the plan year in which the qualification requirement becomes effective for that plan, except that, in the case of a "disqualifying provision" as defined in section 1.401(b)-1(b) of the Income Tax Regulations (which does not apply to changes in qualification requirements due to TRA or REA), the compliance date is the last day of the remedial amendment period as defined in section 1.401(b)-1(c). See Notice 85-5, 1985-1 C.B. 427; Notice 85-14, 1985-33 I.R.B. 16, and Announcement 85-128, 1985-35 I.R.B. 44. The compliance date for a master or prototype plan adopted by an employer on or before March 19, 1984, to which the relief described in these procedures applies, is determined in accordance with section 12 of Rev. Proc. 84-23. The compliance date for a master or prototype plan adopted by an employer after March 19, 1984, will be determined under section 12 of Rev. Proc. 84-23 provided the following conditions are satisfied. The conditions are (1) the sponsor of the master or prototype plan requested an opinion letter in accordance with Rev. Proc. 84-23 on such plan (or a plan that replaced such plan) no later than December 31, 1984, and (2) such plan is first adopted by the employer no later than the last day of the twelfth month after either the Service issued an opinion letter with respect to the master or prototype plan, or the application for an opinion letter with respect to the plan was withdrawn. This notice extends until June 30, 1986, the time for complying with the requirements of TEFRA, TRA and REA applicable to pension, profit-sharing, stock bonus and annuity plans. This extension of time applies to plans with compliance dates before June 30, 1986.

3. Replacing, in the first paragraph under *Conditions for Granting Relief*, the last sentence with:

To take advantage of this procedure, the plan administrator must make the necessary amendments and request a determination letter with respect thereto no later than the last day of the ninth month beginning after the applicable compliance date.

4. Replacing the table under *Scope of Relief* with:

NUMBER-OF-MONTHS-FACTOR (%)

Number of months that have begun after the compliance date and on or before the date of submission

1	2	3	4	5	6	7	8	9
90	80	70	60	50	40	30	20	10

5. Replacing, in *Example (1)*, "Nov. 1, 1985" with "June 30, 1986"; "TEFRA" with "TEFRA, TRA or REA"; "Jan." with "July"; and "two months have ended" with "one month began".

6. Replacing, in *Example (2)*, Jan." with "July"; "Nov. 9, 1986" with "March 9, 1987"; and "nine months have ended" with "eight months began".

7. Adding, at the end of the notice, the following provisions:

PROVISIONS FOR TCESOPS

The following provisions are applicable in the case of a tax credit employee stock ownership plan (TCESOP) of a corporation which would have been eligible for the employee stock ownership credit under section 41 of the Code or former section 48(n) but for the fact that the plan failed to meet the requirements of section 409 as a result of not being timely amended to comply with TEFRA, TRA or REA.

Scope of Relief—With respect to the employer contributions made for a taxable year which ends within or with a taxable year of the plan's trust for which the trust is not exempt under section 501(a) of the Code because of a failure to comply with TEFRA, TRA or REA, the allowable tax credit for that taxable year of the employer or any other taxable year on account of such contributions will be equal to the following amount: the product of the number-of-months factor described above multiplied by the lesser of (a) the amount contributed by the employer, or (b) the limitation under section 41 or former section 48(n) that would apply if the plan met the requirements of section 409. To the extent the tax credit is reduced by application of the preceding sentence, such contributions are treated as contributions for which no credit under section 41 or former section 48(n) had ever been elected, and such contributions are deductible in accordance with section 404(a)(5). The amount includible in the key employees' respective gross incomes will be determined in the same manner as described above as though the employer were a tax-exempt organization.

Instructions to Taxpayers—The same requirements must be satisfied as described above except that references to deductions are deemed to refer also to the tax credit allowed under these procedures.

This revision will be reflected in Notice 86-3 when the notice is reprinted in the Cumulative Bulletin.

Information Returns Relating to Sales or Exchanges of Certain Partnership Interests—Public Hearing

Announcement 86-61[1]

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to information returns, statements, and notifications required where there is a sale or exchange of certain partnership interests.

DATES: The public hearing will be held on Thursday, June 12, 1986, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Thursday, May 29, 1986.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, ATTN: CC:LR:T (LR-236-84), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Faye Easley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, telephone 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 6050K of the Internal Revenue Code of 1954. The proposed regulations appeared in the FEDERAL REGISTER for Monday, December 23, 1985 (50 FR 52332) [LR-236-84, 1986-7 I.R.B. 26].

The rules of §601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Thursday, May 29, 1986, an outline of oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

---

[1] Filed by the Office of the Federal Register on April 9, 1986, 8:45 a.m., and published in the issue of the Federal Register for April 10, 1986, 51 F.R. 12340.

Recapture of Overall Foreign Losses—Public Hearing

Announcement 86-62[1]

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the recapture of overall foreign losses.

DATES: The public hearing will be held on Thursday, June 5, 1986, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Thursday, May 22, 1986.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-3-77), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Fay Easley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, telephone 202-566-3935 (not a toll-free call).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 904(f) of the Internal Revenue Code of 1954. The proposed regulations appeared in the FEDERAL REGISTER for Friday, January 24, 1986 (51 FR 3193) [LR-3-77, 1986-10 I.R.B. 14].

The rules of §601.601(a)(3) of the "Statement of Procedural Rules" (26 Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Thursday, May 22, 1986, an outline of oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

Increase in Excise Tax on Coal

Announcement 86-63

The Consolidated Omnibus Budget Reconciliation Act of 1985, Public Law 99-272, has increased the manufacturers excise tax rate on coal. The tax is imposed on domestically mined coal (other than lignite) sold or used by the producer. Effective April 1, 1986, the tax rate is the lesser of (1) $1.10 per ton for coal from underground mines and 55 cents per ton for coal from surface mines, or (2) 4.4 percent of the price for which the coal is sold.

Affected taxpayers should start reporting and paying tax at the new rate on Form 720, Quarterly Federal Excise Return, for the quarter ending June 30, 1986.

The coal tax revenues are appropriated for the Black Lung Disability Trust Fund. The trust fund pays black lung disability benefits to coal miners or their survivors.

Revision of Form 2032, Contract Coverage Under Title II of the Social Security Act

Announcement 86-64

Form 2032, Contract Coverage Under Title II of the Social Security Act, which is used to enter into the agreement specified in section 3121(l) of the Internal Revenue Code to extend coverage under the Social Security Act to U.S. citizens and resident aliens employed abroad by foreign affiliates, has been revised.

The December 1985 revision now permits employers to elect to have the social security rules that became effective after April 20, 1983, apply to agreements in effect on that date. By making this election, employers with preexisting agreements can extend social security coverage to U.S. resident aliens, as well as to U.S. citizens, employed by certain foreign affiliates.

The revised form is now available in Internal Revenue Service distribution centers.

Accrual of Income by Utilities

Announcement 86-65

Introduction

The Internal Revenue Service will not follow the Tax Court's recent decision in *Orange and Rockland Utilities, Inc. v. Commissioner*, 86 T.C. ___ (1986), and its earlier decision in *Public service Co. of New Hampshire v. Commissioner*, 78 T.C. 445 (1982). Furthermore, the Service is studying the possibility of revoking Rev. Rul. 72-114, 1972-1 C.B. 124, effective for tax years beginning on or after the publication of this announcement in the Internal Revenue Bulletin.

The Tax Court's decision in *Orange and Rockland* was filed on February 18 of this year. It held that a group of natural gas and electric utilities which used the accrual method of accounting were not required currently to accrue income from product deliveries occurring between each customer's December meter reading date, or meter estimation date, and the end of the calendar year. Instead, the utilities were permitted to defer accrual of that income until the first meter reading date or estimation date in the succeeding calendar year. In 1982, the Tax Court rendered a similar decision in *Public Service Co. of New Hampshire v. Commissioner*. The Tax Court reached these results even though in both cases (1) the utilities had performed, before the end of the current calendar year, all acts necessary to earn the income in question, (2) the income could be accurately estimated, (3) the utilities accrued and reported the income on their current year financial statements, which were used for reporting operating results to shareholders and the financial community, and (4) the utilities took current year federal income tax deductions for all expenses associated with earning the income.

The Tax Court's *Orange and Rockland* decision was based principally on the following conclusions:

(1) Delivery of electricity and natural gas is the furnishing of a service rather

---

[1] Filed by the Office of the Federal Register on April 1, 1986, 8:45 a.m., and published in the issue of the Federal Register for April 2, 1986, 51 F.R. 11323.

than the sale of a good or product;

(2) Income tax accrual accounting rules applicable to service transactions allowed the *Orange and Rockland* utilities to defer accrual of the year-end income in question until the first meter reading date or meter expiration date of the next year;

(3) Since Rev. Rul. 72-114 would have permitted such deferral by the *Orange and Rockland* Utilities if their nontax financial statements had been prepared on a conforming basis, deferral should be allowed regardless of the utilities' nonconforming financial statements because such nonconformity is not an adequate ground for distinguishing between taxpayers. In the opinion of the Internal Revenue Service, the *Orange and Rockland* decision misapplied well-settled rules of income tax accrual accounting and improperly rejected the accounting conformity requirement contained in Revenue Ruling 72-114.

Accrual Accounting

The furnishing of electricity and natural gas constitutes the sale of a product or good rather than the sale of services. Thus, natural gas utilities are required to employ in inventory method of accounting for their gas, Rev. Rul. 78-352, 1978-2 C.B. 168; and gas and electric utilities may defer the reporting of prepaid income upon compliance with regulations governing prepayment for sales of goods. *City Gas Co. of Fla. v. Commissioner*, 47 T.C.M. 971, 975-78 (1984); Rev. Rul. 72-114, 1972-1 C.B. 124. Therefore, the utilities involved in the *Orange and Rockland* case were required to accrue income in accordance with rules applicable to sellers of goods.

The Income Tax Regulations provide that sellers of goods must accrue income "when all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy." Section 1.446-1(c)(1)((ii)) of the regulations. The income of the *Orange and Rockland* utilities attributable to gas and electricity delivered between the last December meter reading date, or meter estimation date, and the calendar year end could be estimated with reasonable accuracy and accountants for the utilities so certified. Thus, under the regulations quoted above, this income should have been currently accrued for tax purposes if compliance with the "all events" requirement occurred before year end.

The "all events" requirement is satisfied with respect to income when payment is due, when payment is received, or when the income is earned, whichever occurs first. *Schlude v. Commissioner*, 372 U.S. 128 (1963); Rev. Rul. 79-195, 1979-1 C.B. 177, 178. A corollary of this rule is that the "all events" requirement is satisfied no later than the time when income is earned by performance, regardless of when billing is permitted. Section 1.446-1(c)(1)(ii) of the regulations; *Bentley Laboratories, Inc. v. Commissioner*, 77 T.C. 152, 165 (1981); *Western Oaks Building Corp. v. Commissioner*, 49 T.C. 365, 371-72 (1968), *nonacq.*, 1968-2 C.B. 3. Furthermore, even if the utilities in *Orange and Rockland* were considered to be furnishing services instead of goods, there would be no difference in the outcome, because the governing rule for service providers also requires accrual of reasonably estimatable income no later than the time when the income is earned, irrespective of the time when billing is permitted. *Georgia School-Book Depository, Inc. v. Commissioner*, 1 T.C. 463 (1943); Rev. Rul. 74-372, 1974-2 C.B. 147. The date when billing occurs, or is permitted, is relevant in determining whether a right to income is fixed only in cases where the income has not yet been earned through the performance of services or delivery of goods. *See Schlude v. Commissioner*, 372 U.S. 128 (1963); *Cox v. Commissioner*, 43 T.C. 448, 454-58 (1965), *Acq.*, 1965-2 C.B. 4, *nonacq.*, 1965-2 C.B. 7. *Orange and Rockland* was not such a case.

Since the customers of the utilities in *Orange and Rockland* would be required to pay for all gas and electricity delivered through the end of December regardless of when billing was permitted or occurred, the utilities earned the income attributable to that gas and electricity at time of delivery. *See City Gas Co. of Fla. v. Commissioner*, 47 T.C.M. 971, 976 (1984). Consequently, the utilities should have currently accrued all income attributable to gas and electricity deliveries between the last December meter reading date, or meter estimation date, and the end of the calendar year even though state regulatory rules did not allow the customers to be billed until the first meter reading or meter estimation date in the following year. *Bay State Gas Co. v. Commissioner*, 689 F.2d 1, 5 (1st Cir. 1982).

Hybrid Accounting

The utilities in *Orange and Rockland* did not report income at the time required by accrual rules but did deduct expenses under those rules. Thus the accounting method used by the utilities to report their income and deductions was a "hybrid" of tax accounting principles. This particular hybrid is commonly referred to as the "cycle meter reading" method of accounting.

Hybrid tax accounting methods, such as the cycle meter reading method, are not permitted unless they comply with Regulations prescribed under authority granted by section 446(c)(4) of the Internal Revenue Code. To prevent income distortion, the regulations under Internal Revenue Code section 446(c)(4) state that a taxpayer who employs the accrual method of accounting in deducting costs and expenses, as the utilities did in *Orange and Rockland*, must also employ the accrual method in computing income, which those utilities failed to do. Section 1.446-1(c)(1)(iv)(a) of the regulations. *See also Massachusetts Mutual Life Co. v. Commissioner*, 288 U.S. 269, 273-74 (1933). Thus, the hybrid cycle meter reading accounting method of the *Orange and Rockland* utilities would ordinarily not be permissible under the income tax law. *See Connors, Inc. v. Commissioner*, 71 T.C. 913 (1979).

The Revenue Ruling 72-114 Conformity Requirement

Section 1.446-1(c)(2)(ii) of the regulations authorizes the Commissioner to allow a taxpayer's continued employment of an otherwise impermissible accounting method if the method is "consistently used by the taxpayer" and if, *"in the opinion of the Commissioner,* income is clearly reflected by the use of such method." *See Pierce Ditching Co., Inc. v. Commissioner*, 73 T.C. 301 (1979). So long as the Commissioner does not act arbitrarily, his opinion is determinative of whether a particular accounting method clearly reflects income. *Bangor Punta Opera-*

tions, Inc. v. United States, 466 F.2d 930, 935 (7th Cir. 1972).

Pursuant to section 1.446-1(c)(2)(ii) of the regulations, the Commissioner issued Rev. Rul. 72-114, which permits a utility to use the otherwise unacceptable cycle meter reading method if the utility prepares its financial accounting statements on a conforming basis. The Commissioner granted this permission for three reasons. First, the cycle meter reading method had been extensively used in the utility industry's financial statements for many years and requiring the entire industry to adopt a different method for tax purposes would have imposed substantial costs and inconvenience. Second, the industry then had stable year-to-year costs and revenues so that the cycle meter reading method produced little distortion on an industry-wide basis. Third, the cycle meter reading method is theoretically incorrect under generally accepted accounting principles and, therefore, cannot be used for financial accounting purposes if it materially distorts income when compared with results under a strict accrual method. Consequently, a given utility's independent auditors will require the utility to prepare financial statements under accrual principles, rather than under the cycle meter reading method, whenever the cycle meter reading method produces income distortion in excess of the level tolerated by the materiality standard. *See* Accounting Principles Board Statement No. 4, Basic Concepts and Accounting Principles Underlying Financial Statements of Business Enterprises, Chapter 6 (Oct. 1970); Financial Accounting Standards Board, Statement of Financial Accounting Concepts No. 2, Qualitative Characteristics of Accounting Information (May 1980). Thus, as long as a given utility's financial accounting statements conform to its use of the cycle meter reading method in preparing its income tax returns, the Commissioner can be certain that the utility's independent auditors do not view the cycle meter reading method as materially distorting income. While the Service does not accept the accounting profession's materiality standard as the government measure of clear reflection of income for tax purposes, *see All-Steel Equipment, Inc. v. Commissioner*, 54 T.C. 1749, 1751-52 (1970), *Acq. in result*, 1978-2 C.B. 1, *nonacq.*, 1978-2 C.B. 3, *rev'd on other grounds*, 467 F.2d 1184 (7th Cir. 1972), reliance on that standard operates as a check against the extreme income distortion that might otherwise occur in individual cases under the cycle meter reading method.

Obviously, the conformity requirement is crucial to the Commissioner's grant of permission in Revenue Ruling 72-114 to employ an otherwise objectionable accounting method. It allows the Commissioner to rely on independent auditors to verify that no "material" distortion of income, as defined by the accounting profession's materiality standard, results from use of the cycle meter reading method in individual cases. However, when a utility ceases to conform its financial statements to its tax return use of the cycle meter reading method, the Commissioner's ability to rely on the limited protection afforded by the auditor's policing function is lost. The Commissioner must then either withdraw permission to use the method or make periodic case-by-case determinations of whether the method produces a material distortion of income. Since a case-by-case approach would represent a disproportionate and inappropriate use of the Commissioner's audit resources and since the cycle meter reading method is prima facie unacceptable for income tax purposes, Rev. Rul. 72-114 provides that use of the method is contingent on compliance with the conformity requirement. This position is clearly a reasonable exercise of administrative discretion and is also consistent with the holding in *All-Steel Equipment, Inc. v. Commissioner*, 54 T.C. 1749, 1751-58 (1970), *Acq. in result*, 1978-2 C.B. 1, *nonacq.*, 1978-2 C.B. 3, *rev'd on other grounds*, 467 F.2d 1184 (7th Cir. 1972), that a method of accounting which distorts income, as the cycle meter reading method does, is not rendered acceptable for tax purposes by the fact that the distortion is immaterial under financial accounting criteria.

The Orange and Rockland and Public Service Co. of New Hampshire Cases

For reasons given above, the *Orange and Rockland* and *Public Service Co. of New Hampshire* decisions improperly allowed non-conforming utilities to continue using the cycle meter reading method. Accordingly, the Internal Revenue Service will follow neither case.

Revocation of Revenue Ruling 72-114

In 1972, when Rev. Rul. 72-114 was promulgated, the cycle meter reading method was employed by the overwhelming majority of gas and electric utilities in preparing their financial accounting statements. Furthermore, the utility industry was then experiencing stable costs, prices and volumes with the result that costs and revenues were consistent from year-to-year. In these circumstances, use of the cycle meter reading method for tax purposes produced little industry-wide income distortion; and the conformity requirement of Rev. Rul. 72-114 served as a check against material distortions in individual cases. Therefore, the Commissioner made the administrative judgment that it was appropriate to permit utilities to employ the cycle meter reading method for income tax purposes rather than require an entire industry to bear the expense and inconvenience of using an accounting method for income tax purposes that differed from the industry-wide financial accounting method.

The facts which the Commissioner relied on in 1972 have changed substantially. For several years, the utility industry has not had stable year-to-year revenues and costs. As a result, the cycle meter reading method now produces significant, wide-spread income distortions. Furthermore a sizeable and increasing segment of the industry has discontinued use of the cycle meter reading method for financial accounting purposes. Therefore, the Internal Revenue Service is studying the propriety of revoking Rev. Rul. 72-114, effective for tax years beginning on or after the publication of this announcement in the Internal Revenue Bulletin.

Revision of Form 4789, Currency Transaction Report

Announcement 86-66[1]

A revised Form 4789, (December 1985 revision) Currency Transaction Report, for reporting cash transactions of more than $10,000, will become effective on July 1, 1986.

---

[1] Based on News Release IR-86-53, dated April 28, 1986.

Until then, financial institutions should continue to use the present Form 4789 but may now order the revised version from Internal Revenue Service Forms Distribution Centers.

These forms should be filed with the Detroit Data Center, P.O. Box 42621, Detroit, MI 48232, Attn: CTR. As of July 1, 1986, all prior forms should be destroyed.

Any institutions wishing to print their own Forms 4789 may obtain reproduction proofs by writing the Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, Attn: Reproduction Coordinator, PM:S:FM:P:D.

Change in Reporting Distributions of Excess Contributions Made to IRAs

Announcement 86-67

Section 408(d)(4) of the Internal Revenue Code provides that if excess contributions made to an individual retirement account (IRA) plus earnings on such excess are distributed to the participant before the due date of his or her return (including extensions), the earnings are taxable to the participant in the year the excess contributions were made.

The instructions for Form 5498, Individual Retirement Arrangement Information, currently advise financial institutions and other trustees and issuers of IRAs to report these distributions on Form W-2P,, Statement for Recipients of Annuities, Pensions, Retired Pay, or IRA Payments; or on Form 1099-R, Statement for Recipients of Total Distributions From Profit-Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc., for the year in which the contribution was made.

The Service realizes that it is very difficult for many financial institutions and other trustees and issuers to use a prior year form to report the distribution, made after the close of the year, of earnings attributable to excess contributions that were made in the prior year. Therefore, to ease the burden imposed on these filers, the Service has established a procedure, effective immediately, to permit the reporting of these distributions on a current year Form W-2P or 1099-R. To indicate that the earnings distributed are taxable in the prior year, the filer should enter code "P" in the distribution category box of the appropriate form (Box 14 of Form W-2P or Box 7 of Form 1099-R) if the excess contribution was made in the year just prior to the year of distribution. This code will be added to the list of distribution codes when the instructions for Forms W-2P and 1099-R are revised for 1987. Filers should continue to use code 8 to indicate that the earnings are taxable in the current year if the excess contribution was made and withdrawn in the same year.

This new code will also be added to the magnetic media revenue procedures being developed by the Service for 1986.

Announcement of the Disbarment, Suspension, or Consent to Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents and Enrolled Actuaries from Practice Before the Internal Revenue Service

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Revenue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletin for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

The following individuals have been placed under consent suspension from practice before the Internal Revenue Service:

Name	Address	Designation	Term of Suspension
Louis Crown	Bayside, NY	Certified Public Accountant	Indefinite from March 14, 1986
David H. Heilman	Council Grove, KS	Attorney	Indefinite from March 14, 1986
Beryl W. Markwell	Elmhurst, IL	Certified Public Accountant	Twenty-four Months from March 20, 1986
Marc Pozner	Tenafly, NJ	Certified Public Accountant	Indefinite from March 14, 1986
A. Russel Lucid	Norwell, MA	Attorney	Indefinite from March 26, 1986
Gary E. Borushko	Grosse Pointe Wood, MI	Certified Public Accountant	Indefinite from April 7, 1986
Paul Skulsky	Spring Valley, NY	Certified Public Accountant	Indefinite from April 1, 1986

Under Section 330, Title 31 of the United States Code (1970 ed.), the Secretary of the Treasury, after due notice and opportunity for hearing, is authorized to suspend or disbar from practice before the Internal Revenue Service any attorney, certified public accountant, enrolled agent, or enrolled actuary who has violated the rules and regulations governing such practice.

Attorneys, certified public accountants, enrolled agents and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before their Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify such disbarred or suspended practitioners, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been disbarred or suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date of disbarment or period of suspension. This announcement will continue to appear in the weekly Bulletin for five successive weeks for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended or disbarred and will later be consolidated and published in the Cumulative Bulletin.

After due notice and opportunity for hearing, the following individuals have been disbarred from further practice before the Internal Revenue Service:

Name	Address	Designation	Effective Date
Thomas G. Abernethy, Jr.	Jackson, MS	Attorney	March 7, 1986
Thomas H. Foxhill, Jr.	Pemberton, NJ	Enrolled Agent	April 12, 1986
Peter Parker	Baltimore, MD	Attorney	April 12, 1986

Announcement of the Suspension, Termination, or Consent to Voluntary Suspension or Termination of Enrollment to Perform Actuarial Services Under the Employee Retirement Income Security Act of 1974

Under 20 Code of Federal Regulations, Part 901, an enrolled actuary, in order to avoid the initiation or conclusion of a suspension or termination proceeding, may offer his/her consent to suspension of enrollment. The Executive Director, Joint Board for the Enrollment of Actuaries, may suspend enrollment in accordance with the consent offered. An enrolled actuary whose enrollment is suspended is prohibited from performing actuarial services under the Employee Retirement Income Security Act of 1974 (ERISA) during the period of suspension.

To enable employees of the Internal Revenue Service and others to indentify enrolled actuaries under suspension, the Executive Director will announce in the Internal Revenue Bulletin the names and addresses of enrolled actuaries who have been suspended. This announcement will appear in the weekly Bulletin at the earliest practicable date following suspension and will continue to appear in the weekly Bulletin for at least three successive weeks for each enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

Name of Enrolled Actuary	Address	Term of Suspension
Robert E. Nemann	Cincinnati, OH	For three months effective April 9, 1986

Announcement Relating to Proposed Regulations Published With Notice of Proposed Rulemaking

Changes in regulations as announced below have been published in the Federal Register in tentative or proposed form to provide interested parties with an opportunity to file their objections or suggestions for consideration prior to final adoption of such regulations. These announcements will appear in the Bulletin during the period which has been prescribed for the submission and consideration of any views, arguments, or suggestions pertaining to the proposed regulations so published. Statement of such views, arguments or suggestions should be submitted in writing, preferably six copies, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

Original issue discount rules, imputed interest rules, and safe haven interest rates	1986-18 I.R.B. 4	June 9, 1986

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as "rulings") that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with *modified, below*).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with *amplified* and *clarified*, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in law or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in the new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1954 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, *modified and superseded* describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.

Abbreviations

The following abbreviations in current use and formerly used will appear in material published in the Bulletin.

A—Individual.
Acq.—Acquiescence.

INTERNAL REVENUE BULLETIN

The Introduction on page 3 describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of the weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and *are not* included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

BULLETIN INDEX-DIGEST SYSTEM

The Bulletin Index-Digest System provides a fast and easy way to research Revenue Rulings, Revenue Procedures, Public Laws, Treasury Decisions, and other matters of a permanent nature published in the weekly Internal Revenue Bulletin, or Cumulative Bulletin from 1953 on. It is a comprehensive and up-to-date research tool that requires no filing or other clerical maintenance. The current revision consists of four Services, available on a subscription basis, each including a basic volume that covers the period 1953-1983/1984 and a cumulative supplement covering material published in subsequent Bulletins for the following two-year period. Cumulative supplements are issued quarterly for the Income Tax Service and semiannually for the Estate and Gift, Employment, and Excise Tax Service.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Please allow two to six weeks, plus mailing time, for delivery.

Highlights of this Issue

These synopses are intended only as aids to the reader in identifying the subject matter covered. They may not be relied upon as authoritative interpretations.

INCOME TAX

Rev. Rul. 86-69, page 4.
Qualified tuition reductions. Amounts excludable from gross income as a qualified tuition reduction under section 117(d)(1) are not subject to the $5,000 limitation of section 127(a)(2).

Rev. Rul. 86-70, page 4.
Carryover; disallowed interest. A carryover of disallowed interest is not available to the extent it exceeds taxable income for the taxable year in which it was paid or accrued.

Rev. Rul. 86-71, page 5.
Deductions; fee for preparation of F.C.C. license application. An amount paid for the preparation of an F.C.C. application for a license to operate a radio system is a capital expenditure and not deductible as an expense under section 212 of the Code. If the application is denied, the fee paid may be deductible at some future date as a loss under section 165.

Rev. Rul. 86-72, page 6.
Installment obligation; cancelled on death of payee. Gain is recognized by the estate of a payee of an installment obligation that is cancelled because of the death of the payee.

Rev. Rul. 86-73, page 7.
Partnerships; termination on sale of interests; effect of section 754 election of deemed distribution to incoming partner. A section 754 election in effect upon the sale of a 50 percent interest in partnership capital and profits applies to the interest of the incoming partner for purposes of determining adjusted basis upon the deemed distribution of partnership assets following a termination under section 708(b)(1)(B).

EMPLOYEE PLANS

Rev. Rul. 86-78, page 11.
Individual retirement arrangements; disclosure. If values under an individual retirement arrangement (IRA) are guaranteed or can be projected, the trustee or issuer must in certain instances disclose to an IRA purchaser the amounts guaranteed or projected to be withdrawable.

EXEMPT ORGANIZATIONS

Rev. Proc. 86-23, page 17.
Information returns; church-affiliated organizations. Certain church-affiliated organizations that are internally supported are relieved from filing annual information returns. Rev. Rul. 83-23 supplemented and Notice 84-2 superseded.

Announcement 86-68, page 36.
A list is given of organizations now classified as private foundations.

ADMINISTRATIVE

Rev. Proc. 86-24, page 18.
Reproduction of Forms W-2, W-2P, and W-3. Specifications are set forth under which substitutes for Forms W-2, W-2P, and W-3 may be privately printed without prior approval by the Service. Rev. Proc. 85-20 superseded.

T.D. 8077, page 8.
Amendments to the regulations under section 7611 of the Code relate to the procedures for conducting church tax inquiries and examinations.

Announcement 86-69, page 37.
Wages of state and local government employees hired after March 31, 1986, are generally subject to the Medicare portion of the social security tax under the recently enacted Consolidated Omnibus Budget Reconciliation Act. To allow employers time to implement the new requirements of the law, the Service will waive penalties on the tax due for April through December 1986 provided the taxes due are paid by February 2, 1987.

Finding Lists begin on page 42.
Announcement of Disbarments and Suspensions begin on page 38.
Announcement of Notice of Proposed Rulemaking on page 40.

Department of the Treasury
Internal Revenue Service

T 22.23:

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenues at the least cost to the public, and in a manner that warrants the highest degree of public confidence in our integrity, efficiency and fairness. To achieve that purpose, we will:

—Encourage and achieve the highest possible degree of voluntary compliance in accordance with the tax law and regulations;

—Advise the public of their rights and responsibilities;

—Determine the extent of compliance and the causes of noncompliance;

—Do all things needed for the proper administration and enforcement of the tax laws;

—Continually search for and implement new, more efficient and effective ways of accomplishing our Mission.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents of a permanent nature are consolidated semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

Part I.—1954 Code.

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1954.

Part II.—Treaties and Tax Legislation.

This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.

To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts.

Part IV.—Items of General Interest.

With the exception of the disbarment and suspension list included in this part, none of these announcements is consolidated in the Cumulative Bulletins.

The first Bulletin for each month includes an index for the matters published during the preceding month. These monthly indexes are cumulated on a quarterly and semiannual basis, and are published in the first Bulletin of the succeeding quarterly and semi-annual period, respectively.

The Bulletin Index-Digest System, a research and reference service supplementing the Bulletin, may be obtained from the Superintendent of Documents on a subscription basis. It consists of four Services: Service No. 1, Income Tax; Service No. 2, Estate and Gift Taxes; Service No. 3, Employment Taxes; Service No. 4, Excise Taxes. Each Service consists of a basic volume and a cumulative supplement that provide (1) finding lists of items published in the Bulletin, (2) digests of revenue rulings, revenue procedures, and other published items, and (3) indexes of Public Laws, Treasury Decisions, and Tax Conventions.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Prices: Domestic—$1.75 a single copy, $82.00 a year subscription. Foreign—$2.19 a single copy, $102.50 a year for subscription.

Part I. Rulings and Decisions Under the Internal Revenue Code of 1954

Section 117.—Scholarships and Fellowship Grants

(Also Section 127.)

Qualified tuition reductions. Amounts excludable from gross income as a qualified tuition reduction under section 117(d)(1) are not subject to the $5,000 limitation of section 127(a)(2).

Rev. Rul. 86-69

ISSUE

In the case of the graduate student engaged in teaching or research activities at a university described in section 170(b)(1)(A)(ii) of the Internal Revenue Code, is the $5,000 limit of section 127(a)(2) of the Code applicable to a qualified tuition reduction that is excluded from gross income under section 117(d)(1) of the Code?

FACTS

A is a graduate student and a candidate for a Ph.D. degree at *U*, a university described in section 170(b)(1)(A)(ii) of the Code. *A* also is engaged in teaching or research activities for *U*. In 1985, *U* reduced *A*'s tuition by $6,000. *U* does not maintain for its employees an educational assistance program described in section 127(b).

LAW AND ANALYSIS

Section 117(d)(1) of the Code provides that gross income does not include any qualified tuition reduction.

Section 117(d)(2) of the Code provides that the term "qualified tuition reduction" means the amount of any reduction in tuition provided to an employee of an organization described in section 170(b)(1)(A)(ii) for the education (below the graduate level) at such organization (or another organization described in section 170(b)(1)(A)(ii)) of such employee, or any person treated as an employee (or whose use is treated as an employee use) under the rules of section 132(f).

Section 127(a)(1) of the Code provides that gross income of an employee does not include amounts paid or expenses incurred by the employer for educational assistance to the employee if the assistance is furnished pursuant to a program that meets the requirements of section 127(b).

Section 127(a)(2) of the Code provides that if section 127 would otherwise exclude from gross income more than $5,000 of educational assistance furnished to an individual during a calendar year, section 127(a) will apply only to the first $5,000 of such assistance so furnished.

Section 127(c)(6) of the Code provides that section 127 will not be construed to affect the deduction or inclusion in income of amounts (not within the exclusion under section 127) that are paid or incurred, or received as reimbursement, for educational expenses under section 117, 162 or 212.

Section 127(c)(8) of the Code provides that, in the case of the education of an individual who is a graduate student at an educational organization described in section 170(b)(1)(A)(ii) and who is engaged in teaching or research activities for such organization, section 117(d)(2) will be applied as if it did not contain the phrase "(below the graduate level)."

Pursuant to section 127(d), section 127 will not apply to taxable years beginning after December 31, 1985.

Section 127(c)(8) was added to the Internal Revenue Code of section 1(c) of Pub. L. 98-611, 1985-1 C.B. 413. Section 127(c)(8) is effective for taxable years beginning after December 31, 1983, and, in the case of education described in section 127(c)(8), section 117(d) is treated as being in effect on and after January 1, 1984. Sections 1(g)(1) and 1(g)(5) of Pub. L. 98-611, 1985-1 C.B. 413, 414. The legislative history states with reference to section 127(c)(8):

> Under the bill, the exclusion from gross income for income and employment taxes for qualified tuition reductions (sec. 117(d)) is extended to apply to education furnished to graduate students who are employees of certain educational institutions and who perform teaching or research activities for the educational institutions.

H.R. Rep. No. 98-1049, 98th Cong., 2d Sess. 8, 1985-1 C.B. 414, 416.

In the present situation, section 127(c)(8) extends section 117(d) to *U*'s reduction of *A*'s tuition. As indicated in section 127(c)(6) of the Code, the provisions of sections 117(d)(1) and 127(a) are independent of each other, and amounts that would not be excluded from gross income under section 127(a) may, nonetheless, be excluded under section 117(d)(1). Thus, the $5,000 limitation on the annual exclusion for amounts furnished under an educational assistance program (section 127(a)(2)) does not apply to a qualified tuition reduction under section 117(d)(1).

HOLDING

Whether *A* may exclude the $6,000 of tuition reduction received in 1985 from gross income under section 117(d)(1) is determined without regard to the $5,000 limitation under section 127(a)(2). Any amount of tuition reduction received by *A* in taxable years beginning after December 31, 1985, may not be excluded from *A*'s gross income under 117(d)(1) or 127.

Section 127.—Educational Assistance Programs

Whether amounts excludable from gross income as a qualified tuition reduction under section 117(d)(1) of the Code are subject to the $5,000 limitation under section 127(a)(2). See Rev. Rul. 86-69, this page.

Section 163.—Interest

26 CFR 1.163-1: Interest deduction in general.

Carryover; disallowed interest. A carryover of disallowed interest is not available to the extent it exceeds taxable income for the taxable year in which it was paid or accrued.

Rev. Rul. 86-70

ISSUE

Under the circumstances described below, is a carryover of disallowed interest on investment indebtedness under section 163(d)(2) of the Internal Revenue Code to a succeeding taxable year available to a taxpayer to the extent that the disallowed interest exceeds the taxpayer's taxable income for the taxable year in which the interest was paid or accrued?

FACTS

A, an individual taxpayer, had adjusted gross income as defined in section 62 of the Code of \$100*x* in 1984. *A*'s itemized deductions, as defined in section 63(f) (including all investment interest expense) plus *A*'s personal exemptions totaled \$190*x*. *A* had no unused zero bracket amount as defined in section 63(e). *A*'s deductions as determined before application of section 163(d)(1) did not result in a net operating loss for 1984 as defined in section 172(c). *A*'s computation of the limitation on investment interest under section 163(d)(1) resulted in disallowed interest of \$50*x*. Consequently, *A*'s total allowable deductions under section 63 for 1984 were \$140*x* (\$190*x* − \$50*x*), which exceeded *A*'s adjusted gross income by \$40*x*. Thus, *A* had no taxable income for 1984.

LAW AND ANALYSIS

Section 63(b) of the Code defines taxable income, in the case of an individual, as adjusted gross income reduced by the sum of the excess itemized deductions, the deductions for personal exemptions provided by section 151, and the direct charitable deduction.

Section 163(d)(1) of the Code imposes certain limitations on the amount of interest on investment indebtedness that is allowable as a deduction.

Section 163(d)(2) of the Code provides that the amount of disallowed investment interest for any taxable year shall be treated as investment interest paid or accrued in the succeeding taxable year.

Section 163(d)(3)(E) of the Code provides that the term "disallowed investment interest" means that respect to any taxable year, the amount not allowable as a deduction solely by reason of the limitation in section 163(d)(1).

Section 163(d)(3)(E) of the Code was enacted as part of the Tax Reform Act of 1969, section 221, 1969-3 C.B. 10, 60. the report of the Committee on Ways and Means relating to this provision, H.R. Rep. No. 91-413 (Part 1), 91st Cong., 1st Sess. 74 (1969), 1969-3 C.B. 200, 245-46, explains that a carryover of disallowed interest on investment indebtedness is not available to the extent the disallowed interest exceeds the taxpayer's taxable income for the taxable year in which the interest was paid or accrued. In such circumstances, the disallowed interest would not have reduced taxable income even if it had been allowed as a deduction in that year.

In this case, *A*'s allowable deductions under section 63 of the Code in 1984 exceeded *A*'s adjusted gross income for that year by \$40*x* and resulted in no taxable income. Thus, the disallowed interest would not have reduced *A*'s taxable income in 1984 even if it had been allowed in that year. The \$50*x* of disallowed interest is not therefore disallowed *solely* by reason of section 163(d)(1), and that amount does not constitute "disallowed investment interest" that may be carried over to 1985 under section 163(d)(2).

HOLDING

In the circumstances described above, a carryover of disallowed interest under section 163(d)(2) of the Code to a succeeding taxable year is not available to a taxpayer to the extent that the disallowed interest exceeds the taxpayer's taxable income for the taxable year in which the interest was paid or accrued.

Section 165.—Losses

26 CFR 1.165-1: Losses.

The extent to which an individual may deduct as a loss amounts extended in an unsuccessful attempt to obtain a license to operate a cellular radiotelephone system. See Rev. Rul. 86-71, below.

Section 212.—Expenses for Production of Income

26 CFR 1.212-1: Nontrade or nonbusiness expenses.
(Also Sections 165, 263, 461; 1.165-1, 1.263(a)-1, 1.461-1.)

Deductions; fee for preparation of F.C.C. license application. An amount paid for the preparation of an F.C.C. application for a license to operate a radio system is a capital expenditure and not deductible as an expense under section 212 of the Code. If the application is denied, the fee paid may be deductible at some future date as a loss under section 165.

Rev. Rul. 86-71

ISSUE

If a taxpayer pays a person to prepare an application for a Common Carrier Radio Station Construction Permit and License from the Federal Communications Commission (F.C.C.), is the payment deductible as an expense under section 212 of the Internal Revenue Code in the circumstances described below?

FACTS

In November 1984, taxpayer *A*, an individual not otherwise involved in the telecommunications industry, signed a contract with *X*, a corporation engaged in the business of providing engineering, economic, and financial planning in the telecommunications industry. Under the agreement, *X* prepared and filed a Common Carrier Radio Station Application on behalf of *A* in December 1984. The application is guaranteed to satisfy the filing requirements of the F.C.C., although no assurance is provided that the application will be granted. The application is for participation in the F.C.C.'s random selection program to award licenses to operate cellular radio systems. If granted, the license covers a period greater than one year. The F.C.C. procedures did not permit an award of a license in 1984 for the geographic area that *A*'s application covers, and *A*'s application was not, in fact, acted upon in 1984.

X charged a fee of 30*x* dollars for its services. *A* paid the fee in cash in November 1984.

LAW AND ANALYSIS

Section 212 of the Code provides that an individual shall be allowed a deduction for all ordinary and necessary expenses paid or incurred for the production or collection of income, and for the management, conservation, or maintenance of property held for the production of income. Under section 211, these deductions are limited by exceptions provided by sections 261 through 280G. One of these exceptions, contained in section 263 and sections 1.263(a)-1 and 1.263(a)-2 of the Income Tax Regulations, provides that no deduction shall be allowed for capital expenditures. In addition, section 1.212-1(n) of the regulations provides that no deduction is allowed under section 212 for a capital expenditure.

The costs of obtaining a license to operate a cellular radio-telephone system with a useful life greater than one year are costs of obtaining a capital asset and are not currently deductible as ordinary and necessary expenses for the production of income. *See Dustin v. Commissioner*, 53 T.C. 491 (1969), *aff'd*, 467 F.2d 47 (9th Cir. 1972); *KWTX Broadcasting Co., Inc. v. Commissioner*, 31 T.C. 952, *aff'd per curiam*, 272 F.2d 406 (5th Cir. 1959); *Radio Station WBIR, Inc. v. Commissioner*, 31 T.C. 803 (1959). *See also* Rev. Rul. 56-520, 1956-2 C.B. 170.

In the present situation, the fee paid by *A* is to file an application to acquire an operating license, with a useful life greater than one year, that *A* may obtain at some indefinite future date. Accordingly, the expense is related to the cost of acquiring a capital asset, and pursuant to section 263 of the Code and sections 1.263(a)-1, 1.263(a)-2 and 1.212-1(n) of the regulations, *A* is not entitled to deduct the fee paid to *X* under section 212. *See Central Texas Savings & Loan Association v. United States*, 731 F.2d 1181 (5th Cir. 1984).

If, however, *A* is unsuccessful in obtaining the license, a deduction for the application fee may be allowable as a loss under section 165(a) of the Code. *A* will not be allowed to deduct the loss until the tax year in which final action is taken to deny the application. Section 1.165-1(b) of the regulations; Rev. Rul. 71-191, 1971-1 C.B. 77, clarified by Rev. Rul. 79-346, 1979-2 C.B. 84; Rev. Rul. 83-137, 1983-2 C.B. 41; Rev. Rul. 56-520, 1956-2 C.B. 170.

HOLDING

The fee paid by *A* to *X* in 1984 is a capital expenditure within the scope of section 263, and thus is not deductible as as expense under seciton 212 of the Code.

Section 263.—Capital Expenditures

26 CFR 1.263(a)-1: Capital expenditures; in general.

Whether an amount expended to obtain a license to operate a cellular radiotelephone system is a capital expenditure. See Rev. Rul. 86-71, page 5.

Section 453.—Installment Method

26 CFR 1.453-1: Installment method of reporting income.

Whether gain is recognized by a payee's estate if, pursuant to the terms of an installment note, the note is automatically cancelled on the payee's death. See Rev. Rul. 86-72, this page.

Section 453B.—Gain or Loss on Disposition of Installment Obligations

Whether gain is recognized by a payee's estate if, pursuant to the terms of an installment note, the note is automatically cancelled on the payee's death. See Rev. Rul. 86-72, this page.

Section 461.—General Rule For Taxable Year of Deduction

26 CFR 1.461-1: General rule for taxable year of deduction.

When amounts expended to obtain a license to operate a cellular radiotelephone system may be deducted. See Rev. Rul. 86-71, page 5.

Section 691.—Recipients of Income in Respect of Decedents

26 CFR 1.691(a)-1: Income in respect of a decedent.
(Also Sections 453, 453B.)

Installment obligation; cancelled on death of payee. Gain is recognized by the estate of a payee of an installment obligation that is cancelled because of the death of the payee.

Rev. Rul. 86-72

ISSUE

Is gain recognized when an installment obligation terminates because of the death of the payee, and, if so, is the gain recognized by the payee or the payee's estate.

FACTS

On July 1, 1981, *A*, an individual taxpayer, sold property and accepted a cash downpayment and an installment note providing for payment in annual installments over 4 years, plus interest at 11 percent on the unpaid balance. Both the sales agreement and the installment note provided that all sums due on the note were automatically extinguished and cancelled at *A*'s death. *A* reported the gain on the sale on the installment method of accounting under section 453 of the Internal Revenue Code.

On the date of the sale, *A*'s actuarial life expectancy was 21 years, as determined by reference to Table 1.—Ordinary Life Annuities—One Life—Expected Return Multiples, in section 1.72-9 of the Income Tax Regulations. *A* died 2 years after the sale, with 2 installment payments outstanding.

LAW AND ANALYSIS

Section 453 of the Code permits the transferor in an installment sale to take into account ratably over the period during which the installment payments are received, any gain resulting from the sale. Section 453B(a) provides generally that gain or loss shall result from the disposition of an installment obligation. Section 453B(f)(1) treats the cancellation of an installment obligation as a taxable disposition. Section 453B(c) provides that, except as provided in section 691, the disposition rules of section 453B do not apply to the transmission of installment obligations at death.

Section 691(a)(2) of the Code provides that if a right to receive an amount is transferred by the estate of the decedent, there shall be included in the gross income of the estate for the taxable period in which the transfer occurs the fair market value of such right at the time of such transfer plus the amount by which any consideration for the transfer exceeds such fair market value.

Section 691(a)(5) of the Code provides that, for purposes of 691(a)(2), in the case of an installment obligation held by the decedent before the decedent's death and reportable by the decedent under section 453, any cancellation of the obligation at the death of the decedent shall be treated as a transfer by the decedent's estate.

In the present case, *A*'s death cancelled the installment obligation with 2 payments outstanding. Because *A* reported the gain from the sale on the installment method of accounting, recognition of the portion of the gain represented by the outstanding payments was deferred during *A*'s lifetime.

The legislative history indicates that section 691(a)(5) of the code was enacted to clarify prior law, so that the installment obligation disposition rules would apply to obligations that are cancelled or become unenforceable by reason of death of the holder of the obligation. S. Rep. No. 96-1000, 96th Cong., 2d Sess. 26 (1980), 1980-2 C.B. 494, 508.

HOLDING

Under sections 691(a)(2) and 691(a)(5), gain is recognized by and includible in the gross income of *A*'s estate.

Section 708—Continuation of Partnership

26 CFR 1.708-1: Continuation of partnership.
(Also Sections 732, 743, 754, 755; 1.732-2, 1.743-1, 1.754-1, 1.755-1.)

Partnership; termination of sale interests; effect of section 754 election on deemed distribution to incoming partner. A section 754 election in effect upon the sale of a 50 percent interest in partnership capital and profits applies to the interest of the incoming partner for purposes of determining adjusted basis upon the deemed distribution of partnership assets following a termination under section 708(b)(1)(B).

Rev. Rul. 86-73

ISSUE

If a 50 percent interest in a partnership is sold causing the partnership to terminate under section 708(b)(1)(B) of the Internal Revenue Code and a section 754 election is in effect for the taxable year in which the sale occurs, does the election apply with respect to the incoming partner so that the bases of any partnership assets are adjusted prior to their deemed distribution to the partner.

FACTS

T, a 50 percent partner in *PT*, a partnership, sold *T*'s interest to *A*. For the taxable year in which the sale occurred, *PT* had an election in effect under section 754 of the Code, and the fair market value of *PT*'s property exceeded its adjusted basis.

LAW AND ANALYSIS

Section 708(b)(1)(B) of the Code provides that a partnership shall be considered as terminated if within a twelve month period there is a sale or exchange of 50 percent or more of the total interest in partnership capital and profits.

Section 1.708-1(b)(1)(iv) of the Income Tax Regulations provides that if a partnership is terminated by a sale or exchange of an interest, the partnership is deemed to distribute its properties to the purchaser and to the other remaining partners in proportion to their respective interests in the partnership properties. Immediately thereafter, the purchaser and the other remaining partners are deemed to contribute the properties to a new partnership. The last sentence of that provision states that, for an election of basis adjustments by the purchaser and other remaining partners, see sections 732(d) and 743(b) of the Code and the regulations thereunder.

Section 732(b) of the Code provides that the basis of property (other than money) distributed by a partnership to a partner in liquidation of the partner's interest shall be an amount equal to the adjusted basis of such partner's interest in the partnership reduced by any money distributed in the same transaction.

Section 732(c) of the Code provides that the basis of distributed properties to which section 732(b) is applicable generally shall be allocated first to any unrealized receivables and inventory items in an amount equal to the adjusted basis of each such property to the partnership and, to the extent of any remaining basis, to any other distributed properties in proportion to their adjusted based to the partnership.

Section 1.732-2(b) of the regulations provides that in the case of a distribution of property to a partner who acquired any part of an interest in a transfer as to which an election under section 754 of the Code was in effect, then, for the purposes of section 732, the adjusted partnership basis of the distributed property shall take into account the transferee's special basis adjustment for the distributed property under section 743(b).

Section 743(b) of the Code provides that in the case of a transfer of an interest in a partnership by sale or exchange, a partnership as to which the election provided in section 754 is in effect shall (1) increase the adjusted basis of the partnership property by the excess of the basis to the transferee partner of the partner's interest in the partnership over the partner's proportionate share of the adjusted basis of the partnership property, or (2) decrease the adjusted basis of the partnership property by the excess of the transferee partner's proportionate share of the adjusted basis of the partnership property over the basis of the partner's interest in the partnership. Such increase or decrease generally constitutes an adjustment to the basis of partnership property with respect to the transferee partner only.

Section 754 of the Code provides the manner in which a partnership shall file an election to adjust the basis of partnership property under section 743.

Section 755(a) of the Code provides that any increase or decrease in the adjusted basis of partnership property under section 743(b) shall be allocated in a manner which has the effect of reducing the difference between the fair market value and the adjusted basis of partnership properties.

The issue here is whether the section 754 election applies to adjust the basis of partnership assets with respect to the incoming 50 percent partner before the constructive liquidation of the partnership that occurs under section 1.708-1(b)(1)(iv) of the regulations, or whether the sale of the 50 percent interest to the incoming partner extinguishes the section 754 election before it can be applied.

The language of section 1.708-1(b)(1)(iv) of the regulations treats the partnership property as constructively distributed to the incoming purchaser and the remaining partners. This indicates that the purchaser is a partner for the instant before the constructive liquidating distribution is deemed to occur; thus, the purchaser is a partner at least for the purpose of the termination. Since the purchaser is a partner in the instant before termination, the section 754 election applies in that instant, and the incoming partner's basis in the partnership assets is correspondingly adjusted. Upon the deemed distribution-recontribution under section 1.708-1(b)(1)(iv), the special basis adjustment under section 743(b) of the Code is taken into account in applying sections 732(b) and (c). If the new partnership, *PA*, wants to make a section 754 election, it will have to file a new election.

The legislative history of section 743 buttresses the conclusion that the adjustment of basis of partnership assets is made before the deemed liquidating distribution occurs. The report of the Senate Finance Committee, S. Rep. No. 1622, 83d Cong., 2d Sess. 399 (1954), contains an example in which a section 754 election is applied to adjust the basis of partnership assets when a fifty percent interest in a partnership is sold.

HOLDING

If a 50 percent interest in a partnership is sold causing the partnership to terminate under section 708(b)(1)(B) of the Code, a section 754 election that is in effect for the taxable year in which the sale occurs applies with respect to the incoming partner. Therefore, the bases of any partnership assets are adjusted pursuant to sections 743 and 755 prior to their deemed distribution to the incoming partner.

Section 732.—Basis of Distributed Property Other Than Money

26 CFR 1.732-2: Special partnership basis of distributed property.

Whether a section 754 election applies to the transferee of a 50 percent interest in partnership capital and profits for purposes of the deemed distribution following the section 708(b)(1)(B) termination. See Rev. Rul. 86-73, page 7.

Section 743.—Optional Adjustment to Basis of Partnership Property

26 CFR 1.743-1: Optional adjustment to basis of partnership property.

Whether a section 754 election applies to the transferee of a 50 percent interest in partnership capital and profits for purposes of the deemed distribution following the section 708(b)(1)(B) termination. See Rev. Rul. 86-73, page 7.

Section 754.—Manner of Electing Optional Adjustment to Basis of Partnership Property

26 CFR 1.754-1: Time and manner of making election to adjust basis of partnership property.

Whether a section 754 election applies to the transferee of a 50 percent interest in partnership capital and profits for purposes of the deemed distribution following the section 708(b)(1)(B) termination. See Rev. Rul. 86-73, page 7.

Section 755.—Rules for Allocation of Basis

26 CFR 1.755-1: Rules for allocation of basis.

Whether a section 754 election applies to the transferee of a 50 percent interest in partnership capital and profits for purposes of the deemed distribution following the section 708(b)(1)(B) termination. See Rev. Rul. 86-73, page 7.

Section 6011.—General Requirement of Return, Statement or List

Printing of substitutes for Form W-2, Wage and Tax Statement, From W-2P, Statement for Recipients of Annuities, Pensions, Retired Pay or IRA Payments, and Form W-3, Transmittal of Income and Tax Statements. See Rev. Proc. 86-24, page 18.

Section 6033.—Returns by Exempt Organizations

26 CFR 1.6033-2: Returns by exempt organizations; taxable years beginning after December 31, 1969.

Additional class of exempt organizations that is not required to file Form 990. See Rev. Proc. 86-23, page 17.

Section 6041.—Information at Source

26 CFR 1.6041-1: Return of information as to payment of $600 or more.

Printing of substitutes for Form W-2, Wage and Tax Statement, Form W-2P, Statement for Recipients of Annuities, Pensions, Retired Pay or IRA Payments, and Form W-3, Transmittal of Income and Tax Statements. See Rev. Proc. 86-24, page 18.

Section 6047.—Information Relating to Certain Trusts and Annuity and Bond Purchase Plans

26 CFR 1.6047-1: Information to be furnished with regard to employee retirement plan covering an owner-employee.

Printing of substitutes for Form W-2, Wage and Tax Statement, Form W-2P, Statement for Recipients of Annuities, Pensions, Retired Pay or IRS Payments, and Form W-3, Transmittal of Income and Tax Statements. See Rev. Proc. 86-24, page 18.

Section 6051.—Receipts for Employees

26 CFR 31.6051-1: Statements for employees.

Printing of substitutes for Form W-2, Wage and Tax Statement, Form W-2P, Statement for Recipients of Annuities, Pensions, Retired Pay or IRA Payments, and Form W-3, Transmittal of Income and Tax Statements. See Rev. Proc. 86-24, page 18.

26 CFR 31.6051-2: Information returns on Form W-3 and Internal Revenue Service copies of Forms W-2.

Section 7611.—Restrictions on Church Tax Inquiries and Examinations

26 CFR 301.7611-1. Questions and answers relating to church tax inquiries and examinations.

T.D. 8077

TITLE 26—INTERNAL REVENUE.—CHAPTER 1, SUBCHAPTER F, Part 301—PROCEDURE AND ADMINISTRATION

Restrictions on Church Tax Inquiries and Examinations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the procedures for conducting church tax inquiries and examinations. Changes to the applicable law were made by the Tax Reform Act of 1984 [Pub. L. 98-369, 1984-3 C.B. (Vol. 1) 1]. The regulations provide guidance concerning the procedures described in the Act and affect church tax inquiries and examinations within the scope of section 7611 of the Internal Revenue Code of 1954 as well as certain other requests for information relating directly or indirectly to churches.

DATES: The regulations apply to all church tax inquiries and examinations beginning after December 31, 1984 and are effective after December 31, 1984. Church examinations commenced prior to January 1, 1985, will be conducted pursuant to section 7605(c) of the Internal Revenue Code of 1954.

FOR FURTHER INFORMATION CONTACT: Monice Rosenbaum of the Employee Plans and Exempt Organizations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention CC:EE) Telephone 202-566-3938 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On March 11, 1985, the Federal Register published proposed amendments to the Procedure and Administration Regulations (26 CFR Part 301), in the form of temporary regulations, under section 7611 of the Internal Revenue Code of 1954 (50 FR 9614) [T.D. 8013, 1985-1 C.B. 390]. The amendments were proposed to conform the regulations to changes made by the addition of section 7611 by section 1033 of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 1034-1039) [1984-3 C.B. (Vol. 1) 1, 546]. The temporary regulations were accompanied by a notice of proposed rulemaking published in the Federal Register on March 11, 1985 (50 FR 9678) [EE-1-85, 1985-1 C.B. 628] soliciting public comments.

Public comments on the proposed regulations were received. A public hearing was held on July 16, 1985. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

PUBLIC COMMENTS

Commentators suggested that the language of Q and A-3, defining what is a "church" for purposes of the section 7611 procedures, was inadequate in the case of an organization which operates at multiple locations or in the case of an organization composed of various functions some of which may or may not be separately incorporated. The text of Q and A-3 is not changed in these final regulations because the application of the section 7611 procedures to any organization "claiming to be a church" is deemed sufficiently broad to cover those situations where the Internal Revenue Service contacts the organization in a manner inconsistent with the section 7611 procedures on the assumption that the entity is not a church. Any organization claiming to be a church, and thus included under the procedures of section 7611, should advise the Internal Revenue Service of its claim when contacted.

Commentators questioned whether Q and A-5, concerning the extent to which the Internal Revenue Service may use third party records, and Q and A-11, concerning circumstances in which the Internal Revenue Service may, in lieu of an examination, propose to revoke an organization's exemption, were to be applied without regard to the procedures of section 7611. Qs and As 5 and 11, that refer to these situations, each contains specific language which requires the Internal Revenue Service to provide the organization with notice and offer of a conference.

Commentators noted that Q and A-15 provides that the Internal Revenue Service may examine records of a year earlier than the year, or years, specified in the examination notice. An examination of records of an earlier year may be made if material to a determination of exempt status during the period under examination or if material to a determination of unrelated business income tax liability. An examination of records of an earlier year may be necessary, for example, in cases concerning adjustments to basis, depreciation or amortization. The number of years under examination or for which an assessment of tax may be made are limited by section 7611(d)(2); however, section 7611(b)(4) authhorizes the examination of any records not specified in the examination notice to the extent necessary to determine tax liability.

Other comments received have been addressed in the Internal Revenue Manual provisions relating to church tax inquiries and examinations.

A change has been made to Q and A-9 in response to a comment suggesting that the Internal Revenue Service be required to request information during the inquiry notice stage in an effort to alleviate the concerns which gave rise to the inquiry.

A change has been made to Q and A-10 in response to a comment that the expansion of an examination should be a result of facts and circumstances which subsequently come to the attention of the Internal Revenue Service after issuance of the notice of examination.

SPECIAL ANALYSES

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required.

Although a notice of proposed rulemaking soliciting public comments was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these regulations are not subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

DRAFTING INFORMATION

The principal author of these regulations is Monice Rosenbaum of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

* * * * *

Adoption of Amendments to the Regulations

Accordingly, after careful consideration of all comments received, 26 CFR Part 301 is amended as follows:

PROCEDURE AND ADMINISTRATION

[26 CFR 301]

Paragraph 1. The authority for Part 301 continues to read in part:

Authority: 26 U.S.C. 7805. * * *.

Par. 2. Section 301.7611-1T is amended by removing "T" from the section number and removing the word "(Temporary)" from the title.

Par. 3. The last sentence of the first paragraph of A-9 of section 301.7611-1 is amended by removing the words "may also" and adding in their place the words "will generally".

Notice Requirements

Q-9: What satisfies the inquiry notice requirement (first notice) upon commencement of a church tax inquiry?

A-9: Upon commencing a church tax inquiry, the appropriate Regional Commissioner is required to provide written notice to the church of the beginning of the inquiry. This notice will include (1) an explanation of the concerns which gave rise to the inquiry and the general subject matter of the inquiry, which is sufficiently specific to allow the church to understand the particular area of church activities or behavior which is at issue; (2) a general explanation of the provisions of the Internal Revenue Code which authorize the inquiry or which may otherwise be involved in the inquiry; and (3) a general explanation of applicable administrative and constitutional provisions with respect to the inquiry, including the right to a conference with the Internal Revenue Service before an examination of church records is commenced. The inquiry notice (first notice) will generally request information in an effort to alleviate the concerns which gave rise to the inquiry.

However, the Internal Revenue Service is not precluded from expanding its inquiry beyond the concerns expressed in the inquiry notice (first notice) as a result of facts and circumstances which subsequently comes to its attention (including, where appropriate an expansion of an unrelated business income inquiry to include questions of tax-exempt status, and vice-versa).

The inquiry notice requirement (first notice) does not require the Internal Revenue Service to share particular items of evidence with the church, or to identify its sources of information regarding church activities, if providing such information would be damaging to the inquiry or to the sources of information. For example, in an inquiry regarding unrelated business income, the Internal Revenue Service might state that its inquiry was prompted by a local newspaper advertisement regarding a church-owned business. However, the Internal Revenue Service would not be required to reveal the existence or identity of any so-called "informers" within a church (including present or former employees).

Par. 4. the last sentence of the second paragraph of A-10 of section 301.7611-1 is amended by removing the words "(see Q and A-9)". The following new sentence is added to the end of that paragraph:

Q-10: What must be done to satisfy the examination notice requirement (second notice) before commencing an examination of church records or religious activities with respect to an examination conducted under section 7611?

A-10: Where an examination is conducted under section 7611, church records or religious activities of a church may be examined only if, at least 15 days prior to the examination, written notice of the proposed examination is provided to the church and to the appropriate Regional Counsel. This notice is in addition to the notice of commencement of inquiry (first notice) previously provided to the church.

The notice of examination (second notice) is required to include (1) a copy of the church tax inquiry notice (first notice) previously provided to the church; (2) a description of the church records and activities sought to be examined; and (3) a copy of all documents which were collected or prepared by the Internal Revenue Service for use in the examination, and which are required to be disclosed under the Freedom of Information Act (5 U.S.C. 552) as supplemented by section 6103 of the Code (relating to disclosure and confidentiality of tax return information). The documents to be supplied under this provision will be limited to documents specifically concerning the church whose records are to be examined and will not include documents relating to other inquiries or examinations or to Internal Revenue Service practices and procedures in general. Disclosure to the church will be subject to restrictions regarding the disclosure of the existence or identity of informants. Although a description of materials to be examined will be provided in the notice of examination (second notice), the description does not restrict the ability of the Internal Revenue Service to examine church records or religious activities which are not specifically mentioned in the notice of examination (second notice) but which are properly within the scope of the examination. Thus, the Internal Revenue Service is not precluded from expanding its inquiry beyond the concerns expressed in the examination notice (second notice) as a result of facts and circumstances which subsequently come to its attention (including, where appropriate, an expansion of an unrelated business income examination to include questions of tax-exempt status, and vice versa).

At the time the notice of examination (second notice) is provided to the church, a copy of the same notice will be provided to the appropriate Regional Counsel. The Regional Counsel is then allowed 15 days from issuance of the second notice in which to file an advisory objection to the examination. (This is concurrent with the 15-day period during which an examination of church records is prohibited pending a request for a conference.)

As part of the notice of examination (second notice), the church will be offered an opportunity to meet with an Internal Revenue Service official to discuss the concerns which gave rise to the inquiry and the general subject matter of the inquiry. An examination will not begin until 15 days after the mailing of the notice of examination (second notice). The organization may request a conference at any time prior to beginning of the examination and a conference so requested will be scheduled within a reasonable time after the request is made.

The purpose of the conference is to remind the church, in general terms, of the stages of the church tax inquiry and examination procedures and to discuss the relevant issues that may arise as part of the inquiry, in an effort to resolve the issues of tax exemption or liability without the necessity of an examination of church records or activities. Information properly excludable from a written notice of examination (second notice) (including information regarding the identity of third-party witnesses or evidence provided by such witnesses) is not a subject for discussion at, and will not be revealed during, a conference.

Once a conference request is timely made, an examination will begin only following the conference. The conference requirement may not be utilized to delay an examination beyond the time reasonably necessary to prepare for and hold the conference. The holding of one conference with the church will be sufficient to satisfy the requirements of section 7611 and these questions and answers.

ROSCOE L. EGGER, JR.,
Commissioner of
Internal Revenue.

Approved January 27, 1986.

J. ROGER MENTZ,
Acting Assistant Secretary
of the Treasury.

(Filed by the Office of the Federal Register on February 20, 1986, 8:45 a.m., and published in the issue of the Federal Register for February 21, 1986, 51 F.R. 6219)

Section 408.—Individual Retirement Accounts

26 CFR 1.408-6: Disclosure statements for individual retirement arrangements.

Individual retirement arrangements; disclosure. If values under an individual retirement arrangement (IRA) are guaranteed or can be projected, the trustee or issuer must in certain instances disclose to an IRA purchaser the amounts guaranteed or projected to be withdrawable.

Rev. Rul. 86-78

This ruling provides questions and answers relating to the financial disclosure that must be provided by the trustee or issuer of an individual retirement account or annuity (IRA) to the individual to be benefited by an IRA.

Section 1.408-6(d)(4) of the Income Tax Regulations provides that the trustee or isssuer of an IRA must furnish a disclosure statement to the benefited individual and prescribes the information the statement must contain. Among other things, the statement must satisfy the applicable financial disclosure requirements of section 1.408-6(d)(4)(v), (vi), and (vii) of the regulations. That section requires that where an amount is guaranteed over a period of time, or a projection of growth in value of the IRA can reasonably by made, the disclosure statement must show the amount guaranteed or projected to be made available to the benefited individual if (1) level annual contributions in the amount of $1,000 were made on the first day of each year, and (2) the benefited individual were to withdraw, in a single sum, the entire amount of the IRA at the end of each of the first five years during which contributions are to be made, at the end of the year in which the benefited individual attains the ages of 60, 65, and 70, and at the end of each year during which the increase in the guaranteed available amount is less than the increase in the guaranteed amount available during any preceding year. Similar information must be provided with respect to amounts guaranteed or projected to be made available under an IRA which is to receive only a rollover contribution except the amounts guaranteed or projected to be made available are based on only one $1,000 contribution made in the beginning of the year the rollover contribution occurred.

This ruling is being issued because of the widespread public interest in the amounts that must be shown to be made available on the IRA disclosure statement where the IRA values are either guaranteed or can reasonably be projected. It is important that trustees and issuers of IRAs know the IRS position on these matters because such trustees and issuers can be subject to penalties for failure to conform to IRA disclosure requirements.

No inference should be drawn regarding matters not addressed which may be suggested by a particular question or answer or as to why certain questions and not others are included.

Q–1. What must be taken into account in computing the amounts that are required to be disclosed where the values under the IRA are guaranteed or can be reasonably projected?

A–1. The amount that is shown to be available at any particular time must be the amount actually guaranteed or reasonably projected to be withdrawable after reduction for all charges or penalties that may be applied, including, for example, trustee fees and any penalties for early withdrawal (such as interest forfeiture provisions for early withdrawal for a time deposit). For example, the issuer of an IRA that guarantees or reasonably projects an earnings rate of 10 percent annual interest, but deducts five percent of any amounts withdrawn within five years after the account is established, must show $1,045 ($1,000 × 1.10 × .95) as the amount available if the account is withdrawn at the end of the first year, whether or not such fees and penalties are charged directly to the account or stated separately.

Q–2. In the example given in Q–1, would it be acceptable to show $1,100 as available at the end of the first year and indicate separately that there is a five percent or $55 ($1,100 × .05) deduction for withdrawal at the end of the first year?

A–2. No. The disclosure statement must show the amount that could actually be withdrawn by the benefited individual at the end of the first year after reduction for all applicable charges and penalties.

Q–3. Must guarantees or projections of IRA values available at ages 60, 65, and 70 of the benefited individual be based on the actual age of the benefited individual?

A–3. Yes. Amounts guaranteed or projected for ages 60, 65, and 70 must be computed based on the actual age of the benefited individual as of the date the IRA is established. The requirement to provide the value of the IRA at ages 60, 65, and 70 must be met by providing the values for the particular benefited individual at those ages.

Q–4. May the requirement discussed in Q-3 be met by providing a table that shows the values at those ages based on various ages at the time the IRA is established, including the age of the particular benefited individual at that time?

A–4. Yes. Also, it would be sufficient to provide a table that shows the value of the IRA based on the number of years after the IRA was established if the benefited individual, by knowing how many years it will be until he or she reaches ages 60, 65, and 70, could determine the value of the IRA at those times.

Q–5. If the IRA has a minimum guaranteed earnings rate that is lower than the rate currently being paid on the IRA investments, may the trustee or issuer of the IRA show projected amounts based on the earnings rate actually being paid?

A–5. If the trustee or issuer of the IRA is paying earnings at a greater rate than guaranteed to be paid and it is reasonable to project growth in values, the disclosure statement may show a projected amount available based on the actual greater rate. However, section 1.408-6(d)(4)(v)(A)(1) and (B)(2) of the regulations requires that the disclosure statement clearly identify what amounts are, or are not, guaranteed to be available to the benefited individual.

Q–6. If the earnings rate of the IRA is not guaranteed but a reasonable projection of growth may be made, may the projection use an assumed earnings rate that is greater than the rate being paid at the time the IRA is being established?

A–6. No. Where the values of the IRA are projected and not guaranteed, section 1.408–6(d)(4)(v)(B)(2) of the regulations requires the projection be based on an earnings rate no greater than the rate currently being paid.

Q–7. If the earnings rate of the IRA is not guaranteed but may be projected, may the projection use an assumed earnings rate that is lower than the rate being paid at the time the IRA is being established?

A–7. Yes. In fact, if the trustee or issuer uses the greatest earnings rate allowable in the disclosure statement projections, and the actual earnings rate then falls below that rate, the disclosure statement must be revised before the IRA is offered to other individuals. Thus, trustees or issuers of IRAs may prefer to use more conservative earnings rates than the greatest rate allowable so that small decreases in the earnings rate being paid will not require immediate modification of their disclosure statements.

Example

Bank M provides an IRA that guarantees an interest rate of 6 percent per year compounded daily using a 365/360 day year. However, a withdrawal penalty of 10 percent of the amount in the account is assessed by Bank M if withdrawal takes place within the first 10 years. Currently, the IRA is paying earnings at 8 percent using the same method of compounding as is used for the guaranteed rate. An individual establishes an IRA with Bank M. The disclosure requirements are satisfied if the following instructions and tables are provided to such individual (similar tables would be used for a rollover of $1,000, except that such tables would reflect only one payment of $1,000):

Instructions for Use of the Tables Below

(1) Find your age in the first column of the table.

(2) Look across the table on the same line as your age to determine the projected value of the account at ages 60, 65 and 70, after taking out any withdrawal penalty.

(3) At the top of each table values are shown for the projected account after taking the withdrawal penalty at the end of the first, second, third, fourth and fifth years. Values at the end of the first five years will be the same for all ages.

(4) The first table uses the current rate and the second table uses the guaranteed rate.

(5) The projections used the following assumptions:
   (a) A level contribution of $1,000 annually paid on the first day of the calendar year;
   (b) Interest compounded daily using a 365/360 day year, i.e., using an effective daily rate of interest of 1/360 of the assumed rate and compounding such effective daily rate for 365 days per year.

INTEREST RATE EQUALS 8 PERCENT COMPOUNDED DAILY USING A 365/360 DAY YEAR

Part III. Administrative, Procedural, and Miscellaneous

26 CFR 601.602: Forms and instructions.
(Also Part I, Section 6033; 1.6033-2.)

Rev. Proc. 86-23

SECTION 1. PURPOSE

The purpose of this revenue procedure is to supplement Rev. Proc. 83-23, 1983-1 C.B. 687, and to supersede Notice 84-2, 1984-1 C.B. 331, by establishing an additional class of organizations, affiliated with a church or convention or association of churches and exempt from federal income tax under section 501(c)(3) of the Internal Revenue Code, that is not required to file an annual information return on Form 990, Return of Organization Exempt from Income Tax.

SEC. 2. BACKGROUND

.01 Section 6033(a)(1) of the Code generally requires the filing of annual information returns by exempt organizations.

.02 Section 6033(a)(2)(A) of the Code provides certain mandatory exceptions to this filing requirement.

.03 In addition, section 6033(a)(2)(B) of the Code provides discretionary exceptions from filing such returns where the Secretary "Determines such filing is not necessary to the efficient administration of the internal revenue laws." Section 1.6033-2(g)(6) of the Income Tax Regulations delegates authority to the Commissioner to excuse organizations from the filing requirement. It provides that "the Commissioner may relieve any organization or class of organizations from filing, in whole or in part, the annual return required by section 6033 where he determines that such returns are not necessary for the efficient administration of the internal revenue laws."

.04 Section 1.6033-2(g)(1) of the regulations provides a partial list of organizations that are not required to file annual returns either because they are excepted by statute or because the Commissioner has exercised the authority referred to above in Sec. 2.03. A more complete list is contained in Rev. Proc. 83-23, 1983-1 C.B. 687.

.05 Notice 84-2 contains a list of church-affiliated organizations that are excused from filing Form 990 for tax years beginning after December 31, 1975. Generally, these are organizations that carry out church-related financing, funding, and pension programs. The organizations listed in Notice 84-2 have been excused from filing under the Commissioner's discretionary authority under section 6033(a)(2)(B) of the Code.

.06 From time to time, the Commissioner may excuse organizations from filing Form 990 returns by publishing an announcement in the Internal Revenue Bulletin, or by revising the instructions accompanying Form 990, amending the regulations, or other appropriate publication.

SEC. 3. ORGANIZATIONS EXCUSED FROM FILING

For tax years beginning after December 31, 1975, an organization that is described in sections 501(c)(3) and 509(a)(1), (2), or (3) of the Code, that is affiliated with a church or convention or association of churches as defined in Sec. 4, and that meets the internal support requirement of Sec. 5 of this revenue procedure will not be required to file Form 990.

SEC. 4. AFFILIATED WITH A CHURCH OR CONVENTION OR ASSOCIATION OF CHURCHES

For purposes of Sec. 3, an organization is affiliated with a church or a convention or association of churches if:

1 The organization is covered by a group exemption letter under Rev. Prov. 80-27, 1980-1 C.B. 677, or subsequent revision; or

2 The organization is operated, supervised, or controlled by or in connection with, as defined in section 1.509(a)-4 of the regulations, a church or convention or association of churches; or

3 Relevant facts and circumstances show that it is so affiliated. The factors to be considered include:

(a) The organization's enabling instrument (corporate charter, trust instrument, articles of association, constitution, or similar document) or by-laws affirm that the organization shares common religious doctrines, principles, disciplines, or practices with the church or convention or association of churches.

(b) The church or convention or association of churches has authority to appoint or remove or to control the appointment or removal of at least one of the organization's officers or directors.

(c) The church or convention or association of churches receives reports, at least annually, on the financial and general operations of the organization.

(d) The corporate name of the organization indicates an institutional relationship, which relationship is affirmed by the church or convention or association of churches or a designee thereof; or if the corporate name of the organization does not indicate an institutional relationship, this institutional relationship is affirmed by the church, or convention or association of churches, or designee thereof.

(e) In the event of dissolution, the assets are required to be distributed to the church or convention or association of churches or to an affiliate thereof within the meaning of this revenue procedure.

(f) Any other relevant fact or circumstance.

The absence of one or more of the above factors does not necessarily preclude classification of an organization as being affiliated with a church or convention or association of churches.

SEC. 5. INTERNAL SUPPORT REQUIREMENT

For purposes of Sec. 3, an organization is internally supported within the meaning of this section *unless* it both:

1 offers admissions, goods, services, or facilities for sale, other than on an incidental basis, to the general public (except goods, service, or facilities sold at a nominal charge or substantially less than cost), and

2 normally receives more than 50 percent of its support from a combination of governmental sources; public solicitation of contributions (such as through a community fund drive); and receipts from the sale of admissions, goods, performance of services, or furnishing of facilities in activities that are not unrelated trades or businesses.

SEC. 6. SPECIAL RETURN FILING PROCEDURES

Any section 501(c)(3) church-affiliated organization that failed to file a required return on Form 990 for any tax year ending on or before December 31, 1986, but which files such return or returns on May 15, 1987, on the basis of this revenue procedure, will not be subject to a late filing penalty under section 6652(d)(1) of the Code. Such return should be marked at the top, "Filed under Rev. Proc. 86-23."

SEC. 7. EFFECT ON OTHER DOCUMENTS

.01 Rev. Proc. 83-23 is hereby supplemented.

.02 Notice 84-2 is hereby superseded because the organizations it excuses from filing are excused from filing under this revenue procedure.

---

26 CFR 601.602: Forms and instructions.
(Also Part I, Sections 6011, 6041, 6047, 6051, 6071, 6081, 6091; 1.6041-1, 1.6047-1, 31.6051-1, 31.6051-2, 31.6071(a)-1, 31.6081(a)-1.)

Rev. Proc. 86-24

SECTION 1. PURPOSE

.01 The purpose of this revenue procedure is to state the requirements of the Internal Revenue Service (IRS) and the Social Security Administraiton (SSA) relating to substitutes for Form W-2, Wage and Tax Statement, Form W-2P, Statement for Recipients of Annuities, Pensions, Retired Pay or IRA Payments, and Form W-3, Transmittal of Income and Tax Statements. This revenue procedure also contains general rules for filing Forms W-2, W-2P, and W-3. The IRS provides a six-part Form W-2 and W-2P set. The official Form W-3 is provided as a two-part set.

.02 This revenue procedure supersedes Rev. Proc. 85-20, 1985-1 C.B. 521.

SEC. 2. GENERAL RULES FOR FILING FORMS W-2 AND W-2P

.01 *Employers and payers* (hereafter and where applicable collectively referred to as payers) must use magnetic media for filing tax year (TY) 1986 Forms W-2 (Copy A) and W-2P (Copy A) data with the SSA if the payer files 500 or more of these forms (for TY 1987 magnetic media filing will be required for payers who file 250 or more forms). Requests for additional information concerning magnetic media filing should be directed to the appropriate Regional SSA Magnetic Media Coordinator. Exhibit N contains the addresses and telephone numbers of these coordinators. If filing on magnetic media will result in an undue hardship a waiver of the requirement for one year may be requested from the IRS. Waiver requests for TY 86 should be addressed to: Magnetic Media Reporting, National Computer Center, P.O. Box 1359, Martinsburg, WV 25401-1359. Requests must be submitted by June 30, 1986. Payers who do not comply with the magnetic media requirements and who are not granted a waiver will be subject to a failure to file penalty of $50 per Form W-2/W-2P up to a maximum of $50,000 per calendar year. Since many states and localities accept Forms W-2 and W-2P data on magnetic media, savings may be obtained if magnetic media is used for filing with both the SSA and state or local agencies. Magnetic media users can design their own statements to give to employees, pensioners, annuitants, recipients of retired pay, recipients of IRA (Individual Retirement Account) payments, and recipients of disability income (hereafter and where applicable collectively referred to as payees). Statements designed by payers *must* comply with the requirements of Sections 5, 7, 8 and 9 shown below.

.02 The following Technical Information Bulletins (TIB) contain the specifications and procedures for filing Forms W-2 (Copy A) and W-2P (Copy A) data on magnetic media directly with SSA.

1 TIB-4a—"Magnetic Tape Reporting, Submitting FICA Wage and Tax Data to the Social Security Administration" Form W-2 (Copy A);

2 TIB-4b—"Magnetic Tape Reporting, Submitting Annuity, Pension, Retired Pay or IRA Payments to the Social Security Administration" Form W-2P (Copy A);

3 TIB-4c—"Diskette Reporting, Submitting FICA Wage and Tax Data to the Social Security Administration" Form W-2 (Copy A).

Copies of these publications are available by writing any IRS Service Center; IRS District Office; and SSA, (Reports Preparation Section, P.O. Box 2317, Baltimore, Maryland 21203); or by contacting the Regional SSA Magnetic Media Coordinator.

.03 Payers not using magnetic media must file Copy A of Form W-2 or Copy A of Form W-2P with SSA on either an official form or a privately printed substitute paper form meeting the specifications shown below.

.04 Payers using magnetic media are cautioned to obtain the most recent Technical Information Bulletins and supplements due to possible changes in the specifications and procedures.

SEC. 3. GENERAL RULES FOR FILING FORM W-3

.01 Employers and payers (hereafter and where applicable collectively referred to as payers) required to file Forms W-2 or W-2P must transmit Forms W-2 or W-2P with Form W-3.

.02 Form W-3 must be the same width (i.e. 7 inches, 7.5 inches, or 8 inches) as the Forms W-2 or W-2P filed.

.03 Payers using magnetic media must transmit W-2 or W-2P data with Form 6559, Transmitter Report of Magnetic Media Filing, along with either Form 6560, Employer Summary of Form W-2 Magnetic Media Wage Information, or Form 6561, Payer Summary of Form W-2 Magnetic Media Pension Information. SSA will provide these forms to all approved magnetic media filers. Do not transmit W-2 or W-2P magnetic media with a Form W-3.

SEC. 4. PAPER SUBSTITUTES FOR FORMS W-2 (COPY A), W-2P (COPY A), AND W-3

.01 Paper substitutes *conforming* to the specifications contained in this revenue procedure should be privately printed without the prior approval of the IRS. Proposed substitutes *not conforming totally* to these specifications are not acceptable.

.02 Forms W-2, W-2P, and W-3 are subject to annual review and possible change. Payers are cautioned against overstocking supplies of privately printed substitutes.

.03 Copies of the official form for the reporting year may be obtained from any IRS office. The IRS provides only cut sheet sets with no carbon interleaves for Forms W-2, W-2P, and W-3.

.04 Substitute Forms W-2, W-2P, and W-3 transmitted to the SSA should generally contain only data provided to payees and summary data as requested by the forms' instructions.

.05 Substitute Forms W-2, W-2P, and W-3 may be redesigned as to the spacing for state and local tax data *as long* as the vertical and horizontal spacing for all federal payment and data boxes are in compliance with the specifications contained herein.

.06 All ballot boxes on Forms W-2 (Copy A), W-2P (Copy A), and W-3 must be 8-point boxes.

NOTE: More than 50% of the applicable ballot box must be covered by an "X".

SEC. 5. REQUIREMENTS FOR SUBSTITUTE FORMS FURNISHED TO PAYEES (COPIES B, C, AND 2 OF FORMS W-2 AND W-2P)

.01 All payers, including those filing Copy A using magnetic media, must furnish payees with at least two statements. The dimensions of these copies may be expanded from the dimensions of the official form to allow space for conveying additional information such as withholding from pay for health insurance, union dues, bonds, charity, etc. This may permit the payer to eliminate other statements or notices which would otherwise be furnished to payees. The maximum allowable dimensions are:

1 depth should be no more than five inches;

2 width no more than eight inches.

.02 The paper for all copies should be white. The substitute Copy B (or its equal), that payees are instructed to attach to their Federal income tax return, must be at least 24-pound paper (basis 17 × 22–500), while the other copies furnished the payee should be at least 18-pound paper (basis 17 × 22–500).

.03 Chemical transfer paper is *permitted* only if the following standards are met:

1 All copies must be clearly legible;

2 All copies must have the capability to be photocopied;

3 Fading must not be of such a degree as to preclude legibility and the ability to photocopy.

In general, black chemical transfer inks are preferred; other colors are permitted only if the above standards are met. "Spot carbons" are *not permitted.*

.04 Interleaved carbon must meet the requirements specified in .03 above.

NOTE: chemical transfer paper is permitted for additional payee copies.

.05 Substitute forms for payees need contain only the payment boxes and captions that are applicable (in any desired sequence). Other boxes contained on the official form may be omitted, except that in all cases the payee name, address, social security number and the year must be present. Payment boxes and captions that are applicable must be clearly identified, using where possible the same wording as on the official form. On Form W-2, Copy B, payers *are required* to identify the amount of Federal income tax withheld as "Box 9" and the amount of Wages, tips, other compensation as "Box 10." On Form W-2P, Copy B, payers *are required* to identify the taxable amount as "Box 10" and the amount of Federal income tax withheld as "Box 11." These payment boxes on Copy B *are required* to be outlined in bold 2-point rule (see Exhibit M) or identified in some manner to distinguish these boxes from the rest of the form. If the form contains additional data (e.g., savings bonds withholding, retirement withholding, payroll savings, etc.), there should be a special highlighting of the areas pertaining to (1) Federal income tax withheld, (2) Wages, tips, and other compensation, and (3) Advance EIC payment.

.06 For substitute forms for payees (Copies B, C, and 2 of Forms W-2 and Copies B, C, and 2 of Forms W-2P), the following requirements must be met:

1 All copies of Forms W-2 and W-2P must show both the form number, form title and the year. The title of Form W-2 is "Wage and Tax Statement" The title of Form W-2P is "Statement for Recipients of Annuities, Pensions, Retired Pay, or IRA Payments."

2 If the substitute forms are *not labelled* as to the disposition of the copies, then written notification must be provided to each payee as specified below:

(a) The first copy of the form should be filed with the employee's (or recipient's) Federal tax return.

(b) The second copy of the form should be for the employee's (or recipient's) records.

(c) If applicable, the third copy of the form should be filed with the employee's state, city, or local income tax return.

3 If the substitute forms are *labelled*, then the forms must contain the applicable description.

(a) "Copy B, to be filed with employee's Federal tax return", "Copy C, for employee's records", and the designation "Form W-2 Department of the Treasury—Internal Revenue Service", or

(b) "Copy B, file with recipient's Federal tax return", "Copy C, for recipient's records", and the designation "Form W-2P Department of the Treasury—Internal Revenue Service".

(c) The reference to the Department of the Treasury—Internal Revenue Service should be omitted from other copies provided in the set.

4 Instructions similar to those contained on the back of Copy C of the official form should be provided to each employee (recipient). For Form W-2, the Social Security (FICA) rates applicable for the current tax year must:

(a) appear either on the front or the back of the copy (Copy C) retained by the employee; or

(b) be communicated to the employee via a separate statement.

Note: If you are a Federal employer, you must provide the current rate for hospital insurance benefits (Medicare) for Federal employees.

5 Such substitutes are acceptable and payees should be advised that substitute wage and tax statements are acceptable for filing with their Federal income tax returns.

SEC. 6. REQUIREMENTS FOR SUBSTITUTE "PRIVATELY PRINTED" FORMS W-2 (COPY A), FORMS W-2P (COPY A), AND FORMS W-3 THAT PAYERS SUBMIT TO THE SSA

.01 Payers may file privately printed substitute Forms W-2 and W-2P with the SSA (hereafter referred to as a substitute Copy A). Payers may file privately printed substitute Forms W-3 with the SSA (hereafter referred to as a substitute W-3). The substitute form must be an exact replica of the official repro-proof with respect to layout and contents because it will be read by machines. Spot carbons are *not permitted* for Copy A or for Form W-3 filed with SSA. The dimensions of a substitute form may differ as far as width (see

Section 6.05 below) and the printing of the Government Printing Office (GPO) symbol must be deleted (see Section 6.12 below). The specifications and allowable tolerances for the Copy A of substitute Forms W-2 and W-2P are provided in Exhibits A, B, D, E, F, and G respectively. The specifications and allowable tolerances for Forms W-3 are provided in Exhibits C, H, and I.

NOTE: *Printers of Forms W-2 or W-2P that are wider than 7 inches must provide Forms W-3 that are of the same width as the Forms W-2 or W-2P (i.e., 7 1/2" width Forms W-3 with 7 1/2" width Forms W-2 or W-2P; 8" width Forms W-3 with 8" width Forms W-2 or W-2P).*

.02 Color and quality of paper.

Paper for Copy A and for Form W-3, (cut sheets and continuous pinfeed forms), to be filed with SSA, as specified by JCP 0-25, dated November 29, 1978, must be: White 100% bleached chemical wood, optical character recognition (OCR) bond produced in accordance with the following specifications:

NOTE: Reclaimed fiber in any percentage is permitted, provided the requirements of this standard are met.

1 Acidity: pH value, average,
 not less than 4.5
2 Basis Weight 17 × 22
 1000 cut sheets 32-40
 Metric equivalent grams
 per. sq. meter 75
 A Tolerance of ±5 pct.
 shall be allowed.
3 Stiffness: Average, each
 direction, not less
 than—Gurley miligrams
 ____cross direction 50
 ____machine direction ... 80
4 Tearing strength: Average,
 each direction, not less
 than—grams 40
5 Opacity: Average, not less
 than—percent 82
6 Thickness: Average—
 inch —0.0038
 Metric equivalent—
 mm —0.097
 A tolerance of +0.0005 inch (0.0127 mm) shall be allowed. Paper shall not vary more than 0.0004 inch (0.012 mm) from one edge to the other.
7 Porosity: Average, not less
 than—seconds 10
8 Finish (smoothness): Average,
 each side—seconds 20–55
 For information only,
 the Sheffield
 equivalent—units 170-d100
9 Dirt: Average, each side,
 not to exceed—parts
 per million 8

.03 All printing will be in red OCR dropout ink, as specified, except for the '22222', '55555', or '33333' at the top of the form and the descriptive information at the bottom (see Exhibits J, K, and L) which will be printed in nonreflective black ink. All other printing will be in red OCR dropout ink with or comparable to the specifications below. The screened area of any substitute form (Copy A of Form W-2 and W-2P, and the Form W-3 that is sent to SSA) should generally correspond to that present on the official form. Vertical rules require screening of .05 inches on each side of an inside rule. Horizontal screening should follow the standard format and allow for typewriter spacing. All screened areas are printed in the red OCR dropout ink. The numbered captions are printed as a solid with no screened background. (See Exhibits) Sinclair and Valentine (U.S.) red OCR dropout ink number J-25083 is the preferred ink because it is easier for the forms preparer to read. However, the following inks may be used until your present supply is exhausted:

Ink Manufacturer	Red Ink Identification No.
Gans Ink Co.	CS-310
General Printing Inks Div. (Sun Chemical Corp.)	SS-40B
Ink Masters, Inc. (Chicago)	B-6056
Inmont Canada, Ltd.	4T-39605
Lorilleux Lefranc	U-17410
Sinclair & Valentine (U.S.)	J-24893
Toyo Ink Company	OMB-57

Printing in any other red OCR dropout ink must be cleared by contacting Manager of Media Support, Recognition Equipment, Inc., P.O. Box 660204, Dallas, Texas 75266; telephone number (214) 579-6088.

.04 Typography—Type must be substantially identical in size and shape with corresponding type on the official form. NOTE: The form identifying number must be in OCR A Font.

1 On Copy A of Forms W-2 and W-2P and for Form W-3, all the perimeter rules must be 1-point (0.014 inch), while all other rules must be one-half point (0.007 inch).

2 Vertical rules must be parallel to the left edge of the document; horizontal rules parallel to the top edge.

.05 Dimension—Three official Forms W-2, W-2P (Copy A) or one official Form W-3 are contained on a single page which is 7 inches wide (exclusive of any snap-stubs) by 11 inches deep. The width of privately printed substitute pages must be 7 inches, 7 1/2 inches, or 8 inches exclusive of any left or right snap-stubs, or pin-feed holes, although adherence to the size of the official page is preferred. If a 7 inch form is produced, the image must be an exact copy of the official repro-proof. If the width of the substitute page is increased, the width of specified fields on the substitute page must be increased in accordance with Exhibits D, E, F, G, H, and I. The top margins and the right margin must be 1/4 inch plus or minus .0313 inch and must be free of all printing. For Forms W-2, W-2P and W-3 the combination width of Box 1, "Control number", and the box containing the form identifying number must always be 2.2 inches.

1 When the width of Copy A is increased to 8 inches, exclusive of any left or right snap-stubs or pin-feed holes, the form identifying number must be shown as 222 for Form W-2, 555 for Form W-2P, or 333 for form W-3. This number tells the scan equipment used by SSA which information document it is reading, the width size and the position of individual data fields (see Exhibits D, F, and H).

2 When the width of Copy A is increased to 7 1/2 inches, exclusive of any left or right snap-stubs or pin-feed holes, the form identifying number must be shown as 2222 for Form W-2, 5555 for Form W-2P, or 3333 for Form

W-3. This number tells the scan equipment used by SSA which information document it is reading, the width size and the position of individual data fields (see Exhibits E, G, and I).

.06 The depth of the individual image on a page (for Form W-2 and W-2P) must be the same (3 2/3 inches) as that of the official reproproof. The depth of the Form W-3 on a page must be 3.37 inches.

.07 The words *"Do Not Cut or Separate Forms on This Page"* must be printed in red OCR dropout ink between the three forms W-2 or W-2P (Copy A) (see Exhibits A and B) and must also be present on 7 1/2 inch and 8 inch wide substitute Forms W-2 or W-2P. Perforations are required on all copies (except Copy A) to enable the separation of individual forms.

.08 The words "For Paperwork Reduction Act Notice, see back of Copy D" *must* be printed on the Forms W-2 or W-2P (Copy A) (see Exhibits A and B for format and location) and *must* also be present on 7 1/2 inch and 8 inch wide substitute Forms W-2 or W-2P.

.09 The OMB Number *must* be printed on *each* ply of Form W-2, W-2P, and W-3 (see Exhibits A, B, and C for format and location) and *must* also be present on 7 1/2 inch and 8 inch wide substitute Forms W-2, W-2P, or W-3.

.10 The words *"Please return this entire page to the Social Security Administration address for your State as listed below"* as well as the list of SSA addresses *must* be printed on all Forms W-3 (see Exhibit C) whether Forms W-3 are 7 inches wide, 7 1/2 inches wide, or 8 inches wide.

.11 The Paperwork Reduction Act Notice must be printed on Form W-3 (see Exhibit C for format and location) whether Forms W-3 are 7 inches wide, 7 1/2 inches wide, or 8 inches wide.

.12 *Privately printed continuous substitute Forms W-2 and W-2P (Copy A) must be perforated at each 11" (3-on) page depth. No perforations are allowed between the 3 2/3" forms on a single copy page of Copy A.*

NOTE: Perforations are required between all the other individual copies (Copy 1, B, C, 2, and D) included in the set.

.13 The back of a substitute Copy A must be free of all printing.

.14 Spot carbons are *NOT permitted* for Copy A of Forms W-2 or W-2P or for Form W-3. Interleaved carbon must be of good quality to assure legibility of information on all parts to preclude smudging, and should be black (see Section 5.04).

.15 The use of "chemical transfer paper" on Copy A may be approved after review by IRS and SSA. Submit all requests with a minimum sample of 100 sheets of at least 20-lb. paper (17 × 22–500) to: Internal Revenue Service, Attention: D:R:R:IM, 1111 Constitution Avenue, N.W., Washington, D.C. 20224. The paper will be tested and the results reported to the requester.

.16 Printer's symbol—The GPO symbol must not be placed on substitute Copy A of Forms W-2 and W-2P. In the place of the GPO symbol, the Employer Identification Number (EIN) of the forms printer must be printed in the bottom margin on the face of each individual sheet of Copy A. In addition, the EIN of the forms printer must be printed on the face of the Form W-3 which is filed with SSA.

SEC. 7. ADDITIONAL INSTRUCTIONS

.01 Arrangement of assembly—Except as provided below, if magnetic media is not used for filing with SSA, the substitute copies of Forms W-2 and W-2P assembly should be arranged in the same order as the official Forms W-2 and W-2P. Copy A should be first, followed sequentially by perforated sets (Copies 1, B, C, 2, and D). The substitute form to be filed with SSA by the payer must carry the designation Copy A.

1 Copy D for Employer or Payer. It is not required that privately printed substitute forms contain a copy to be retained by payers although payers must be prepared to verify or duplicate this information if it is requested by the IRS or SSA.

(a) If Copy D *is provided* for the employer or payer, instructions contained on the back of Copy D of the official form *must* appear on the back of the substitute form Copy D.

(b) If Copy D *is not provided* for the employer or payer, instructions contained on the back of Copy D of the official form *must* be furnished on a separate statement to the employer or payer.

2 Additional Copies. Except as provided in the arrangement of the official assemblies, additional copies which may be prepared by papers shall not be placed ahead of the copy "For employee's records," Copy C (Form W-2) or "For Recipient's Records," Copy C (Form W-2P).

3 Notice to Employees. Instructions similar to those contained on the back of Copy C of the official form should be provided to each employee (recipient). For Form W-2, the social security (FICA) rates applicable for the current tax year must:

(a) appear either on the front or the back of the copy (Copy C) retained by the employee; or

(b) be communicated to the employee via a separate statement.

Note: If you are a Federal employer, you must provide the current rate for hospital insurance benefits (Medicare) for Federal employees. The IRS recommends that the other text on the back of the official form Copy C be provided to the employee.

.02 All privately printed Forms W-2 and W-2P (Copy A) must have the tax year printed on the bottom face of each, using identical type to that of the official format.

.03 The substitute Copy B (or its equal), which the payee is instructed to attach to his/her Federal income tax return, must be at least 24-pound paper (basis 17 × 22-500), while the other copies furnished the payee should be at least 18-pound paper (basis 17 × 22-500).

.04 The OCR bond Form W-3 that is filed with SSA must have no printing on the reverse side.

.05 Instructions for Form W-3— Instructions similar to those provided as part of the official form must be provided as part of any substitute Form W-3.

.06 All privately printed Forms W-3 must have the tax year printed on the bottom face of each Form W-3, using identical type to that of the official format.

.07 The copy of the substitute Form W-3 which contains the instructions and is to be retained by the employer should be at least 18-pound paper (basis 17 × 22-500).

SEC. 8. INSTRUCTIONS FOR PAYERS

.01 Only originals or ribbon copies of Copy A of Forms W-2 and W-2P and of Form W-3 may be filed. Carbon copies and photocopies are not acceptable.

.02 The Service requests the cooperation of the payers in typing or machine printing whenever possible and in providing good quality data entries on the forms, i.e., using black ribbon, inserting data in the middle of blocks, well separated from other printing and guidelines, and taking any other measures that will guarantee clear, sharp images. However, payers are not required to acquire equipment solely for the purpose of preparing these forms.

.03 The Employer Identification Number (EIN) may be entered anywhere in Box 2 along with the Payer's name and address on Copy A of Forms W-2 and W-2P. (If this is done, the EIN need not be entered in Box 3 of either Form W-2 or W-2P.) For Forms W-3, the EIN must be entered where prescribed by the Form W-3 Instructions.

.04 The payer's name, address and EIN may be pre-printed.

.05 State agencies—The amounts of wages paid and employee contributions withheld under a State-Federal Agreement, entered into pursuant to Section 218 of the Social Security Act, may be shown in the space on Form W-2 for Social Security Act Wages and Employee Tax. In such cases, the identification number assigned by the Social Security Administration to the state (prefixed by 69) should be shown in the employer name and address area block on Form W-2. This "69" number may be pre-printed.

.06 The optional employer's state number may be pre-printed in the employer's (payer's) name, address, and ZIP code box. If this is done, Box 4 of Forms W-2 and W-2P need not be completed, so long as the applicable state taxing authority does not object.

.07 The preparation and filing instructions for Forms W-2 and W-2P are contained in the 1986 Instructions for Forms W-2 and W-2P. The preparation and filing instructions for Form W-3 are contained as part of the 1986 Form W-3 snap set assembly.

.08 To avoid confusion and questions by payees, payers are encouraged to delete the following items from copies of Forms W-2 and W-2P provided to payees:

(1) Form identifying number (e.g., 22222, 55555);

(2) The words "subtotal" and "void" and their boxes;

(3) Any other captions or box number that would not be of any informational use to payees.

.09 Payers are encouraged to use IRS-supplied labels for affixing to all Forms W-3 filed with SSA.

SEC. 9. OMB REQUIREMENTS

Office of Management and Budget (OMB) Requirements for Substitute Forms

Public Law 96-511 requires: (1) OMB approval of IRS tax forms, (2) that each form (all copies) show the OMB approval number and when appropriate, the form's expiration date, and (3) that the form (or its instructions) state why IRS is collecting the information, how we will use it and whether it must be given to us. The official IRS forms will contain this information.

As it applies to substitute IRS forms this means:

1. All substitute forms (all copies) *must* show the OMB number and any expiration date as they appear on the official IRS form (see Exhibits A, B, and C).

2. The OMB number must be in one or the following formats:

OMB No. 1545-0008 (preferred)
or
OMB #1545-0008

3. You must inform the users of your substitute forms of the reasons for IRS collection, use and requirements, as stated in the instructions for the IRS form.

SEC. 10. REPRODUCTION PROOFS

.01 Order blanks for reproduction proofs are mailed annually to requestors of record, and on request to other users. Reproduction copies of Forms W-2 (Copy A), W-2P (Copy A), and W-3 (Page 1) each consists of two parts. Part 1 is line art, i.e., type and ink. Part 2 is a black solid which should be photographically screened by the user to allow a 10%-20% dot pattern when printed in red OCR dropout ink. In some cases where the production method requires the use of something other than a standard dot pattern, the printed value of part 2 must still be 10%-20%. Printers and others wishing to obtain reproduction proofs may send their requests to Internal Revenue Service, Attn: Distribution Manager, PM:S:FM:P—Room 1528, 1111 Constitution Avenue, N.W., Washington, D.C., 20224.

.02 A charge of $1 per page will be made for each reproduction proof regardless of page size. Invoices will be mailed after orders have been filled.

SEC. 11. EFFECT ON OTHER PROCEDURES

Rev. Proc. 85-20, 1985-1 C.B. 521 is superseded.

Part IV. Items of General Interest

Foundations Status of Certain Organizations

Announcement 86-68

The following organizations have failed to establish or have been unable to maintain their status as public charities or as operating foundations. Accordingly, grantors and contributors may not, after this date, rely on previous rulings or designations in the Cumulative List of Organizations (Publication 78), or on the presumption arising from the filing of notices under section 508(b) of the Code. This listing does *not* indicate that the organizations have lost their status as organizations described in section 501(c)(3), eligible to receive deductible contributions.

Former Public Charities. The following organizations (which have been treated as organizations that are not private foundations described in section 509(a) of the Code) are now classified as private foundations:

A Just Service, Everett, WA
Alcohol Rehabilitation Corporation, Ukiah, CA
Allied One-Hundred Corporation, Scranton, PA
Allied Two-Hundred Corporation, Scranton, PA
Allied Three-Hundred Corporation, Scranton, PA
Allied Four-Hundred Corporation, Scranton, PA
American Association Christian Egyptians Corps of California, Downey, CA
American Rehabilitation Research Group, Inc., Harrisburg, PA
Anno Domini, Portland, OR
Antelope Valley Community Theatre, Lancaster, CA

University of the Philippines Alumni Association In America (UPAAA), Teaneck, NJ
Verdugo Hills Tournament Softball Association Inc., Sunland, CA
Walcott Carey Company Inc., New York, NY
Youth Assistance Association of San Francisco, San Francisco, CA

If an organization listed above submits information that warrants the renewal of its classification as a public charity or as a private operating foundation, the Internal Revenue Service will issue a ruling or determination letter with the revised classification as to foundation status. Grantors and contributors may thereafter rely upon such ruling or determination letter as provided in section 1.509(a)-7 of the Income Tax Regulations. It is not the practice of the Service to announce such revised classification of foundation status in the Internal Revenue Bulletin.

Medicare for State and Local Government Employees

Announcement 86-69[1]

Wages of state and local government employees hired after March 31, 1986, are generally subject to the hospital insurance—Medicare—portion of the social security tax under the recently enacted Consolidated Omnibus Budget Reconciliation Act.

Under prior law, state and local government employees were not required to be subject to any portion of the social security tax. However, all the states have made voluntary agreements with the Secretary of Health and Human Services to have certain groups of employees, such as teachers, covered by social security, including Medicare. Payments under these agreements are made and reported to the Social Security Administration (SSA).

Under the law just enacted, employees in such coverage groups will continue to be subject to these agreements, no matter when they are hired to work in the coverage group. States will continue to make and report required payments to the SSA.

In general, under the new law, employees hired after March 31, 1986, will be subject to the Medicare portion of the social security tax if they are in a group not covered by an agreement. Within a few weeks, the Service will send further information to each state and local government employer regarding whether the tax for that employer's employees should be paid to the Service or to the SSA.

The Service will waive penalties to allow employers time to implement the new requirements of the law. If all amounts due to the Service for April through December 1986 are paid by February 2, 1987, the Service will waive any penalties that might otherwise have been due for late payments. The Service will send further details and instructions to all affected employers.

---

[1] Based on News Release IR-86-56, dated April 28, 1986.

Announcement of the Disbarment, Suspension, or Consent to Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents and Enrolled Actuaries from Practice Before the Internal Revenue Service

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Revenue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletin for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

The following individuals have been placed under consent suspension from practice before the Internal Revenue Service:

Name	Address	Designation	Term of Suspension
A. Russel Lucid	Norwell, MA	Attorney	Indefinite from March 26, 1986
Gary E. Borushko	Grosse Pointe Woods, MI	Certified Public Accountant	Indefinite from April 7, 1986
Paul Skulsky	Spring Valley, NY	Certified Public Accountant	Indefinite from April 1, 1986

Under Section 330, Title 31 of the United States Code (1970 ed.), the Secretary of the Treasury, after due notice and opportunity for hearing, is authorized to suspend or disbar from practice before the Internal Revenue Service any attorney, certified public accountant, enrolled agent, or enrolled actuary who has violated the rules and regulations governing such practice.

Attorneys, certified public accountants, enrolled agents and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before their Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify such disbarred or suspended practitioners, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been disbarred or suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date of disbarment or period of suspension. This announcement will continue to appear in the weekly Bulletin for five successive weeks for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended or disbarred and will later be consolidated and published in the Cumulative Bulletin.

After due notice and opportunity for hearing, the following individuals have been disbarred from further practice before the Internal Revenue Service:

Name	Address	Designation	Effective Date
Thomas H. Foxhill, Jr.	Pemberton, NJ	Enrolled Agent	April 12, 1986
Peter Parker	Baltimore, MD	Attorney	April 12, 1986

Announcement of the Suspension, Termination, or Consent to Voluntary Suspension or Termination of Enrollment to Perform Actuarial Services Under the Employee Retirement Income Security Act of 1974

Under 20 Code of Federal Regulations, Part 901, an enrolled actuary, in order to avoid the initiation or conclusion of a suspension or termination proceeding, may offer his/her consent to suspension of enrollment. The Executive Director, Joint Board for the Enrollment of Actuaries, may suspend enrollment in accordance with the consent offered. An enrolled actuary whose enrollment is suspended is prohibited from performing actuarial services under the Employee Retirement Income Security Act of 1974 (ERISA) during the period of suspension.

To enable employees of the Internal Revenue Service and others to indentify enrolled actuaries under suspension, the Executive Director will announce in the Internal Revenue Bulletin the names and addresses of enrolled actuaries who have been suspended. This announcement will appear in the weekly Bulletin at the earliest practicable date following suspension and will continue to appear in the weekly Bulletin for at least three successive weeks for each enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

Name of Enrolled Actuary	Address	Term of Suspension
Robert E. Nemann	Cincinnati, OH	For three months effective April 9, 1986

Announcement Relating to Proposed Regulations Published With Notice of Proposed Rulemaking

Changes in regulations as announced below have been published in the Federal Register in tentative or proposed form to provide interested parties with an opportunity to file their objections or suggestions for consideration prior to final adoption of such regulations. These announcements will appear in the Bulletin during the period which has been prescribed for the submission and consideration of any views, arguments, or suggestions pertaining to the proposed regulations so published. Statement of such views, arguments or suggestions should be submitted in writing, preferably six copies, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as "rulings") that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with *modified, below*).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with *amplified* and *clarified*, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in law or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in the new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1954 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, *modified and superseded* describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.

INTERNAL REVENUE BULLETIN

The Introduction on page 3 describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of the weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and are *not* included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

BULLETIN INDEX-DIGEST SYSTEM

The Bulletin Index-Digest System provides a fast and easy way to research Revenue Rulings, Revenue Procedures, Public Laws, Treasury Decisions, and other matters of a permanent nature published in the weekly Internal Revenue Bulletin, or Cumulative Bulletin from 1953 on. It is a comprehensive and up-to-date research tool that requires no filing or other clerical maintenance. The current revision consists of four Services, available on a subscription basis, each including a basic volume that covers the period 1953-1983/1984 and a cumulative supplement covering material published in subsequent Bulletins for the following two-year period. Cumulative supplements are issued quarterly for the Income Tax Service and semiannually for the Estate and Gift, Employment, and Excise Tax Service.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Please allow two to six weeks, plus mailing time, for delivery.

DEPOSITORY 328

These synopses are intended only as aids to the reader in identifying the subject matter covered. They may not be relied upon as authoritative interpretations.

INCOME TAX

Rev. Rul. 86-76, page 5.

Income from sources within the United States. Interest income from savings deposits with a domestic branch of a United States bank that is received by a domestic estate and is distributed to nonresident alien beneficiaries in the year of receipt is not from United States sources and is not subject to United States taxation in the hands of the beneficiaries. If such income is not distributed in the year of receipt, it is income to the estate and subject to United States taxation. Rev. Rul. 81-244 amplified.

EMPLOYEE PLANS

Rev. Rul. 86-74, page 4.

Integration with social security; guides. Guidelines for determining whether retirement plans properly integrate with benefits provided by social security are modified pursuant to the Social Security Amendments of 1983 to provide that certain items of deferred compensation are included in the definition of taxable wages and to reflect the change in the age at which unreduced social security benefits might be received. Rev. Rul. 71-446 modified.

Announcement 86-70, page 33.

In accordance with Section 12.02 of Rev. Proc. 84-23, set forth is a list of master and prototype plans closed by the National Office of the Internal Revenue Service as of March 31, 1986.

EXEMPT ORGANIZATIONS

Rev. Rul. 86-75, page 5.

Fraternal beneficiary society; whole life insurance with investment features. Whole life insurance constitutes a life benefit under section 501(c)(8) of the Code even though the policies contain investment features such as cash surrender value and policy loan.

Rev. Rul. 86-77, page 7.

Private foundations; taxable expenditures. A private foundation that made grants to individuals after 45 days from the date it submitted an exemption application in accordance with procedures fully disclosed in its application did not make taxable expenditures under section 4945 of the Code, even though the foundation did not specifically request advance approval of its procedures.

EXCISE TAXES

Rev. Rul. 86-77, page 7.

Private foundations; taxable expenditures. A private foundation that made grants to individuals after 45 days from the date it submitted an exemption application in accordance with procedures fully disclosed in its application did not make taxable expenditures under section 4945 of the Code, even though the foundation did not specifically request advance approval of its procedures.

ADMINISTRATIVE

Department of the Treasury
Internal Revenue Service

T22.23:

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenues at the least cost to the public, and in a manner that warrants the highest degree of public confidence in our integrity, efficiency and fairness. To achieve that purpose, we will:

—Encourage and achieve the highest possible degree of voluntary compliance in accordance with the tax law and regulations;

—Advise the public of their rights and responsibilities;

—Determine the extent of compliance and the causes of noncompliance;

—Do all things needed for the proper administration and enforcement of the tax laws;

—Continually search for and implement new, more efficient and effective ways of accomplishing our Mission.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents of a permanent nature are consolidated semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

Part I.—1954 Code.

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1954.

Part II.—Treaties and Tax Legislation.

This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.

To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts.

Part IV.—Items of General Interest.

With the exception of the disbarment and suspension list included in this part, none of these announcements is consolidated in the Cumulative Bulletins.

The first Bulletin for each month includes an index for the matters published during the preceding month. These monthly indexes are cumulated on a quarterly and semiannual basis, and are published in the first Bulletin of the succeeding quarterly and semi-annual period, respectively.

The Bulletin Index-Digest System, a research and reference service supplementing the Bulletin, may be obtained from the Superintendent of Documents on a subscription basis. It consists of four Services: Service No. 1, Income Tax; Service No. 2, Estate and Gift Taxes; Service No. 3, Employment Taxes; Service No. 4, Excise Taxes. Each Service consists of a basic volume and a cumulative supplement that provide (1) finding lists of items published in the Bulletin, (2) digests of revenue rulings, revenue procedures, and other published items, and (3) indexes of Public Laws, Treasury Decisions, and Tax Conventions.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Prices: Domestic—$1.75 a single copy, $82.00 a year subscription. Foreign—$2.19 a single copy, $102.50 a year for subscription.

READEX FICHE best copy available

Part I. Rulings and Decisions Under the Internal Revenue Code of 1954

Section 401.—Qualified Pension, Profit-Sharing and Stock Bonus Plans

26 CFR 1.401-3: Requirements as to coverage. (Also Section 7805; 301.7805-1.)

Integration with social security; guides. Guidelines for determining whether retirement plans properly integrate with benefits provided by social security are modified pursuant to the Social Security Amendments of 1983 to provide that certain items of deferred compensation are included in the definition of taxable wages and to reflect the change in the age at which unreduced social security benefits might be received. Rev. Rul. 71-446 modified.

Rev. Rul. 86-74

SECTION 1. PURPOSE

The purpose of this revenue ruling is to modify Internal Revenue Service guidelines for determining whether pension, annuity, profit-sharing, and stock bonus plans integrate with benefits provided by the Social Security Act because of changes made by the Social Security Amendments of 1983, Pub. L. 98-21, 1983-2 C.B. 309.

SEC. 2. BACKGROUND INFORMATION.

Section 3.03 of Rev. Rul. 71-446, 1971-2 C.B. 187, defines compensation for purposes of that ruling as either (1) the amount of compensation that would be subject to tax under section 3101(a) of the Internal Revenue Code without the dollar limitation of section 3121(a)(1) of the Code or (2) the amount of compensation determined according to a restrictive definition such as compensation inclusive or exclusive of bonuses, commissions or overtime pay, or as basic compensation, or as the regular rate of compensation provided that whatever definition is used cannot result in prohibited discrimination.

Service guidelines for determining whether plan benefits integrate with benefits provided under the Social Security Act in Rev. Rul. 71-446 and Rev. Rul. 83-97, 1983-2 C.B. 72, assume that age 65 is the age at which unreduced old-age insurance benefits commence under the Social Security Act.

The Social Security Amendments of 1983 (1) amended the Code to provide that certain items of deferred compensation are included in the definition of taxable wages and (2) changed the age at which unreduced old-age insurance benefits commence under the Social Security Act for those born after January 1, 1938.

SEC. 3. DEFINITION OF COMPENSATION

Except as provided below, for purposes of Rev. Rul. 71-446, deferred compensation is excluded from the definition of "compensation" in section 3.03 of that revenue ruling. However, in accordance with Rev. Rul. 83-89, 1983-1 C.B. 88, and Rev. Rul. 84-74, 1984-1 C.B. 118, elective contributions (1) under a qualified cash or deferred arrangement described in section 401(k) of the Code, or (2) to a tax sheltered annuity described in section 403(b) of the Code may be included in "compensation" under section 3.03 of Rev. Rul. 71-446.

SEC. 4. OFFSET PLANS

Offset plans, as defined in Rev. Rul. 71-446, base the offset upon the old-age insurance benefit payable under the Social Security Act. The application of section 11 (and section 10.02) of Rev. Rul. 71-446 and the application of Rev. Rul. 83-97 to offset plans is based upon age 65 being the age at which unreduced old-age insurance benefits commence under the Social Security Act. Age 65 remains the age at which unreduced old-age insurance benefits commence for individuals born before January 2, 1938. However, because the age at which unreduced old-age insurance benefits commence for individuals born after January 1, 1938, has been increased by the Social Security Amendments of 1983, the application of section 11 (and section 10.02) of Rev. Rul. 71-446 and the application of Rev. Rul. 83-97 to offset plans with respect to individuals born after January 1, 1938, is modified by substituting for age 65 the age at which unreduced old-age insurance benefits commence.

Example 1:

An offset plan established by an employer covers an employee retiring at normal retirement age 65 and for whom age 67 is the age at which unreduced old-age insurance benefits commence. The plan may comply with Rev. Rul. 71-446, as modified herein, using one of the alternatives in section 11.01 for the period from age 65 to 67 and applying the reductions of section 10.02(1) or section 10.02(2) for that same period by substituting age 67 for age 65 wherever it appears in those sections.

Example 2:

An offset plan defines the normal retirement age as age 65 with the offset at age 65 based upon the old-age insurance benefits payable at age 65. For early retirement or other separation from service before age 65, the plan may satisfy the requirements of the preceding paragraph by using either of the alternatives of section 11.01 of Rev. Rul. 71-446 for the period of service between the age of early retirement or separation from service to age 65. in applying the 1/15 and 1/30 factors of section 10.02(1) pursuant to section 11.02 when applicable in this situation, the age at which unreduced old-age insurance benefits commence is substituted for age 65. Accordingly, the offset at age 65 is reduced by the 1/15 and 1/30 factors multiplied by the applicable number of years (including portions thereof) by which the age of early retirement or separation from service precedes age 65. However, the number of years for which the 1/15 factor applies may not exceed five minus the number of years (including portions thereof) by which the age at which unreduced old-age insurance benefits commence exceeds age 65.

SEC. 5. EXCESS PLANS

For excess plans (including step-rate excess plans), no change is required in the otherwise applicable integration limits determined under sections 5 and 6 of Rev. Rul. 71-446.

SEC. 6. PROSPECTIVE APPLICATION FOR CERTAIN PLANS

For plans in existence on May 27, 1986, that satisfy the Service's requirements for integration with social security benefits before the Social Security Amendments of 1983 and the modifications specified herein but fail to satisfy these requirements because of this change in law and these modifications, pursuant to the authority contained in section 7805(b) of the Code, this revenue ruling is effective only with respect to plan years commencing after December 31, 1986, for plan participants having any service after December 31, 1986. The plan amendments necessary for such plans to satisfy the Service's requirements for integration with social security benefits as modified herein must be adopted by the last day of the first plan year commencing after December 31, 1986, to be effective as of the beginning of that plan year. Under section 411(d)(6), such amendments must not reduce any plan participant's accrued benefit as of the later of the date of adoption or the effective date of the amendments. Because of the nature of necessary plan amendments, the accrued benefits of some plan participants may be increased.

For plans other than those described in the preceding paragraph, this revenue ruling is effective for plan years beginning after May 27, 1986.

SEC. 7. EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 71-446 is modified by the changes specified herein.

Section 501.—Exemption From Tax on Corporations, Certain Trusts, Etc.

26 CFR 1.501(c)(8)-1: Fraternal beneficiary societies.

Fraternal beneficiary society; whole life insurance with investment features. Whole life insurance constitutes a life benefit under section 501(c)(8) of the Code even though the policies contain investment features such as cash surrender value and policy loan.

Rev. Rul. 86-75

ISSUE

Does whole life insurance constitute a life benefit under section 501(c)(8) of the Internal Revenue Code?

FACTS

A fraternal beneficiary society operating under the lodge system issues life insurance contracts (as defined in section 7702 of the Code) to its members. The contracts provide a lump-sum death benefit which will be paid to the member's dependents on the death of an insured member. At any time, a member of the organization may borrow against the cash surrender value of the contract or withdraw the cash surrender value and terminate the contract.

LAW

Section 501(c)(8) of the Code provides for the exemption from federal income tax of fraternal beneficiary societies, orders, or associations—

(A) operating under the lodge system or for the exclusive benefit of the members of a fraternity itself operating under the lodge system, and

(B) providing for the payment of life, sick, accident, or other benefits to the members of such society, order, or association or their dependents.

Section 1.501(c)(8)-1 of the Income Tax Regulations provides that in order to be exempt under section 501(c)(8) of the Code an organization must have an established system for the payment to its members of their dependents of life, sick, accident, or other benefits.

HOLDING

Whole life insurance constitutes a life benefit under section 501(c)(8) of the Code.

Section 661.—Deduction For Estates and Trusts Accumulating Income or Distributing Corpus

26 CFR 1.661(a)-2: Deduction for distributions to beneficiaries.

Whether interest income from savings deposits with a domestic branch of a U.S. bank that is received by a domestic estate and distributed to nonresident alien beneficiaries in the year of receipt is deductible by the estate under section 661(a)(2) of the Code. See Rev. Rul. 86-76 below.

Section 861.—Income From Sources Within The United States

26 CFR 1.861-2: Interest.
(Also Sections 661, 871, 1441; 1.661(a)-2, 1.871-7, 1.1441-4.)

Income from sources within the United States. Interest income from savings deposits with a domestic branch of a United States bank that is received by a domestic estate and is distributed to nonresident alien beneficiaries in the year of receipt is not from United States sources and is not subject to United States taxation in the hands of the beneficiaries. If such income is not distributed in the year of receipt, it is income to the estate and subject to United States taxation. Rev. Rul. 81-244 amplified.

Rev. Rul. 86-76

ISSUE

Under the circumstances described below, if interest income from a savings deposit account with a domestic branch of a United States bank is received by a domestic estate, is that interest income taxable to the estate or to its nonresident alien beneficiaries?

FACTS

Situation (1). *A* was a resident of the United States who died in 1980. At the time of death, *A* maintained a savings deposit account with a domestic branch of a United States bank. Subsequent to *A*'s death, the savings deposit account was transferred to *E*, the domestic estate of *A*, which is administered by a public administrator. The savings account is the only asset of *E*. All the beneficiaries of *E* are nonresident alien individuals residing in foreign country *FC* with which the United States does not have an income tax treaty.

Pursuant to the terms of *A*'s will, *E* distributes all of the income earned by *E* from the savings deposit account (100*x* dollars) to the nonresident alien beneficiaries in the taxable year of receipt. The interest income is not effectively connected with the conduct by *E* of a trade or business within the United States, and is the only income of *E*.

Situation (2). The facts are the same except that, pursuant to the terms of *A*'s will, *E* does not distribute income received from the savings deposit account (100*x* dollars) to the nonresident alien beneficiaries in the taxable year of receipt (year 1). In the subsequent taxable year (year 2), *E* earns 50*x* dollars of interest and distributes 150*x* dollars to the nonresident alien beneficiaries. The distributable net income of *E* in year 2 is equal to 50*x* dollars under section 643 of the Internal Revenue Code.

LAW AND ANALYSIS

Section 641 of the Code provides for the taxation of estates and trusts, including the computation of their taxable income.

Section 661(a) of the Code provides that an estate is entitled to a deduction in computing taxable income in any taxable year, equal to the sum of (1) any amount of income required to be distributed currently (including any amount required to be distributed which may be paid out of income or corpus to the extent such amount is paid out of income for such taxable year); and (2) any other amounts properly paid or credited or required to be distributed for such taxable year. The deduction is limited to the distributable net income of the estate, as defined under section 643. Distributable net income is the table income of the trust or estate for the taxable year with certain modifications as provided in section 643.

Section 662(a) of the Code provides, in general, that the beneficiaries of the estate must include in gross income (1) amounts specified in section 661(a) required to be distributed currently; and (2) other amounts properly paid, credited, or required to be distributed to them for the taxable year. The amount of income that beneficiaries must include in any particular taxable year is limited to the distributable net income of the estate with respect to such year. Application of section 662 is not limited to citizens or residents of the United States.

Section 662(b) of the Code provides, in general, that the amounts within the scope of section 662(a) shall have the same character in the hands of the beneficiary as in the hands of the estate. Section 1.665(a)-OA(d) of the Income Tax Regulations provides that Subpart D, which contains the "throw-back" rules, does not apply to any estate.

Section 861(a)(1) of the Code provides, in part, that interest from the United States, or the District of Columbia, and interest on bonds, notes, or other interest-bearing obligations of residents, corporate or otherwise, shall be treated as income from sources within the United States. However, section 861(a)(1)(A) further provides that interest on amounts described in section 861(c) received by a nonresident alien individual shall not be treated as income from sources within the United States, if such interest is not effectively connected with the conduct of a trade or business within the United States.

Section 861(c) of the Code provides, in part, that for purposes of section 861(a)(1)(A) the amounts described in section 861(c) are deposits with persons carrying on the banking business, and deposits or withdrawable accounts with savings institutions chartered and supervised as savings and loan or similar associations under federal or state law.

Except in the case of portfolio interest attributable to certain debt obligations, section 871(a)(1)(A) of the Code provides, in part, that a nonresident alien individual is subject to a tax of 30 percent on amounts received as interest from sources within the United States (other than original issue discount as defined in section 1273), but only to the extent the amount so received is not effectively connected with the conduct of a trade or business within the United States.

Section 1441(a) of the Code provides, in part, that any person having control, receipt, custody, disposal, or payment of the items of income specified in section 1441(b) (to the extent that these items constitute gross income from sources within the United States) of any nonresident alien individual, must deduct and withhold from these items a tax of 30 percent. Section 1441(b) lists interest (other than original issue discount as defined in section 1273) as an item of income subject to the withholding of tax under section 1441(a). However, section 1441(c)(9) provides that portfolio interest within the meaning of section 871(h)(2) attributable to certain debt obligations is not subject to the withholding requirements of section 1441(a).

In Rev. Rul. 81-244, 1981-2 C.B. 151, the trustee of a domestic simple trust distributed interest income received from United States bank deposits to the trust's nonresident alien beneficiaries in the year such interest was received. The interest income was not effectively connected with a trade or business in the United States. Rev. Rul. 81-244 holds that the interest income received by the nonresident alien beneficiaries is not United States source income within the meaning of section 861(a)(1)(A) of the Code. *Accord Isidro Martin-Montis Trust v. Commissioner*, 75 T.C. 381 (1980), *acq.* 1981-2 C.B. 2.

Rev. Rul. 81-244 recognizes that Congress intended to incorporate the conduit theory of trust and estate taxation into the 1954 Code. In connection with the taxation of estates and trusts under the 1954 Code, the House Committee on Ways and Means stated:

> The bill adheres to the conduit theory of the existing law. This means that an estate or trust is in general treated as a conduit through which income passes to the beneficiary. [H.R. Rep. No. 1337, 83d Cong., 2d Sess. 61 (1954).]

In *Maximov v. United States*, 373 U.S. 49 (1963), a complex trust created in the United States with beneficiaries resident in the United Kingdom was held to be taxable on capital gains it realized that were not distributed to the beneficiaries by the trust during the same taxable year. An exemption from United States capital gains tax was provided for residents of the United Kingdom under the United States—United Kingdom Income Tax Convention in effect at that time. The Court noted the separate taxable entity status of a trust, apart from its beneficiaries, and that a trust is taxable on income it receives that is not distributed to the beneficiaries, nor otherwise taxable directly to the beneficiaries.

Thus, with respect to Situation 2, the 100*x* dollars of interest that *E* receives in year 1 is includible in *E*'s gross income. The 50*x* dollars of interest received by *E* in year 2 is includible in the gross income of *E* in that year, and is deductible by *E* in computing its taxable income in that year under section 661(a)(2) of the Code. The amount of the 150*x* dollar distribution from *E* potentially includible in the beneficiaries' gross income in year 2 is limited by *E's* distributable net income for such year under section 662(a)(2). Thus, only 50*x* dollars of the 150*x* dollar distribution is potentially includible in the gross income of the beneficiaries in year 2. However, pursuant to section 662(b), the 50*x* dollars will retain its character as interest in the hands of the beneficiaries, and, under sections 861(a)(1)(A) and 861(c), is not United States source income and is not subject to the 30 percent tax and withholding provisions in sections 871 and 1441, respectively. Further, since the 100*x* dollars is not included in the beneficiaries' gross income in year 2, the 100*x* dollars is not subject to the 30 percent tax and withholding provisions in sections 871 and 1441, respectively.

HOLDINGS

Situation (1). Interest from a savings deposit account with a domestic branch of a United States bank received and distributed by a domestic estate to nonresident alien beneficiaries in the same taxable year it is received is includible in the gross income of the estate in the taxable year of receipt, and is deductible by the estate in computing its taxable income in that year under section 661(a)(2) of the Code. The interest in the hands of the beneficiaries is not United States source income by reason of section 861(a)(1)(A), and thus is not subject to the 30 percent tax and withholding provisions in sections 871 and 1441, respectively.

Situation (2). Interest from a savings deposit account with a domestic branch of a United States bank received by a domestic estate in one taxable year and distributed to nonresident alien beneficiaries in a subsequent taxable year is includible in the gross income of the estate in the taxable year of receipt. No deduction is allowable to the estate with respect to such interest under section 661(a)(2), nor is any of such interest includible in the gross income of the nonresident alien beneficiaries under section 662, because no interest was distributed or was required to be distributed by the estate to the nonresident alien beneficiaries in the taxable year of receipt.

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 81-244 is amplified.

Section 871.—Tax on Nonresident Alien Individuals

26 CFR 1.871-7: Taxation of nonresident alien individuals not engaged in United States business.

Whether interest income from savings deposits with a domestic branch of a U.S. bank that is received by a domestic estate and subsequently distributed to nonresident alien beneficiaries is subject to U.S. income tax in the hands of such beneficiaries. See Rev. Rul. 86-76, page 5.

Section 1441.—Withholding of Tax on Nonresident Aliens

26 CFR 1.1441-4: Exemptions from withholding.

Whether interest income from savings deposits with a domestic branch of a U.S. bank that is received by a domestic estate and subsequently distributed to nonresident alien beneficiaries is subject to withholding under section 1441. See Rev. Rul. 86-76, page 5.

Section 4945.—Taxes on Taxable Expenditures

26 CFR 53.4945-4: Grants to individuals.

Private foundations; taxable expenditures. A private foundation that made grants to individuals after 45 days from the date it submitted an exemption application in accordance with procedures fully disclosed in its application did not make taxable expenditures under section 4945 of the Code, even though the foundation did not specifically request advance approval of its procedures.

Rev. Rul. 86-77

ISSUE

Did a private foundation make taxable expenditures within the meaning of section 4945(d)(3) of the Internal Revenue Code when it made grants to individuals under the circumstances described below?

FACTS

A newly created nonprofit organization applied for exemption from federal income tax in 1980 as a private foundation under section 501(c)(3) of the Code. The application disclosed its intent to provide scholarship grants to individuals for study at educational institutions under procedures that were fully described in materials submitted as part of the application. The description of the procedures included a detailed statement describing the selection process, a description of the terms and conditions under which the organization ordinarily makes grants, a detailed description of its procedures to supervise grants, and a description of procedures to review grantee reports, investigate possible diversion of grant funds and recover diverted grant funds. While the scholarship program meets the requirements required for the approval of such grants, the application made no specific request for approval of its procedures.

In 1980, the Internal Revenue Service recognized the organization as a private foundation exempt from federal income tax under section 501(c)(3) of the Code. The exemption letter neither expressly approved nor disapproved the organization's procedures for providing grants to individuals. Upon receipt of this letter, the organization began to make grants to individuals in accordance with the procedures described in its application.

LAW AND ANALYSIS

Section 4945 of the Code imposes a tax on each taxable expenditure made by a private foundation.

Section 4945(d)(3) of the Code provides that the term "taxable expenditures" includes any amount paid or incurred by a private foundation as a grant to an individual for travel, study, or other similar purposes except as provided in section 4945(g).

Section 4945(g) of the Code provides that a grant to an individual for study that is made on an objective and nondiscriminatory basis pursuant to a procedure approved in advance by the Secretary is not a taxable expenditure under section 4945(d)(3) if it is demonstrated to the satisfaction of the Secretary that (1) the grant constitutes a scholarship or fellowship grant which is subject to the provisions of section 117(a) and is to be used for study at an educational organization described in section 170(b)(1)(A)(ii); (2) the grant constitutes a prize or award that is subject to the provisions of section 74(b), if the recipient of such prize or award is selected form the general public; or (3) the purpose of the grant is to achieve a specific, objective, produce a report or other similar product, or improve or enhance a literary, artistic, musical, scientific, teaching, or other similar capacity, skill, or talent of the grantee.

Section 53.4945-4(a)(3)(ii) of the Foundation Excise Tax Regulations provides the general rule that grants to individuals for travel, study or similar purposes will be taxable expenditures under section 4945(d)(3) of the Code, unless, among other requirements, the grants are made pursuant to procedures approved in advance by the Commissioner.

Section 53.4945-4(d)(1) of the regulations provides that a request for advance approval of a foundation's grant procedures must fully describe the foundation's procedures for awarding grants and for ascertaining that such grants are used for the proper purposes. The request must contain: (1) a detailed statement describing the selection process; (2) a description of the terms and conditions under which the foundation ordinarily makes grants; (3) a detailed description of the foundation's procedure for exercising supervision over grants; and (4) a description of the foundation's procedures for review of grantee reports, for investigation where diversion of grant funds from their proper purposes is indicated, and for recovery of diverted grant funds.

Section 53.4945-4(d)(3) of the regulations provides that if, by the 45th day after a request for approval of grant procedures has been properly submitted to the Service, the organization has not been notified that such procedures are not acceptable, such procedures shall be considered as approved from the date of submission until receipt of actual notice from the Service that such procedures do not meet the requirements of section 4945(g) of the Code. If a grant to an individual for a purpose described in section 4945(d)(3) is made after notification to the organization by the Service that the procedures under which the grant is made are not acceptable, such grant is a taxable expenditure.

Organizations applying for tax exemption and seeking advance approval of their procedures for grants to individuals may request such approval with their submission of Form 1023, Application for Recognition of Exemption under Section 501(c)(3) of the Code. A full and complete disclosure of an organization's grant-making procedures that includes the information required by section 53.4945-4(d)(1) is considered equivalent to a request for advance approval when submitted in conjunction with an exemption application. However, approval of an organization's exemption application does not in itself constitute approval of the organization's grant procedures unless the exemption letter so provides.

The organization's full disclosure of its grant-making procedures in its exemption application constituted a properly submitted request for approval of grant procedures within the meaning of section 53.4945-4(d) of the regulations. The 1980 approval of its exempt status, however, did not itself constitute an approval of its grant procedures. Nevertheless, because it did not receive, by the 45th day after submission of its application notification that its procedures were not approved, the organization's procedures are considered to have been approved from the date of its application under the provisions of section 53.4945-4(d)(3) of the regulations. Consequently, the organization's grants to individuals were not taxable expenditures under section 4945(d)(3) of the Code.

HOLDING

Under the circumstances described above, the private foundation did not make taxable expenditures within the meaning of section 4945(d)(3) of the Internal Revenue Code when it made grants to individuals.

Section 6231.—Definitions and Special Rules [Partnership Items]

26 CFR 301.6231(a)(3)-1: Partnership items.

T.D. 8082

TITLE 26—INTERNAL REVENUE.—CHAPTER I,—SUBCHAPTER F, PART 301—PROCEDURE AND ADMINISTRATION

Definition of Partnership Item

AGENCY: Internal Revenue Service, Treasury

ACTION: Final regulations.

SUMMARY: This document contains final Regulations on Procedure and Administration relating to the definition of "partnership item" under the rules for the tax treatment of partnership items. The Tax Equity and Fiscal Responsibility Act of 1982 [Pub. L. 97-248, 1982-2 C.B. 462] prescribed those rules. Code section 6231(a)(3) provides that a "partnership item" is any item that must be taken into account for a taxable year of a partnership under any income tax provision to the extent that the regulations provide that the item is more appropriately determined at the partnership level. This document sets forth items that the Service considers to be more appropriately determined at the partnership level than at the partner level. These regulations provide guidance to partners, partnerships, and Internal Revenue Service personnel for compliance with the tax law.

DATES: The regulations shall apply with respect to partnership taxable years beginning after September 3, 1982. However, if a partnership and the Service agree to accelerate the effective date for the consolidated proceedings pursuant to section 407(a)(3) of the Tax Equity and Fiscal responsibility Act of 1982, the regulations shall apply with respect to that partnership for any partnership taxable year ending after September 3, 1982.

FOR FURTHER INFORMATION CONTACT: Cynthia Grigsby of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T) Telephone 202-566-3318 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Prior to the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) there was no mechanism for making tax adjustments at the partnership level since the partnership was not the taxable entity. The Service could not require all partners to join in a single consolidated administrative or judicial proceeding with respect to partnership issues even if the issues were common to all partners. Section 402 of TEFRA added sections 6221-6231 to the Internal Revenue Code to allow for consolidated administrative and judicial proceedings to determine the tax treatment of "partnership items" at th partnership level rather than at the partner level.

Under Code section 6231(a)(3) a "partnership item" is any item that must be taken into account for a taxable year of a partnership under any income tax provision of the Code to the extent that the regulations provide that that item is more appropriately determined at the partnership level than at the partner level. Proposed regulations published in the Federal Register on January 14, 1983 (48 F.R. 1759) [LR-186-82, 1983-1 C.B. 1048] listed the items which the Service considered to be more appropriately determined at the partnership level.

Among the items listed in the proposed regulations were the "distributive share" items that the partnership must allocate to the partners (including partnership liabilities and certain special purpose data such as that necessary to enable partners to compute depletion). Also included were guaranteed payments and partnership-level determinations that have a bearing on transactions affecting particular partners. Four comments were received on these proposed regulations. No public hearing was held because none was requested. After consideration of all comments regarding the proposed regulations, the proposed regulations are adopted as revised by this Treasury decision.

The notice of proposed rulemaking would have added the proposed regulations to the Income Tax Regulations (26 CFR Part 1). Because it is more appropriate to include these provisions in the Regulations on Procedure and Administration (26 CFR Part 301), this Treasury decision redesignates the provisions.

RESPONSE TO COMMENTS

One comment suggested that the regulations make clear that determinations relating to the timing of income, deductions, and credits, including the selection of an accounting method, depreciation, and inventory practices are partnership items. That these items are partnership items was implicit in the assumptions underlying the proposed regulations. For example, the determination of partnership taxable income of necessity includes determinations relating to the timing of income, deductions, and credits, and the accounting method and inventory practices of the partnership. In response to the comment, however, the proposed regulations are amended by adding a new paragraph (b) to make clear that the term "partnership item" includes items that affect the computation of partnership taxable income, such as the method of accounting, inventory method, taxable year, and elections of the partnership. The new paragraph also explicitly states that the term "partnership item" includes the accounting practices and the legal and factual determinations that underlie determinations as to the amount, timing, and characterization of items of income, credit, gain, loss, or deduction (for example, whether an item is currently deductible or must be capitalized, whether partnership activities have been engaged in with the intent of earning a profit for purposes of section 183, or whether the partnership qualifies for the research and development credit under section 30).

It was also suggested that the regulations address whether "coverage" issues (that is, issues that relate to whether the rules apply to a particular entity or item) are themselves partnership items. The most important of these coverage issues is whether the entity in question is a partnership. Section 6233, which was added to the Code by section 714(p)(1) of the Tax Reform Act of 1984 [Pub. L. 98-369, 1984-3 C.B. (Vol. 1) 1, 472], generally provides for extension of the rules for consolidated proceedings to an entity that files a partnership return (or S corporation return). A notice of proposed rulemaking under sections 6221 through 6231 and section 6233 is set forth * * * [on page 12, this Bulletin].

One comment expressed concern that the inclusion of guaranteed payments as a partnership item could eliminate the availability of the "small partnership exception" under section 6231(a)(1)(B) to partnerships that would otherwise qualify as small partnerships. Section 6231(a)(1)(B) requires each partner's share of each partnership item to be the same as the partner's share of every other item. In the case of a guaranteed payment, the recipient's share of that item (100 percent) would be different than the recipient's share of other items. The notice of proposed rulemaking under section 6231(a)(1)(B), set forth * * * [on page 12, this Bulletin], addresses this issue.

One comment suggested that a transferee partner's basis in a partnership interest should not be treated as a partnership item even if the partnership has made election under section 754. The commenter stated that if the partnership disagrees with the transferee partner's determinations regarding amounts paid for the partnership interest (*e.g.*, whether some parts of the consideration were interest rather than principal), the partner should be entitled to dispute the partnership's determination of that item. This suggestion is not adopted in the final regulations. The determination of the transferee partner's basis in his partnership interest is a partnership item because that determination is necessary in order for the partnership to make certain partnership-level determinations with respect to the transferee partner's basis in partnership property. Treating an item as a partnership item does not deprive a partner of the right to disagree with the treatment of that item by the partnership.

The phrase "(including necessary preliminary determinations, such as the partner's basis in the contributed property)" is added to §301.6231(a)(3)-1(c)(2)(iv) to make clear that the partner's basis in property contributed to a partnership is a partnership item.

Two comments pointed out that personal arrangements between a partner and third parties may be relevant in determining to what extent a partner is "at risk" in a partnership activity to which section 465 applies. The commenters expressed concern that proposed §1.6231(a)(3)-1(a)(1)(vi)(c) treated these personal arrangements as "partnership items." The final regulations add the phrase "determinable at the partnership level" to §301.6231(a)(3)-1(a)(1)(vi)(c) to make clear that such personal arrangements are not partnership items.

The final regulations delete an erroneous example in the proposed regulations. That example indicated that the partnership would not need to make any determinations as to the partnership interest constructively owned by a partner with whom the partnership engages in a transaction governed by section 707(a). The partnership may at times need to make a determination with respect to constructive ownership.

The final regulations delete paragraphs (a)(4)(iv), (a)(4)(v), and (b)(4) of proposed §1.6231(a)(3)-1 and instead include determinations with respect to the application of section 751(a) and (b) under §301.6231 (a)(3)-1(a)(1)(vi).

EXECUTIVE ORDER 12291 AND REGULATORY FLEXIBILITY ACT

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required.

Pursuant to 5 U.S.C. 605(b), it is hereby certified that the requirements of the Regulatory Flexibility Act do not apply to this final regulation because it will not have a significant economic impact on a substantial number of small entities. The final regulation does not impose a significant economic burden on taxpayers; the regulation merely defines the items that are within the scope of the new rules for consolidated partnership proceedings.

DRAFTING INFORMATION

The principal author of these regulations is Robert E. Shaw of the Legislation and Regulations Division of the Office of the Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

* * * * *

Adoption of amendments to the regulations

Accordingly, 26 CFR Part 301 is amended as follows:

Paragraph 1. The authority for part 301 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 301.6231(a)(3)-1 also issued under 26 U.S.C. 6230(k) and 6231(a)(3).

Par. 2. There is inserted in the appropriate place the following new section:

§301.6231(a)(3)-1 Partnership items.

(a) *In general.* For purposes of subtitle F of the Internal Revenue Code of 1954, the following items which are required to be taken into account for the taxable year of a partnership under subtitle A of the Code are more appropriately determined at the partnership level than at the partner level and, therefore, are partnership items:

(1) The partnership aggregate and each partner's share of each of the following:

(i) Items of income, gain, loss, deduction, or credit of the partnership;

(ii) Expenditures by the partnership not deductible in computing its taxable income (for example, charitable contributions);

(iii) Items of the partnership which may be tax preference items under section 57(a) for any partner;

(iv) Income of the partnership exempt from tax;

(v) Partnership liabilities (including determinations with respect to the amount of the liabilities, whether the liabilities are nonrecourse, and changes from the preceding taxable year); and

(vi) Other amounts determinable at the partnership level with respect to partnership assets, investments, transactions and operations necessary to enable the partnership or the partners to determine—

(A) The investment credit determined under section 46(a);

(B) Recapture under section 147 of the investment credit;

(C) Amounts at risk in any activity to which section 465 applies;

(D) The depletion allowance under section 613A with respect to oil and gas wells; and

(E) The application of section 751(a) and (b);

(2) Guaranteed payments;

(3) Optional adjustments to the basis of partnership property pursuant to an election under section 754 (including necessary preliminary determinations, such as the determination of a transferee partner's basis in a partnership interest); and

(4) Items relating to the following transactions, to the extent that a determination of such items can be made from determinations that the partnership is required to make with respect to an amount, the character of an amount, or the percentage interest of a partner in the partnership, for purposes of the partnership books and records or for purposes of furnishing information to a partner:

(i) Contributions to the partnership;

(ii) Distributions from the partnership; and

(iii) Transactions to which section 707(a) applies (including the application of section 707(b)).

(b) *Factors that affect the determination of partnership items.* The term "partnership item" includes the accounting practices and the legal and factual determinations that underlie the determination of the amount, timing, and characterization of items of income, credit, gain, loss, deduction, etc. Examples of these determinations are: The partnership's method of accounting, taxable year, and inventory method; whether an election was made by the partnership; whether partnership property is a capital asset, section 1231 property, or inventory; whether an item is currently deductible or must be capitalized; whether partnership activities have been engaged in with the intent to make a profit for purposes of section 183; and whether the partnership qualifies for the research and development credit under section 30.

(c) *Illustrations.* (1) *In general.* This paragraph (c) illustrates the provisions of paragraph (a)(4) of this section. The determinations illustrated in this paragraph (c) that the partnership is required to make are not exhaustive; there may be additional determinations that the partnership is required to make which relate to a transaction listed in paragraph (a)(4) of this section. The critical element is that the partnership needs to make a determination with respect to a matter for the purposes stated; failure by the partnership actually to make a determination (for example, because it does not maintain proper books and records) does not prevent an item from being a partnership item.

(2) *Contributions.* For purposes of its books and records, or for purposes of furnishing information to a partner, the partnership needs to determine:

(i) The character of the amount received from a partner (for example, whether it is a contribution, a loan, or a repayment of a loan);

(ii) The amount of money contributed by a partner;

(iii) The applicability of the investment company rules of section 721(b) with respect to a contribution; and

(iv) The basis to the partnership of contributed property (including necessary preliminary determinations, such as the partner's basis in the contributed property).

To the extent that a determination of an item relating to a contribution can be made from these and similar determinations that the partnership is required to make, therefore, that item is a partnership item. To the extent that that determination requires other information, however, that determination is not a partnership item. For example, it may be necessary to determine whether contribution of the property causes recapture by the contributing partner of the investment credit under section 47 in certain circumstances in which that determination is irrelevant to the partnership.

(3) *Distributions.* For purposes of its books and records, or for purposes of

furnishing information to a partner, the partnership needs to determine:

(i) The character of the amount transferred to a partner (for example, whether it is a distribution, a loan, or a repayment of a loan);

(ii) The amount of money distributed to a partner;

(iii) The adjusted basis to the partnership of distributed property; and

(iv) The character of partnership property (for example, whether an item is inventory or a capital asset).

To the extent that a determination of an item relating to a distribution can be made from these and similar determinations that the partnership is required to make, therefore, the determination is a partnership item. To the extent that that determination requires other information, however, that item is not a partnership item. Such other information would include those factors used in determining the partner's basis for the partnership interest that are not themselves partnership items, such as the amount that the partner paid to acquire the partnership interest from a transferor partner if that transfer was not covered by an election under section 754.

(4) *Transactions to which section 707(a) applies*. For purposes of its books and records, the partnership needs to determine:

(i) The amount transferred from the partnership to a partner or from a partner to the partnership in any transaction to which section 707(a) applies;

(ii) The character of such an amount (for example, whether or not it is a loan; in the case of amounts paid over time for the purchase of an asset, what portion is interest); and

(iii) The percentage of the capital interests and profits interests in the partnership owned by each partner.

To the extent that a determination of an item relating to a transaction to which section 707(a) applies can be made from these and similar determinations that the partnership is required to make, therefore, that item is a partnership item. To the extent that that determination requires other information, however, that item is not a partnership item. An example of such other information is the cost to the partner of goods sold to the partnership.

(d) *Effective date*. This section shall apply with respect to partnership taxable years beginning after September 3, 1982. This section shall also apply with respect to any partnership taxable year ending after September 3,1 982, if with respect to that year there is an agreement entered into pursuant to section 407(a)(3) of the Tax Equity and Fiscal Responsibility Act of 1982.

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved April 14, 1986.

Part IV. Items of General Interest

Notice of Proposed Rulemaking

Miscellaneous Provisions Related to the Tax Treatment of Partnership Items

LR-205-82

SUMMARY: This document contains proposed regulations relating to certain rules for the tax treatment of partnership items. The Tax Equity and Fiscal Responsibility Act of 1982 [Pub. L. 97-248, 1982-2 C.B. 462] amended the applicable law. The proposed regulations would clarify miscellaneous provisions related to the tax treatment of partnership items and would provide guidance to partners and partnerships affected.

DATES: Written comments and requests for a public hearing must be delivered or mailed by June 17, 1986.

The regulations relating to consolidated partnership proceedings are proposed to apply with respect to partnership taxable years beginning after September 3, 1982. However, if a partnership and the Service agree to accelerate the effective date for the consolidated proceedings pursuant to section 407(a)(3) of the Tax Equity and Fiscal Responsibility Act of 1982 [Pub. L. 97-248, 1982-2 C.B. 462, 597], the regulations are proposed to apply with respect to that partnership for any partnership taxable years ending after September 3, 1982.

The regulations relating to consolidated S corporation proceedings (paragraphs (b) and (c)(2) of proposed §301.6233-1) are proposed to apply with respect to taxable years beginning after December 31, 1982.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-205-82), 1111 Constitution Ave., N.W., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Cynthia Grigsby of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., N.W., Washington, D.C. 20224 (Attention: CC:LR:T LR-205-82). Telephone 202-566-3318 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Prior to the enactment of the Tax Equity and Fiscal Responsibility Act of 1982 (96 Stat. 324) there was no mechanism for making tax adjustments at the partnership level since the partnership was not the taxable entity. Section 402 of that Act added sections 6221 through 6231 to the Internal Revenue Code to allow for consolidated administrative and judicial proceedings to determine the tax treatment of "partnership items" at the partnership level rather than at the partner level. Final regulations defining "partnership items" are set forth * * * [on page 8, this Bulletin]. Temporary regulations and a notice of proposed rulemaking concerning special enforcement areas under section 6231(c) were published in the FEDERAL REGISTER on December 13, 1984 (49 FR 48536, 48573 [T.D. 7996, 1985-1 C.B. 357, LR-242-84, 1984-2 C.B. 917]). Section 714(p)(1) of the Tax Reform Act of 1984 (98 Stat. 494) [Pub. L. 98-369, 1984-3 C.B. (Vol. 1) 1, 472] added section 6233 to the Internal Revenue Code. Generally, section 6233 extends the rules for consolidated administrative and judicial proceedings to entities filing partnership returns or S corporation returns. Final regulations under section 6232, concerning the tax treatment of partnership items for windfall tax purposes, were published in the FEDERAL REGISTER on October 1, 1985 (50 FR 39,998) [T.D. 8054, 1985-44 I.R.B. 7]. The proposed regulations contained in this document address a variety of issues that arise under Code sections 6221 through 6231 and section 6233.

EXPLANATION OF PROVISIONS

Tax treatment determined at the partnership level.

Section 6221 states that the tax treatment of any partnership item shall be determined at the partnership level. Proposed §301.6221-1 provides that neither the Service nor the taxpayer may make any change to the treatment of a partnership item on the partner's return except as provided in sections 6222 through 6231 and the regulations thereunder. Thus, a partner who treats partnership items on the partner's return in a manner that is consistent with the treatment of those items on the partnership return is generally not subject to an adjustment of those items except through a partnership-level proceeding. Likewise, a taxpayer may not put partnership items in issue in a proceeding relating to nonpartnership items.

Notification of inconsistent treatment

Section 6222 requires the partner to treat partnership items on the partner's return in a manner consistent with the treatment of those items on the partnership return. This rule does not apply if the partner treats an item inconsistently and notifies the Service of the inconsistency.

The proposed regulations provide that the notification of inconsistent treatment of partnership items is to be made by filing the form prescribed by the Service for that purpose (currently, Form 8082) in accordance with the instructions accompanying that form.

If a partner reports the inconsistent treatment of any partnership items in accordance with proposed §301.6222(b)-1, the Service generally may not make an adjustment with respect to that partnership item unless the Service conducts a partnership-level proceeding or notifies the partner under section 6231(b)(1)(A) that all partnership items arising from that partnership will be treated as nonpartnership items with respect to that partner and conducts a separate proceeding. The proposed regulations make clear that adjustments in a separate proceeding with the partner are not limited to conforming adjustments. Likewise, a partner who reports an inconsistent treatment is protected only to the extent of notification. Thus, if the partner fails to point out another inconsistent item on the return, that item is subject to a computational adjustment to conform the treatment of that item on the partner's return to the treatment of the item on the partnership return.

Notice sent to partnership

The date that a notice with respect to a partnership proceeding is mailed to the tax matters partner is a significant event. For instance, a partner is not entitled to notice unless the partner is adequately identified at least 30 days before the notice is mailed to the tax matters partner. Proposed §301.6223(a)-1 provides that a notice is mailed to the tax matters partner on the earlier of the date on which the notice is mailed to the "TAX MATTERS PARTNER" at the address of the partnership or the date on which the notice is mailed to the person who is the tax matters partner at the address of the partner or the partnership.

Notice group

Section 6223 requires the Service to send notice of proceedings to the representative of any group of partners owning at least an aggregate 5-percent profits interest in the partnership (a "notice group") if the group so requests. Proposed §301.6223(b)-1 provides that a notice group may be formed only with respect to partnership taxable years that have ended before the request is filed. However, a request by a notice group may relate to more than one taxable year. The proposed regulations also provide that the notice group may include notice partners entitled to separate notice and that a partner may join a notice group after the formation of the group at any time by providing the Service with the required information. The proposed regulations further provide that a partner cannot be a member of more than one notice group with respect to the same partnership for the same taxable year or withdraw from a notice group. While the proposed rules with respect to notice groups are intended to allow partners flexibility to form and join notice groups, these limitations are necessary for administrative reasons.

The proposed regulations make clear that partners forming a notice group are not necessarily associating themselves as a "5-percent group" for purposes of litigation. The representative of a notice group does not have the power to file a petition for judicial review on behalf of the group. All members of any "5-percent group" must join in filing any petition. The role of the notice group representative is administrative (that is, forwarding notice to the members of the group). He or she is not the legal representative of the group.

Withdrawal of notice of beginning of administrative proceeding

Proposed §301.6223(a)-2 provides that the Service may withdraw a notice of the beginning of an administrative proceeding within 45 days after that notice is mailed to the tax matters partner if the Service decides not to propose any adjustments to the partnership return as filed. If the Service withdraws the notice, neither the Service nor the tax matters partner is required to furnish any notice with respect to that proceeding to any other partner. Proposed §301.6223(a)-2(b) limits the circumstances under which the Service can reissue a notice of the beginning of an administrative proceeding once it has been withdrawn.

Duties of tax matters partner

Proposed §301.6223(g)-1 defines the responsibility of the tax matters partner to furnish information on developments in the proceeding to the partners.

Settlement agreements and unidentified indirect partners

Proposed §301.6224(c)-2 provides that indirect partners who are not separately identified at least 30 days before the settlement are bound by any settlement agreement entered into by the pass-thru partner. This provision allows the Service the same 30-day period for taking identifying information with respect to an indirect partner into account for settlement purposes as well as for for purposes of sending notices to such a partner.

Consistent settlements

Proposed §301.6224(c)-3 provides that any partner desiring settlement terms consistent with the terms of any settlement agreement entered into with any other partner must file with the Internal Revenue Service office that entered into the agreement a statement to that effect no later than the 150th day after the notice of the final partnership administrative adjustment is mailed to the tax matters partner (or, if later, the 60th day after the original settlement was entered into). The proposed regulations clarify that the "consistent settlement" requirement does not apply unless the items subject to the settlement were partnership items with respect to the partner who entered into the original settlement immediately before the settlement and are still partnership items with respect to the requesting partner at the time of the request.

Administrative adjustment requests

Proposed §301.6227(b)-1 provides that an administrative adjustment request that the tax matters partner asks to have treated as a substituted partnership return remains an administrative adjustment request even if the Service decides not to treat the request as a substituted return. Thus, the tax matters partner may file suit under section 6228(a) if the Service fails to take timely action on the request.

An administrative adjustment request filed on behalf of a partner is similar to a claim for refund except that it relates only to partnership items and the partner's right to bring suit on the request is limited. Proposed §301.6227(c)-1 provides that the request must be filed on the form specified by the Service for that purpose (currently, Form 8082), in accordance with the instructions accompanying that form.

Definition of partnership

Section 6231(a)(1) defines the term "partnership" broadly to include any partnership required to file a return under section 6031(a) but provides an exception from the consolidated partnership procedures for certain small partnerships. A partnership qualifies for this exception for any partnership taxable year only if during that taxable year it has 10 or fewer partners and each partner's share of each partnership item is the same as his or her share of every other item. The proposed regulations provide that a partnership does not qualify for the exception if any of its partners is a pass-thru partner (other than partner's estate).

The proposed regulations apply the "10 or fewer" limitation to the aggregate number of individuals who are partners at any one time during the partnership taxable year. Thus, a partnership that never has more than 10 partners at any given moment during the taxable year would be treated as a small partnership even if, because of transfers, 11 or more individuals hold interests in the partnership during the course of the yaxable year. A husband and wife are treated as one partner.

The "same share" requirement excludes from the scope of the small partnership exception any partnership making item allocations (other than special allocations under section 704(c) and certain allocations based on similar concepts). Under this requirement, a partner generally must have the same percentage interest in all items of partnership income or loss. Some items that will be treated as "partnership items" for general purposes under the proposed rules will not be treated as "partnership items" for purposes of the "same share" requirement. The proposed regulations apply the "same share" rule only in the case of specified distributive share partnership items. The same share requirement is satisfied for a taxable year if during all periods within that taxable year each partner's share of each of the enumerated partnership items is the same as the partner's share of each of the other enumerated items during that period (even though the partners share of all enumerated items changes from period to period within that taxable year).

An exempt small partnership may elect to be subject to the new partnership procedures. The proposed regulations provide procedural rules for making this election.

Spouse filing joint return with individual holding separate interest

Generally, proposed §301.6231(a)(2)-1 treats a spouse who files a joint return with an individual holding a separate interest in the partnership as a partner. Thus, the spouse will be permitted to participate in administrative and judicial proceedings. However, the spouse will not be counted as a partner for purposes of applying the special rules for partnerships with more than 100 partners or the exception for small partnerships.

Affected items and computational adjustments

Proposed §301.6231(a)(5)-1 provides that the term "affected item" includes a partner's basis in his or her partnership interest and application of the at-risk limitation, to the extent these items are not partnership items. Additions to tax and additional amounts that are attributable to partnership items or affected items are also affected items. Proposed §301.6231(a)(6)-1 provides that a change in the tax liability of a partner to properly reflect the treatment of a partnership item is made through a computational adjustment. In some cases, a change in tax liability attributable to an affected item may be made through a computational adjustment. However, if a change in the tax liability cannot be made without certain partner-level determinations then the change attributable to such partner-level determinations is made through deficiency procedures and not through a computational adjustment. Certain affected items may require partner-level determinations; for example, a partner's at-risk amount may depend upon the source from which the partner obtained the funds that the partner contributed to the partnership. Other affected items, such as the threshold amount for medical deductions that changes as a result of determinations made at the partnership level, do not require partner-level determinations and can thus be included in a computational adjustment. Proposed §301.6231(a)(6)-1 provides that a computational adjustment may not include any additions to tax or additional amounts.

Designation of a tax matters partner

Section 6231(a)(7) provides that the tax matters partner is the general partner designated as the tax matters partner in the manner prescribed by regulations. The proposed regulations provide that a person may be designated as the tax matters partner only if the person was a general partner at some time during the taxable year for which the designation is made or is a general partner as of the time the designation is made. The proposed regulations provide that the partnership may designate the tax matters partner for a taxable year on the partnership return if the form prescribed for the partnership return (currently, Form 1065) for that taxable year contains a space for the designation of a tax matters partner. If the form does not contain such a space, the designation may be made on a statement filed with the partnership return. Currently, Form 1065 does not contain a space for the designation. The proposed regulations also permit designations in other circumstances. A designated tax matters partner may certify to the Service the selection of a successor. In addition, a tax matters partner may be designated after the filing of the partnership return by general partners with a majority interest (taking into account only interests held by general partners) or, under certain circumstances, by partners with a majority overall interest. The proposed regulations also provide rules for terminating this designation and for determining the tax matters partner when the partnership has not made a designation.

The proposed regulations permit the designation of an alternate tax matters partner if the partnership designates an individual as tax matters partner. The alternate tax matters partner automatically succeeds the designated tax matters partner if the tax matters partner dies or is adjudicated incompetent. The proposed regulations limit the ability of a partnership to designate a tax matters partner who is not a United States person.

Special enforcement areas

Under the rules for consolidated partnership proceedings, if a partner treats partnership items on the partner's return consistently with the treatment of those items on the partnership return, generally no adjustment can be made with respect to a partnership item on that partner's return without conducting a partnership-level proceeding to determine the tax treatment of partnership items with respect to all partners. The requirement of a partnership-level proceeding before an assessment with respect to partnership items can be made would interfere with certain existing tax procedures. For example, a jeopardy assessment may ordinarily be made immediately if the Service believes that the assessment or collection of a deficiency will be jeopardized by delay.

Section 6231(c) lists certain areas that may present special enforcement problems under the rules for consolidated proceedings and authorizes the addition of other areas to the list of special enforcement areas by regulations. The proposed regulations add to the list of special enforcement areas provided in section 6231(c) the following: bankruptcy, receivership, and requests for prompt assessment under section 6501(d). Additional special enforcement problems were addressed in temporary regulations and a notice of proposed rulemaking which were published in the FEDERAL REGIS-

TER on December 13, 1984 (49 F. Reg. 48536, 48573 [T.D. 7996, 1985-1 C.B. 357, LR-242-84, 1984-2 C.B. 917]). The temporary regulations, §§301.6231(c)-1 T and 301.6231(c)-2 T, provide special rules for certain applications for tentative carryback and refund adjustments based on partnership losses, deductions, or credits and for certain refund claims based on losses, deductions, or credits from abusive tax shelter partnerships.

Section 6231(c) provides that to the extent that the regulations provide that the treatment of items as partnership items in these special cases will interfere with the effective and efficient enforcement of internal revenue laws, those items will be treated as nonpartnership items. The proposed regulations state when application of the new rules for treatment of partnership items would interfere with effective tax administration and note the date on which the partnership items become nonpartnership items. For example, when a petition is filed in Bankruptcy Court naming a bankrupt partner as debtor, any action in any court to determine the bankrupt partner's tax liability is stayed. The Bankruptcy Court may exercise its discretion to determine the tax liability of the bankrupt partner but the rules for consolidated partnership proceedings do not confer any jurisdiction over the partnership proceedings. Determining the tax liability of a partner who is named as a debtor in a bankruptcy proceeding under the rules for consolidated partnership proceedings would interfere with the effective and efficient enforcement of the tax laws. Therefore, the proposed regulations provide that all partnership items of such a partner will be treated as nonpartnership items as of the date a petition naming that partner as a debtor is filed in bankruptcy. The proposed regulations do not include foreign partnerships as a special enforcement area. Items treated as nonpartnership items are subject to adjustment in separate proceedings.

Effect of judicial decision on certain proceedings

Section 6231(e) provides that a court decision with respect to a partner's income tax liability not resulting from a partnership proceeding shall not be a bar to further proceedings with respect to that liability because of items which become nonpartnership items after the appropriate time to include them in the earlier court proceeding has passed. Proposed §301.6231(e)-2 makes clear that the Service could issue a later deficiency notice for the same taxable year with respect to that partner and that that partner could bring a refund suit with respect to those items that have become nonpartnership items.

Proposed §301.6231(e)-1 makes clear that a determination with respect to an item in a nonpartnership proceeding with a partner is not controlling in the determination of that item with respect to other partners. For example the finding of a court in a separate proceeding with a partner that a certain partnership expenditure is deductible does not bind either the Service or the other partners in a later partnership proceeding. While this proposition is not specifically spelled out in the statute, it is implicit in the statutory scheme which permits separate proceedings before the conclusion of partnership-level proceedings.

Disallowance of losses and credits in certain cases

Proposed §301.6231(f)-1 provides that the disallowance rule in section 6231(f) applies to both domestic and foreign partnerships. Although the heading of that Code provision refers to "foreign partnerships," the actual statutory language is not so limited. The purpose of the provision is to prevent partners from deriving tax benefits from any partnership, foreign or domestic, that fails to file a required partnership return if either the tax matters partner resides outside the United States or the books and records of the partnership are maintained outside the United States. Either of these circumstances could substantially increase the administrative burden on the Service in auditing the partnership.

The proposed regulations provide that the losses and credits arising from a partnership will be disallowed to a partner only if the partnership fails to file the required return within 60-days after the Service notifies the partner of the problem. Even if the partnership fails to file the return within that 60-day period, the losses or credits may still be allowed in whole or in part if the partner shows that the losses and credits are proper and that the partner has made a good faith effort to have the partnership file the return.

Extension to entities filing a partnership or S corporation return, etc.

Proposed §301.6233-1 provides that the provisions of subchapter C of chapter 63 of the Code ("subchapter C") apply with respect to entities filing a partnership return for taxable years beginning after September 3, 1982 (and certain earlier years to which an election to be included within the rules for consolidated proceedings provisions applies), the entity's items for that taxable year, and to any person holding an interest in the entity for that taxable year. The provisions of subchapter C also apply where a partnership return is filed but it is determined that there is no entity. However, the provisions of subchapter C do not apply to entities for any taxable year in which the entity would qualify for the small partnership exception under proposed §301.6231(a)(1)-1 if the entity were a partnership and for any taxable year for which a partnership return was filed for the sole purpose of making an election under section 761(a).

Proposed §301.6233-1 also provides that the provisions of subchapter D of chapter 63 of the Code ("subchapter D") apply with respect to entities filing a return as an S corporation for taxable years beginning after December 31, 1982, the entity's items for that taxable year, and any person holding an interest in the entity for that taxable year. The provisions of subchapter D also apply where an S corporation return is filed but it is determined that there is no entity. Regulations under subchapter D will be promulgated at a future date.

COMMENT AND PUBLIC HEARING

Before the adoption of these proposed regulations consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the FEDERAL REGISTER.

The collection of information requirements contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act. Comments on these requirements should be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Internal Revenue Service, New Executive Office Building, Washington, D.C. 20530. The Internal Revenue Service requests that persons submitting comments on these requirements to OMB also send copies of those comments to the Service.

SPECIAL ANALYSES

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis is therefore not required.

Pursuant to 5 U.S.C. 605(b), it is hereby certified that the requirements of the Regulatory Flexibility Act do not apply to this notice of proposed rulemaking because the proposed regulations will not have a significant economic impact on a substantial number of small entities. The definitional rules being proposed apply regardless of the size of the partnership. The procedural rules are designed to keep the reporting burden to the minimum necessary to enable the Internal Revenue Service to administer the law; duplicate filing is required in certain instances to permit the Service to coordinate examinations of partners and partnerships.

DRAFTING INFORMATION

The principal author of these proposed regulations is Robert E. Shaw of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

301.6231(c)-4, 301.6231(c)-5,
301.6231(c)-6, 301.6231(c)-7,
301.6231(c)-8 301.6231(d)-1,
301.6231(e)-1, 301.6231(e)-2,
301.6231(f)-1, and 301.6233-1.

§301.6221-1 Tax treatment determined at partnership level.

(a) *In general.* A partner's treatment of partnership items on the partner's return may not be changed except as provided in sections 6222 through 6231 of the Code and the regulations thereunder. Thus, for example, if a partner treats an item on the partner's return consistently with the treatment of the item on the partnership return, the Internal Revenue Service generally cannot adjust the treatment of that item on the partner's return except through a partnership-level proceeding. Similarly, the taxpayer may not put partnership items in issue in a proceeding relating to nonpartnership items. For example, the taxpayer may not offset a potential increase in taxable income based on changes in nonpartnership items by a potential decrease based on partnership items.

(b) *Restrictions inapplicable after items become nonpartnership items.* Section 6221 and paragraph (a) of this section cease to apply to items arising from a partnership with respect to a partner when those items cease to be partnership items with respect to that partner under section 6231(b).

(c) *Cross reference.* See §§301.6231(c)-1T and 301.6231(c)-2T for special rules relating to certain applications and claims for refund based on losses, deductions, or credits from abusive tax shelter partnerships.

§301.6222(a)-1 Consistent treatment of partnership items.

(a) *In general.* The treatment of a partnership item on the partner's return shall be consistent with the treatment of that item by the partnership in all respects including the amount, timing, and characterization of the item.

(b) *Treatment must be consistent with partnership return.* The treatment of a partnership item on the partner's return shall be consistent with the treatment of that item on the partnership return. Thus, a partner who treats an item consistently with a schedule or other information furnished to the partner by the partnership has not satisfied the requirement of paragraph (a) of this section if the treatment of that item is inconsistent with the treatment of the item on the partnership return actually filed. For rules relating to the election to be treated as having reported the inconsistency where the partner treats an item consistently with an incorrect schedule, see §301.6222(b)-3.

(c) *Examples.* The following examples illustrate the principles set forth in this section.

Example (1). B is a partner of Partnership P. Both B and P use the calendar year as the taxable year. in December 1983, P receives an advance payment for services to be performed in 1984 and reports this amount as income for calendar year 1983. However, B reports B's distributive share of this amount on B's income tax return for 1984 and not on B's return for 1983. B's treatment of this partnership item is inconsistent with the treatment of the item by P.

Example (2). Partnership P incurred certain start-up costs before P was actively engaged in its business. P capitalized these costs. C, a partner in P, deducted C's proportionate share of these start-up costs. C's treatment of the partnership expenditure is inconsistent with the treatment of that item by P.

Example (3). D is a partner in partnership P which reports a loss of $100,000 on its return, $5,000 of which it reports on the Schedule K-1 attached to its return as D's distributive share. However, P reports $15,000 as D's distributive share of P's loss on the Schedule K-1 furnished to D. D reports the $15,000 loss in D's income tax return. D has not satisfied the consistency requirement. See, however, §301.6222(b)-3 for an election to be treated as having reported the inconsistency.

§301.6222(a)-2 Application of consistency and notification rules to indirect partners.

(a) *In general.* The consistency requirement of §301.6222(a)-1 is generally applied with respect to the source partnership. For purposes of this section, the term "source partnership" means the partnership (within the meaning of section 6231(a)(1)) from which the partnership item originates.

(b) *Indirect partner files consistently with source partnership.* An indirect partner who treats an item from a source partnership in a manner which is consistent with the treatment of that item on the return of the source partnership satisfies the consistency requirement of section 6222(a) regardless of whether the indirect partner treats that item in a manner which is consistent with the treatment of that item by the pass-thru partner through which the indirect partner holds the interest in the source partnership. Under these circumstances, therefore, the Service shall not send to the indirect partner the notice described in section 6231(b)(1)(A).

(c) *Indirect partner files inconsistently with source partnership*—(1) *Indirect partner notifies Service of inconsistency.* An indirect partner who—

(i) Treats an item from a source partnership in a manner which is inconsistent with the treatment of that item on the return of the source partnership, and

(ii) Files a statement identifying the inconsistency with the source partnership in accordance with §301.6222(b)-1,

shall not be subject to a computational adjustment to conform the treatment of that item to the treatment of that item on the return of the source partnership.

(2) *Indirect partner does not notify Service of inconsistency.* Except as provided in paragraph (c)(3) of this section, an indirect partner who—

(i) Treats an item from a source partnership in a manner which is inconsistent with the treatment of that item on the return of the source partnership, and

(ii) Fails to file a statement identifying the inconsistency with the source partnership in accordance with §301.6222(b)-1,

is subject to a computational adjustment to conform the treatment of that item to the treatment of that item on the return of the source partnership.

(3) *Indirect partner files consistently with a pass-thru partner that notifies the Service of the inconsistency.* If an indirect partner treats an item from a source partnership in a manner which is consistent with the treatment of that item by a pass-thru partner through which the indirect partner holds the interest in the source partnership and that pass-thru partner—

(i) Treats that item in a manner that is inconsistent with the treatment of that item on the return of the source partnership, and

(ii) Files a statement identifying the inconsistency with the source partnership in accordance with §301.6222(b)-1,

the indirect partner is not subject to a computational adjustment to conform the treatment of that item of the treatment of that item on the return of the source partnership.

(d) *Examples.* The following examples illustrate the principles set forth in this section.

Example (1). One of the partners in Partnership A is Partnership B, which has four equal partners C, D, E, and F. Both A and B are partnerships within the meaning of section 6231(a)(1). On its return, A reports $100,000 as B's distributive share of A's ordinary income. B, however, reports only $80,000 as its distributive share of the income and does not notify the Service of this inconsistent treatment with respect to A. C reports $20,000 as its distributive share of the item. Although C reports the item consistently with B, C is subject to a computational adjustment to conform the treatment of that item on C's return to the treatment of that item on the return of A.

Example (2). Assume the same facts as in example (1) except that B notified the Service of its inconsistent treatment with respect to source partnership A. C is not subject to a computational adjustment.

Example (3). Assume the same facts as in example (1). D reports only $15,000 as D's distributive share of the income and does not report the inconsistency. F reports only $9000 as its distributive share of the item but reports this inconsistency with respect to source partnership A. D is subject to a computational adjustment to conform the treatment of that item on D's return to the treatment of that item on the return of A. F is not subject to a computational adjustment.

Example (4). Assume the same facts as in example (3) except that F reported the inconsistency with respect to B and did not report the inconsistency with respect to source partnership A. F is subject to a computational adjustment to conform the treatment of that item on F's return to the treatment of that item on the return of A.

Example (5). Assume the same facts as in example (1). E reports $25,000 as its distributive share of the item. Regardless of whether E reports the inconsistency between its treatment of the item and that by B, E is neither subject to a computational adjustment to conform E's treatment of that item to that of B nor subject to the notice described in section 6231(b)(1)(A) with respect to any such notification of inconsistent treatment.

§301.6222(b)-1 Notification to Service when partnership items are treated inconsistently.

The statement identifying an inconsistency described in section 6222(b)(1)(B) shall be filed by filing the form prescribed for that purpose in accordance with the instructions accompanying that form.

§301.6222(b)-2 Effect of notification of inconsistent treatment.

(a) *In general.* Generally, if a partner treats a partnership item on the partner's return in a manner which is inconsistent with the treatment of that item on the partnership return the Service may make a computational adjustment to conform the treatment of the item by the partner with the treatment of that item on the partnership reutrn. Any additional tax resulting from that computational adjustment may be assessed without either the commencement of a partnership proceeding or notification tot he partner that all partnership items arising from that partnership will be treated as nonpartnership items. However, if a partner notifies the Service of the inconsistent treatment of a partnership item in the manner prescribed in §301.6222(b)-1, the Service generally may not make an adjustment with respect to that partnership item unless the Service—

(1) Conducts a partnership-level proceeding, or

(2) Notifies the partner under section 6231(b)(1)(A) that all partnership items arising from that partnership will be treated as nonpartnership items.

See, however, §§301.6231(c)-1T and 301.6231(c)-2T for special rules relating to certain applications and claims for refund based on losses, deductions, or credits from abusive tax shelter partnerships.

(b) *Partner protected only to extent of notification.* A partner who reports the inconsistent treatment of partnership items on the partner's return is protected from computational adjustments under section 6222(c) only with respect to those partnership items the inconsistent treatment of which is reported. Thus, if a partner notifying the Service with respect to one item fails to report the inconsistent treatment of another item, the partner is subject to a computational adjustment with respect to that latter item.

Example. Partner A of Partnership P treats a deduction and a capital gain arising from P on A's return in a manner that is inconsistent with the treatment of those items by P. A reports the inconsistent treatment of the deduction but not of the gain. A is subject to a computational adjustment under section 6222(c) with respect to the gain.

(c) *Adjustments in a separate proceeding not limited to conforming adjustments.* If the Service conducts a separate proceeding with a partner whose partnership items are treated as nonpartnership items under section 6231(b), the Service is not limited to making adjustments that merely conform the partner's return to the partnership return.

Example. partnership P allocates to E, one of its partners, a loss of $8,000. E, however, claims a loss of $9,000 and reports the inconsistent treatment. The Service notifies E that it will treat all of E's partnership items arising from P as nonpartnership items. As a result of a separate proceeding with E, the Service may issue a deficiency notice which could include reducing the loss to $3,000.

§301.6222(b)-3 Partner receiving incorrect schedule.

(a) *In general.* A partner shall be treated as having complied with section 6222(b)(1)(B) and §301.6222(b)-1 with respect to a partnership item if the partner—

(1) Demonstrates that the treatment of the partnership item on the partner's return is consistent with the treatment of that item on the schedule prescribed by the Service and furnished to the partner by the partnership showing the partner's share of income, credits, deductions, etc., and

(2) Elects in accordance with the rules prescribed in paragraph (b) of this section to have this section apply with respect to that item.

(b) *Election provisions*—(1) *Time and manner of making election.* The election described in paragraph (a) of this section shall be made by filing a statement with the Internal Revenue Service office issuing the notice of computational adjustment within 30 days after the notice is mailed to the partner.

(2) *Contents of statement.* The statement described in paragraph (b)(1) of this section shall be:

(i) clearly identified as an election under section 6222(b)(2),

(ii) Signed by the partner making the election, and

(iii) Accompanied by copies of the schedule furnished to the partner by the partnership and of the notice of computational adjustment. The partner need not enclose a copy of the notice of computational adjustment, however, if the partner clearly identifies the notice of computational adjustment.

Generally, the requirement described in paragraph (a)(1) of this section will be satisfied by attaching to the statement a copy of the schedule furnished to the partner by the partnership. However, if it is not clear from the information contained on the schedule that the treatment of the partnership item on the schedule is consistent with the partner's treatment of such item on the partner's return the statement shall also include an explanation of how the treatment of such item on the schedule is consistent with the treatment on the partner's return with respect to the characterization, timing, and amount of such item.

§301.6223(a)-1 Notice sent to tax matters partner.

(a) *In general.* For purposes of subchapter C of chapter 63 of the Code, a notice is treated as mailed to the tax matters partner on the earlier of—

(1) The date on which the notice is mailed to "THE TAX MATTERS PARTNER" at the address of the partnership (as provided on the partnership return, except as updated under §301.6223(c)-1), or

(2) The date on which the notice is mailed to the person who is the tax matters partner at the address of that person (as provided on the partner's return, except as updated under §301.6223(c)-1) or the partnership. See §301.6223(c)-1 for rules relating to the information to be used by the Service in providing notices, etc.

(b) *Example.* The provisions of this section may be illustrated by the following example:

Example. Partnership P designates B as its tax matters partner in accordance with §301.6231(a)(7)-1(b). On December 1 a notice of the beginning of an administrative proceeding is mailed to "THE TAX MATTERS PARTNER" at the address of P. On January 10, a copy of the notice is mailed to B at B's address. December 1 is treated as the date that the notice was mailed to the tax matters partner.

§301.6223(a)-2 Withdrawal of notice of the beginning of an administrative proceeding.

(a) *In general.* If the Internal Revenue Service, within 45 days after the day on which the notice specified in section 6223(a)(1) is mailed to the tax matters partner, decides not to propose any adjustments to the partnership return as filed, the Service may withdraw the notice specified in section 6223(a)(1) by mailing a letter to that effect to the tax matters partner within that 45-day period. If the Service withdraws the notice, neither the Service nor the tax matters partner is required to furnish any notice with respect to that proceeding to any other partner. Except as provided in paragraph (b) of this section, a notice specified in section 6223(a)(1) which has been withdrawn shall be treated for purposes of subchapter C of chapter 63 of the Code as if that notice had never been mailed to the tax matters partner.

(b) *Service may not reissue notice except under certain circumstances.* If the notice specified in section 62323(a)(1) was mailed to the tax matters partner with respect to a partnership taxable year and that notice was later withdrawn as provided in paragraph (a) of this section, the Service shall not mail a second notice specified in section 6233(a)(1) by mailing a letter to that effect to the tax matters partner within that 45-day period. If the Service withdraws the notice, neither the Service nor the tax matters partner is required to furnish any notice with respect to that proceeding to any other partner. Except as provided in paragraph (b) of this section, a notice specified in section 6223(a)(1) which has been withdrawn shall be treated for purposes of subchapter C of chapter 63 of the Code as if that notice had never been mailed to the tax matters partner.

(b) *Service may not reissue notice except under certain circumstances.* If the notice specified in section 6223(a)(1) was mailed to the tax matters partner with respect to a partnership taxable year and that notice was later withdrawn as provided in paragraph (a) of this section, the Service shall not mail a second notice specified in section 6233(a)(1) with respect to that taxable year unless:

(1) There is evidence of fraud, malfeasance, collusion, concealment, or misrepresentation of a material fact;

(2) The prior proceeding involved a clearly defined substantial error with respect to an established Service position existing at the time of the previous examination; or

(3) Other circumstances exist which indicate that failure to reissue the notice would be a serious administrative omission.

§301.6223(b)-1 Notice group.

(a) *In general.* If a group of partners having in the aggregate a 5 percent or more interest in the profits of a partnership so requests and designates one of their members to receive the notices described in section 6223(a)(1) and (2), the member so designated shall be treated as a partner to whom section 6223(a) applies. Thus, the designated representative is entitled to receive any notice described in section 6223(a) that is mailed to the tax matters partner 30 days or more after the day on which the Service receives the request from the group.

(b) *Request for notice*—(1) *In general.* The Service shall mail to the member of the notice group designated to receive such notice any notice described in section 6223(a) that is mailed to the tax matters partner 30 days or more after the day on which the Service receives the request for notice from the group if such request for notice is made in accordance with the rules prescribed in this paragraph (b).

(2) *Content of request.* The request for notice from a notice group shall—

(i) Identify the partnership by name, address, and taxpayer identification number,

(ii) Specify the taxable year or years for which the notice group is formed,

(iii) Designate the member of the group to receive the notices,

(iv) Set out the name, address, taxpayer identification number, and profits interest of each member of the group, and

(v) Be signed by all partners comprising the notice group.

(3) *Place for filing.* The request for notice from a notice group generally shall be filed with the service center with which the partnership return is filed. However, if the notice group representative knows that the notice described in section 6223(a)(1) (beginning of an administrative proceeding) has already been mailed to the tax matters partner, the statement shall be filed with the Internal Revenue Service office that mailed that notice.

(4) *Copy to be sent to the tax matters partner.* A copy of the request for notice from a notice group shall be provided to the tax matters partner by the notice group representative within 30 days after the request is filed with th the Service.

(5) *Years covered by request.* A request for notice by a notice group may relate only to partnership taxable years that have ended before the request is filed. A request, however, may relate to more than one partnership taxable year if the 5 percent or more profits interest requirement of section 6223(b)(2) is satisfied for each year to which the request relates.

(c) *Composition of notice group*—(1) *In general.* A notice group shall be comprised only of persons who were partners at some time during the partnership taxable year for which the group is formed. If a notice group is formed for more than one taxable year, each member of the group must have been a partner at some time during at least one of the taxable years for which the group is formed. A notice group may include a partner entitled to separate notice. See section 6231(d) and §301.6231(d)-1 for rules relating to determining the interest of a partner in the profits of a partnership for a partnership taxable year for purposes of section 6223(b). See paragraph (c)(6) of this section for rules relating to indirect and pass-thru partners.

(2) *Partner may be a member of only one group.* A partner cannot be a member of more than one notice group with respect to the same partnership for the same partnership taxable year. See paragraph (c)(6) of this section for rules relating to indirect and pass-thru partners.

(3) *Partner may join group after formation.* A partner may join a notice group at any time after the formation of that group by filing with the Internal Revenue Service office with which the notice group filed its request a statement that it is joining the notice group. The statement shall identify the partner joining the notice group, the partnership, and the members of the notice group by name, address, and taxpayer identification number and shall be signed by the joining partner. A copy of the statement shall be provided by the joining partner to both the tax matters partner and the notice group representative within 30 days after the request is filed with the Service. The partner shall become a member of the notice group for each partnership taxable year for which the group was formed and for which the partner was a partner at any time during such partnership taxable year.

(4) *Date on which a partner becomes a member of notice group.* A partner shall become a member of a notice group on the 30th day after the day on which the Service receives—

(i) A request for notice from a notice group that identifies that partner as a member of that notice group, or

(ii) A statement filed in accordance with paragraph (c)(3) of this section that states that the partner is joining the notice group.

(5) *No withdrawal from notice group.* A partner who has signed a notice group request filed with the Service remains a member of that notice group until the group terminates. A partner cannot withdraw from the notice group.

(6) *Indirect and pass-thru partners—(i) Pass-thru partners and unidentified indirect partners.* A pass-thru partner may become a member of a notice group as provided in this section. For purposes of applying the aggregate interest requirement specified in paragraph (a) of this section to a pass-thru partner, the partnership interest hold by the pass-thru partner shall not include any interest held through the pass-thru partner by an indirect partner that has been identified as provided in section 6223(c)(3) and §301.6223(c)-1 before the date on which the pass-thru partner becomes a member of the notice group.

(ii) *Indirect partners identified before the pass-thru partner joins a notice group.* An indirect partner may become a member of a notice group with respect to a partnership taxable year only if:

(A) The indirect partner held an interest in the partnership (either directly or through one or more pass-thru partners) at some time during that taxable year, and

(B) The indirect partner was identified as provided in section 6223(c)(3) and §301.6223(c)-1 on or before the date on which the pass-thru partner became a member of a notice group.

(d) *Termination of notice group.* Unless the original request for notice from the notice group or a subsequent statement filed by the representative (in accordance with paragraph (b)(3) and (4) of this section) designates a successor to the designated group representative, the group terminates if the representative dies (or, in the case of an entity, if the entity is dissolved), resigns, or is adjudicated incompetent.

(e) *Notice group is not a 5-percent group.* The forming of a notice group under this section does not constitute the forming of a 5-percent group for purposes of litigation. A notice group is formed solely for the purpose of receiving notices. A 5-percent group is formed solely for the purpose of filing a petition for judicial review or appealing a judicial determination. See §301.6226(b)-1. Thus, a member of a notice group may choose not to join a 5-percent group formed by other members of the notice group.

§301.6223(c)-1 Additional information regarding partners furnished to the Service.

(a) *In general.* In addition to the names, addresses, and profits interests as shown on the partnership return, the Service will use additional information as provided in this section for purposes of administering subchapter C of chapter 63 of the Code.

(b) *Procedure for furnishing additional information—*(1) *In general.* Any person may furnish additional information at any time by filing a written statement with the Service. However, the information contained in the statement will be considered for purposes of determining whether a partner is entitled to a notice described in section 6223(a) only if the Service receives the statement at least 30 days before the date on which the Service mails the notice to the tax matters partner. Similarly, information contained in the statement generally will not be taken into account for other purposes by the Service until 30 days after the statement is received.

(2) *Where statement must be filed.* A statement furnished under this section shall generally be filed with the service center with which the partnership return is filed. However, if the person filing the statement knows that the notice described in section 6223(a)(1) (beginning of an administrative proceeding) has already been mailed to the tax matters partner, the statement shall be filed with the Internal Revenue Service office that mailed such notice.

(3) *Contents of statement.* The statement shall—

(i) Identify the partnership, each partner for whom information is supplied, and the person supplying the information by name, address, and taxpayer identification number;

(ii) Explain that the statement is furnished to correct or supplement earlier information with respect to the partners in the partnership;

(iii) Specify the taxable year to which the information relates;

(iv) Set out the corrected or additional information, and

(v) Be signed by the person supplying the information.

(c) *No incorporation by reference to previously furnished documents.* Incorporation by reference of information contained in another document previously furnished to the Internal Revenue Service will not be given effect for purposes of sections 6223(c) or 6229(e). For example, reference to a return filed by a pass-thru partner which contains identifying information with respect to the indirect partners of that pass-thru partner is not sufficient to identify the indirect partners unless a copy of the document referred to is attached to the statement.

(d) *Information supplied by a person other than the tax matters partner.* The Service may require appropriate verification in the case of information furnished by a person other than the tax matters partner. The 30-day period referred to in paragraph (b)(1) of this section shall not begin until that verification is supplied.

(e) *Power of attorney*—(1) *In general.* This paragraph (e) applies to powers of attorney with respect to proceedings under subchapter C of chapter 63 of the Code ("chapter 63C") that begin on or after the date which is 90 days after the date final regulations under this section are published in the FEDERAL REGISTER.

(2) *Specifically for purposes of chapter 63C.* A power of attorney specifically for purposes of chapter 63C shall be furnished in accordance with paragraph (b)(2) of this section.

(3) *Existing power of attorney.* A power of attorney granted to another person by a partner for other tax purposes shall not be given effect for purposes of chapter 63C unless the partner specifically requests that the power be given such effect in a statement furnished to the Service in accordance with paragraph (b) of this section.

(f) *Service may use other information.* In addition to the information on the partnership return and that supplied on statements filed under this section, the Service may use information in its possession (for example, a change in address reflected on a partner's return) in administering subchapter C of chapter 63 of the Code. However, the Service is not obligated to search its records for information not expressly furnished under this section.

§301.6223(e)-1 Effect of Service's failure to provide notice.

(a) *Notice group.* Section 6223(e)(1)(B)(ii) applies with respect to a notice group only if the request for notice described in §301.6223(b)-1 is received by the Service at least 30 days before the notice is mailed to the tax matters partner.

(b) *Indirect partners*—(1) *In general.* For purposes of section 6223(e), the Service's failure to provide notice to a pass-thru partner that is entitled to notice under section 6223(b) is deemed failure to provide notice to indirect partners holding an interest in the partnership through the pass-thru partner. However, this rule does not apply if the indirect partner:

(i) Receives notice from the Service,

(ii) Is identified as provided in section 6223(c)(3) and §301.6223(c)-1 at least 30 days before the notice is mailed to the tax matters partner, or

(iii) Is a member of a notice group entitled to notice under paragraph (a) of this section.

(2) *Examples.* The provisions of paragraph (b)(1) of this section may be illustrated by the following examples:

Example (1). Partnership ABC has as one of its partners, A, a partnership with three partners, X, Y, and Z. ABC does not have more than 100 partners, and partnership A is entitled to notice under section 6223(a). In addition, Z was identified as provided in section 6223(c)(3) and §301.6223(c)-1 on May 1, 1985. The Service mailed notice to the tax matters partner of ABC on July 1, 1985, but failed to provide notice to partnership A. Notwithstanding the Service's notice to the tax matters partner, the Service is deemed to have failed to provide notice to X and Y. The Service's failure to provide notice to A, however, has no effect on Z; whether notice was provided to Z is determined independently.

Example (2). Assume the same facts as in Example (1), except that the Service provided notice to partnership A but did not provide separate notice to Z. Notwithstanding the Service's notice to partnership A, the Service is deemed to have failed to provide notice to Z.

Example (3). Assume the same facts as in Example (1), except that partnership ABC has more than 100 partners and partnership A is entitled to notice under section 6223(b) because it had at least a 1 percent profits interest in partnership ABC. In addition, X became a member of a member of a notice group on June 1, 1985, and the Service mailed notice to the designated member of that notice group. The Service also mailed a separate notice to Z. The Service's failure to provide notice to partnership A only affects Y, who is deemed not to have been provided notice by the Service.

§301.6223(e)-2 Elections if Service fails to provide timely notice.

(a) *Proceeding finished.* If at the time the Internal Revenue Service mails the partner notice of the proceeding—

(1) The period within which a petition for review of a final partnership administrative adjustment under section 6226 may be filed has expired and no petition has been filed, or

(2) The decision of a court in an action begun by such a petition has become final,

the partner may elect in accordance with paragraph (c) of this section to have that adjustment, that decision, or a settlement agreement described in section 6224(c)(2) with respect to the partnership taxable year to which the adjustment relates apply to that partner. If the partner does not make an election in accordance with paragraph (c) of this section, the partnership items of the partner for the partnership taxable year to which the proceeding relates shall be treated as having become nonpartnership items as of the day on which the Service mails the partner notice of the proceeding.

(b) *Proceeding still going on.* If paragraph (a) of this section does not apply, the partner shall be a party to the proceeding unless the partner elects, in accordance with paragraph (c) of this section, to have—

(1) A settlement agreement described in section 6224(c)(2) with respect to the partnership taxable year to which the proceeding relates apply to the partner, or

(2) The partnership items of the partner for the partnership taxable year to which the proceeding relates treated as having become nonpartnership items as of the day on which the Service mails the partner notice of the proceeding.

(c) *Election*—(1) *In general.* The election described in paragraph (a) or (b) of this section shall be made in the manner prescribed in this paragraph (c). The election shall apply to all partnership items for the partnership taxable year to which the election relates.

(2) *Time and manner of making election.* The election shall be made by filing a statement with the Internal Revenue Service office mailing the notice regarding the proceeding within 45 days after the date on which that notice was mailed.

(3) *Contents of statement.* The statement shall—

(i) Be clearly identified as an election under section 6223(e)(2) or (3).

(ii) Specify the election being made

(that is, application of final partnership administrative adjustment, court decision, consistent settlement agreement, or nonpartnership item treatment),

(iii) Identify the partner making the election and the partnership by name, address, and taxpayer identification number,

(iv) Specify the partnership taxable year to which the election relates, and

(v) Be signed by the partner making the election.

§301.6223(f)-1 Duplicate copy of final partnership administrative adjustment.

Section 6223(f) does not prohibit the Service from issuing a duplicate copy of the notice of final partnership administrative adjustment (for example, in the event the original notice is lost).

§301.6223(g)-1 Responsibilities of the tax matters partner.

(a) *Notices described in section 6223(a)*—(1) *Notice of beginning of proceeding.* Except as otherwise provided in §301.6223(a)-2, the tax matters partner shall, within 75 days after the mailing by the Service of the notice specified in section 6223(a)(1), forward a copy of that notice to each partner that is not entitled to notice from the Service under section 6223. See §301.6230(e)-1 for information to be furnished to the Service.

(2) *Notice of final partnership administrative adjustment.* The tax matters partner shall, within 60 days after the mailing by the Service of the notice specified in section 6223(a)(2), forward a copy of that notice to each partner that is not entitled to notice from the Service under section 6223.

(3) *Requirement inapplicable in certain cases.* The tax matters partner is not required to send notice to a partner if—

§301.6223(a)-2 Withdrawal of notice of the beginning of an administrative proceeding.

(a) *In general.* If the Internal Revenue Service, within 45 days after the day on which the notice specified in section 6223(a)(1) is mailed to the tax matters partner, decides not to propose any adjustments to the partnership return as filed, the Service may withdraw the notice specified in section 6223(a)(1) by mailing a letter to that effect to the tax matters partner within that 45-day period. If the Service withdraws the notice, neither the Service nor the tax matters partner is required to furnish any notice with respect to that proceeding to any other partner. Except as provided in paragraph (b) of this section, a notice specified in section 6223(a)(1) which has been withdrawn shall be treated for purposes of subchapter C of chapter 63 of the Code as if that notice had never been mailed to the tax matters partner.

(b) *Service may not reissue notice except under certain circumstances.* If the notice specified in section 6223(a)(1) was mailed to the tax matters partner with respect to a partnership taxable year and that notice was later withdrawn as provided in paragraph (a) of this section, the Service shall not mail a second notice specified in section 6233(a)(1) with respect to that taxable year unless:

(i) Before the expiration of the applicable 75-day or 60-day period the partnership items of that partner have become nonpartnership items (for example, by settlement),

(ii) That partner is an indirect partner and has not been identified to the tax matters partner at least 30 days before the tax matters partner is required to send such notice,

(iii) That partner is treated as a partner solely by virtue of §301.6231(a)(2)-1,

(iv) That partner was a member of a notice group as of the date on which the notice was mailed to the tax matters partner (see §301.6223(b)-1(c)(4) for the date on which a partner becomes a member of a notice group),

(v) The notice has already been provided to that partner by another person, or,

(vi) The notice is withdrawn by the Service under §301.6223(a)-2.

(b) *Other notices or information*—(1) *In general.* The tax matters partner shall furnish to the partners specified in paragraph (b)(2) of this section information with respect to the following:

(i) Closing conference with the examining agent,

(ii) Proposed adjustments, rights of appeal, and requirements for filing of a protest,

(iii) Time and place of any Appeals conference,

(iv) Acceptance by the Service of any settlement offer,

(v) Consent to the extension of the period of limitations with respect to all partners,

(vi) Filing of a request for administrative adjustment (including a request for substituted return treatment under §301.6227(b)-2) on behalf of the partnership,

(vii) Filing by the tax matters partner or any other partner of any petition for judicial review under sections 6226 or 6228(a),

(viii) Filing of any appeal with respect to any judicial determination provided for in sections 6226 or 6228(a), and

(ix) Final judicial redetermination.

(2) *Partners to be notified.* The tax matters partner shall provide information with respect to any action or other matter specified in paragraph (b)(1) of this section to all notice group representatives and all other partners except partners—

(i) Whose partnership items become nonpartnership items before the expiration of the period specified in paragraph (b)(3) of this section for furnishing that information,

(ii) Who are indirect partners and who are not identified to the tax matters partner at least 30 days before the tax matters partner is required to provide the information,

(iii) Who are treated as partners solely by virtue of §301.6231(a)(2)-1,

(iv) Who are members of a notice group as of the date on which the tax matters partner takes that action or receives information with respect to that matter (see §301.6223(b)-1(c)(4) for the date on which a partner becomes a member of a notice group), or

(v) Who have already received information with respect to the action or matter from any other person.

(3) *Time for furnishing information.* The tax matters partner shall furnish information with respect to an action or other matter described in paragraph (b)(1) of this section within 30 days of taking the action or receiving information with respect to that matter.

§301.6223(h)-1 Responsibilities of pass-thru partner.

The pass-thru partner shall, within 30 days of receiving notice or any other information regarding a partnership proceeding from the Internal Revenue

Service, the tax matters partner, or another pass-thru partner, forward a copy of that notice or information to the person or persons holding an interest through the pass-thru partner in the profits or losses of the partnership for the partnership taxable year to which the notice or information relates. In the case of a pass-thru partner which is a partnership within the meaning of section 6231(a)(1), the tax matters partner of such partnership shall forward copies of such notice or information to the partners of such partnership.

§301.6224(a)-1 Participation in administrative proceedings.

Every partner in the partnership, including an indirect partner, has the right to participate in any phase of administrative proceedings. However, except as provided in section 6223 and the regulations thereunder, neither the Service nor the tax matters partner is required to provide notice of any proceeding to partners. Consequently, a partner who wishes, for example, to be present during a preliminary discussion between an examining agent and the tax matters partner should make special arrangements with the tax matters partner to obtain information as to the time and place of the discussion. The Service and the tax matters partner will determine the time and place for all administrative proceedings. Arrangements will generally not be changed merely for the convenience of another partner.

§301.6224(b)-1 Partner may waive rights.

(a) *In general*. A partner may at any time waive any right that that partner has or any restriction on action by the Service under subchapter C of chapter 63 of the Code.

(b) *Form and manner of making waiver*. The waiver described in paragraph (a) of this section shall be made by a written statement. If the Service furnishes a form to be used for this purpose, the partner may make the waiver by completing the form in accordance with the instructions accompanying that form. If such a form is not furnished, the statement shall—

(1) Be clearly identified as a waiver under section 6224(b),

(2) Identify the partner and the partnership by name, address, and taxpayer identification number,

(3) Specify the right or restriction being waived and the taxable year(s) to which the waiver applies,

(4) Be signed by the partner making the waiver, and

(5) Be filed with the service center with which the partnership return is filed. However, if the person filing the statement knows that the notice described in section 6223(a)(1) (beginning of an administrative proceeding) has already been mailed to the tax matters partner, the statement shall be filed with the Internal Revenue Service office that mailed such notice.

§301.6224(c)-1 Tax matters partner may bind non-notice partners.

(a) *In general*. In the absence of a showing of fraud, malfeasance, or misrepresentation of fact, if the tax matters partner enters into a settlement agreement with the Service and expressly states that that agreement shall be binding on the other partners, that agreement shall be binding on all partners except those who—

(1) Are, as of the day on which the agreement is entered into, either notice partners or members of a notice group (see §301.6223(b)-1(c)(4) for the date on which a partner becomes a member of a notice group), or

(2) Have, at least 30 days before the day on which the agreement is entered into, filed with the Service the statement described in paragraph (c) of this section.

(b) *Indirect partners*—(1) *In general*. If, under paragraph (a) of this section, a pass-thru partner is not bound by an agreement entered into by the tax matters partner, all indirect partners holding an interest in the partnership through that pass-thru partner shall not be bound by that agreement. If, however, the pass-thru partner is bound by an agreement entered into by the tax matters partner, paragraph (a) of this section shall be applied separately to each indirect partner holding an interest in the partnership through that pass-thru partner to determine whether the indirect partner is also bound by the agreement.

(2) *Example*. The following example illustrates the principles set forth in this section.

Example. Partnership P has over 100 partners. Partnership J is a partner in partnership P with a profits interest of less than 1 percent. Partnership J has three partners, A, B, and C. A is a member of a notice group with respect to partnership P, but B and C are not. On July 1, 1985, B filed the statement described in paragraph (c) of this section not to be bound by any settlement agreement entered into by the tax matters partner of partnership P. On August 1, 1985, the tax matters partner of partnership P enters into a settlement agreement with the Service and states that the agreement is binding on other partners as provided in section 6224(c)(3). Since partnership J is bound by the settlement agreement, paragraph (a) of this section is applied separately to each of the indirect partners to determine whether they are bound. A is not bound by the agreement because he was a member of a notice group on the day and agreement was entered into and B is not bound because she filed the statement not to be bound at least 30 days before the agreement was entered into. C is bound by the settlement agreement.

(c) *Statement not to be bound*—(1) *Contents of statement*. The statement referred to in paragraph (a)(2) of this section shall—

(i) Be clearly identified as a statement to deny settlement authority to the tax matters partner under section 6224(c)(3)(B),

(ii) Identify the partner and partnership by name, address, and taxpayer identification number,

(iii) Specify the taxable year or years to which the statement applies, and

(iv) Be signed by the partner filing the statement.

(2) *Place where statement is to be filed*. The statement described in paragraph (c)(1) of this section generally shall be filed with the service center with which the partnership return is filed. However, if the partner knows that the notice described in section 6223(a)(1) (beginning of an administrative proceeding) has already been mailed to the tax matters partner, the statement shall be filed with the Internal Revenue Service office that mailed that notice.

(3) *Consolidated statements*. The statement described in paragraph (c)(1) of this section may be filed with respect to more than one partner if the requirements of that paragraph (c)(1)(including signatures) are satisfied with respect to each partner.

§301.6224(c)-2 Pass-thru partner binds indirect partners.

(a) *Pass-thru partner binds unidentified indirect partners*—(1) *In general*. If a pass-thru partner enters into a settlement agreement with the Service with respect to partnership items, that agreement binds all indirect partners holding an interest in that partnership through the pass-thru partner except those indirect partners who have been identified as provided in section 6223(c)(3) and §301.6223(c)-1 at least 30 days before the date on which the agreement is entered into. However, if, in addition to the interest in the partnership held through the pass-thru partner entering into a settlement agreement, an indirect partner holds a separate interest in that partnership, either directly or indirectly through a different pass-thru partner, the indirect partner shall not be bound by that settlement agreement with respect to the interests held directly or indirectly through a pass-thru partner other than the pass-thru partner entering into the settlement agreement.

(2) *Example*. The provisions of paragraph (a)(1) of this section may be illustrated by the following example:

Example. Partnership J is a partner in partnership P. C is a partner in J but has not been identified as provided in section 6223(c)(3) and §301.6223(c)-1. The only interest that C holds in P is through J. The tax matters partner of J enters into a settlement agreement with the Service with respect to partnership items arising from P. C is bound by the settlement agreement entered into by the tax matters partner of J.

(b) *Person in pass-thru partner authorized to enter into settlement agreement that binds indirect partners*. In the case of a pass-thru partner that is—

(1) A partnership within the meaning of section 6231(a)(1), the tax matters partner of that partnership;

(2) A partnership other than a partnership described in paragraph (b)(1) of this section, any general partner of that partnership;

(3) An S corporation subject to the provisions of subchapter D of chapter 63 of the Code, the tax matters person of that S corporation;

(4) An S corporation other than an S corporation described in paragraph (b)(3) of this section, any officer of that S corporation; or

(5) A trust, estate, or nominee, any person authorized in writing to act on behalf of that trust, estate, or nominee may enter into a settlement agreement with the Service on behalf of its respective entity that would bind the unidentified indirect partners that hold a partnership interest through the pass-thru partner.

§301.6224(c)-3 Consistent settlements.

(a) *In general*. If the Service enters into a settlement agreement with any partner with respect to partnership items, the Service shall offer to any other partner who so requests in accordance with paragraph (c) of this section settlement terms which are consistent with those contained in the settlement agreement entered into.

(b) *Requirements for consistent settlements*. "Consistent" settlement terms are those based on the same determinations with respect to partnership items. Settlements with respect to partnership items shall be self-contained; thus, a concession by one party with respect to a partnership item may not be based upon a concession by the other party with respect to a nonpartnership item. Settlements shall be comprehensive, that is, a settlement may not be limited to selected items. The requirement for consistent settlement terms applies only if—

(1) The items were partnership items for the partner entering into the original settlement immediately before the original settlement, and

(2) The items are partnership items for the partner requesting the consistent settlement at the time the partner files the request.

(c) *Time and manner of requesting consistent settlements*—(1) *In general*. A partner desiring settlement terms consistent with the terms of any settlement agreement entered into between any other partner and the Service shall submit a written statement to the Internal Revenue Service office that entered into the settlement.

(2) *Contents of statement*. Except as otherwise provided in instructions to the taxpayer from the Service, the written statement described in paragraph (c)(1) of this section shall—

(i) Identify the statement as a request for consistent settlement terms under section 6224(c)(2),

(ii) Contain the name, address, and taxpayer identification number of the partnership and of the partner requesting the settlement offer (and, in the case of an indirect partner, of the pass-thru partner through which the indirect partner holds an interest),

(iii) Identify the earlier agreement to which the request refers, and

(iv) Be signed by the partner making the request.

(3) *Time for filing request*. The statement shall be filed not later than the later of—

(i) The 150th day after the day on which the notice of final partnership administrative adjustment is mailed to the tax matters partner, or

(ii) The 60th day after the day on which the settlement was entered into.

(d) *Examples*. The following examples illustrate the principles set out in this section.

Example (1). The Service seeks to disallow a $100,000 loss reported by Partnership P. The Service agrees to a settlement with X, a partner in P, in which the Service allows 60 percent of the loss and accepts the treatment of all other partnership items on the partnership return. Partner Y, which owns a 10 percent interest in the partnership, requests settlement terms which are consistent with the settlement made between X and the Service. The items are partnership items for X immediately before X enters into the settlement agreement and partnership items for Y at the time of the request. The Service must offer Y a settlement agreement allowing a $6,000 loss and otherwise reflecting the treatment of partnership items on the partnership return.

Example (2). F files inconsistently with partnership P and reports the inconsistency. The Service notifies F that it will treat all partnership items arising from P as nonpartnership items with respect to F. Later, the Service enters into a settlement agreement with F on these items. The Service is not required to offer the other partners of P settlement terms consistent with the settlement reached between F and the Service because at the time of the settlement the items arising from P are no longer partnership items with respect to F.

Example (3). G, a partner in Partnership P, filed suit under section 6228(b) after the Service failed to allow an administrative adjustment request with respect to a partnership item arising from P for a taxable year. Under section 6231(b)(1)(B), the partnership items of G for the partnership taxable year became nonpartnership items as of the date the suit was filed. After G filed suit, another partner and the Service entered into a settlement agreement with respect to items arising from P in that year. G is not entitled to consistent settlement terms because the items arising from P are no longer partnership items with respect to G.

§301.6226(a)-1 Principal place of business of partnership.

(a) *In general*. The principal place of business of a partnership for purposes of determining the appropriate district court in which a petition for a readjustment of partnership items may be filed is its principal place of business as of the date the petition is filed.

(b) *Example*. The provisions of paragraph (a) of this section may be illustrated by the following example:

Example. The principal place of business of partnership A on the day that the the notice of the final partnership administrative adjustment was mailed to the tax matters partner of A was

Cincinnati, Ohio. However, by the day on which a petition seeking judicial review of that adjustment was filed, A had moved its principal place of business to Louisville, Kentucky. For purposes of section 6226(a)(2), A's principal place of business is Louisville.

§301.6226(b)-1 5-percent group.

All members of a 5-percent group shall join in filing any petition for judicial review. The designation of partner as a representative of a notice group does not authorize that partner to file a petition for a readjustment of partnership items on behalf of the notice group.

§301.6226(e)-1 Jurisdictional requirement for bringing an action in District Court or Claims Court.

(a) *Amount to be deposited*—(1) *In general*. The jurisdictional amount that the filing partner (or, in the case of a petition filed by a 5-percent group, each member of the group) shall deposit is the amount by which the tax liability of the partner would be increased if the treatment of the partnership items on the partner's return were made consistent with the treatment of partnership items on the partnership return, as adjusted by the notice of final partnership administrative adjustment. The partner is not required to pay other outstanding liabilities in order to deposit a jurisdictional amount.

(2) *Example*. The provisions of paragraph (a)(1) of this section may be illustrated by the following example:

Example. A files a petition for readjustment of partnership items in the Claims Court. A's tax liability would be increased by $4,000 if partnership items on his return were conformed to the partnership return, as adjusted by the notice of final partnership administrative adjustment. A has an unpaid liability of $10,000 attributable to nonpartnership items. A is required to deposit only $4,000 in order to satisfy the jurisdictional requirement.

(b) *Deposit taken into account in computing interest*. The amount deposited is treated as a payment of tax for purposes of chapter 67 (relating to interest). Thus, the period of deposit will be treated as a period of payment for purposes of determining the interest due on any overpayment or underpayment and computing any penalty under section 6653(a)(2) or (b)(2).

(c) *Deposit generally not treated as payment of tax*. Except as provided in paragraph (b) of this section, an amount deposited under section 6226(e) shall not be treated as payment of tax. Thus, the Service may proceed against the depositor for a deficiency based on nonpartnership items without regard to this deposit.

(d) *Amount deposited may be applied against assessment*. If the restriction on assessment provided under section 6225(a) lapses with respect to a deficiency attributable to partnership items for a partnership taxable year while an amount is on deposit under section 6226(e) in connection with a petition relating to those items, the Service may apply the amount deposited against any such deficiency that is assessed.

§301.6226(f)-1 Scope of judicial review.

(a) *In general*. A court reviewing a notice of final partnership administrative adjustment has jurisdiction to determine all partnership items for the taxable year to which the notice relates and the proper allocation of such items among the partners. Thus, the review is not limited to the items adjusted in the notice.

(b) *Example*. The provisions of paragraph (a) of this section may be illustrated by the following example.

Example. The Service issues a notice of final partnership administrative adjustment with respect to Partnership ABC in which the only item adjusted is depreciation. A petition for judicial review of that notice is filed. During the judicial proceeding, a partner of ABC, in accordance with the applicable court rules, raises an issue relating to the treatment of intangible drilling costs. The court reviewing the notice has jurisdiction to determine the intangible drilling cost issue as well as the depreciation issue.

§301.6227(b)-1 Administrative adjustment request by the tax matters partner on behalf of the partnership.

(a) *In general*. A request for an administrative adjustment filed by the tax matters partner on behalf of the partnership shall be filed on the form prescribed by the Service for that purpose in accordance with the instructions accompanying that form. Except as otherwise provided in the instructions accompanying that form, the request shall be—

(1) Filed with the service center where the original partnership return was filed,

(2) Signed by the tax matters partner, and

(3) Accompanied by revised schedules showing the effects of the proposed changes on each partner and an explanation of the changes.

(b) *Denied request for treatment as a substituted return remains administrative adjustment request*. An administrative adjustment request filed by the tax matters partner on behalf of the partnership for which substituted return treatment is requested but not granted remains an administrative adjustment request. Thus, for example, the tax matters partner may file suit under section 6228(a) if the Service fails to take timely action on the request.

§301.6227(c)-1 Administrative adjustment request filed on behalf of a partner.

A request for an administrative adjustment on behalf of a partner shall be filed on the form prescribed by the Service for that purpose in accordance with the instructions accompanying that form. Except as otherwise provided in the instructions accompanying that form, the request shall—

(a) Be filed in duplicate, the original copy filed with the partner's amended income tax return (on which the partner computes the amount by which the partner's tax liability should be adjusted if the request is granted) and the other copy filed with the service center where the partnership return is filed,

(b) Identify the partner and the partnership by name, address, and taxpayer identification number,

(c) Specify the partnership taxable year to which the administrative adjustment request applies,

(d) Relate only to partnership items, and

(e) Relate only to one partnership and one partnership taxable year.

§301.6229(b)-1 Extension by agreement.

Any partnership may authorize any person to extend the period described in section 6229(a) with respect to all partners by filing a statement to that effect with the service center with which the partnership return is filed. The statement shall—

(a) Provide that it is an authorization for a person other than the tax matters partner to extend the assessment period with respect to all partners,

(b) Identify the partnership and the person being authorized by name, address, and taxpayer identification number,

(c) Specify the partnership taxable year or years for which the authorization is effective, and

(d) Be signed by all persons who were general partners at any time during the year or years for which the authorization is effective.

§301.6229(e)-1 Information with respect to unidentified partner.

A partner who is not properly identified on the partnership return (including an indirect partner) remains an unidentified partner for purposes of section 6229(e) until identifying information is furnished asprovided in §301.65223(c)-1.

§301.6230(b)-1 Request that correction not be made.

The request that a correction not be made under section 6230(b)(2) shall be in writing and shall—

(a) State that it is a request that a correction not be made under section 6230(b),

(b) Identify the partnership and the partner filing the request by name, address, and taxpayer identification number,

(c) Be signed by the partner filing the request, and

(d) Be filed with the Internal Revenue Service office that provided the notice of the correction of the error.

§301.6230(c)-1 Claim arising out of erroneous computation, etc.

A claim for refund under section 6230(c) shall state the grounds for the claim and shall be filed with the service center with which the partner's return is filed.

§301.6230(e)-1 Tax matters partner required to furnish names.

(a) *In general.* If a notice of the beginning of an administrative proceeding is mailed to the tax matters partner with respect to any partnership taxable year, the tax matters partner shall furnish to the Internal Revenue Service office that issued the notice the name, address, profits interest, and taxpayer identification number of each person who was a partner in the partnership at any time during that taxable year if that information was not provided on the partnership return filed for that year.

(b) *Revised or additional information.* If the tax matters partner discovers that any information furnished to the Service on the partnership return or under paragraph (a) of this section was incorrect or incomplete, the tax matters partner shall furnish revised or additional information to the Service within 15 days of discovering that the information furnished to the Service was incorrect or incomplete.

(c) *Information required with respect to indirect partners.* The requirements of this section for identifying information apply with respect to indirect partners to the extent that the tax matters partner has such information.

§301.6231(a)(1)-1 Exception for small partnerships.

(a) *In general.* For purposes of the exception for small partnerships under section 6231(a)(1)(B) the rules contained in this section shall apply.

(1) *"10 or fewer."* The "10 or fewer" limitation described in section 6231(a)(1)(B)(i)(I) is applied to the number of natural persons (other than nonresident aliens) and estates that were partners at any one time during the partnership taxable year. Thus, for example, a partnership that at no time during the taxable year had more than 10 partners may be treated as a small partnership even if, because of transfers of interests in the partnership, 11 or more natural persons or estates owned interests in the partnership for some portion of the taxable year. For purposes of section 6231(a)(1)(B) and this section, a husband and wife (and their estates) are treated as one person.

(2) *Pass-thru partner.* The exception provided in section 6231(a)(1)(B) does not apply to a partnership for a taxable year if any partner in the partnership during that taxable year is a pass-thru partner. For purposes of this paragraph (a)(2), an estate shall not be treated as a pass-thru partner.

(3) *"Same share."* The requirement of section 6231(a)(1)(B)(i)(II) is satisfied for a taxable year if during all periods within that taxable year each partner's share of each of the partnership items specified in §301.6231(a)(3)-1(a)(1)(i) through (iv) is the same as that partner's share of each of the other partnership items specified in that section during that period (even though the partner's share of all such specified partnership items changes from period to period within that taxable year). Thus, a partner whose share of all such specified partnership items changes as a result of a sale or redemption of a partnership interest (or portion thereof) or a contribution of cash or property to the partnership during the partnership taxable year shall satisfy the same share requirement if during the period before the sale, redemption, or contribution the partner's share of each specified partnership item is the same as all other specified partnership items and during the period after the sale, redemption, on contribution the partner's share of each specified partnership item is the same as all other specified partnership items. For purposes of section 6231(a)(1)(B)(i)(II) and this section, if each partner's share of each partnership item would be the same as his or her share of every other item but for allocations made under section 704(c) or allocations made under similar principles in accordance with applicable regulations the requirement of section 6231(a)(1)(B)(i)(II) shall be considered satisfied. Similarly, special basis adjustments pursuant to sections 754, 743, and 734 shall not be taken into account in determining whether the "same share" requirement is met.

(4) *Determination made annually.* The determination of whether a partnership meets the requirements for the exception for small partnerships under section 6231(a)(1)(B) and this paragraph (a) shall be made with respect to each partnership taxable year. Thus, a partnership that does not qualify as a small partnership in one taxable year may qualify as a small partnership in another taxable year if the requirements for the exception under section 6231(a)(1)(B) and this paragraph (a) are met with respect to that other taxable year.

(b) *Election to have subchapter C of chapter 63 apply*—(1) *General.* Any partnership that meets the requirements set forth in section 6231(a)(1)(B) of the Code and paragraph (a) of this section (relating to the exception for small partnerships) may elect under paragraph (b)(2) of this section to have the provisions of subchapter C of chapter 63 of the Code apply with respect to that partnership.

(2) *Method of election.* A partnership shall make the election described in paragraph (b)(1) of this section by attaching a statement to the partnership

return for the first taxable year for which the election is to be effective. The statement shall be identified as an election under section 6231(a)(1)(B)(ii), shall be signed by all persons who were partners of that partnership at any time during the partnership taxable year to which the return relates, and shall be filed at the time (determined with regard to any extension of time for filing) and place prescribed for filing the partnership return. However, for partnership taxable years for which a partnership return is to be filed before 90 days after the date final regulations under this section are published in the FEDERAL REGISTER the partnership may file the statement described in the preceding sentence on or before the date which is one year before the date specified in section 6229(a) for the expiration of the period of limitations with respect to that partnership (determined with regard to extensions of that period under section 6229(b)).

(3) *Years covered by election*. The election shall be effective for the partnership taxable year to which the return relates and all subsequent partnership taxable years unless revoked with the consent of the Commissioner.

§301.6231(a)(2)-1 Persons whose tax liability is determined indirectly by partnership items.

(a) *Spouse filing joint return with individual holding separate interest*—(1) *In general*. Except as otherwise provided in this paragraph (a), a spouse who files a joint return with an individual holding a separate interest in the partnership shall be treated as a partner for purposes of subchapter C of chapter 63 of the Code. Thus, the spouse who files a joint return with a partner will be permitted to participate in administrative and judicial proceedings.

(2) *Counting rules*. A spouse who files a joint return with an individual holding a separate interest in the partnership shall not be counted as a partner for purposes of applying section 6223(b) (relating to special rules for partnerships with more than 100 partners) and section 6231(a)(1)(B) (relating to the exception for small partnerships).

(3) *Notice rules*—(i) *In general*. Except as provided in paragraph (a)(3)(ii) of this section, for purposes of subchapter C of chapter 63 of the Code, a spouse who files a joint return with an individual holding a separate interest in the partnership shall be treated as receiving any notice received by the individual holding the separate interest.

(ii) *Spouse identified on partnership return or by statement*. Paragraph (a)(3)(i) of this section shall not apply to a spouse who files a joint return with an individual holding a separate interest in the partnership if that spouse:

(A) Is identified on the partnership return; or

(B) Is identified as a partner entitled to notice as provided in §301.6223(c)-1(b).

(4) *Cross-reference*. See §301.6231(a)(12)-1 for special rules relating to spouses holding a joint interest in a partnership.

(b) *Shareholder of C corporation*. A shareholder of a C corporation (as defined in section 1361(a)(2)) is not a partner in a partnership merely because the C corporation is a partner in that partnership.

§301.6231(a)(5)-1 Definition of affected item.

(a) *In general*. The term "affected item" includes items unrelated to the items reflected on the partnership return (for example, an item such as the threshold for the medical expenses deduction under section 213, that varies if there is a change in an individual partner's adjusted gross income).

(b) *Partner's basis in his partnership interest*. A partner's basis in his interest in the partnership is an affected item to the extent it is not a partnership item.

(c) *At-risk limitation*. The application of the at-risk limitation under section 465 to a partner with respect to a loss flowing from partnership is an affected item to the extent it is not a partnership item.

(d) *Addition to tax or additional amount*—(1) *In general*. The term "affected item" includes any addition to tax or additional amount provided by subchapter A of chapter 68 of the Internal Revenue Code of 1954 to the extent provided in this paragraph (d).

(2) *Addition to tax or additional amount without floor*. In the case where an addition to tax or additional amount that does not contain a floor (that is, a threshold amount of underpayment or understatement necessary before the imposition of the addition to tax or additional amount) is imposed on a partner as the result of an adjustment to a partnership item, the term "affected item" shall include the addition to tax or additional amount computed with reference to the entire under payment or understatement.

(3) *Addition to tax or additional amount containing floor*—(i) *Floor exceeded prior to adjustment*. In the case where a partner would have been subject to an addition to tax or additional amount that contains a floor in the absence of an adjustment to a partnership item (that is, the partner's understatement or underpayment exceeded the floor even without an adjustment to a partnership item) the term "affected item" shall include only the addition to tax or additional amount computed with reference to the partnership item (or affected item).

(ii) *Floor not exceeded prior to adjustment*. In the case of an addition to tax or additional amount that contains a floor, if the taxpayer's understatement or underpayment does not exceed the floor prior to an adjustment to a partnership item but does so after such adjustment, the term "affected item" shall include the addition to tax or additional amount computed with reference to the entire underpayment or understatement.

(4) *Examples*. The provisions of this paragraph (d) may be illustrated by the following examples:

Example (1). A, a partner of P, had an aggregate underpayment of $1000 of which $100 is attributable to an adjustment to partnership items. A is negligent in reporting the partnership items. The addition to tax for negligence computed with reference to the entire $1000 underpayment is an affected item.

Example (2). B, a partner in partnership P, understated his income tax liability attributable to nonpartnership items by $6,000. An adjustment to a partnership item resulting from a partnership providing increased B's income tax by an additional $2,000. Prior to the adjustment, B would have been subject to the addition to tax under section 6661 with respect to the $6,000 understatement. The addition to tax under section 6661 computed with reference to the $2,000 increase is an affected item. The addition to tax computed with reference to the $6,000 pre-existing understatement is not an affected item.

Example (3). C, a partner in partnership P, understated his income tax liability attributable to nonpartnership items by $4,000. As a result of adjustment to partnership items, that understatement is increased to $10,000. Prior to the adjustment, C would not have been subject to any addition to tax under section 6661. The section 6661 addition to tax computed with reference to the entire $10,000 underpayment is an affected item.

§301.6231(a)(6)-1 Computational adjustments.

(a) *In general.* A change in the tax liability of a partner to properly reflect the treatment of a partnership item under subchapter C of chapter 63 of the Code is made through a computational adjustment. A computational adjustment may include a change in tax liability that reflects a change in an affected item where that change is necessary to properly reflect the treatment of a partnership item. However, if a change in a partner's tax liability cannot be made without making one or more partner-level determinations, that portion of the change in tax liability attributable to the partner-level determinations shall be made under the provisions of subchapter B of chapter 63 of the Code (relating to deficiency procedures). Thus, changes in a partner's tax liability with respect to affected items that do not require partner-level determinations (such as the threshold amount for medical deductions under section 213 that changes as the result of determinations made at the partnership level) are included in a computational adjustment. However, changes in a partner's tax liability with respect to affected items that require partner-level determinations (such as a partner's at-risk amount that depends upon the source from which the partner obtained the funds that the partner contributed to the partnership) are not included in a computational adjustment.

(b) *Interest.* A computational adjustment includes any interest due with respect to any underpayment or overpayment of tax attributable to adjustments to reflect properly the treatment of partnership items.

(c) *Addition to tax or additional amount.* A computational adjustment shall not include an addition to tax or additional amount. Regardless of whether an addition to tax or additional amount is an affected item within the meaning of section 6231(a)(5) and §301.6231(a)(5)-1, the addition to tax or additional amount shall be subject to the provisions of subchapter B of chapter 63 of the Code (relating to deficiency procedures). See section 6229(a) for the period of limitations for making assessments with respect to affected items.

§301.6231(a)(7)-1 Designation of tax matters partner.

(a) *In general.* A partnership may designate a partner as its tax matters partner for a specific taxable year only as provided in this section. Similarly, the designation of a partner as the tax matters partner for a specific taxable year may be terminated only as provided in this section.

(b) *Persons who may be designated tax matters partner*—(1) *General requirement.* A person may be designated as the tax matters partner of a partnership for a taxable year only if that person—

(i) Was a general partner in the partnership at some time during the taxable year for which the designation is made, or

(ii) Is a general partner in the partnership as of the time the designation is made.

(2) *Limitation on designation of tax matters partner who is not a United States person.* If any United States person would be eligible under paragraph (a) of this section to be designated as the tax matters partner of a partnership for a taxable year, no person who is not a United States person may be designated as the tax matters partner of the partnership for that year without the consent of the Commissioner. For the definition of the term "United States person," see section 7701(a)(30).

(c) *Designation of tax matters partner at time partnership return is filed*—(1) *If the form provided for the partnership return contains space for designation.* If the form provided for the partnership return for a taxable year contains a space for the designation of a tax matters partner, the partnership may designate a tax matters partner for that partnership taxable year on the partnership return in accordance with the instructions for that form.

(2) *If form does not contain space for designation.* If the form provided for the partnership return for a taxable year does not contain a space for the designation of a tax matters partner, the partnership may make the designation by attaching a statement to the partnership return for that year, filed at the time (determined with regard to any extension of time for filing) and place prescribed for filing the partnership return. The statement shall—

(i) Identify the partnership and the designated tax matters partner by name, address, and taxpayer identification number,

(ii) Declare that it is designation of a tax matters partner for the taxable year to which the return relates, and

(iii) Be signed by the partner signing the partnership return.

(d) *Certification by current tax matters partner of selection of successor.* If a partner properly designated as the tax matters partner of a partnership for a partnership taxable year under this section certifies that another partner has been selected as the tax matters partner of the partnership for that taxable year, that other partner is thereby designated as the tax matters partner for that year. The current tax matters partner shall make the certification by filing with the service center with which the partnership return is filed a statement that—

(1) Identifies the partnership, the partner filing the statement, and the successor tax matters partner by name, address, and taxpayer identification number,

(2) Specifies the partnership taxable year to which the designation relates,

(3) Declares that the partner filing the statement has been properly designated as the tax matters partner of the partnership for the partnership taxable year and that that designation is in effect immediately before the filing of the statement,

(4) Certifies that the other named partner has been selected as the tax matters partner of the partnership for that taxable year in accordance with the partnership's procedure for making that selection, and

(5) Is signed by the partner filing the statement.

(e) *Designation by general partners with majority interest.* The partnership may designate a tax matters partner for a partnership taxable year at any time after the filing of a partnership return for that taxable year by filing a statement with the service center with which the partnership return was filed. The statement shall—

(1) Identify the partnership and the designated partner by name, address, and taxpayer identification number,

(2) Specify the partnership taxable year to which the designation relates,

(3) Declare that it is a designation of a tax matters partner for the taxable year specified, and

(4) Be signed by persons who were general partners at the close of the year and were shown on the return for that year to hold more than 50 percent of

the aggregate interest in partnership profits held by all general partners as of the close of that taxable year. For purposes of this paragraph (e)(4), all limited partnership interests held by general partners shall be included in determining the aggregate interest in partnership profits held by such general partners.

(f) *Designation by partners with majority interest under certain circumstances*—(1) *In general*. A tax matters partner may be designated for a partnership taxable year under this paragraph (f) only if, at the time the designation is made, each partner who was a general partner at the close of such partnership taxable year is described in one or more of the following subdivisions of this paragraph (f)(1).

(i) The general partner is dead, or, if the general partner is an entity, has been liquidated or dissolved;

(ii) The general partner has been adjudicated by a court of competent jurisdiction to be no longer capable of managing his or her person or estate;

(iii) The general partner's partnership items have become nonpartnership items under section 6231(b); or

(iv) The general partner is no longer a partner in the partnership.

(2) *Method of making designation*. A tax matters partner for a partnership taxable year may be designated under this paragraph (f) at any time after the filing of the partnership return for such taxable year by filing a written statement with the service center with which the partnership return was filed. The statement shall—

(i) Identify the partnership and the designated tax matters partner by name, address, and taxpayer identification number,

(ii) Specify the partnership taxable year to which the designation relates,

(iii) Declare that is a designation of a tax matters partner for the partnership taxable year specified, and

(iv) Be signed by persons who were partners at the close of such taxable year and were shown on the return for that year to hold more than 50 percent of the aggregate interest in partnership profits held by all partners as of the close of such taxable year.

(g) *Designation of alternate tax matters partner*. If an individual is designated as the tax matters partner of a partnership under paragraph (c), (d), (e), or (f) of this section, the document by which that individuals designated may also designate an alternate tax matters partner who will become tax matters partner upon the occurrence of one or more of the events described in paragraph (l)(1) or (2) of this section. The person designated as the alternate tax matters partner becomes the tax matters partner as of the time the designation of the tax matters partner is terminated under paragraph (l)(1) or (2) of this section. The destination of a person as the alternate tax matters partner shall have no effect in any other case.

(h) *Prior designations superseded*. A designation of a tax matters partner for a partnership taxable year under paragraphs (d), (e), or (f) of this section shall supersede all prior designations of a tax matters partner for that year, including a prior designation of an alternate tax matters partner under paragraph (g) of this section.

(i) *Resignation of designated tax matters partner*. A person designated as the tax matters partner of a partnership under this section may resign at any time by a written statement to that effect. The statement shall specify the partnership taxable year to which the resignation relates and shall identify the partnership and the tax matters partner by name, address, and taxpayer identification number. The statement shall also be signed by the resigning tax matters partner and shall be filed with the service center with which the partnership return was filed.

(j) *Revocation of designation*. The partnership may revoke the designation of the tax matters partner for a partnership taxable year at any time after the filing of a partnership return for that taxable year by filing a statement with the service center with which the partnership return was filed. The statement shall—

(1) Identify by name, address, and taxpayer identification number the partnership and the general partner whose designation as tax matters partner is being revoked,

(2) Specify the partnership taxable year to which the revocation relates,

(3) Declare that it is a revocation of a designation of the tax matters partner for the taxable year specified, and

(4) Be signed by the persons described in paragraph (e)(4) of this section, or, if at the time that the revocation is made, each partner who was a general partner at the close of the partnership taxable year to which the revocation relates is described in one or more of subdivisions (i) through (iv) of paragraph (f)(1) of this section, by the persons described in paragraph (f)(2)(iv) of this section.

(k) *When designation, etc., becomes effective*—(1) *In general*. Except as otherwise provided in paragraph (k)(2) of this section, a designation, resignation, or revocation provided for in this section becomes effective on the day that the statement required by the applicable paragraph of this section is filed.

(2) *Notice of proceeding mailed*. If a notice of beginning of an administrative proceeding with respect to a partnership taxable year is mailed before the date on which a statement of designation, resignation, or revocation provided for in this section with respect to that taxable year is filed, the Service is not required to give effect to such designation, resignation, or revocation until 30 days after the statement is filed.

(l) *Termination of designation*. A designation of a tax matters partner for a taxable year under this section shall remain in effect until—

(1) The death of the designated tax matters partner,

(2) An adjudication by a court of competent jurisdiction that the individual designated as the tax matters partner is no longer capable of managing the individual's person or estate,

(3) The liquidation or dissolution of the tax matters partner, if the tax matters partner is an entity,

(4) The partnership items of the tax matters partner become nonpartnership items under section 6231(c) (relating to special enforcement areas), or

(5) The day on which—

(i) The resignation of the tax matters partner under paragraph (i) of this section,

(ii) A subsequent designation under paragraph (d), (e), or (f) of this section, or

(iii) A revocation of the designation under paragraph (j) of this section becomes effective.

The termination of the designation of a partner as the tax matters partner under this paragraph (l) does not affect the validity of any action taken by that partner as tax matters partner before the designation is terminated. For example, if that tax matters partner had previously consented to an extension of the period for assessment sunder section 6229(b)(1)(B), that extension remains valid even after termination of the designation.

(m) *Tax matters partner where no partnership designation made*—(1) *In general.* The tax matters partner for a partnership taxable year shall be determined under this paragraph (m) if:

(i) The partnership has not designated a tax matters partner under this section for that taxable year; or

(ii) The partnership has designated a tax matters partner under this section for that taxable year, that designation has been terminated under paragraph (l) of this section, and the partnership has not made a subsequent designation under this section for that taxable year.

(2) *General partner having the largest profits interest is the tax matters partner.* The tax matters partner for any partnership taxable year to which this paragraph (m) applies is the general partner having the largest profits interest in the partnership at the close of that taxable year (or where there is more than one such partner, the one of such partners whose name would appear first in an alphabetical listing). For purposes of this paragraph (m)(2), all limited partnership interests held by a general partner shall be included in determining that general partner's profits interest in the partnership.

(3) *Termination of designation.* A designation of a tax matters partner for a partnership taxable year under this paragraph (m) shall remain in effect until the earlier of the occurrance of one or more of the events described in paragraph (l)(1) through (4) or the day on which a designation under paragraph (d), (e), or (f) of this section becomes effective. If a designation of a tax matters partner for a partnership taxable year is terminated under this paragraph (m)(3) and the partnership has not subsequently designated a tax matters partner for that taxable year under paragraph (d), (e), or (f) of this section the tax matters partner for that taxable year shall be determined under paragraph (m)(2) of this section and, for purposes of applying that paragraph (m)(2), the general partner whose designation was so terminated shall be treated as having no profits interest in the partnership for that taxable year.

§301.6231(a)(12)-1 Special rules relating to spouses.

(a) *In general.* For purposes of subchapter C of chapter 63 of the Code, spouses holding a joint interest in a partnership are treated as partners. Thus, both spouses are permitted to participate in administrative and judicial proceedings. The term "joint interest" includes tenancies in common, joint tenancies, tenancies by the entirety, and community property.

(b) *Notice and counting rules*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, for purposes of applying section 6223 (relating to notice to partners of proceedings) and section 6231(a)(1)(B) (relating to the exception for small partnerships), spouses holding a joint interest in a partnership shall be treated as one person. Except as provided in paragraph (b)(2) of this section, the Service or the tax matters partner may send any required notice to either spouse.

(2) *Identified spouse entitled to notice.* For purposes of applying section 6223 (relating to notice to partners of proceeding) for a partnership taxable year an individual who holds a joint interest in a partnership with his or her spouse who is entitled to notice under section 6223 shall be entitled to receive separate notice under section 6223 if such individual:

(i) Is identified as a partner on the partnership return for that taxable year; or

(ii) Is identified as a partner entitled to notice as provided in §301.6223(c)-1(b).

(c) *Cross-reference.* See §301.6231(a)(2)-1(a) for special rules relating to spouses who file joint returns with individuals holding a separate interest in a partnership.

§301.6231(c)-3 Limitation on applicability of §§301.6231(c)-4 through 301.6231(c)-8.

A provision of §§301.6231(c)-4 through 301.6231(c)-8 shall not apply with respect to partnership items arising in a partnership taxable year if, as of the date on which those items would otherwise begin to be treated as nonpartnership items under that provision—

(a) A notice of final partnership administrative adjustment with respect to those items has been mailed to the tax matters partner, and

(b) Either—

(1) The period during which an action with respect to that final partnership administrative adjustment may be brought under section 6226 has expired and no such action has been brought, or

(2) The decision of the court in an action brought under section 6226 with respect to that final partnership administrative adjustment has become final.

§301.6231(c)-4 Termination and jeopardy assessment.

The treatment of items as partnership items with respect to a partner against whom an assessment of income tax under section 6851 (termination assessment) or section 6861 (jeopardy assessment) is made will interfere with the effective and efficient enforcement of the internal revenue laws. Accordingly, partnership items of such a partner arising in any partnership taxable year ending with or within the partner's taxable year for which an assessment of income tax under section 6851 or section 6861 is made shall be treated as nonpartnership items as of the moment before such assessment is made.

§301.6231(c)-5 Criminal investigations.

The treatment of items as partnership items with respect to a partner under criminal investigation for violation of the internal revenue laws relating to income tax will interfere with the effective and efficient enforcement of the internal revenue laws. Accordingly, partnership items of such a partner arising in any partnership taxable year ending on or before the last day of the latest taxable year of the partner to which the criminal investigation relates shall be treated as nonpartnership items as of the date on which the partner is notified that he or she is the subject of a criminal investigation and receives written notification from the Service that his or her partnership items shall be treated as nonpartnership items. The partnership items of a partner who is notified that he or she is the subject of a criminal investigation shall not be treated as nonpartnership items under this section unless and until such partner receives written notification from the Service of such treatment.

§301.6231(c)-6 Indirect method of proof of income.

The treatment of items as partnership items with respect to a partner whose taxable income is determined by use of an indirect method of proof of income will interfere with the effective and efficient enforcement of the internal revenue laws. Accordingly, partnership items of such a partner arising in any partnership taxable year ending on or before the last day of the taxable year of the partner for which a deficiency notice based upon an indirect method of proof of income is mailed to the partner shall be treated as nonpartnership items as of the date on which that hat deficiency notice is mailed to the partner.

§301.6231(c)-7 Bankruptcy and receivership.

(a) *Bankruptcy*. The treatment of items as partnership items with respect to a partner named as a debtor in a bankruptcy proceeding will interfere with the effective and efficient enforcement of the internal revenue laws. Accordingly, partnership items of such a partner arising in any partnership taxable year ending on or before the last day of the latest taxable year of the partner with respect to which the United States could file a claim for income tax due in the bankruptcy proceeding shall be treated as nonpartnership items as of the date the petition naming the partner as debtor is filed in bankruptcy.

(b) *Receivership*. The treatment of items as partnership items with respect to a partner for whom a receiver has been appointed in any receivership proceeding before any court of the United States or of any State or the District of Columbia will interfere with the effective and efficient enforcement of the internal revenue laws. Accordingly, partnership items of such a partner arising in any partnership taxable year ending on or before the last day of the latest taxable year of the partner with respect to which the United States could file a claim for income tax due in the receivership proceeding shall be treated as nonpartnership items as of the date a receiver is appointed in any receivership proceeding before any court of the United States or of any State or the District of Columbia.

§301.6231(c)-8 Prompt assessment.

The treatment of items as partnership items with respect to a partner on whose behalf a request for a prompt assessment of tax under section 6501(d) is filed will interfere with the effective and efficient enforcement of the internal revenue laws. Accordingly, partnership items of such a partner arising in any partnership taxable year ending with or within any taxable year of the partner with respect to which a request for a prompt assessment of tax is filed shall be treated as nonpartnership items as of the date that the request is filed.

§301.6231(d)-1 Time for determining profits interest of partners for purposes of sections 6223(b) and 6231(a)(11).

(a) *Partner owns interest at close of year*. For purposes of section 6223(b) (relating to special rules for partnerships with more than 100 partners) and section 6231(a)(11) (relating to 5-percent groups), except as otherwise provided in this section, the profits interest held by a partner, directly or indirectly through one or more pass-thru partners, in a partnership (the "audit partnership") to which subchapter C of chapter 63 of the Code applies shall be determined at the close of the audit partnership's taxable year.

(b) *Partner does not own interest at close of year*. If the entire direct and indirect interest of a partner in an audit partnership is terminated by virtue of a disposition by such partner of such interest (or by virtue of the disposition of an interest held by one or more pass-thru partners through which the partner holds an interest), then the profits interest of such partner in the audit partnership shall be measured as of the moment before the disposition causing such termination. The preceding sentence shall not apply with respect to a termination if subsequent to such termination and before the close of the audit partnership's taxable year the partner acquires a direct or indirect interest in the audit partnership.

(c) *Disposition of last remaining portion of interest is disposition of entire interest*. If a partner (or a pass-thru partner through which a partner holds an interest) makes several partial dispositions of an interest in an audit partnership during a taxable year of the audit partnership, paragraph (b) of this section will apply with respect to the disposition which causes a termination of the partner's entire direct and indirect interest in the audit partnership.

(d) *No profits interest in certain cases*. If—

(1) The interest of a partner in a partnership is entirely disposed of before the close of the taxable year of the partnership, and

(2) No items of the partnership for that taxable year are required to be taken into account by the partner,

that partner has no profits interest in the partnership for that taxable year. For example, if a partner dies before the close of the taxable year of the partnership, generally no items of the partnership for that taxable year are required to be taken into account on the final return of the deceased partner under §1.706-1(c)(3); consequently, the deceased partner has no profits interest in the partnership for that taxable year.

(e) *Examples*. The provisions of this section may be illustrated by the following examples. Assume in all examples that there have been no reacquisitions prior to the close of the audit partnership's taxable year.

Example (1). B holds an interest in partnership P through T, a pass-thru partner. P uses a fiscal year ending June 30 as P's taxable year; B and T use the calendar year as the taxable year. As of the close of P's taxable year ending June 30, 1985, T holds an interest in P and B holds an interest in P through T. The profits interest held by B in P through T for that year is determined as of June 30, 1985.

Example (2). Assume the same facts as in example (1), except that B sold the entire interest that B held in P through T on November 4, 1984. The profits interest held by B in P through T for P's taxable year ending June 30, 1985, is determined as of the moment before the sale on November 5, 1984.

Example (3) C holds an interest in partnership P through T, a pass-thru partner. C, P, and T all use the calendar year as the taxable year. T disposes of T's interest in P on June 5, 1985. The profits interest held by C in P through T for 1985 is determined as of the moment before the disposition on June 5, 1985.

Example (4) Assume the same facts as in example (3), except that C sold her entire interest in T (and, therefore, her entire interest that she held in P through T) on March 15, 1985. The profits interest held by C in P through T for 1985 is determined as of the moment before the sale on March 15, 1985.

Example (5) On January 1, 1985, D held a 2 percent profits interest in partnership P. Both D and P use the calendar year as the taxable year. On August 1, 1985, D transfers three-fourths of D's profits interest in P to E. On September 1, 1985, D sells his remaining .5 profits interest in P to F. For purposes of sections 6223(b) and 6231(a)(11), D had a .5 percent profits interest in P for 1985.

Example (6) Assume the same facts as in example (5), except that on January 1, 1985, D also held a 1 percent profits interest in partnership P through T, a pass-thru partner which also uses the calendar year as the taxable year. In addition to the sale to E on August 1, 1985, D sold a portion of his interest in T on December 1, 1985, such that after the sale, D held a .2 percent profits interest in P through T. D made no other transfers of interests in either P or T. For purposes of sections 6223(b) and 6231(a)(11), D had a .7 percent profits interest in P for 1985.

§301.6231(e)-1 Effect of a determination with respect to a nonpartnership item on the determination of a partnership item.

The determination of an item after it has become a nonpartnership item with respect to a partner is not controlling in the determination of that item with respect to other partners. Thus, for example, the determination by a court in a separate proceeding relating to a partner that a certain partnership expenditure was deductible does not bind either the Service or the other partners in a later partnership or other proceeding.

§301.6231(e)-2 Judicial decision not a bar to certain adjustments.

A court decision with respect to a partner's income tax liability attributable to nonpartnership items shall not be a bar to further proceedings with respect to that partner's income tax liability if that partner's partnership items become nonpartnership items after the appropriate time to include such nonpartnership items in the earlier court proceeding has passed. Thus, the Service could issue a later deficiency notice for the same taxable year with respect to that partner or that partner could bring a refund suit with respect to those items that have become nonpartnership items.

§301.6231(f)-1 Disallowance of losses and credits in certain cases.

(a) *Application of section.* This section applies if—

(1) A partnership, whether domestic or foreign, that is required to file a return under section 6031 for a taxable year fails to file the return within the time prescribed, and,

(2) At any time after the close of that taxable year, either—

(i) The tax matters partner of that partnership resides outside the United States, or

(ii) The books and records of that partnership are maintained outside the United States.

(b) *Computational adjustment permitted if return is not filed after mailing of notice.* Except as otherwise provided in paragraph (c) of this section, if—

(1) This section applies with respect to a partnership for a partnership taxable year,

(2) The Service mails notice to a partner that the losses and credits arising from that partnership for that year will be disallowed to that partner unless the partnership files a return for that year within 60 days after the date on which the notice is mailed, and

(3) The partnership fails to file a return for that year within that 60-day period,

The Service may, without conducting a partnership-level proceeding, mail a notice of computational adjustment to that partner to reflect the disallowance of any loss (including a capital loss) or credit arising from that partnership for that year.

(c) *Restriction on notices under paragraph (b).* Neither the notice referred to in paragraph (b)(2) of this section nor the notice of computational adjustment referred to in paragraph (b) of this section may be mailed on a day on which—

(1) The tax matters partner of the partnership resides within the United States, and

(2) The books and records of the partnership are maintained within the United States.

Thus, if this section applies with respect to a partnership for a taxable year solely because the tax matters partner of that partnership resided outside the United States for a period after the close of that taxable year and the tax matters partner later takes up residence within the United States, no notice may be mailed under paragraph (b) of this section while the tax matters partner resides within the United States.

(d) *No disallowance in certain circumstances.* If the person to whom the notice referred to in paragraph (b)(2) of this section establishes to the satisfaction of the Service—

(1) That the losses and credits arising from the partnership for the year are proper, and

(2) That the partner has made a good faith effort to have the partnership file the required return,

the Service may allow the losses and credits in whole or in part.

§301.6233-1 Extension to entities filing partnership returns, etc.

(a) ***Entities filing a partnership return.*** Except as provided in paragraph (d)(1) of this section, the provisions of subchapter C of chapter 63 of the Code ("subchapter C") and the regulations thereunder shall apply with respect to any taxable year of an entity for which such entity files a partnership return as well as to such entity's items for that taxable year and to any person holding an interest in such entity at any time during that taxable year. Any final partnership administrative adjustment or judicial determination resulting from a proceeding under subchapter C with respect to such taxable year may include a determination that the entity is not a partnership for such taxable year as well as determinations with respect to all items of the entity which would be partnership items, as defined in section 6231(a)(3) and the regulations thereunder, if such entity had been a partnership in such taxable year (including, for example, any amounts taxable to an entity determined to be an association taxable as a corporation). Thus, a final determination under subchapter C that an entity that filed a partnership return is an association taxable as a corporation will serve as a basis for a computational adjustment reflecting the disallowance of any loss or credit claimed by a purported partner with respect to that entity.

(b) *Entities filing an S corporation return.* Except as provided in paragraph (d)(2) of this section, the provisions of subchapter D of chapter 63 of the Code ("subchapter D") and the regulations thereunder shall apply with respect to any taxable year of an entity for which such entity files a return as an S corporation as well as to such entity's items for that taxable year and to any person holding an interest in such entity at any time during that taxable year. Any final S corporation administrative adjustment or judicial determination resulting from a proceeding under subchapter D with respect to such taxable year may include a determination that the entity is not an S corporation for such taxable year as well as determinations with respect to all items of the entity which would be subchapter S items, as defined in section 6245 and the regulations thereunder, if such entity had been an S corporation for such taxable year (including, for example, any amounts taxable to an entity determined to be taxable as a C corporation).

(c) *Partnership or S corporation return filed but no entity found to exist*—(1) *Partnership return filed.* Paragraph (a) of this section shall apply where a partnership return is filed for a taxable year but it is determined that there is no entity for such taxable year. For purposes of applying paragraph (a) of this section, the partnership return shall be treated as if it was filed by an entity. However, any final partnership administrative adjustment or judicial determination resulting form a proceeding under subchapter C with respect to such taxable year may also include a determination that there is no entity for such taxable year.

(2) *S corporation return filed.* Paragraph (b) of this section shall apply where an S corporation return is filed for a taxable year but it is determined that there is no entity for such taxable year. For purposes of applying paragraph (b) of this section, the S corporation return shall be treated as if it was filed by an entity. However, any final S corporation administrative adjustment or judicial determination resulting from a proceeding under subchapter D with respect to such taxable year may also include a determination that there is no entity for such taxable year.

(d) *Exceptions*—(1) *Partnership proceedings.* Paragraph (a) of this section shall not apply to:

(i) Entities for any taxable year in which such entity would be excepted from the provisions of subchapter C under section 6231(a)(1)(B) and the regulations thereunder (relating to the exception for small partnerships) if such entity were a partnership for such taxable year, and

(ii) Entities for any taxable year for which a partnership return was filed for the sole purpose of making the election described in section 761(a).

(2) *S corporation proceedings.* [RESERVED].

(e) *Effective dates.* Paragraphs (a), (c)(1), and (d)(1) of this section shall apply with respect to any taxable year beginning after September 3, 1982, and with respect to any taxable year beginning on or before and ending after September 3, 1982, if with respect to that taxable year there is an agreement entered into pursuant to section 407(a)(3) of the Tax Equity and Fiscal Responsibility Act of 1982 [Pub. L. 97-248, 1982-2 C.B. 462-597]. Paragraphs (b) and (c)(2) of this section shall apply with respect to any taxable year beginning after December 31, 1982.

ROSCOE L. EGGER, JR.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on April 15, 1986, 4:35 p.m., and published in the issue of the Federal Register for April 18, 1986, 51 F.R. 13231).

Employee Plans—Lists of Master and Prototype Plans

Announcement 86-70

This Announcement contains two lists of master and prototype (M&P) pension, annuity or profit-sharing plans submitted to the National Office of the Internal Revenue Service during 1984 by sponsoring organizations and mass submitters.

The first list (List A) includes those M&P plans that were timely submitted under Revenue Procedure 84-23, 1984-1 C.B. 457, by December 31, 1984, and were closed or otherwise disposed of by the Service between January 1, 1986, and March 31, 1986.

List A contains the names and addresses of the plans' sponsoring organization or mass submitter, symbols indicating the type of plan, and file folder number. It also shows the date of disposition of the plan and the type of disposition as follows: (1) favorable opinion letter (F), (2) unfavorable/nonopinion letter (U), (3) withdrawal letter (W), or (4) other (O).

Employers that adopted an approved M&P plan and, if appropriate, requested a determination letter on or before March 19, 1984, and received a favorable determination letter, retained reliance on their favorable letter under the provisions of Section 12 of Rev. Proc. 84-23. Other adopting employers will have the provisions of Section 12 of Rev. Proc. 84-23 applied to them also, provided the conditions outlined in Announcement 86-60, 1986-19 I.R.B. are met. In either case, if the approved plan is included in List A, the employer must take further action in order to have continued reliance and to meet the compliance date described in Announcement 86-60.

If List A shows that the plan adopted by the employer received a favorable opinion letter, the employer must, within 12 months after the sponsor received the favorable letter, either (1) amend its existing plan by adopting the sponsor's M&P plan as approved by the Service, or (2) adopt an M&P plan of another sponsor on List A or another quarterly list, that has received a favorable letter (See Announcement 85-130, 1985-36 I.R.B. 58).

If List A shows that the plan was closed other than by issuance of a favorable opinion letter, such employer must either (1) make all amendments required by Section 5 of Rev. Proc. 84-23, including amendments to conform with the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) Pub. L. 97-248, 1962-2 C.B. 462, the Tax Reform Act of 1984 (TRA) Pub. L. 98-369, 1984-3 (Vol. 1) C.B. 1, and the Retirement Equity Act of 1984 (REA) Pub. L. 98-397, 1984-2 C.B. 433, and submit a request for a determination letter to the appropriate key district office, or (2) adopt an M&P plan of a sponsor listed in Announcement 85-99, 1985-28 I.R.B. 4, or List B of Announcement 85-165, 1985-47 I.R.B. 4, List B of Announcement 86-43, 1986-14 I.R.B. 13, or List B of this Announcement, that has received a favorable opinion letter. In order to be afforded continued reliance and to meet the compliance date described in Announcement 86-60 the employer must adopt the amended plan by November 30, 1986.

After amending its existing plan or adopting another M&P plan, an employer must request a determination letter from the appropriate key district office in order to rely on the plan's qualification unless the employer adopts a standardized or paired plans within the meaning of Section 6.01 of Rev. Proc. 84-23.

The second list in this Announcement (List B) includes those M&P plans that were inadvertently omitted from the list published in Announcement 85-99. See Announcement 85-99 regarding when these plans must be amended.

LISTING OF MASTER OR PROTOTYPE PLANS

Abbreviations:

Type of Closing

F = Favorable
U = Unfavorable/nonopinion
W = Withdrawal
O = Other

Type of Plan

P = Paired
S = Standardized (not paired)
NS = Nonstandardized
M = Money Purchase
T = Target Benefit
D = Defined Benefit

Revision of Form 851, Affiliations Schedule

Announcement 86-71

Form 851, Affiliations Schedule, has been revised and is now available at most Internal Revenue Service Forms Distribution Centers. This revision replaces the May 1984 version of Form 851.

The revision, dated April 1986, reflects the new definition of an affiliated group in section 1504 of the Internal Revenue Code as amended by the Deficit Reduction Act of 1984 (Act). Under the new law, a corporation is required to own 80% or more of the voting power and 80% or more of the total fair market value of the stock of another corporation for the two corporations to be considered an affiliated group for purposes of filing a consolidated tax return.

The new law is effective for tax years beginning after December 31, 1984. However, a special transitional rule provided by section 60(b)(2) of the Act allows a corporation that was a member of an affiliated group on June 22, 1984, and that was included in the consolidated return of the group for its tax year that included June 22, 1984, to continue as a member of the affiliated group under the rules that existed before the Act was passed. The transitional rule does not apply to corporations that became affiliated after June 22, 1984, or to certain corporations that were affiliated by June 22, 1984, but had a sell-down or issuance of stock after June 22, 1984. For tax years beginning after 1987, all corporations must be affiliated under the revised rules in order to qualify for filing a consolidated return.

If the transitional rule applies to all corporations in an affiliated group, and the group has already filed a consolidated return for 1985 and attached the prior version (May 1984) of Form 851, no further action is required. However, if a 1985 consolidated return was filed and the transitional rule does not apply to corporations in the group, the parent corporation of the group must complete the April 1986 version of Form 851 for the group and send it to the Service Center where the group filed its 1985 consolidated return.

Announcement of the Disbarment, Suspension, or Consent to Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents and Enrolled Actuaries from Practice Before the Internal Revenue Service

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Revenue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletin for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

The following individuals have been placed under consent suspension from practice before the Internal Revenue Service:

Name	Address	Designation	Term of Suspension
Gary E. Borushko	Grosse Pointe Woods, MI	Certified Public Accountant	Indefinite from April 7, 1986
Paul Skulsky	Spring Valley, NY	Certified Public Accountant	Indefinite from April 1, 1986

Under Section 330, Title 31 of the United States Code (1970 ed.), the Secretary of the Treasury, after due notice and opportunity for hearing, is authorized to suspend or disbar from practice before the Internal Revenue Service any attorney, certified public accountant, enrolled agent, or enrolled actuary who has violated the rules and regulations governing such practice.

Attorneys, certified public accountants, enrolled agents and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify such disbarred or suspended practitioners, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been disbarred or suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date of disbarment or period of suspension. This announcement will continue to appear in the weekly Bulletin for five successive weeks for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended or disbarred and will later be consolidated and published in the Cumulative Bulletin.

After due notice and opportunity for hearing, the following individuals have been disbarred from further practice before the Internal Revenue Service:

Name	Address	Designation	Effective Date
Thomas H. Foxhill, Jr.	Pemberton, NJ	Enrolled Agent	April 12, 1986
Peter Parker	Baltimore, MD	Attorney	April 12, 1986

Announcement Relating to Proposed Regulations Published With Notice of Proposed Rulemaking

Changes in regulations as announced below have been published in the Federal Register in tentative or proposed form to provide interested parties with an opportunity to file their objections or suggestions for consideration prior to final adoption of such regulations. These announcements will appear in the Bulletin during the period which has been prescribed for the submission and consideration of any views, arguments, or suggestions pertaining to the proposed regulations so published. Statement of such views, arguments or suggestions should be submitted in writing, preferably six copies, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

Original issue discount rules, imputed interest rules, and safe haven interest rates	1986-18 I.R.B. 4	June 9, 1986

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as "rulings") that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with *modified, below*).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with *amplified* and *clarified*, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in law or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in the new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1954 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, *modified and superseded* describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.

INTERNAL REVENUE BULLETIN

The Introduction on page 3 describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of the weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and *are not* included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

BULLETIN INDEX-DIGEST SYSTEM

The Bulletin Index-Digest System provides a fast and easy way to research Revenue Rulings, Revenue Procedures, Public Laws, Treasury Decisions, and other matters of a permanent nature published in the weekly Internal Revenue Bulletin, or Cumulative Bulletin from 1953 on. It is a comprehensive and up-to-date research tool that requires no filing or other clerical maintenance. The current revision consists of four Services, available on a subscription basis, each including a basic volume that covers the period 1953-1983/1984 and a cumulative supplement covering material published in subsequent Bulletins for the following two-year period. Cumulative supplements are issued quarterly for the Income Tax Service and semiannually for the Estate and Gift, Employment, and Excise Tax Service.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Please allow two to six weeks, plus mailing time, for delivery.

Highlights of this Issue

These synopses are intended only as aids to the reader in identifying the subject matter covered. They may not be relied upon as authoritative interpretations.

SPECIAL ANNOUNCEMENTS

Announcement 86-72, page 52.
A public hearing will be held on June 26, 1986, on proposed regulations relating to effective dates and certain other issues arising under the employee benefit provisions of the Tax Reform Act of 1984.

Announcement 86-73, page 52.
A public hearing will be held on June 18, 1986, relating to the treatment of qualified real estate agents and direct sellers as nonemployees, the determination of employer liability for income tax withholding and employee social security taxes when an employee is treated as a nonemployee, and information reporting of direct sales and payments of remuneration for services.

INCOME TAX

Rev. Rul. 86-79, page 7.
Federal short-term, mid-term, and long-term rates. For purposes of section 1274(d) of the Code, relating to certain transactions in which a debt instrument is issued for property, a table sets forth the applicable federal short-term, mid-term, and long-term rates for June 1986.

T.D. 8086, page 4.
Amendments to the regulations under section 103 of the Code relate to the election of the $10 million limitation on exempt small issues of industrial development bonds and to supplemental capital expenditure statements required with respect to certain small issues of tax-exempt industrial development bonds.

EMPLOYEE PLANS

T.D. 8085, page 5.
Amendments to the regulations under section 404(g) of the Code relate to the deduction of employer liability payments.

Finding Lists begin on page 57.
Announcement of Disbarments and Suspensions begin on page 53.
Announcement of Notice of Proposed Rulemaking on page 55.
Index for April and May begin on page 60.

Department of the Treasury
Internal Revenue Service

T22.23:

EXCISE TAXES

Rev. Proc. 86-25, page 9.
Partnership items; windfall profit tax. Temporary procedures for the tax treatment of partnership items to windfall profit tax, which were implemented by Rev. Proc. 84-4, are now found in sections 150.6232(c)-1 through 150.6232(c)-5 of the Temporary Excise Tax Regulations for removal years 1983 and 1984, and sections 51.6232(c)-1 through 51.6232(c)-5 of the Excise Tax Regulations for removal years after 1984. Rev. Proc. 84-4 obsoleted.

ADMINISTRATIVE

Rev. Proc. 86-25, page 9.
Partnership items; windfall profit tax. Temporary procedures for the tax treatment of partnership items to windfall profit tax, which were implemented by Rev. Proc. 84-4, are now found in sections 150.6232(c)-1 through 150.6232(c)-5 of the Temporary Excise Tax Regulations for removal years 1983 and 1984, and sections 51.6232(c)-1 through 51.6232(c)-5 of the Excise Tax Regulations for removal years after 1984. Rev. Proc. 84-4 obsoleted.

Rev. Proc. 86-26, page 9.
Forms; magnetic tape; Forms 940; reporting agents. Conditions are set forth under which reporting agents preparing Form 940, Employer's Federal Unemployment Tax Return, can furnish the required information on magnetic tape instead of paper documents.

Rev. Proc. 86-27, page 34.
Forms; magnetic tape; Forms 941 and 941E; reporting by agents. Requirements are set forth under which reporting agents preparing Form 941, Employer's Quarterly Federal Tax Return, and 941E, Quarterly Return of Withheld Federal Income Tax, can furnish the required information on magnetic tape instead of paper documents. Rev. Proc. 84-11 superseded.

Statement of Procedural Rules, page 49.
Miscellaneous amendments to the Statement of Procedural Rules (SPR) reflect changes in the fees charged for search and duplication services and for copies of returns and return information.

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenues at the least cost to the public, and in a manner that warrants the highest degree of public confidence in our integrity, efficiency and fairness. To achieve that purpose, we will:

—Encourage and achieve the highest possible degree of voluntary compliance in accordance with the tax law and regulations;

—Advise the public of their rights and responsibilities;

—Determine the extent of compliance and the causes of noncompliance;

—Do all things needed for the proper administration and enforcement of the tax laws;

—Continually search for and implement new, more efficient and effective ways of accomplishing our Mission.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents of a permanent nature are consolidated semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

Part I.—1954 Code.

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1954.

Part II.—Treaties and Tax Legislation.

This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.

To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts.

Part IV.—Items of General Interest.

With the exception of the disbarment and suspension list included in this part, none of these announcements is consolidated in the Cumulative Bulletins.

The first Bulletin for each month includes an index for the matters published during the preceding month. These monthly indexes are cumulated on a quarterly and semiannual basis, and are published in the first Bulletin of the succeeding quarterly and semi-annual period, respectively.

The Bulletin Index-Digest System, a research and reference service supplementing the Bulletin, may be obtained from the Superintendent of Documents on a subscription basis. It consists of four Services: Service No. 1, Income Tax; Service No. 2, Estate and Gift Taxes; Service No. 3, Employment Taxes; Service No. 4, Excise Taxes. Each Service consists of a basic volume and a cumulative supplement that provide (1) finding lists of items published in the Bulletin, (2) digests of revenue rulings, revenue procedures, and other published items, and (3) indexes of Public Laws, Treasury Decisions, and Tax Conventions.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Prices: Domestic—$1.75 a single copy, $82.00 a year subscription. Foreign—$2.19 a single copy, $102.50 a year for subscription.

Part I. Rulings and Decisions Under the Internal Revenue Code of 1954

Section 103.—Interest on Certain Governmental Obligations

26 CFR 1.103-10: Exemption for certain small issues of industrial development bonds.

T.D. 8086

TITLE 26—INTERNAL REVENUE.—CHAPTER I, SUBCHAPTER A, SUBCHAPTER H, PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953; PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Election of $10 Million Limitation on Exempt Small Issues of Industrial Development Bonds; Supplemental Capital Expenditure Statements

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final rule.

SUMMARY: This document contains regulatory amendments that change the existing regulatory requirement for electing the $10 million limitation for exempt small issues of industrial development bonds and eliminate the existing regulatory requirement to file certain supplemental capital expenditure statements with respect to certain small issues of tax-exempt industrial development bonds. The amendments also conform the regulations on exempt small issues to the increase in the limit on the size of such small issues, enacted by the Revenue Act of 1978 [Pub. 95-600, 1978-3 C.B. (Vol. 1) 1], and clarify rules regarding capital expenditures. The amendments affect issuers and holders of the exempt small issues, and principal users of facilities financed with the proceeds of these issues.

DATES: The elimination of the requirement to file capital expenditure statements implemented by the amendments to §1.103-10(b)(2)(vi) is effective on and after September 3, 1971. The amendments relating to the time for and manner of making the $10 million small issue election under §1.103-10(b)(2)(vi) are effective after May 2, 1986 except that issuers who, before October 29, 1986, make the election in the manner prescribed by §1.103-10(b)(2)(vi) as in effect prior to amendment by this Treasury decision will be treated as having made the election at the time and in the manner prescribed by §1.103-10(b)(2)(vi) as amended by this Treasury decision. The amendments to §1.103-10 relating to the increase in the limit on the size of small issues of industrial development bonds are effective for obligations issued after December 31, 1978, in taxable years ending after such date, and for capital expenditures made after December 31, 1978, with respect to obligations issued before January 1, 1979.

FOR FURTHER INFORMATION CONTACT: John A. Tolleris of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3590).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains amendments to the Income Tax Regulations (26 CFR Part 1) under section 103(b)(6)(D) of the Internal Revenue Code of 1954. These amendments revise the present requirements of §1.103-10(b)(2)(vi) relating to elections and supplemental capital expenditure statements with respect to certain small issues of tax-exempt industrial development bonds.

This Treasury decision was not preceded by a notice of proposed rulemaking soliciting public comments because the Treasury Department has determined that the rules promulgated herein will not adversely affect any taxpayer. Accordingly, it is found unnecessary to issue this Treasury decision with notice and public procedure under section (b) of Section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

EXPLANATION OF PROVISIONS

This Treasury decision eliminates the requirement that issuers of exempt small issues of industrial development bonds file a statement with the Service in order to elect the $10 million small issue limitation; however, bond issuers would be required to make the election under section 103(b)(6) by timely making a notation thereof on their books or records with respect to the issue.

This Treasury decision also eliminates the requirement that principal users of facilities financed by certain small issues of tax-exempt industrial development bonds (with respect to which the $10 million limitation has been elected under section 103(b)(6)(D)) file annual supplemental capital expenditure statements concerning such facilities and copies of the election statement with certain income tax returns.

This Treasury decision also contains a provision to conform the Income Tax Regulations to the increase in the limitation, from $5 million to $10 million, in the size of certain exempt small issues, enacted by section 331(a) of the Revenue Act of 1978 (92 Stat. 2839) [Pub. L. 95-600, 1978-3 C.B. (Vol. 1) 1, 73]. This document also contains amendments to clarify rules regarding capital expenditures.

NONAPPLICABILITY OF EXECUTIVE ORDER 12291

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

REGULATORY FLEXIBILITY ACT

A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for final regulations subject to 5 U.S.C. 553(b)(B). Therefore, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

DRAFTING INFORMATION

The principal author of these proposed amendments is John A. Tolleris of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

PAPERWORK REDUCTION ACT

The elimination of the collection of information contained in this regulation has been submitted to the Office of Management and Budget (OMB) in accordance with the requirements of the Paperwork Reduction Act of 1980. This reduction in the requirements has been approved by OMB under control number 1545-0940.

* * * * *

Adoption of amendments to the regulations.

Accordingly, 26 CFR Parts 1 and 602 are amended as follows:

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

(26 CFR Part 1)

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 1.103-10 also issued under 26 U.S.C. 103(b)(6). * * *

Par 2. Section 1.103-10 (relating to exemption for certain small issues of industrial development bonds) is amended as follows:

(1) The phrase "section 103(c)" is removed each place it appears as a reference or part of a reference and the phrase "section 103(b)" is inserted in lieu thereof as a reference or part of a reference.

(2) Paragraph (a) is amended by adding the following new sentence at the end thereof: "For bonds issued before January 1, 1979, in taxable years ending before such date, and for capital expenditures made before January 1, 1979, with respect to such bonds, paragraphs (b), (c), and (d) of this section shall be applied by substituting $5 million for $10 million."

(3) Paragraph (c)(2) is amended by revising the caption to read *"10 million or less refinancing issue."* and by removing "$5" each place it appears and inserting in lieu thereof "$10".

(4) Paragraph (d)(1) is amended by removing "$5" and inserting in lieu thereof "$10".

(5) Paragraph (d)(3)(ii) is amended by removing "$5" each place it appears and inserting in lieu thereof "$10".

(6) Paragraph (b)(2) is amended by revising the heading and subdivisions (i), (ii)*(a)*, and (vi) thereof, to read as follows:

§1.103-10 Exemption for certain small issues of industrial development bonds.

* * * * *

(b) *Small issue exemption.* * * *

(2) *$10 million or less.* (i) Under Section 103(b)(6)(D), the issuing State or local governmental unit may elect to have an aggregate authorized face amount of $10 million or less, in lieu of the $1 million exemption otherwise provided for in section 103(b)(6)(A), with respect to issues of obligations that are industrial development bonds (within the meaning of section 103(b)(2)) issued after October 24, 1968. If the election is made in a timely manner, the bonds will be treated as obligations of a State or local governmental unit described in section 103(a)(1) and §1.103-1 if the sum of—

(a) The aggregate face amount of the issue including the aggregate outstanding face amount of any prior $1 million or $10 million exempt small issues taken into account under section 103(b)(6)(B) and paragraph (d) of this section, and

(b) The aggregate amount of "section 103(b)(6)(D) capital expenditures" (within the meaning of paragraph (b)(2)(ii) of this section),

is $10 million or less. In the case of an issue of obligations that qualified for exemption under section 103(b)(6)(A) and this paragraph, if a section 103(b)(6)(D) capital expenditure made after the date of issue has the effect of making taxable the interest on the issue, under section 103(b)(6)(G) the loss of tax exemption for the interest shall begin only with the date on which the expenditure that caused the issue to cease to qualify under the $10 million limit was paid or incurred. See paragraph (b)(2)(vi) of this section for the time and manner in which the issuer may elect the $10 million exemption. See section 103(b)(6)(H) and paragraph (c)(2) of this section for the treatment of certain refinancing issues of $10 million or less.

(ii) * * *

(a) The capital expenditure was financed other than out of the proceeds of issues to the extent such issues are taken into account under paragraph (b)(2)(i)*(a)* of this section.

* * * * *

(vi) The issuer may make the election provided by section 103(b)(6)(D) and this paragraph (b)(2) (assuming that the bonds otherwise qualify under section 103(b)(6)) by noting the election affirmatively at or before the time of issuance of the issue in question on its books or records with respect to the issue. The term "books or records" includes the bond resolution or other similar legislation for the issue in question as well as the bond transcript or other compilation of bond and bond-related documents. If the issuer fails to make an election at the time and in the manner prescribed in this paragraph (b)(2), the issue will not be treated as described in section 103(b)(6)(D), and interest thereon will be includible in gross income.

OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

(26 CFR Part 602)

Par. 3 The authority citation for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805

Par. 4. Section 602.101(c) is amended by inserting in the appropriate place in the table "§1.103-10(b)(2)(vi). . . . 1545-0940".

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved March 28, 1986

J. Roger Mentz,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on May 1, 1986, 8:45 a.m., and published in the issue of the Federal Register for May 2, 1986, 51 F.R. 16298)

Section 404.—Deduction for Contributions of an Employer to an Employees' Trust or Annuity Plan and Compensation under a Deferred-Payment Plan

26 CFR 1.404(g)-1: Deduction of employer liability payments.

T.D. 8085

TITLE 26—INTERNAL REVENUE.—CHAPTER I, SUBCHAPTER A, PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Deduction of Employer Liability Payments

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations concerning the deduction of employer liability payments. Changes to the applicable tax law were made by the Multiemployer Pension Plan Amendments Act of 1980 [Pub. L. 96-364, 1980-2 C.B. 437]. The regulations will provide the public with additional guidance needed to comply with that Act and will affect all employers that maintain qualified plans.

DATES: The amendments are effective for employer payments made after September 25, 1980.

FOR FURTHER INFORMATION CONTACT: Marjorie Hoffman of the Employee Plans and Exempt Organizations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T). Telephone 202-566-3430 (not a toll free number).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On May 20, 1985, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 404 of the Internal Revenue Code of 1954 (50 FR 20800) [EE-130-80, 1985-1 C.B. 610]. These amendments conform the regulations to section 205 of the Multiemployer Pension Plan Amendments Act of 1980 (94 Stat. 1287) [Pub. L. 96-364, 1980-2 C.B. 437, 446]. No comments were submitted on the proposed amendments. No public hearing on the proposed amendments was requested. Accordingly, the amendments are adopted by this Treasury decision substantially as they appeared in the FEDERAL REGISTER. Typographical errors which were contained in the notice of proposed rulemaking have been corrected.

EXECUTIVE ORDER 12291 AND REGULATORY FLEXIBILITY ACT

The Treasury Department has determined that this regulation is not subject to review under Executive Order 12291 and that a regulatory impact analysis therefore is not required.

Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

DRAFTING INFORMATION

The principal author of these final regulations is Marjorie Hoffman of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

* * * * *

Adoption of amendments to the regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority citation for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. The following new §1.404(g)-1 is added immediately after §1.404(e)-1A.

§1.404(g)-1 Deduction of employer liability payments.

(a) *General rule.* Employer liability payments shall be treated as contributions to a stock bonus, pension, profit-sharing, or annuity plan to which section 404 applies. Such payments that satisfy the limitations of this section shall be deductible under section 404 when paid without regard to any other limitations in section 404.

(b) *Employer liability payments.* For purposes of this section, employer liability payments mean:

(1) Any payment to the Pension Benefit Guaranty Corporation (PBGC) for termination or withdrawal liability imposed under section 4062 (without regard to section 4062(b)(2)), 4063, or 4064 of the Employee Retirement Insurance Security Act of 1974 (ERISA) [Pub. L. 93-406, 1974-3 C.B. 1]. Any bond or escrow payment furnished under section 4063 of ERISA shall not be considered as a payment of liability until applied against the liability of the employer.

(2) Any payment to a non-multiemployer plan pursuant to a commitment to the PBGC made in accordance with PBGC Determination of Plan Sufficiency and Termination of Sufficient Plans. See PBGC regulations, 29 CFR 2617.13(b) for rules concerning these commitments. Such payments shall not exceed an amount necessary to provide for, and used to fund, the benefits guaranteed under section 4022 of ERISA.

(3) Any payment to a multiemployer plan for withdrawal liability imposed under part 1 of subtitle E of title IV of ERISA. Any bond or escrow payment furnished under such part shall not be considered as a payment of liability of the employer.

(c) *Limitations, etc.*—(1) *Permissible expenses.* A payment shall be deductible under section 404(g) and this section only if the payment satisfies the conditions of section 162 or section 212. Payments made by an entity which is liable for such payments because it is a member of a commonly controlled group of corporations, or trades or businesses, within the meaning of section 414(b) or (c), shall not fail to satisfy such conditions merely because the entity did not directly employ participants in the plan with respect to which the liability payments were made.

(2) *Qualified plan.* A payment shall be deductible under section 404(g) and this section only if the payment is made in a taxable year of the employer ending within or with a taxable year of the trust for which the trust is exempt under section 501(a). For purposes of this paragraph, the payment timing rules of section 404(a)(6) shall apply.

(3) *Full funding limitation.* (i) If the employer liability payment is to a plan, the total amount deductible for such payment and for other plan contributions may not exceed an amount equal

to the full funding limitation as defined in section 412(c)(7) for the taxable year with respect to which the contributions are deemed made under section 404.

(ii) If the total contributions to the plan for the taxable year including the employer liability payment exceed the amount equal to this full funding limitation, the employer liability payment shall be deductible first.

(iii) Any amount paid in a taxable year in excess of the amount deductible in such year under the full funding limitation shall be treated as a liability payment and be deductible in the succeeding taxable years in order of time to the extent of the difference between the employer liability payments made in each succeeding year and the maximum amount deductible for such year under the full funding limitation.

(4) *Maximum deduction allowable under section 404*. The amount deductible under section 404 is limited to the higher of the maximum amount deductible by the employer under section 404(a) or the amount otherwise deductible under section 404(g). If the contributions are to a plan to which more than one employer contributes, this limit shall apply to each employer separately rather than all employers in the aggregate. Thus, each employer may deduct the greater of its allocable share of the deduction determined under sections 404(a) and 413(b)(7) or 413(c)(6) or its allocable share of the amount deductible under section 404(g).

However, pursuant to the rule in subdivision (ii) of subparagraph (3), in determining each employer's allocable share under section 404(a), the total amount deductible under section 404(a) by all employers shall not exceed the difference between the full funding limitation and the total amount deductible by all employers under section 404(g).

(5) *Example*. The provisions of this paragraph may be illustrated by the following example:

Example. In the 1983 taxable year, Employer *A* makes a withdrawal liability payment of $700,000 to multiemployer Plan *X* to which Employer *A* and Employer *B* are required to contribute. Employer *A*'s allocable share of the deduction allowable under sections 404(a) and 413(b)(7) in the 1983 taxable year is $600,000. Employer *B*'s allocable share of the deduction allowable under section 404(a) and 413(b)(7) in the 1983 taxable year is $400,000.

The full funding limitation for the 1983 taxable year is $1,000,000. Based on paragraph (c)(4) of this section, Employer A may deduct $700,000, the amount of the withdrawal liability payment. However, the deduction of Employer *B* is limited to $300,000, the difference between the full funding limitation and the amount deductible under section 404(g).

(d) *Effective date etc.*—(1) *General rule*. This section is effective for employer payments made after September 25, 1980.

(2) *Transitional rule*. For employer payments made before September 26, 1980, for purposes of section 404, any amount paid by an employer under section 4062, 4063, or 4064 of the Employee Retirement Income Security Act of 1974 [Pub. L. 93-406, 1974-3 C.B. 1, 198-200] shall be treated as a contribution to which section 404 applies by such employer to or under a stock bonus, pension, profit-sharing, or annuity plan.

ROSCOE L. EGGER, JR.,
Commissioner of Internal Revenue.

Approved April 14, 1986.

J. ROGER MENTZ,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on May 1, 1986, 8:45 a.m., and published in the issue of the Federal Register for May 2, 1986, 51 F.R. 16297)

Section 467.—Certain Payments for the Use of Property or Services

Federal short-term, mid-term and long-term rates are set forth for the month of June 1986. See Rev. Rul. 86-79, below.

Section 483.—Interest on Certain Deferred Payments

Federal short-term, mid-term and long-term rates are set forth for the month of June 1986. See Rev. Rul. 86-79, below.

Section 1274.—Determination of Issue Price in the Case of Certain Debt Instruments Issued for Property

(Also Sections 467, 483 7872.)

Rev. Rul. 86-79

For purposes of section 1274(d) of the Internal Revenue Code, the short-term, mid-term, and long-term applicable federal rates (AFR) for the month of June 1986 are as follows:

	Period for Compounding			
	Annual	*Semiannual*	*Quarterly*	*Monthly*
Short-Term				
AFR	6.74%	6.63%	6.58%	6.54%
110% AFR	7.42%	7.29%	7.22%	7.18%
120% AFR	8.12%	7.96%	7.88%	7.83%
Mid-Term				
AFR	7.32%	7.19%	7.13%	7.08%
110% AFR	8.07%	7.91%	7.83%	7.78%
120% AFR	8.82%	8.63%	8.54%	8.48%
Long-term				
AFR	7.64%	7.50%	7.43%	7.39%
110% AFR	8.42%	8.25%	8.17%	8.11%
120% AFR	9.20%	9.00%	8.90%	8.84%

Requirements for the filing of Forms 941 and 941E on magnetic tape by reporting agents. See Rev. Proc. 86-27, page 34.

Section 6232.—Extension of Subchapter To Windfall Profit Tax

26 CFR 51.6232(c)2-1: Partnership authorized to act on behalf of partners for removal year 1983 or 1984.

Procedures for the tax treatment of partnership items for windfall profit tax purposes. See Rev. Proc. 86-25, page 9.

Section 6402.—Authority to Make Credits or Refunds

26 CFR 51.6402-1: Credit or refund of overpayment of windfall profit tax.

Procedures for the tax treatment of partnership items for windfall profit tax purposes. See Rev. Proc. 86-25, page 9.

Section 7872.—Treatment of Loans with Below-Market Interest Rates

Federal short-term, mid-term and long-term rates are set forth for the month of June 1986. See Rev. Rul. 86-79, page 7.

Part III. Administrative, Procedural, and Miscellaneous

26 CFR 601.601: Rules and regulations.
(Also Part I, Sections 4996, 4997, 6232, 6402; 51.4996-1, 51.4997-1, 51.4997-2, 51.6232(c)-1, 150.6232(c)-1, 51.6402-1.)

Rev. Proc. 86-25

Rev. Proc. 84-4, 1984-1 C.B. 363, sets out temporary procedures for the implementation of section 6232 of the Internal Revenue Code relating to the tax treatment of partnership items to the windfall profit tax. That revenue procedure is obsolete. Procedures for the tax treatment of partnership items for windfall profit tax purposes are now found in sections 150.6232(c)-1 through 150.6232(c)-5 of the Temporary Excise Tax Regulations for removal years 1983 and 1984 and sections 51.6232(c)-1 through 51.6232(c)-5 of the Excise Tax Regulations for removal years after 1984. General rules and definitions relating to all years are found in sections 51.6232(a)-1 and 51.6232(a)-2 of the regulations.

Rev. Proc. 86-26

SECTION 1. PURPOSE

.01 The purpose of this revenue procedure is to set forth requirements and conditions under which reporting agents preparing Form 940, Employer's Federal Unemployment Tax Return, for groups of taxpayers can furnish the required information in the form of magnetic tape instead of paper documents.

.02 If a reporting agent is unable to comply with the changes in specifications, he/she should contact the local Magnetic Tape Coordinator for Business Tax Returns for further instructions.

.03 The procedures for filing Form 940 on magnetic tape differ from the procedures for filing Forms 941 and 941E on magnetic tape, principally in the Tax Data Records. Whereas in reporting Form 941, there is one Tax Data "B" Record, in reporting Form 940 there are three types of Tax Data "B" Records, "B1," "B2" and "B3".

The need for three different records was established when the return was analyzed. Form 940 is complex with five different parts. Questions A and B at the top of the form determine which parts are required. In addition, in at least two places the return allows for multiple repeating lists: 1) multiple reasons for exempt payments, and 2) multiple entries of state codes and experience rates in Part 5.

To deal with the multiple list problem without paper attachments or tying up large pieces of record formats with seldom used fields, the specifications allow some record types ("B2" and "B3") to be repeated to take care of virtually all taxpayers.

Furthermore, because information as the states to which credit reduction will apply is not available until November of each year, all states and applicable territories are treated as potential credit reduction states.

In addition, many intermediate fields (i.e. fields resulting from the addition, subtraction and multiplication of primary data fields) have been omitted from the "B" Record specification. The test of the final result field, "Total FUTA Tax," against the generated results of the primary fields (i.e. fields only available from taxpayer records) will be used to determine the accuracy of the calculation of the correct tax by the reporting agent.

If an agent chooses not to develop software for exceptional cases, he/she may choose to file those returns on paper.

SEC. 2. APPLICATION FOR TAPE REPORTING

.01 Agents who desire to file authorized federal tax returns on magnetic tape must first file a letter of application or submit Form 4995, Application for Magnetic Tape Filing of Federal Business Tax Returns (previously known as Application for Magnetic Tape Filing of Form 941, Employer's Quarterly Federal Tax Return). A separate application must be submitted for each type of tax return filed (e.g. 941, 941E, 940). A separate revenue procedure applies to filing Forms 941 or 941E on magnetic tape. The letter of application should be addressed to the Director, Internal Revenue Service Center, Attention: Magnetic Tape Coordinator for Business Tax Returns, of the service center that serves the primary business address of the reporting agent. Addresses of the Internal Revenue Service Centers are shown in Section 9 of this revenue procedure. The letter of application must contain the following:

1. Name, address and EIN (Employer Identification Number) of the person, organization, or firm making the application.
2. Name, title, and telephone number of the person to contact regarding the application.
3. Type and nature of equipment to be used to prepare the tape file, i.e., manufacturer and model of main frame and tape drives, tape width, density (characters per inch), and recording mode (e.g. BCD, EBCDIC and ASCII).
4. List of the taxpayers to be included on the initial establishment of the Magnetic Tape Filing system. The list must be in triplicate with the data shown in the exact order as Exhibit 1. Show each taxpayer's name, complete address (including Zip Code), and EIN. Sort into EIN sequence. See section 6.03 for additional details.
5. The service center where paper tax returns were last filed.
6. Signature of the agent or agent's employee authorized to prepare federal tax returns for taxpayers.
7. An agreement by the reporting agent to keep copies of the Powers of Attorney (POA) on file at the agent's principal place of business for examination by the Service upon request. Such copies must be retained until the statute of limitations for the last return filed under its authority expires.
8. An agreement to fully pay the tax by Federal Tax Deposits.

NOTE: This revenue procedure does not restrict a non-financial organization who performs a payroll or tax service from being a reporting agent. See Rev. Proc. 80-31, 1980-2 C.B. 760, concerning the requirements under which FTDs can be made by the reporting agent.

9. An agreement to fully pay contributions to state unemployment funds on time and to timely file related state unemployment tax returns.
10. The first tax period for which the agent plans to file returns on magnetic tape.

11. The estimated volume of returns the agent plans to file by type of return (e.g. 941, 941E or 940).

SEC. 3. POWER OF ATTORNEY

.01 A POA must be submitted for each filer on the list attached to Form 4995 or the letter of application. The POA may be submitted on Form 2848, Power of Attorney and Declaration of Representative, which is available on request; or any other instrument which clearly states that the reporting agent is granted the authority to file and sign the return. The POA filed under this revenue procedure is not subject to the rules contained in the Conference and Practice Requirements (Treasury Regulation 601.502). The POA may cover the filing of both Forms 940 and 941 if desired.

.02 Both the taxpayer, or his authorized representative, and the reporting agent must sign the POA. The signed document will remain in effect until such time as it is revoked by the taxpayer, terminated by written notification from the reporting agent, or expires under its own terms.

1. The following persons may execute a POA on behalf of a corporation or other business taxpayer:

(a) The individual, if the person required to make the return is an individual;

(b) The president, vice president, or other principal officer, if the person required to make the return is a corporation;

(c) A responsible and duly authorized member or officer having knowledge of its affairs, if the person required to make the return is a partnership or other unincorporated organization.

(d) The fiduciary, if the person required to make the return is a trust or estate; or

(e) An agent who is duly authorized in accordance with section 31.6011(a)-7 of the Employment Tax Regulations.

.03 The scope of the POA for magnetic tape filing will be governed according to the following:

1. POA will delegate to the reporting agent the power to sign and file appropriate federal tax returns.

2. The POA becomes effective for the tax period the agent notifies the Service that the employer or filer is being added to the Magnetic Tape Filing system and remains in effect for subsequent periods until revoked, terminated or expired.

3. The POA is automatically revoked when the reporting agent notifies the Service that a taxpayer is no longer included in the Magnetic Tape Filing system.

4. The receipt of a POA for magnetic tape filing has no effect on prior Powers of Attorney on file for other purposes for a given taxpayer.

5. The POA for magnetic tape filing is a limited power of attorney, i.e., notices, refunds and other output resulting from filing on magnetic tape will be mailed to the taxpayer.

6. Requests from a reporting agent for information or adjustments on an account for which the taxpayer has authorized magnetic tape filing will be honored by the service center.

7. Requests for address changes may not be made by the reporting agent. Requests for address changes for taxpayers that are reported under magnetic tape filing will be processed only if they originate with one of the following:

(a) The taxpayer,

(b) An employee of the Service, or

(c) An attorney-in-fact if the attorney has a full POA for all tax matters concerning a taxpayer, and has filed a copy of the POA with the Service.

SEC. 4. APPROVAL OF AGENTS APPLICATION

.01 The Service will act on applications and notify applicants of authorization or disapproval within 30 days of receipt of Form 4995 or a letter of application as defined in Section 2.

.02 Generally, reporting agents using equipment compatible with the Service's can presume that tape filing will be approved. Compatible tape characteristics are shown in Section 11. If the reporting agent has the capability to prepare several types of tapes, the Service prefers that compatible tapes be prepared.

.03 If the reporting agents propose to submit convertible tapes, i.e., tapes requiring translation, the Service will either translate these tapes or provide translation through other government agencies. Magnetic tape filing will be disapproved when the Service is unable to obtain facilities to translate a reporting agent's file to a compatible form. (See Sections 10 and 11 for specifications.)

.04 Once authorization to file tax data on magnetic tape has been granted to a reporting agent, such approval will continue to effect in succeeding tax periods as long as the requirements of this revenue procedure are met, and there are no equipment changes by the reporting agent. However, new applications are required if users change from compatible tapes to equipment producing tapes that require translation, or if they discontinue magnetic tape filing for one or more periods, then decide to resume this method of reporting.

SEC. 5. EFFECT ON PAPER DOCUMENTS

.01 Authorization to file on magnetic tape does not prohibit the filing on paper tax returns, but merely permits filing of such returns on the Magnetic Tape Filing system. If for some reason (e.g. late receipt of records), an agent prefers to file a paper return for a given taxpayer, the agent may do so even after having been given authorization to file that taxpayer's returns on magnetic tape.

.02 The initial filing of tax returns on magnetic tape will be on trial tapes. Each taxpayer included on the magnetic tape must also be on the paper form until authorized by the Service to discontinue filing returns on paper. The paper returns must be arranged in the same order as the returns reported on the magnetic tape and in the same shipment. In general, the Service will notify the reporting agent to discontinue filing paper returns within 90 days after the initial filing of magnetic tape. The notification will depend upon the feasibility of processing the magnetic tape submitted.

.03 Paper and magnetic tape returns for the same tax period must never be filed by a reporting agent at the same time for the same taxpayer unless the returns are filed during the trial period for the reporting agent described in section 5.02.

SEC. 6. FILING TAPE RETURNS

.01 Packaging, shipping, and mailing instructions will be provided in the letter granting initial approval issued by the Service in response to the letter of application for magnetic tape filing.

.02 The Service will allow a tape return to be submitted for those individually approved magnetic tape filers until the reporting agent formally notifies the Service that specific employers are being deleted from their current magnetic tape filing inventory.

.03 Section 6091(b) of the Internal Revenue Code requires that tax returns be filed at the Internal Revenue district (or service center serving that district) that services the legal residence or principal business address of the taxpayer. Thus, reporting agents must normally file taxpayer's returns at the appropriate service center as described above even if it means submitting magnetic tapes to more than one service center. This rule may not be violated unless a reporting agent has applied for and received permission from the Service to do so. Contact your Magnetic Tape Coordinator for Business Tax Returns for details.

.04 Approval by the Service of Form 4995 or a letter of application allows a reporting agent to file at any Internal Revenue service center that services his/her clients. If a reporting agent wishes to file at additional service centers, he/she should notify the Magnetic Tape Coordinator for Business Tax Returns of the service center where he/she originally applied at least 90 days prior to the initial transmittal to the new service center.

.05 The reporting agent will be provided with a validated copy of the agent's listing for taxpayers authorized to file on magnetic tape. This authorization will contain each taxpayer's EIN, four position alpha Name Control, and the District Office Code. This authorization will be the source of the EIN and Name Control to be used on magnetic tape by the reporting agent as an identification of each taxpayer.

It is imperative that this Name Control be retained in the agent's records and be used in each taxpayer's Tax Data "B1" Record (positions 73-76). It is used by the Service to ensure the correct recording of the taxpayer's return. Failure to use the correct Name Control can result in delays in processing the return and notices of delinquent filing being sent to the taxpayer.

.06 Enclose the following in the first box of the tape shipment to the service center:

1. Form 4996, Magnetic Tape Filing Transmittal for Federal Business Returns (previously known as Magnetic Tape Filing Transmittal for Form 941, Employer's Quarterly Federal Tax Return) or a letter of transmittal containing the information described below. File the Form 4996 or the letter of transmittal in duplicate.

2. The letter of transmittal should include:

a. Name and address of reporting agent

b. Type of tax return filed on the magnetic tape

c. Tax period

d. Number of tax returns filed on accompanying tape

e. Total taxes reported

f. Total taxes deposited

g. Service center in which the POA for filing returns on magnetic tape is located

h. Signature of transmitter, title and date.

3. A control listing identifying actual taxpayers previously approved by the Service for magnetic tape filing that are contained on the current tape file being submitted. List the taxpayers in EIN sequence with each taxpayer's name and address.

4. Only Form 940 data may be present on this magnetic tape. Any Form 941 or 941E data must be on separate tapes.

5. The reporting agent should notify the Magnetic Tape Coordinator for Business Tax Returns if the agent does not receive notification of receipt of the transmittal within 15 days from the date he/she sent the transmittal.

SEC. 7. ADDING AND DELETING FILERS FROM MAGNETIC TAPE FILING SYSTEM

.01 When adding or deleting filers, the Service must receive (in triplicate and in the same format as shown on Exhibit 1) a listing which contains the complete names, addresses and EIN's of the taxpayers the reporting agent wants added or deleted from the Magnetic Tape Filing system. The word "ADDITIONS" or "DELETIONS" should be entered after the title, "Agent's Listing," and the effective date.

.02 The Service will provide a validated copy of the updated agent's listing to the reporting agent. Under no circumstances is a new filer to be included on the Magnetic Tape Filing system until the validated copy is received from the Service.

.03 A POA authorization must be included for each taxpayer to be added to the Magnetic Tape Filing system.

.04 The reporting agent should indicate on the last magnetic tape return submitted for a filer that it is either the "Final Return" or a "Discontinued Filer" in the Tax Data "B" Record.

.05 The reporting agent may not always know that the final magnetic tape return for a particular taxpayer is being submitted at the time the tape is being sent in. When the reporting agent determines that the previous tape contained the last return to be prepared for the individual filer, action should be taken to notify the service center which authorized the magnetic tape filing of one of the following conditions:

1. The taxpayer is out of business (state the effective date) and will no longer be liable for filing returns (Final Return), or

2. The reporting agent will no longer be submitting returns on magnetic tape for the taxpayer who is still in business and is still liable for such returns (Discontinued Filer).

.06 List of proposed (Form 940) filer additions deletions, etc., must be received in the service center prior to the end of November. This will permit the Service to properly validate applications and to respond to the agent within 30 days of receipt of the lists. However, if at the time of filing the agent has not received a validated listing with the additions, he/she should not file a magnetic tape return for those taxpayers because he/she has not received a valid Name Control from the Service.

SEC. 8. DUE DATES

.01 The due dates prescribed for filing paper returns with the Service will also apply to magnetic tape filing of Forms 940.

.02 In no case should returns with more than one due date be included on one tape file.

SEC. 9. ADDITIONAL INFORMATION

Requests for additional copies of this revenue procedure, applications for magnetic tape filing, requests for copies of appropriate input record element specifications, and requests for tape filing information should be addressed to the Director, Internal Revenue Service Center, Attention: Magnetic Tape Coordinator of Business Tax Returns, at one of the following addresses:

1. North-Atlantic Region
   - (a) Andover Service Center
     Project 105 Coordinator (Stop 481)
     310 Lowell Street
     Andover, MA 05501
   - (b) Brookhaven Service Center
     Project 105 Coordinator (Stop 110)
     1040 Waverly Avenue
     Holtsville, NY 11742
2. Mid-Atlantic Region
   - (a) Philadelphia Service Center
     Project 105 Coordinator (Drop Point 433)
     P.O. Box 245
     Bensalem, PA 19020
3. Central Region
   - (a) Cincinnati Service Center
     Project 105 Coordinator
     (CSA:C Stop 43)
     P.O. Box 267
     Covington, KY 41019
4. Southeast Region
   - (a) Atlanta Service Center
     Project 105 Coordinator
     P.O. Box 47-421
     Doraville, GA 30362
   - (b) Memphis Service Center
     Project 105 Coordinator
     P.O. Box 30309
     Airport Mail Facility
     Memphis, TN 38130
5. Midwest Region
   - (a) Kansas City Service Center
     P.O. Box 24551
     Kansas City, MO 64131
6. Southwest Region
   - (a) Austin Service Center
     Management Support Branch
     (Stop 1055)
     P.O. Box 934
     Austin, TX 78767
7. Western Region
   - (a) Ogden Service Center
     1160 West 1200 South
     Ogden, UT 84201
   - (b) Fresno Service Center
     P.O. Box 12866
     Fresno, CA 93779

SEC. 10. CONVENTIONS AND DEFINITIONS

.01 Conventions

Certain conventions may be required by the programming system or equipment used by the reporting agent, with respect to header and trailer labels, record and tape marks. If present, the Service prefers that they adhere to American National Standards Institute (ANSI) X3.27 specifications. The Service will accept other specifications if facilities can be found to accommodate them. The Service reserves the right to reject tapes with other than ANSI X3.27 specifications. The tapes must adhere to the following at a minimum:

(a) Header Label
  (1) The first record on a reel only.
  (2) In accordance with ANSI X3.27, Volume Header Label (VOL1), First File Header Label (HDR1) and Second File Header Label (HDR2) are strongly preferred.

(b) Trailer Label
  (1) The last record on a reel only.
  (2) No restrictions apply as to number of characters or type of characters used.

(c) Record Mark
  (1) No restrictions apply to record marks.

(d) Tape mark

The tape mark should only follow an End of Reel "F" Record or an End of File "E" Record.

.02 Definitions

Element	Description
Reporting Agent	Person or organization preparing and filing magnetic tape equivalents of Federal tax returns.
Taxpayer	Persons or organization liable for the payment of tax. The taxpayer will be held responsible for the completeness, accuracy and timely submission of the magnetic tape files.
b	Denotes a blank position.
EIN	Employer Identification Number.
Record	A group of related fields of information, treated as a unit.
Blocked Records	Two or more records grouped together between interrecord gaps.
Blocking Factors	The number of records grouped together to form a block.
Unblocked Records	Single records written between interrecord gaps.
File	A file consists of all tape records submitted by a reporting agent.
Record Mark	Special character used either to limit the number of characters in data transfer or to separate blocked records on tape.
Tape Mark	Special character that is written on tape.
Special Character	Any character that is not a numeral, letter, or blank.
Reel	A spool of magnetic tape.
FTD	Federal Tax Deposit.
POA	Power of Attorney.

SEC. 11. MAGNETIC TAPE SPECIFICATIONS

.01 These specifications prescribe the required format and content of the records to be included in the file, but not the methods or equipment to be used in their preparation.

A compatible tape file must conform to all of the following:

Type of tape	1/2 inch Mylar base, oxide coated
Recording density	800, 1600 or 6250 CPI (characters per inch)
Parity	Even or odd
Interrecord Gap	3/4 inch
Recording Mode	7 channel binary coded decimal (BCD), 9 channel, EBCDIC, ASCII

.02 An acceptable file will contain, for each reporting agent, the following:

1. An Agent "A" Record,
2. A series of Tax Data "B1," "B2" and "B3" Records,
3. A series of Checkpoint "C" Records, and
4. An End of File "E" Record.
5. Multiple reel files will have an End of Reel "F" Record.

.03 All records including headers and trailers, if used, must be written at the same density.

.04 Affix an external label to each tape with the following information:

1. Name of reporting agent
2. Number of tax returns submitted on this reel of tape
3. Tax year YYMM (Year, Year, month, month) format
4. Density (800, 1600, 6250)
5. Channel (7 or 9)
6. Parity (odd or even)
7. Name of computer manufacturer
8. Computer Type (manufacturer's designation)
9. Tape Drive (manufacturer and type)
10. Sequence number of reel and total number of reels in file (for example, 1 of 3).

.05 Since the Service is not restricting magnetic tape filing to reporting agents with specific types of equipment, or prescribing the methods used to prepare the tape files, the Agent "A" Record, End of Reel "F" Record and End of File "E" Record perform the functions normally assigned to header and trailer labels and related conventions. The End of Reel "F" Record signals that no more Tax Data "B" Records are written on the reel, and the End of File "E" Record indicates that there is no further data to be processed. In addition to the functions stated above, the End of Reel "F" Record is used to balance each reel or each series of Tax Data "B" Records of the reporting agent on a reel.

.06 Record Length

The tape records prescribed in the specifications may be blocked or unblocked subject to the following:

(a) A block may not exceed 12,100 tape positions.

(b) If the use of blocked records would result in a short block at the end of a Tax Data "B" Record and the next record is too large to be included in the block, the remaining positions of the block should be filled with 9's or spaces. No other digits or characters other than 9's or spaces are specified or acceptable for filling (or padding) of any tape input data blocks.

(c) All records, except header and trailer labels, if used, are blocked.

.07 Data

Only character data may be used. This means numeric fields cannot use overpunched signs. Special characters should be limited to -, &, % or / and can only be used in the name line fields and the street address fields of Agent "A" Records and Tax Data "B" Records. Otherwise, characters must be numeric or alphabetic. All money fields should include 2 decimal positions on right.

.08 Agent "A" Record

Identifies the reporting agent who prepared and transmitted the tape file. When multiple reels are required for a single file, the Agent "A" Record must be repeated as the first record (second record if header labels are used) on every succeeding reel in the file, and the reel number must be incremented by 1 for each tape reel after the first reel. A reporting agent may include Tax Data "B" Records (of any type) prepared at more than one location on the same tape, but they must have the same DO Code; however, Tax Data "B" Records prepared at different locations with different DO Codes must be on separate files preceded by an Agent "A" Record. Contact the Magnetic Tape Coordinator for Business Tax Returns for additional details, if necessary.

Form 940 AGENT "A" RECORD

Tape Position	Element Name	Entry or Definition
1	Record Type	Enter "A". Must be first character of each Agent "A" Record.
2-3	District Office Code	Enter two numeric digit District Office Code furnished by the Service.
4-5	Reel Number	Serial number assigned by the reporting agent to each reel, starting with 01. If header labels are used and if they contain a reel sequence number field, this should be the same as reel sequence number.

FORM 940 AGENT "A" RECORD—Continued

Tape Position	Element Name	Entry or Definition
6-14	EIN-reporting agent	Enter the 9 numeric characters of the reporting agent's EIN. Do not include the hyphen.
15-18	"B1" Record Length	Enter the number of positions of the Agent "B1" Record (588). If record marks are used at the end of each record include them in the count. Right justify and zero fill except where noted.
19-22	"B2" Record Length	Enter the number of positions of the Agent "B2" Record (143). If record marks are used at the end of each record include them in the count. Right justify and zero fill except where noted.
23-26	"B3" Record Length	Enter the number of positions of the Agent "B3" Record (693). If record marks are used at the end of each record include them in the count. Right justify and zero fill except where noted.
27-66	Name Line 1—Agent	Enter first name line of reporting agent. Left justify and fill with blanks. (40 positions)
67-106	Name Line 2—Agent	Enter the 2nd name line of reporting agent. Left justify and fill with blanks. If not required, fill with blanks. (40 positions)
107-146	Street Address—reporting agent	Enter street address of reporting agent and blank fill. Fill with blanks if street address not required. (40 positions)
147-166	City—reporting agent	Enter city of reporting agent. Left justify and fill with blanks. (20 positions)
167-168	State Code—Reporting Agent	Enter the official Post Office two position state code. (2 positions)
169-177	Zip Code—Reporting Agent	Enter zip code of reporting agent. If not using extending zip codes, left justify blank fill. (9 positions)
178	Tax Period Year	The last digit of the calendar year for which the reporting agent is filing (i.e. 1 = 81, 2 = 82 etc.).

.09 Form 940 Tax Data "B" Records

1. Contains tax information for each filer reported by the reporting agent. The number of Tax Data "B" Records of any type appearing on one tape reel will depend on the number of taxpayers represented (only one tax return for each EIN).

2. Tax Data "B" Records may be blocked together with record types A, C, E or F or the Tax Data "B" Records may be blocked alone with record types A, C, E and F unblocked. Records should have a blocking factor for which blocks will not exceed 12,100 tape positions. All records must be fixed length and for the current tax period. All money amounts must contain dollars and cents, must be right justified with zero filling on left and must be zero filled if non-significant. Fields identified as indicators should always carry a value. Other non-money fields must be left justified and blank filled on right with blank filling of non-significant fields.

3. Directions for the use of the three types of "B" Records:

A. General Directors

1). A "B1" Record is required for all taxpayers. There can be only one per taxpayer.

2). If the taxpayer has employees in more than one state, then a "B3" Record is required. They must follow "B2" Records (if any are present) of the taxpayer.

3). Each "B3" Record will accommodate up to four additional states. Up to thirteen "B3" Records may be present. They must follow "B2" Records (if any are present) of the taxpayer.

4). A "B2" Record is used only if the taxpayer has more than ten separate reasons for exempting payments to employees from FUTA. The various reasons for exempting payments are defined in Section 13 of this revenue procedure. Up to four "B2" Records may follow a "B1" Record.

5). If any field is too small to accommodate the data, the return must be filed on pape. .

6). The single state filing indicator (position 153 of "B1" Record) is a key to the use of the "B1" and "B3" Records.

If the single state filing indicator is equal to zero, then only a "B1" Record is required and positions 449-588 should be blank and zero filled as appropriate.

If the single state filing indicator is equal to one or three, then only a "B1" Record is required but positions

449-588 will require some significant data.

If the single state filing indicator is equal to two, then at least one "B3" Record is needed in addition to the "B1" Record.

The single state filing indicator has no bearing on "B2" Records.

B. Directors for use of "B1" Record:

1). Positions 1-155 of the "B1" Record must contain significant data for all taxpayers.

2). Positions 156-168 (State Contributions) and 169-183 (State Reporting Number) of the "B1" Record must contain significant data if the employer is required to contribute to state unemployment funds.

3). Positions 184-196 (Total Payments to Employees) of the "B1" Record require data from all taxpayers.

4). Positions 197-209 (Payments in Excess of Maximum Taxable Wages) contain significant information if any employee's wages exceeded the maximum for the year.

5). Positions 210-231 (Total FUTA and Total Taxes Deposited plus Overpayment Credit fields) of the "B1" Record require significant data from all taxpayers.

6). Positions 232-242 (Overpayment From Previous Year) may or may not contain significant data depending on whether the taxpayer requested transfer of the previous year's overpayment.

7). Positions 243-253 (Excess) contain significant data only if Total Taxes Deposited plus Overpayment from Previous Year exceeds Total FUTA Tax.

8). Position 254 (Credit Elect Indicator) enables the taxpayer to make a decision as to whether overpayment will be refunded or transferred to the following year's account.

9). Positions 255-265 (Total Taxes Deposited This Year) should also contain significant data.

10). Positions 266-305 should contain significant data if Total FUTA Tax exceeded $100.00.

11). Positions 306-435 contain ten combinations of a two position exemption code and an 11 position dollar and cents amount of wages exempted. The exemption codes and their meanings may be found in Section 13.

12). Positions 436-448 (Credit Reduction Wages for Unpaid Advances to the States) should have significant data only if the state identified in positions 154-155 is a credit reduction state for a given year.

13). Positions 449-588 are a series of repeating fields which only require entries if more than one state is being reported by the taxpayer or the taxpayer is not required to make contributions to the state unemployment fund of the state in which he/she has employees, or if any part of the taxpayer's total taxable wages is exempt from state unemployment taxes. There are four series of five fields.

The five fields are:

a) Taxable payroll

b) Date experience rate took effect

c) Date experience rate was changed

d) State experience rate

e) Contributions made to state.

At least one series of those fields must be used by those taxpayers who are reporting for more than one state or are not required to make contributions to the state unemployment fund, or if any part of the taxpayer's total taxable wages is exempt from state unemployment taxes. Only if the employer's experience rate changes are the other three series used. If an employer has had more than four experience rates in a given year, the return must be filed on paper.

14). The experience rate group fields (positions 449-588) in the "B1" Record allow up to four different experience rates in a given year (i.e. initial rate and three changes).

15). If the employer was not required to pay contributions to the state unemployment fund of a particular state, only one experience rate group should contain significant data and it should be used in the following manner:

a) Taxable payroll—should have significant data

b) Date experience rate took effect—fill with 0101

c) Date experience rate was changed—fill with 1231

d) State experience rate—fill with five zeroes

e) Contributions paid to state—fill with ten zeroes.

C. Directions on use of "B2" Record:

1) Positions 1-13 must have significant data if a "B2" Record is used.

2) Positions 14-143 are ten groups of two fields. The two fields are exemption code and exemption amount. The exemption codes and their meanings can be found in Section 13 of this revenue procedure.

D. Directions on use of "B3" Record:

1) Positions 1-13 must have significant data if a "B3" Record is used.

2) Positions 14-693 contain four groups of fields. Each group is for a separate state code. Therefore each "B3" Record can accommodate reporting of an additional four states.

Positions 14-183 relate to the first state

Positions 184-353 relate to the second state

Positions 354-523 relate to the third state

Positions 524-693 relate to the fourth state.

3) Each state group in the "B3" Record is 170 positions. The state group is composed of the following fields:

a) State Code (2 positions)

b) Credit Reduction Wages (13 positions)

c) State Reporting Number (15 positions)

d) Four groups of experience rate fields.

The experience rate groups are composed as follows:

a) Taxable payroll (12 positions)

b) Date experience rate took effect (MMDD format)

c) Date experience rate was changed (MMDD format)

d) State experience rate (5 positions—all considered decimal)

e) Contributions paid to state (10 positions).

4) Credit Reduction Wages fields should only be significant if the state referenced in associated state code is a credit reduction state for the year in which the return is filed.

5) The experience rate group fields allow up to four different experience rates in a given year (i.e. an initial rate and three changes).

6) If the employer was not required to pay contributions to the state unemployment fund of a particular state, only one experience rate group should contain significant data and it should be used in the following manner:

a) Taxable payroll—should have significant data

b) Date experience rate took effect—fill with 0101

c) Date experience rate was changed—fill with 1231

d) State experience rate—fill with five zeroes

e) Contributions paid to state—fill with ten zeroes.

FORM 940 TAX DATA "B1" RECORD

Tape Position	Element Name	Entry or Description
1	Record Type	"B" must be the first character of each Form 940 "B1" Record.
2	Record Subtype	Enter "1".
3-37	First Name Line—Employer	First name line of the taxpayer. Left justify and fill with blanks. (35 positions)
38-72	Second Name Line—Employer	Second name line of the taxpayer. If a continuation of the first name line left justify and fill with blanks, otherwise blank fill. (35 positions)
73-76	Name Control	Enter the 4 position alpha/numeric name control from the Name Control furnished by the Service.
77-111	Street Address—Employer	Enter the street address of the employer. Left justify and blank fill. (35 positions)
112-131	City—Employer	Enter the city in which the taxpayer is located. Left justify and fill with blanks. (20 positions)
132-133	State-Code-Employer	Enter the state code for the taxpayer as assigned by the U.S. Postal Service. (2 positions)
134-142	Zip Code—Employer	Enter the Zip Code of the taxpayer. Left justify and blank fill if necessary. (9 positions)
143-151	EIN—Employer	Enter the taxpayer's EIN *Do not* include the hyphen. (9 positions)
152	Magnet Tape Filing Indicator	0—if the taxpayer is a continuing magnetic tape filer. 1—if the taxpayer is a first time magnetic tape filer. 2—if the taxpayer is filing a final magnetic tape return and will use a paper Form 940 in the future. 3—if the taxpayer is filing a final return because of discontinued operations. 4—if the taxpayer is a continuing magnetic tape filer and is changing the address contained in positions 77-142. 5—if the taxpayer is filing a final magnetic tape return, will use a paper Form 940 in the future, and is changing the address contained in positions 77-142. 6—if the taxpayer is filing a final return because of discontinued operations and is changing the address contained in positions 77-142. Note: Name changes (positions 3-72) should be reported directly to the Magnetic Tape Coordinator for Business Tax Returns.
153	Single State Filing Indicator	A one character (numeric) field used to describe the method in which a taxpayer files Form 940. Enter: 0—if the taxpayer has operations in a single state and would be eligible to only complete Parts 1, 2, and 4 of Form 940. 1—if the taxpayer has operations in a single state but would have to complete Parts 1, 3, 4, and 5 of Form 940 because he/she made no contribution to state unemployment funds. 2—if the taxpayer is filing for operations in several states.

FORM 940 TAX DATA "B1" RECORD—Continued

Tape Position	Element Name	Entry or Description
		3—if the taxpayer has operations in a single state and has made all the required contributions to state unemployment funds but would have to complete Parts 1, 3, 4, and 5 of Form 940 because a part of the taxpayer's total taxable wages is exempt from state unemployment taxes. Note: If the return being filed is non-taxable, the single state filing indicator should be set to zero.
154-155	State-Code-Employees	Usually same as positions 132-133. May differ if official business address is in different state than operations of business.
156-168	State Contributions	Enter the amount paid by the taxpayer to the state unemployment agency of the taxpayer's address. (13 positions)
169-183	State Reporting Number	Enter the primary state reporting number for the taxpayer assigned by the state unemployment agency where the taxpayer maintains his/her residence. left justify and blank fill as necessary. (15 positions)
184-196	Total payments including Exempt payments during the calendar year for services of employees	Part 1, line 1. (13 positions)
197-209	Payments in excess of maximum taxable wages	Part 1, Line 3. Maximum taxable wages for employee varies with year. (13 positions)
210-220	Total FUTA Tax	Gross FUTA tax less Total Tentative Credit plus Credit Reduction Amount. (11 positions)
221-231	Total taxes deposited plus overpayment from previous year	FTDs plus overpayment from previous year (if the taxpayer elected to apply the previous year's overpayment to this tax year). (11 positions)
232-242	Overpayment from Previous Year	Enter only if taxpayer made election last year to have overpayment applied to the next return. Enter zeros if no significant amount. Right justify and zero fill if significant. (11 positions)
243-253	Excess	Amount that total taxes deposited plus transfer of overpayment from previous year exceeds Total FUTA Tax. Enter zero if no significant amount. Right justify and zero fill it significant (11 positions).
254	Credit Elect Indicator	Enter zero if credit is to be applied to next return. Enter "1" if amount is to be refunded or if excess is zero.
255-265	Total taxes deposited for this tax year	Actual deposits made. (11 positions)

Note: Positions 266-305 report the quarterly accrual of the tax liability. It must have entries if Total FUTA Tax exceeds $100.00.

266-275	FUTA tax liability for first quarter	Part 4, first quarter tax liability. (10 positions)
276-285	FUTA tax liability for second quarter	Part 4, second quarter tax liability. (10 positions)

FORM 940 TAX DATA "B1" RECORD—Continued

Tape Position	Element Name	Entry or Definition
286-295	FUTA tax liability for third quarter	Part 4, third quarter tax liability. (10 positions)
296-305	FUTA tax liability for fourth quarter	Part 4, fourth quarter tax liability (10 positions)

Note: Positions 306-435 contain ten combinations of a two position exemption code and 11 position dollar and cents amount of wages exempted. The exemption codes to be used are described in Section 13.

Tape Position	Element Name	Entry or Definition
306-307	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
308-318	Exemption Amount	Enter the amount of the exemption for positions 306-307. Enter zeros if the corresponding exemption is blank.
319-320	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
321-331	Exemption Amount	Enter the amount of the exemption for positions 319-320. Enter zeros if the corresponding exemption is blank.
332-333	Exemption Code	Enter the approved 2 character (numeric) exemption code for th exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
334-344	Exemption Amount	Enter the amount of the exemption for positions 332-333. Enter zeros if the corresponding exemption is blank.
345-346	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
347-357	Exemption Amount	Enter the amount of the exemption for positions 345-346. Enter zeros if the corresponding exemption is blank.
358-359	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
360-370	Exemption Amount	Enter the amount of the exemption for positions 358-359. Enter zeros if the corresponding exemption is blank.
371-372	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
373-383	Exemption Amount	Enter the amount of the exemption for positions 371-372. Enter zeros if the corresponding exemption is blank.
384-385	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.

FORM 940 TAX DATA "B1" RECORD—Continued

Tape Position	Element Name	Entry or Definition
386-396	Exemption Amount	Enter the amount of the exemption for corresponding exemption is blank.
397-398	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
399-409	Exemption Amount	Enter the amount of the exemption for positions 397-398. Enter zeros if the corresponding exemption is blank.
410-411	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exenmption is claimed here.
412-422	Exemption Amount	Enter the amount of the exemption for positions 410-411. Enter zeros if the corresponding exemption is blank.
423-424	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exempton is claimed here.
425-435	Exemption Amount	Enter the amount of the exemption for positions 423-424. Enter zeros if the corresponding exemption is blank.

Note: Positions 436-588 relate to the state idenified in positions 154-155 whose reporting number is in positions 169-183. Right justify and zero fill money amounts. Blank fill unneeded date fields.

Tape Position	Element Name	Entry or Definition
436-448	Credit Reduction Wages for unrepaid advances to the states	Enter the wages included on line 6 of Part 1 in the state where the taxpayer maintains an address. (13 positions).

Note: Positions 449-483 relate to the initial experience rate of the state identified in positions 154-155.

Tape Position	Element Name	Entry or Definition
449-460	Taxable payroll as defined in state act	First entry Part 5, column 3.
461-464	Date an experience rate took effect	First entry Part 5, column 4, From-Date. If continued from previous year enter 0101. (Format is MMDD—Enter blanks if not present)
465-468	Date an experience rate was changed	First entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
469-473	State experience rate	First entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. (Expressed as a five position decimal).
474-483	Contributions actually paid to state	Enter Part 5, column 9, first entry.

Note: Positions 484-518 relate to the second experience rate (if asserted) of the state identified in positions 154-155.

Tape Position	Element Name	Entry or Definition
484-495	Taxable payroll as defined in state act	Second entry Part 5, column 3.
496-499	Date an experience rate took effect	Second entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).

FORM 940 TAX DATA "B1" RECORD—Continued

Tape Position	Element Name	Entry or Definition
500-503	Date an experience rate was changed	Second entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Formatt is MMDD—Enter blanks if not present).
504-508	State experience rate	Second entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. (Expressed as a five position decimal).
509-518	Contributions actually paid to state	Enter Part 5, column 9, second entry.

Note: Positions 519-553 relate to the third experience rate (if asserted) of the state identified in positions 154-155.

Tape Position	Element Name	Entry or Definition
519-530	Taxable payroll as defined in state act	Third entry Part 5, column 3.
531-534	Date an experience rate took effect	Third entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).
535-538	Date an experience rate was changed	Third entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
539-543	State experience rate	Third entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. (Expressed as a five position decimal).
544-553	Contributions actually paid to state	Enter Part 5, column 9, third entry.

Note: Positions 554-588 relate to the fourth experience rate (if asserted) of the state identified in positions 154-155.

Tape Position	Element Name	Entry or Definition
554-565	Taxable payroll as defined in state act	Fourth entry Part 5, column 3.
566-569	Date an experience rate took effect	Fourth entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).
570-573	Date an experience rate was changed	Fourth entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
574-578	State experience rate	Fourth entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. (Expressed as a five position decimal).
579-588	Contributions actually paid to state	Enter part 5, column 9, fourth entry.

Note: If more than four rate changes occurred in one year, a paper return must be filed.

FORM 940 TAX DATA "B2" RECORD

Note: Up to 4 Agent "B2" Records may follow a "B1" Record. Each "B2" Record contains ten combinations of a two position exemption code and 11 position dollar and cents amount of wages exempted. The exemption codes to be used are described in Section 13.

Tape Position	Element Name	Entry or Description
1	Record Type	"B" must be the first character of each Form 940 "B2" Record.
2	Record Subtype	Enter "2"
3-11	EIN—Employer	Enter the taxpayer's EIN.
12-13	Sequence Number	A unique two character (numeric) field which indicates the order of records in the agent's tape. The first "B2" Record for the current taxpayer will contain a sequence number of "02" all others will be incremented by 1 by the reporting agent.
14-15	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
16-26	Exemption Amount	Enter the amount of the exemption for positions 14-15. Enter zeros if the corresponding exemption is blank.
27-28	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
29-39	Exemption Amount	Enter the amount of the exemption for positions 27-28. Enter zeros if the corresponding exemption is blank.
40-41	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
42-52	Exemption Amount	Enter the amount of the exemption for positions 40-41. Enter zeros if the corresponding exemption is blank.
53-54	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
55-65	Exemption Amount	Enter the amount of the exemption for positions 53-54. Enter zeros if the corresponding exemption is blank.
66-67	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
68-78	Exemption Amount	Enter the amount of the exemption for positions 66-67. Enter zeros if the corresponding exemption is blank.
79-80	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
81-91	Exemption Amount	Enter the amount of the exemption for positions 79-80. Enter zeros if the corresponding exemptionis blank.

FORM 940 TAX DATA "B2" RECORD—Continued

Tape Position	Element Name	Entry or Definition
92-93	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
94-104	Exemption Amount	Enter the amount of the exemption for positions 92-93. Enter zeros if the corresponding exemption is blank.
105-106	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
107-117	Exemption Amount	Enter the amount of the exemption for positions 105-106. Enter zeros if the corresponding exemption is blank.
118-119	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
120-130	Exemption Amount	Enter the amount of the exemption for positions 118-119. Enter zeros if the corresponding exemption is blank.
131-132	Exemption Code	Enter the approved 2 character (numeric) exemption code for the exemption the taxpayer is claiming. Enter blanks if no exemption is claimed here.
133-143	Exemption Amount	Enter the amount of the exemption for positions 131-132. Enter zeros if the corresponding exemption is blank.

FORM 940 TAX DATA "B3" RECORD

**Note: 1) Up to thirteen (13) Agent "B3" Records may follow a "B1" or "B2" Record.
Right justify and zero fill significant money amounts. Blank fill unneeded date fields.
2) If more than four experience rate changes occurred in one year you must file a paper return for the taxpayer.**

Tape Position	Element Name	Entry or Description
1	Record Type	"B" must be the first character of each Form 940 "B3" Record.
2	Record Subtype	Enter "3".
3-11	EIN—Employer	Enter the taxpayer's EIN. Do not enter the hyphen.
12-13	Sequence Number	A unique two character (numeric) field which indicates the order of records in the agent's tape. The first "B3" Record for the current taxpayer will contain a sequence number computed by adding 1 to the sum of all the taxpyer's "B1" Records and "B2" Records. The others will be incremented by 1.

NOTE: Position 14-183 relate to the first state reported on a "B3" Record (positions 14-15).

Tape Position	Element Name	Entry or Description
14-15	State-Code	The two character state code assigned by the U.S. Postal Service for a state other than that of the taxpayer's residence.

FORM 940 TAX DATA "B3" RECORD—Continued

Tape Position	Element Name	Entry or Description
16-28	Credit reduction wages for unrepaid advances to the states	Enter the wages included on line 6 of Part 1 for the state reported in positions 14-15. (13 positions)
29-43	State reporting number	Enter the primary state reporting number for the taxpayer assigned by the state unemployment agency. Left justify and blank fill as necessary. (15 positions)
NOTE: Positions 44-78 relate to the initial experience rate of the state identified in positions 14-15.		
44-55	Taxable payroll as defined in state act	First entry Part 5, column 3. (12 positions)
56-59	Date an experience rate took effect	First entry Part 5, column 4, From-Date. If continued from previous year enter 0101. (Format is MMDD—Enter blanks if not present).
60-63	Date an experience rate was changed	First entry part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
64-68	State experience rate	First entry part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
69-78	Contributions actually paid to state	Enter Part 5, column 9, first entry.
NOTE: Positions 79-113 relate to the second experience rate (if asserted) of the state identified in positions 14-15.		
79-90	Taxable payroll as defined in state act	Second entry Part 5, column 3. (12 positions)
91-94	Date an experience rate took effect	Second entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).
95-98	Date an experience rate was changed	Second entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
99-103	State experience rate	Second entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
104-113	Contributions actually paid to state	Enter Part 5, column 9, second entry.
NOTE: Positions 114-148 relate to the third experience rate (if asserted) of the state identified in positions 14-15.		
114-125	Taxable payroll as defined in state act	Third entry Part 5, column 3. (12 positions)
126-129	Date an experience rate took effect	Third entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).

FORM 940 TAX DATA "B3" RECORD—Continued

Tape Position	Element Name	Entry or Description
130-133	Date an experience rate was changed	Third entry part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
134-138	State experience rate	Third entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
139-148	Contributions actually paid to state	Enter Part 5, column 9, third entry.

NOTE: Positions 149-183 relate to the fourth experience rate (if asserted) of the state identified in positions 14-15.

Tape Position	Element Name	Entry or Description
149-160	Taxable payroll as defined in state act	Fourth entry Part 5, column 3.
161-164	Date an experience rate took effect	Fourth entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).
165-168	Date an experience rate was changed	Fourth entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
169-173	State experience rate	Fourth entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
174-183	Contributions actually paid to state	Enter Part 5, column 9, fourth entry.

Note: Positions 184-353 relate to the second state (positions 184-185) reported on a "B3" Record. If more than 4 experience rate changes occur in a year, the return must be filed on paper.

Tape Position	Element Name	Entry or Description
184-185	State-Code	The two character state code assigned by the U.S. Postal Service for a state other than that of the taxpayer's residence. if not applicable blank fill.
186-198	Credit reduction wages for unrepaid advances to the states	Enter the wages included on line 6 of Part 1 for the state reported in positions 184-185 (13 positions)
199-213	State reporting number	Enter the primary state reporting number for the taxpayer assigned by the state unemployment agency. Left justify and blank fill as necessary. (15 positions)

Note: Positions 214-248 relate to the initial experience rate of the state reported in positions 184-185.

Tape Position	Element Name	Entry or Description
214-225	Taxable payroll as defined in state act	First entry Part 5, column 3.
226-229	Date an experience rate took effect	First entry Part 5, column 4, From-Date. If continued from previous year enter 0101. (Format is MMDD—Enter blanks if not present).
230-233	Date an experience rate was changed	First entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).

FORM 940 TAX DATA "B3" RECORD—Continued

Tape Position	Element Name	Entry or Description
234-238	State experience rate	First entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
239-248	Contributions actually paid to state	Enter part 5, column 9, first entry.

NOTE: Positions 249-283 relate to the second experience rate (if asserted) of the state identified in positions 184-185.

Tape Position	Element Name	Entry or Description
249-260	Taxable payroll as defined in state act	Second entry part 5, column 3.
261-264	Date an experience rate took effect	Second entry Part 5, column 4, From Date. (Format is MMDD—Enter blanks if not present).
265-268	Date an experience rate was changed	Second entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
269-273	State experience rate	Second entry part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
274-283	Contributions actually paid to state	Enter part 5, column 9, second entry.

NOTE: Positions 284-318 relate to the third experience rate (if asserted) of the state identified in positions 184-185.

Tape Position	Element Name	Entry or Description
284-295	Taxable payroll as defined in state act	Third entry Part 5, column 3.
296-299	Date an experience rate took effect	Third entry Part 5, column 4, From-Date. (format is MMDD—Enter blanks if not present).
300-303	Date an experience rate was changed	Third entry part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
304-308	State experience rate	Third entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
309-318	Contributions actually paid to state	Enter part 5, column 9, third entry.

NOTE: Positions 319-353 relate to the fourth experience rate (if asserted) of the state identified in positions 184-185.

Tape Position	Element Name	Entry or Description
319-330	Taxable payroll as defined in state act	Fourth entry Part 5, column 3.
331-334	Date an experience rate took effect	Fourth entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).

FORM 940 TAX DATA "B3" RECORD—Continued

Tape Position	Element Name	Entry or Description
335-338	Date an experience rate was changed	Fourth entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
339-343	State experience rate	Fourth entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
344-353	Contributions actually paid to state	Enter Part 5, column 9, fourth entry.

NOTE: Positions 354-523 relate to the third state reported on a "B3" Record. If more than 4 experience rate changes occur in a year, the return must be filed on paper.

Tape Position	Element Name	Entry or Description
354-355	State-Code	The two character state code assigned by the U.S. Postal Service for a state other than that of the taxpayer's residence. If not applicable blank fill.
356-368	Credit reduction wages for unrepaid advances to the states	Enter the wages included on line 6 of Part 1 for the state reported in positions 354-355.
369-383	State reporting number	Enter the primary state reporting number for the taxpayer assigned by the state unemployment agency. Left justify and blank fill as necessary.

NOTE: Positions 384-418 relate to the initial experience rate of the state identified in positions 354-355.

Tape Position	Element Name	Entry or Description
384-395	Taxable payroll as defined in state act	First entry Part 5, column 3.
396-399	Date an experience rate took effect	First entry Part 5, column 4, From-Date. If continued from previous year enter 0101. (Format is MMDD—Enter blanks if not present).
400-403	Date an experience rate was changed	First entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
404-408	State experience rate	First entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
409-418	Contributions actually paid to state	Enter Part 5, column 9, first entry.

NOTE: Positions 419-453 relate to the second experience rate (if asserted) of the state identified in positions 354-355.

Tape Position	Element Name	Entry or Description
419-430	Taxable payroll as defined in state act	Second entry Part 5, column 3.
431-434	Date an experience rate took effect	Second entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).

FORM 940 TAX DATA "B3" RECORD—Continued

Tape Position	Element Name	Entry or Description
435-438	Date an experience rate was changed	Second entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
439-443	State experience rate	Second entry part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
444-453	Contributions actually paid to state	Enter Part 5, column 9, second entry.

NOTE: Positions 454-488 relate to the third experience rate (if asserted) of the state identified in positions 354-355.

454-465	Taxable payroll as defined in state act	Third entry Part 5, column 3.
466-469	Date an experience rate took effect	Third entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).
470-473	Date an experience rate was changed	Third entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
474-478	State experience rate	Third entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
479-488	Contributions actually paid to state	Enter Part 5, column 9, third entry.

NOTE: Positions 489-523 relate to the fourth experience rate (if asserted) of the state identified in positions 354-355.

489-500	Taxable payroll as defined in state act	Fourth entry Part 5, column.
501-504	Date an experience rate took effect	Fourth entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).
505-508	Date an experience rate was changed	Fourth entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
509-513	State experience rate	Fourth entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
514-523	Contributions actually paid to state	Enter Part 5, column 9, fourth entry.

NOTE: Positions 524-693 relate to the fourth state reported on a "B3" Record. If more than 4 experience rate changes occur in a year, the return must be filed on paper.

524-525	State-Code	The two character state code assigned by the U.S. Postal Service for a state other than that of the taxpayer's residence. If not applicable blank fill.

FORM 940 TAX DATA "B3" RECORD—Continued

Tape Position	Element Name	Entry or Description
526-538	Credit reduction for unrepaid advances to the states	Enter the wages included on line 6 of Part 1 for the state reported in positions 524-525. (13 positions)
539-553	State reporting number	Enter the primary state reporting number for the taxpayer assigned by the state unemployment agency. Left justify and blank fill as necessary. (15 positions)

Note: Positions 554-588 relate to the initial experience rate of the state reported in positions 524-525.

554-565	Taxable payroll as defined in state act	First entry Part 5, column 3.
566-569	Date an experience rate took effect	First entry Part 5, column 4, From-Date. If continued from previous year enter 0101. (Format is MMDD—Enter blanks if not present).
570-573	Date an experience rate was changed	First entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
574-578	State experience rate	First entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
579-588	Contributions actually paid to state	Enter part 5, column 9, first entry.

Note: Positions 589-623 relate to the second experience rate of the state reported in positions 524-525.

589-600	Taxable payroll as defined in state act	Second entry Part 5, column 3.
601-604	Date an experience rate took effect	Second entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present)
605-608	Date an experience rate was changed	Second entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
609-613	State experience rate	Second entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal
614-623	Contributions actually paid to state	Enter Part 5, column 9, second entry.

Note: Positions 624-658 relate to the third experience rate of the state reported in positions 524-525.

624-635	Taxable payroll as defined in state act	Third entry Part 5, column 3.
636-639	Date an experience rate took effect	Third entry Part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).

FORM 940 TAX DATA "B3" RECORD—Continued

Tape Position	Element Name	Entry or Description
640-643	Date an experience rate was changed	Third entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
644-648	State experience rate	Third entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
649-658	Contributions actually paid to state	Enter Part 5, column 9, third entry.

Note: Positions 659-693 relate to the fourth experience rate of the state reported in positions 524-525.

Tape Position	Element Name	Entry or Description
659-670	Taxable payroll as defined in state act	Fourth entry Part 5, column 3.
671-674	Date an experience rate took effect	Fourth entry part 5, column 4, From-Date. (Format is MMDD—Enter blanks if not present).
675-678	Date an experience rate was changed	Fourth entry Part 5, column 4, To-Date. If the rate is continued to the next calendar year enter 1231. (Format is MMDD—Enter blanks if not present).
679-683	State experience rate	Fourth entry Part 5, column 5. If no state experience rate is assessed by the state and only a flat fee is imposed enter zeroes. If present, express as a five position decimal.
684-693	Contributions actually paid to state	Enter part 5, column 9, fourth entry.

.10 Checkpoint Totals "C" Record

1. Write this record after each 100 or fewer Tax Data "B" Records whether "B1," "B2" or "B3". Each Checkpoint Totals "C" Record must contain a count of each type of Tax Data "B" Record and the sum of Total Taxes on all "B1" Records to this point.

2. The checkpoint totals "C" Record must be followed by a Tax Data "B" Record except as follows: If the Checkpoint totals "C" Record is at the end of the reel, it will be followed by an End of Reel "F" Record. If the Checkpoint Totals "C" Record is at the end of the file, it is followed by an End of file "E" Record.

3. All Checkpoint Totals "C" Records must be fixed length. All money amount fields will contain dollars and cents. The Checkpoint Totals "C" Records cannot be followed by a Tape mark.

FORM 940 AGENT "C" RECORD

Note: All amounts are to be entered right justified and zero filled. This record must follow each group of 100 Tax Data "B" Records or less.

Tape Position	Element name	Entry or Definition
1	Record Type	Enter "C".
2-7	Number of "B1"	Enter the sum of "B1" Records you are reporting since the last "C" Record.
8-13	Number of "B2" Records	Enter the sum of "B2" Records you are reporting since the last "C" Record.

FORM 940 AGENT "C" RECORD—Continued

Tape Position	Element Name	Entry or Definition
14-19	Number of "B3" Records	Enter the sum of "B3" Records you are reporting since the last "C" Record.
20-35	Total "B1" Record Taxes	Enter the sum of the taxes on all "B1" Records you are reporting since the last "C" Record.

.11 End of File "E" Record

1. Write this record after the last Checkpoint totals "C" Record.
2. All money amounts will contain dollars and cents.
3. All End of File "E" Records must be fixed length.
4. This record can be followed only be a tape mark or tape mark and trailer label on a reel.

FORM 940 AGENT "E" RECORD

Note: All amounts are to be entered right justified. This record type must be the last record on the arent's tape file.

Tape Position	Element Name	Entry or Definition
1	Record Type	Enter "E".
2-7	Number of "B1" Records	Enter the sum of "B1" Records you are reporting on the file.
8-13	Number of "B2" Records	Enter the sum of "B2" Records you are reporting on the file.
14-19	Number of "B3" Records	Enter the sum of "B3" Records you are reporting on the file.
20-35	Total "B1" Record Taxes	Enter the sum of the taxes on all "B1" Records on the file.

12 End of Reel "F" Record

1. Write this record when the end of the normal writing area of each reel has been reached, but all records in the file have not been written. This record indicates that there are additional records. Each End of Reel "F" Record must contain a count of each type of "B" Record and the sum of Total Taxes reported for all "B1" Records on that reel.

2. The End of Reel "F" Record cannot be followed by an Agent "A" Record, Tax Data "B" Record, Checkpoint Totals "C" Record or an End of File "E" Record. Only a tape mark or a tape mark and trailer label can follow this record.

3. Do not use this record on the final reel of the file being transmitted.

FORM 940 Agent "F" Record

Note: All amounts are to be entered right justified. This record must be present at the end of each tape reel in a multiple reel file, except the last tape reel which must contain an End of File "E" Record as its last record.

Tape Position	Element Name	Entry or Definition
1	Record Type	Enter "F".
2-7	Number of "B1" Records	Enter the sum of "B1" Records you are reporting on the reel.
8-13	Number of "B2" Records	Enter the sum of "B" Records you are reporting on the reel.
14-19	Number of "B3" Records	Enter the sum of "B3" Records you are reporting on the reel.
20-35	Total "B1" Record Taxes	Enter the sum of the taxes on all "B1" Records on the reel.

SEC. 12. Post Office States Codes

Enter the official two position Post Office State Code abbreviations for States and Territories in the Agent "A" Records and Tax Data "B" Records according to the following:

STATE	CODE
Alabama	AL
Alaska	AK
Arizona	AZ
Arkansas	AR
California	CA
Colorado	CO
Conneticut	CT
Delaware	DE
District of Columbia	DC
Florida	FL
Georgia	GA
Hawaii	HI
Idaho	ID
Illinois	IL
Indiana	IN
Iowa	IA
Kansas	KS
Kentucky	KY
Louisiana	LA
Maine	ME
Maryland	MD
Massachusetts	MA

Nevada	NV
New Hampshire	NH
New Jersey	NJ
New Mexico	NM
New York	NY
North Carolina	NC
North Dakota	ND
Ohio	OH
Oklahoma	OK
Oregon	OR
Pennsylvania	PA
Rhode Island	RI
South Carolina	SC
South Dakota	SD
Tennessee	TN
Texas	TX
Utah	UT
Vermont	VT
Virginia	VA
Washington	WA
West Virginia	WV
Wisconsin	WI
Wyoming	WY
Puerto Rico	PR
Virgin Islands	VI
Guam	GU

SEC. 13. EXEMPTION CODES

The following exemption codes are used in the two position fields in the "B1" and "B2" Records.

The following exemption codes are group level exemption codes. If an asterisk is present before the exemption code then a lower level subclassification is present on a later page. If the filing agent cannot provide the subclassification, the higher level classification is sufficient.

Exemption Code	Special classes of employment, special types of payments
01	Agricultural labor
02	Disabled worker's wages paid after year in which worker became entitled to disability benefits under the Social Security Act.
03	Domestic service in college clubs, fraternities and sororoties if employer paid cash wages less than $1000 in any calendar quarter in the current or preceding year.
04	Educational assistance program payments by employer under section 127 of the Code.
05	Employers whose taxibility depends upon number of employees and who meet the requirements set forth in Circular E.
06	Foreign Government and International Organizations.
07	Industrial homeworkers who are statutory employees.
08	Household workers (see Circular E for specifics).
09	Interns working in hospitals.
10	Ministers of churches performing duties as same.
11	Members of religious orders who have taken a vow of poverty and are instructed by the order to perform services for the order, agency of the supervising church or associated institution.
12	Members of religious orders who have not taken a vow of poverty and are instructed by the order to perform services for the order, agency of the supervising church or associated institution.
13	Reimbursement for moving expenses that may be deductible by employee.
14	Newspaper carrier under age 18 delivering to customers.
15	Newspapers and magazine vendors buying at fixed prices and retaining excess from sales to customers.
16	Non-cash payments for household work, agricultural labor and service not in the course of the employer's trade or business.
17	Patients employed by hospitals.

Exemption Code	Special classes of employment, special types of payments
18	Railroads, etc.—Payments subject to Railroad Retirement Tax Act and Railroad Unemployment Insurance Act.
19	Qualified real estate agents and direct sellers.
20	Service not in the course of the employer's trade or business other than on a farm operated for profit (cash payments only).
21	Standby employees (age 65 or over) doing no actual work in period for which paid.
22	Employees of State governments and political subdivisions.
23	Supplemental unemployment compensation plans.
24	Tips over $20 a month (See Circular E for details).
25	Tips less than $20 a month.
*30	Aliens.
*35	Family employees.
*40	Federal employees.
*45	Fishing and related activities.
*50	Foreign service by U.S. citizens.
*55	Insurance agents or soliciters.
*60	Meals and lodging (see Circular E).
*65	Non-profit organizations.
*70	Retirement and pension plans.
*75	Sickness or injury payments.
*80	Students.
	Subdivisions for Aliens classification
31	Resident aliens performing service outside the U.S. and meeting the requirements set down in Circular E.
32	Canadian and Mexican non-resident aliens working in the U.S. who are employed in railroad service.
33	Non-resident alien who is a student, scholar, trainee, teacher, etc. who meets the requirements of a non-immigrant alien under section 101(a)(15)(f) or (j) of Immigration and Naturalization Act.
34	Non-resident alien working on American vessel or aircraft outside U.S. (See Circular E for details).
	Subdivisions for Family Employees classification
36	Son or daughter under 21 employed by parent (or by partnership consisting only of parents); wife employed by husband or husband employed by wife.
37	Parent employed by son or daughter.
	Subdivisions for Federal Employees classifcation
41	Members of uniformed services; Young Adult Conversations Corps, Job Corps, or National Volunteer Antipoverty Program or Peace Corps Volunteers.
42	All others (See Circular E).
	Subdivisions for Fishing and related activities classification
46	First, sponges, etc. other than salmon or halibut on vessels of less than 10 tons.
47	Individual has arrangement with the owner of a boat and is not paid in cash, but receives a share of the catch. This is not applicable to salmon or halibut activities or on vessels greater than 10 tons, or where the operating crew is normally more than 9 persons.
	Subdivisions for Foreign Service classification
51	U.S. Government employee.
52	Employees of foreign subsidiaries of domestic corporations and other private employers.

Exemption Code	Special classes of employment, special types of payments
	Subdivisions for insurance agents or solicitors classification
56	Full-time life insurance salesperson who is not a common law employee and paid soley by commissions.
57	Other salesperson of life, casualty, etc. insurance who is not a common law employee and paid solely by commissions.
	Subdivisions for Meals and Lodging classification
61	Meals furnished for employer's convenience and on the employer's premises.
62	Lodging furnished for employer's convenience and on the employer's premises.
	Subdivisions for non-profit organization classification
66	Religious, educational, charitable, etc. organizations described in section 501(c)(3) of the Code and exempt from income tax under section 501(a).
67	Corporations organized under Act of Congress described in section 501(c)(1) of the Code (See Circular E).
68	Other organizations exempt under section 501(a) of the Code. (See Circular E).
	Subdivisions for retirement and pension plans classification
71	Employer contributions to a simplified employee plan, individual retirement arrangement (SEP-IRA).
72	Employer contributions to section 403(b) of the Code annuity contracts.
73	Retirement and pension plans.
	Subdivisions for sickness or injury payments classification
76	Workmen's compensation law or insurance contract payments.
77	Certain employer plans payments.
78	No employer plans at end of 6 calendar months after calendar month employee last worked for employer.
	Subdivisions for Students classification
81	Student working for private school or university, if enrolled and regularly attending classes.
82	Student performing services for auxiliary nonprofit organization described in section 509(a)(3) of the Code which is organized and operated exclusively for the benefit of and supervised or controlled by a school, college or university at which the student is enrolled and regularly attending classes.
83	Student working for a public school, college or university, if enrolled and regularly attending classes, and student nurse working for a public hospital.
84	Spouse of student provided the conditions set forth in Circular E are met.
85	Student enrolled in a full time program at a nonprofit or public institution. Student service must be taken for credit at the institution and combine academic instruction with work experience. It must be an integral part of the program and the institution must have so certified to the employer. See Circular E for more information.
86	Student nurse working for hospital.

26 CFR 601.602: Forms and instructions.
(Also Part I, Sections 3504, 6011; 31.3504-1, 31.6011(a)-1.)

Rev. Proc. 86-27

SECTION 1. PURPOSE

.01 The purpose of this revenue procedure is to provide a means whereby reporting agents preparing Form 941, Employer's Quarterly Federal Tax Return, and Form 941E, Quarterly Return of Withheld Federal Income Tax, for groups of taxpayers can furnish the required information in the form of magnetic tape instead of paper documents.

.02 This revenue procedure reflects the current changes to the tape specifications.

.03 This revenue procedure supersedes Rev. Proc. 84-11, 1984-1 C.B. 414. If a current reporting agent is unable to comply with the changes in specification, he/she should contact the local Magnetic Tape Coordinator for Business Tax Returns for further instructions.

SEC. 2. APPLICATION FOR TAPE REPORTING

.01 Agents who desire to file authorized federal tax returns on magnetic tape must first file a letter of application or submit Form 4995, Application for Magnetic Tape Filing of Federal Business Tax Returns (previously known as Application for Magnetic Tape Filing of Form 941, Employer's Quarterly Federal Tax Return). A separate application must be submitted for each type of tax return filed (e.g. 941, 941E, 940). The letter of application should be addressed to the Director, Internal Revenue Service Center, Attention: Magentic Tape Coordinator for Business Tax Returns, of the service center that serves the primary business address of the reporting agent. Addresses of the Internal Revenue Service Centers are shown in Section 11 of this revenue procedure. The letter of application must contain the following:

1. Name, address and EIN (Employer Identification Number) of the person, organization, or firm making the application.
2. Name, title, and telephone number of the person to contact regarding the application.
3. Type and nature of equipment to be used to prepare the tape file, i.e., manufacturer and model of main frame and tape drives, tape width, density (characters per inch), and recording mode (e.g. Excess 3, Octal, etc.).
4. List of the taxpayers to be included on the initial establishment of the Magnetic Tape Filing system. The list must be in triplicate with the data shown in the exact order as Exhibit 1. Show each taxpayer's name, complete address (including Zip Code), and EIN: sort into EIN sequence. See Section 6.03 for additional details.
5. Service center where paper tax returns were last filed.
6. Signature of the agent or agent's employee authorized to prepare federal tax returns for taxpayers.
7. An agreement by the reporting agent to keep copies of the Powers of Attorney (POA) on file at the agent's principal place of business for examination by the Service upon request. Such copies must be retained until the statute of limitations for the last return filed under its authority expires.
8. An agreement to fully pay the tax by Federal Tax Deposits (FTDs).

NOTE: This revenue procedure does not restrict a non-financial organization who performs a payroll or tax service from being a reporting agent. See Rev. Proc. 80-31, 1980-2 C.B. 760, concerning the requirements under which FTDs can be made by the reporting agent.

9. The first tax period for which the agent plans to file returns on magnetic tape.
10. The estimated volume of returns the agent plans to file by type of return (e.g. 941, 941E or 940).

SEC. 3. POWER OF ATTORNEY

.01 A POA must be submitted for each filer on the list attached to Form 4995 or the letter of application. The POA must be submitted for each filer on the list attached to Form 4995 or the letter of application. The POA may be submitted on Form 2848, Power of Attorney and Declaration of Representative, which is available on request; or any other instrument which clearly states that the reporting agent is granted the authority to file and sign the return. The POA filed under this revenue procedure is not subject to the rules contained in the Conference and Practice Requirements (Treasury Regulation 601.502). The POA may cover the filing of both Forms 940 and 941 if desired.

.02 Both the taxpayer, or his authorized representative, and the reporting agent must sign the POA. The signed document will remain in effect until such time as it is revoked by the taxpayer, terminated by written notification from the reporting agent, or expires under its own terms.

1. The following persons may execute a POA on behalf of a corporation or other business taxpayer:

(a) The individual, if the person required to make the return is an individual;

(b) The president, vice president, or other principal officer, if the person required to make the return is a corporation;

(c) A responsible and duly authorized member or officer having knowledge of its affairs, if the person required to make the return is a partnership or other unincorporated organization;

(d) The fiduciary, if the person required to make the return is a trust or estate; or

(e) An agent who is duly authorized in accordance with section 31.6011(a)-7 of the Employment Tax Regulations.

.03 The scope of the POA for magnetic tape filing will be governed according to the following:

1. The POA will delegate to the reporting agent the power to sign and file appropriate federal tax returns.

2. The POA becomes effective for the tax period the agent notifies the service that the employer or filer is being added to the Magnetic Tape Filing system and remains in effect for subsequent periods until revoked, terminated or expired.

3. The POA is automatically revoked when the reporting agent notifies the Service that a taxpayer is no longer included in the Magnetic Tape Filing system.

4. The receipt of a POA for magnetic tape filing has no effect on prior POA on file for other purposes for a given taxpayer.

5. The POA for magnetic tape filing will be a limited POA, i.e., notices, refunds and other output resulting from filing on magnetic tape will be mailed to the taxpayer.

6. Requests from a reporting agent for information or adjustments or an account for which the taxpayer has authorized magnetic tape filing will be honored by the service center.

7. Requests for address changes may not be made by the reporting agent. Requests for address changes for taxpayers that are reported under magnetic tape filing will be processed only if they originate with one of the following:

(a) The taxpayer,

(b) An employee of the Service, or

(c) An attorney-in-fact if the attorney has a full POA for all tax matters concerning a taxpayer, and has filed a copy of the POA with the Service.

SEC. 4. APPROVAL OF AGENTS APPLICATION

.01 The Service will act on applications and notify applicants of authorization or disapproval within 30 days of receipt of Form 4995 or a letter of application as defined in Section 2.

.02 Generally, reporting agents using equipment compatible with the Service's can presume that tape filing will be approved. Compatible tape characteristics are shown in Section 13. If the reporting agent has the capability to prepare several types of tapes, the Service prefers that compatible tapes be prepared.

.03 If the reporting agents propose to submit convertible tapes, i.e., tapes requiring translation, the Service will either translate these tapes or provide translation through other government agencies. Magnetic tape filing will be disapproved when the Service is unable to obtain facilities to translate a reporting agent's file to a compatible form. (See Sections 12 and 13 for specifications.)

.04 Once authorization to file tax data on magnetic tape has been granted to a reporting agent, such approval will continue to effect in succeeding tax periods as long as the requirements of this revenue procedure are met, and there are no equipment changes by the reporting agent. However, new applications are required if users change from compatible tapes to equipment producing tapes that require translation, or if they discontinue magnetic tape filing for one or more periods, then decide to resume this method of reporting.

SEC. 5. EFFECT ON PAPER DOCUMENTS

.01 Authorization to file on magnetic tape does not prohibit the filing of paper tax returns, but merely permits filing on such returns through the Magnetic Tape Filing system. If for some reason (e.g. late receipt of records), an agent prefers to file a paper return for a given taxpayer, the agent may do so even after having been given authorization to file that taxpayer's return on magnetic tape.

.02 The initial filing of tax returns on magnetic tape will be on a trial basis. Each taxpayer included on the magnetic tape must also be on the paper form until authorized by the Service to discontinue filing returns on paper. The paper returns must be arranged in the same period as the returns reported on the magnetic tape and filed at the same location and in the same shipment. In general, the Service will be able to notify the reporting agent to discontinue filing paper returns within one quarter after the initial filing of magnetic tape. The notification will depend upon the feasibility of processing the magnetic tape submitted.

.03 Paper and magnetic tape returns for the same tax period at the same time must never be filed by a reporting agent for a taxpayer unless the returns are filed during the trial period for the reporting agent described in section 5.02.

.04 Form 941/941E filers are required to transmit with their return, copies of any W-4's claiming 14 or more exemptions. If the reporting agent files magnetic tape 941/941E for a taxpayer, but does not report W-4 information or magnetic tape, the paper W-4's should be submitted to the service center with a cover letter.

SEC. 6. FILING TAPE RETURNS

.01 Packaging, shipping, and mailing instructions will be provided in the letter granting initial approval issued by the Service in response to the letter of application for magnetic tape filing.

.02 The Service will allow a tape return to be submitted for those individually approved magnetic tape filers until the reporting agent formally notifies IRS that specific employers are being deleted from their current magnetic tape filing inventory.

.03 Section 6091(b) of the Internal Revenue Code requires that tax returns be filed at the Internal Revenue District (or service center serving that district) that services the legal residence or principal business address of the taxpayer. Thus, reporting agents must normally file taxpayer's returns at the appropriate service center as described above even if it means submitting magnetic tapes to more than one service center. This rule may not be violated unless a reporting agent has applied for and received permission from the Service to do so. Contact your Magnetic Tape Coordinator for Business Tax Returns for details.

.04 Approval by the Service of Form 4995 or a letter of application allows a reporting agent to file at any service center that services his/her clients. If a reporting agent wishes to file at additional service centers, he/she should notify the Magnetic Tape Coordinator for Business Tax Returns of the service center where he/she originally applied at least 90 days prior to the initial transmittal to the new service center.

.05 The reporting agent will be provided with a validated copy of the agent's listing for taxpayers authorized to file on magnetic tape. This authorization will contain each taxpayer's EIN, four position alpha Name Control, and the DO (District Office) Code. This authorizaiton will be the source of the EIN and Name Control to be used in magnetic tape by the reporting agent as an identification of each taxpayer.

It is imperative that this Name Control be retained in the agent's records and be used in each taxpayer's Tax Data "B" Record (positions 72-75). It is used by the Service to ensure the correct recording of the taxpayer's return. Failure to use the correct Name Control can result in delays in processing the return and notices of delinquent filing being sent to the taxpayer.

.06 Enclose in the first box of the tape shipment to the service center the following:

1. Form 4996, Magnetic Tape Filing Transmittal for Federal Business Returns (previously known as Magnetic Tape Filing Transmittal for Form 941, Employer's Quarterly Federal Tax Return) or a letter of transmittal containing the information described below. File the Form 4996 or the letter of transmittal in duplicate.

2. The letter of transmittal should include:

a. Name and address of reporting agent

b. Type of tax return filed on the magnetic tape

c. Tax period

d. Number of tax returns filed on accompanying tape

e. Total taxes reported

f. Total taxes deposited

g. Service center in which the POA for filing returns on magnetic tape is located.

h. Total forms 941c and other attachments to support adjustments included in this shipment.

i. Signature of transmitter, title and date.

3. A control listing identifying actual taxpayers previously approved by the Service for magnetic tape filing that are contained on the current tape file being submitted. List the taxpayers in EIN sequence with each taxpayer's name and address.

4. The reporting agent should notify the Magnetic Tape Coordinator for Business Tax Returns if the agent does not receive notification of the receipt of the transmittal within 15 days from the date he/she sent the transmittal.

SEC. 7. ADDING AND DELETING FILERS FROM MAGNETIC TAPE FILING SYSTEM

.01. When adding or deleting filers, the Service must receive (in tripliate and in the same format as shown on Exhibit 1) a listing which contains the complete names, addresses and EIN's of the taxpayers the reporting agent wants added or deleted from the Magnetic Tape Filing system. the word "ADDITIONS" or "DELETIONS" should be entered after the title, "Agent's Listing," and the effective date.

.02 The Service will provide a validated copy of the updated agent's listing to the reporting agent. Under no circumstances is a new filer to be included on the Magnetic Tape Filing system until the validated copy is received from the Service.

.03 A POA authorization must be included for each taxpayer to be added to the Magnetic Tape Filing system.

.04 The reporting agent should indicate on the last magnetic tape return submitted for a filer that it is either the "Final Return" or a "Discontinued Filer" in the Tax Data "B" Record.

.05 The reporting agent may not always know that the final magnetic tape return for a particular taxpayer is being submitted at the time the tape is being sent in. When the reporting agent determines that the previous tape contained the last return to be prepared for the individual filer, action should be taken to notify the service center which authorized the magnetic tape filing of one of the following conditions:

1. The taxpayer is out of business (state the effective date) and will no longer be liable for filing returns (Final Return), or

2. The reporting agent will no longer be submitting returns on magnetic tape for the taxpayer who is still in business and is still liable for such returns (Discontinued Filer).

.06 Lists of proposed quarterly (Form 941/941E) filer additions, deletions, etc., must be received in the service center prior to the end of the second month of a quarter. This will permit the Service to properly validate applications and to respond to the agent within 30 days of receipt of the lists. However, at the time of filing, if the agent has not received a validated listing with the additions, he/she should not file a magnetic tape return for those taxpayers because he/she does not have the valid Name Control.

SEC. 8. DUE DATES

.01 The due dates prescribed for filing paper returns with the Service will also apply to magnetic tape filing of Federal business tax returns.

.02 In no case should returns with more than one date be included on one tape file.

SEC. 9. ADJUSTMENTS TO 941 AND 941E RETURNS

.01 Adjustments may be made on returns submitted on magnetic tape.

.02 Positions 329-338 of Tax Data "B" Record are used to report adjustment of social security (FICA) taxes reported. These positions must be used in conjunction with the FICA Adjustment Indicator (position 155) of the Tax Data "B" Record. If there is no adjustment of FICA taxes, the adjustment indicator should be zero. If there is an adjustment of FICA taxes, the adjustment indicator must be set to 1, 2, 3 or 4 depending on the circumstances explained as follows:

The FICA Adjustment Indicator should be set to 1 if the adjustment to FICA taxes consists only of the difference between the total social security taxes (positions 318-327) of the Tax Data "B" Record and the amount actually collected from your employees wages consists only of fractions of cents added or dropped due to rounding.

The FICA Adjustment Indicator should be set to 3 if the Adjustment To FICA Taxes consists only of total uncollected employee social security tax on tips (i.e. employee previously reached maximum limitation through combination of wages and tips).

The FICA Adjustment Indicator should be set to 4 if the Adjustment To FICA Taxes consists only of FICA tax on third-party sick pay for which the employer is not responsible.

If the description for the adjustment to FICA taxes listed above is not applicable or the adjustment to FICA taxes is significant for more than one reason, the FICA Adjustment Indicator should be set to 2, and a statement or Form 941c should be submitted with the tape identifying the taxpayer and explaining the adjustment to FICA tax. If the second reason for a FICA adjustment is "FRACTIONS ONLY," then it may be ignored and either "FICA TIP" or "sick pay" values may be used.

Note: A FICA tax adjustment is valid only on the Form 941 and is not valid on Form 941E.

.03 Adjustments to proceding quarters (income tax withholding adjustments) should be reported in positions 201-210 of the Tax Data "B" Record. Any magnetic tape return with a significant adjustment to preceding quarters should be supported by a statement submitted with the magnetic tape. The statement should identify the taxpayer and explain the adjustment. The Adjustment Indicator for Income Tax Withheld (position 156 of the Tax Data "B" Record) should be set to "1" if there is an adjustment or be set to zero if there is no adjustment.

.04 Adjustments to backup withholding should be reported in positions 356-374 of the Tax Data "B" Record. Any magnetic tape return with a significant adjustment to backup withholding should be supported by a statement submitted with the magnetic tape. The statement should identify the taxpayer and explain the adjustment. The Adjustment Indicator for Backup Withholding (position 157 of the Tax Data "B" Record) should be set to "1" if there is an adjustment or be set to zero if there is no adjustment.

.05 Include all statements and forms 941c with the magnetic tape shipment for approval and subsequent adjustment action.

SEC. 10. FILING FORMS W-2 (COPY A) WITH THE SOCIAL SECURITY ADMINISTRATION

The reporting agents who file Forms 941 on magnetic tape for employers must file the wage information directly with the Social Security Administration on tape or paper documents. For directions for tape filing, you may call or write the appropriate Service Center Magnetic Tape Coordinator for Business Tax Returns, or any Social Security Administration office and ask for Technical Information Bulletin 4a (TIB-4a), or you can write to the following address:

Social Security Administration
Bureau of Data Processing
P.O. Box 2317
Baltimore, MD 21203

SEC. 11. ADDITIONAL INFORMATION

Requests for additional copies of this revenue procedure, applications for magnetic tape filing, requests for copies of appropriate input record element specifications, and requests for tape filing information should be addressed to the Director, Internal Revenue Service Center, Attention: Magnetic Tape Coordinator for Business Tax Returns, at one of the following addresses:

1. North-Atlantic Region
   (a) Andover Service Center
   Project 105 Coordinator (Stop 481)
   310 Lowell Street
   Andover, MA 05501
   (b) Brookhaven Service Center
   Project 105 Coordinator (Stop 110)
   1040 Waverly Avenue
   Holtsville, NY 11742
2. Mid-Atlantic Region
   (a) Philadelphia Service Center
   Project 105 Coordinator (Drop Point 433)
   P.O. Box 245
   Bensalem, PA 19020
3. Central Region
   (a) Cincinnati Service Center
   Project 105 Coordinator
   (CSA:C Stop 43)
   P.O. Box 267
   Covington, KY 41019
4. Southeast Region
   (a) Atlanta Service Center
   Project 105 Coordinator
   P.O. Box 47-421
   Doraville, GA 30362
   (b) Memphis Service Center
   Project 105 Coordinator
   P.O. Box 30309
   Airport Mail Facility
   Memphis, TN 38130
5. Midwest Region
   (a) Kansas City Service Center
   P.O. Box 24551
   Kansas City, MO 64131
6. Southwest Region
   (a) Austin Service Center
   Management Support Branch
   (Stop 1055)
   P.O. Box 934
   Austin, TX 78767
7. Western Region
   (a) Ogden Service Center
   1160 West 1200 South
   Ogden, UT 84201
   (b) Fresno Service Center
   P.O. Box 12866
   Fresno, CA 93779

SEC. 12. CONVENTIONS AND DEFINITIONS

.01 Conventions

Certain conventions may be required by the programming system or equipment used by the reporting agent, with respect to header and trailer labels, record and tape marks. If present, the Service prefers that they adhere to American National Standards Institute (ANSI) X3.27 specifications. The Service will accept other specifications if the facilities to accommodate them can be found. The Service reserves the right to reject tapes with other than ANSI X3.27 specifications. The tapes must adhere to the following at a minimum:

(a) Label

(1) The first record on a reel only.

(2) In accordance with ANSI X3.27, Volume Header Label

(VOL1), First File Header Label (HDR1) and Second File Header Label (HDR2) are strongly preferred.

(b) Trailer Label

(1) The last record on a reel only.

(2) No restrictions apply as to number of characters or type of characters used.

(c) Record Mark

(1) No restrictions apply to record marks.

(d) Tape Mark

The tape mark should only follow an End of Reel "F" Record or an End of File "E" Record.

.02 Definitions

Element	Description
Reporting Agent	Person or organization preparing and filing magntic tape equivalents of Federal tax returns.
Taxpayer	Persons or organizations liable for the payment of tax. The taxpayer will be held responsible for the completeness, accuracy and timely submission of the magnetic tape files.
b	Denotes a blank position.
EIN	Employer Identification Number.
Record	A group of related fields of information, treated as a unit.
Blocked Records	Two or more records grouped together between interrecord gaps.
Blocking Factors	The number of records grouped together to form a block.
Unblocked Records	Single records written between interrecord gaps.
File	A file consists of all tape records submitted by a reporting agent.
Record Mark	Special character used either to limit the number of characters in data transfer or to separate blocked records on tape.
Tape Mark	Special character that is written on tape.
Special Character	Any character that is not a numeral, letter, or blank.
Reel	A spool of magnetic tape.
FTD	Federal Tax Deposit.
POA	Power of Attorney.

SEC. 13. MAGNETIC TAPE SPECIFICATIONS

.01 These specifications prescribe the required format and content of the records to be included in the file, but not the methods or equipment to be used in their preparation. A compatible tape file must conform to all of the following:

Type of tape	½ inch Mylar base, oxide coated
Recording density	800, 1600, or 6250 CPI (characters per inch)
Parity	Even or odd
Interrecord Gap	¾ inch
Recording Mode	7 channel binary coded decimal (BCD), 9 channel, EBCDIC, ASCII

.02 An acceptable file will contain, for each reporting agent, the following:

1. An Agent "A" Record,
2. A series of Tax Data "B" Records,
3. A series of Checkpoint "C" Records, and
4. An End of File "E" Record,
5. Multiple reel files will have an End of Reel "F" Record.

.03 All records including headers and trailers, if used, must be written at the same density.

.04 Affix an external label to each tape with the following information:

1. Name of reporting agent,
2. Number of tax returns submitted on this reel of tape,
3. Payment period in YYMM (Year, Year, month, month) format, for example 8109,
4. Density (800, 1600, 6250),
5. Channel (7 or 9),
6. Parity (odd or even),
7. Name of computer manufacturer,
8. Computer type (manufacturer's designation),
9. Tape Drive (manufacturer and type),
10. Sequence number of reel and total number of reels in file (for example, 1 of 3).

.05 Since the Service is not restricting magnetic tape filing or reporting agents with specific types of equipment, or prescribing the methods used to prepare the tape files, the Agent "A" Record, End of Reel "F" Record and End of File "E" Record perform the functions normally assigned to header and trailer labels and related conventions. The Agent "A" Records are written on the file for a given location of the reporting agent, the End of Reel "F" Record signals that no more Tax Data "B" Records are written on the reel, and the End of File "E" Record indicates that there is no further data to be processed.

.06 Record Length

1. The tape records prescribed in the specifications may be blocked or un-

blocked subject to the following:

(a) A block may not exceed 12,100 tape positions.

(b) If the use of blocked records would result in a short block at the end of a Tax Data "B" Record and the next record is too large to include in the block, the remaining positions of the block should be filled with 9's or spaces. No other digits or characters other than 9's or spaces are specified or acceptable for filling (or padding) any tape input data blocks.

(c) Two forms of blocking are acceptable:

(1) Only Tax Data "B" Records are blocked; all other records are unblocked.

(2) All records, except header and trailer labels, if used, are blocked. In this case, if employers from more than one location are reported on the same tape, the Agent "A" Record cannot be in the middle of a block, but must be the first record in a block.

.07 Data

1. Only character data may be used. This means numeric fields cannot use overpunched signs and should be right justified and zero filled. Special characters should be limited to =, &, % or / and can only be used in the name line fields and the street address fields of Agent "A" Record and Tax Data "B" Record. Otherwise, characters must be numeric or alphabetic.

.08 Agent "A" Record

1. Identifies the reporting agent who prepares and transmits the tape file. When multiple reels are required for a single file, the Agent "A" Record must be repeated at the first record (second record if header labels are used) on every succeeding reel in the file, and the reel number must be incremented by 1 for each tape reel after the first reel. A reporting agent may include Tax Data "B" Records prepared at more than one location, on the same tape, but they must have the same DO Code; however, Tax Data "B" Records prepared at different locations with different DO Codes must be on separate files and preceded by an Agent "A" Record. Contact the Magnetic Tape Coordinator for Business Tax Returns for additional details if necessary.

AGENT "A" RECORD

Tape Position	Element Name	Agent Data Record Entry or Definition
1	Record Type	Enter "A". Must be first character of each Agent "A" Record.
2-3	DO Code	Enter two numeric digit District Office Code furnished by IRS.
4-5	Tax Period	Enter YQ (Year, Qtr.). For example: tax period "14" represents the year 1981 and the fourth quarter of the year.
6-7	Reel Number	Serial number assigned by the reporting agent to each reel, starting with 01. If header labels are used, this should be the same as Reel Sequence Number.
8-16	EIN—Reporting Agent	Enter the 9 numeric characters of the reporting agent's EIN. DO NOT include the hyphen.
17-20	Type of Return	Enter "941b" or "941E" is appropriate. "b" means blank.
21-23	Record Length—Agent "A" Record	Enter number of positions (178) for Agent "A" Record. If a Record mark is used at the end of each record, include it in the count. DO NOT include in count if used only at the end of the block.
24-27	Record Length "B" Record	Enter number of positions (964) for "B" Record. If a record mark is used at the end of each record, include it in the count. DO NOT include in count if used only at the end of the block.
28-67	1st Name Line Reporting Agent	Enter first name line of reporting agent. Left justify and fill with blanks.
68-107	2nd Name Line Reporting Agent	Enter second name line of reporting agent. Left justify and fill with blanks. Fill with blanks if not required.
108-147	Street Address—Reporting Agent	Enter street address of reporting agent. Left justify and fill with blanks. Fill with blanks if street not required.
148-167	City—Reporting Agent	Enter city of reporting agent. Left justify and fill with blanks.

AGENT "A" RECORD—Continued

Tape Position	Element Name	Entry or Description
168-169	State—Reporting Agent	Enter the official Post Office two position state code. See Section 14 for a list of the state code abbreviations.
170-178	Zip Code Reporting Agent	Enter Zip Code of reporting agent. Left justify, and blank fill.

.09 Form 941/941E Tax Data "B" Record

1. Contains tax information reported by the reporting agent. The number of Tax Data "B" Records appearing on one tape reel will depend on the number of taxpayers represented (only one tax return for each EIN).

2. Tax Data "B" Records may be blocked together with Record Types A, C, E, and F unblocked. Records should have a blocking factor for which blocks will not exceed 12,100 tape positions. All records must be fixed length and for the current tax period. All money amount fields must contain dollars and cents, must be right justified with zero filling on left and must be zero filled if non-significant. Fields identified as indicators or signs should always carry a value. Other non-money fields must be left justified and blank filled on right with blank filling of non-significant fields.

TAX DATA "B" RECORD

Tape Position	Element Name	Entry or Definition
1	Record Type	Enter "B". Must be first character of each Form 941/941E Tax Data "B" Record.
2-36	Employer's name first line	Enter 1st name line of taxpayer. Left justify and fill with blanks. First five positions must be filled.
37-71	Employer's name second line	Enter 2nd name line of taxpayer. Left justify and fill with blanks.
72-75	Name Control	Enter the 4 position alpha/numeric name control from the validated Agent's Listing. Blanks may be present in the low order position(s).
76-84	EIN of employer	Enter the 9 numeric characters of the EIN. Do not enter a hyphen. blanks are not acceptable.
85-119	Street address	Enter the street address of the taxpayer. Left justify and blank fill.
120-139	City of employer	Enter the city in which the taxpayer is located. Left justify and fill with blanks. First three positions must be filled.
140-141	State of employer	Enter the official Post Office two position state code. See Section 14.
142-150	Zip Code of employer	Enter the nine (9) position Zip Code if applicable. If not, enter the five (5) position Zip Code left justified and leave the last four positions blank.
151	Address Change-Indicator	Enter zero if taxpayer's address has not changed since previous filing of Form 941/941E return; otherwise enter "1".
152	New Account Indicator	Enter zero if reporting agent has reported the taxpayer on magnetic tape in the prior quarter. Enter "1" if this is the first consecutive quarter the reporting agent is reporting the taxpayer on magnetic tape. (If the taxpayer has been reported on magnetic tape, is discontinued from tape filing for one or more quarters, and this is the first quarter the taxpayer is again being reported under the Magnetic Tape Filing system, enter "1" for a new account.)

TAX DATA "B" RECORD—Continued

Tape Position	Element Name	Entry or Description
153	Final Return Indicator	Enter zero if this is not taxpayer's final return. Enter "1" if this is the taxpayer's final return.
154	Discounted Mag Tape Filer Indicator	Enter zero if reporting agent will be reporting for the taxpayer in the subsequent quarter on magnetic tape. Enter "1" if the taxpayer is being removed from the Magnetic Tape Filing system.
155	Adjustment Indicator FICA	Enter Zero if no adjustments. Enter "3" if "FICA Tip" only (Employee previously reached maximum limitation thru combination of wages and tips). Enter "4" if adjustment only for "third party" sick pay for which the employer is not responsible. Enter "2" for any other FICA adjustments including combinations of "3" and "4". ALL ADMUSTMENTS OF "2" CATEGORY MUST BE SUPPORTED BY PAPER DOCUMENTATION SENT IN WITH MAGNETIC TAPE TRANSMITTAL. Enter "1" if "Fractions Only" (i.e. FICA tax adjustment is only the result of rounding differences between tax collected from employees and Social Security Tax on wages). If FICA tax adjustment is a combination of "1" and "3" or a combination of "1" and "4" reasons, reason "1" (Fractions only) may be ignored and a value of "3" or "4" can be used as appropriate. For Form 941E this field must contain zero.
156	Adjustment Indicator Income Tax Withheld	Enter zero if there is no adjustment. Enter "1" if there is an adjustment
157	Adjustment Indicator Backup Withholding	Enter zero if there is no adjustment. Enter "1" if there is an adjustment.
158-164	Total Number of Employees	Enter the total of employees in pay period that includes March 12. Do not include household employees. Applicable to first quarter only. Otherwise fill with zeros.
165-173	Parent Corporation EIN	Enter the parent corporation EIN if applicable. If not, then enter all spaces.
174-185	Total Wages and Tips	Total wages and tips subject to withholding, plus other compensation.
186-199	Amount of Income Tax Withheld	Total income tax withheld from wages, tips, pensions, annuities, sick pay and gambling.
200	Sign for Adjustment to preceding quarters	Enter "1" if there is a positive adjustment to withholding. Enter zero if there is a negative adjustments. Enter "1" if there is no adjustment.
201-210	Admustment for preceding quarters	Enter zeroes if there is no adjustment. If there is a significant amount, right justify and zero fill.
211	Sign for Adjusted Total Tax Withheld	Enter "1" if there is a positive adjustment to withholding. Enter "1" if there is no adjustment. Enter "1" if there is no significant amount in the Adjusted Total of Income Tax Withheld field.

TAX DATA "B" RECORD—Continued

Tape Position	Element Name	Entry or Description
212-225	Adjusted Total Income Tax Withheld	Enter zeros if there is no significant amount. If there is a significant amount, right justify and zero fill. This field is the result of the addition of the Amount of Income Tax Withheld field and the Adjustment for preceding quarters field.
226-239	Taxable FICA Wages Paid	Wages paid to employees—not taxes. For Form 941E this field must contain zeroes.
240-252	Taxable FICA Wages Paid	Tax paid on Taxable FICA Wages paid to employees. For Form 941E this field must contain all zeroes.
253-262	Taxable Tips Reported	Tips reported by employees—not taxes. For Form 941E this field must contain all zeroes.
263-271	Tax on Taxable Tips Reported	Tax on tips reported in positions 253-262. For Form 941E this field must contain all zeroes.
272-281	Tips Deemed Wages	Amount reported by employer as difference between minimum wage and the actual amount paid. For Form 941E this field must contain all zeroes. NOTE: This field applies to those employees who are subject to the Minimum Wage provisions of the Fair Labor Standard Act.
282-290	Tax on Tips Deemed Wages	Tax on tips reported in position 272-281. For Form 941E this field must contain all zeroes. NOTE: This field applies to those employees who are subject to the Minimum Wage provisions of the Fair Labor Standard Act.
291-304	Taxable hospital insurance benefits wages paid	Amount reported by federal, state and local governmental employers as wages (other than those electing full social security for employees under a section 218 agreement).
305-317	Tax on hospital insurance benefits wages paid	Tax on amount reported in positions 291-304.
318-327	Total FICA Taxes	Total social security taxes. For Form 941E this field must contain all zeroes. This field is a result of the addition of the fields known as Tax on FICA Wages, Tax on Taxable Tips Reported and Tax on Tips Deemed Wages.
328	Sign for Adjustment to FICA Tax	Enter "1" if the adjustment to FICA is positive. Enter zero if Adjustment to FICA is negative. Enter "1" if there is no Adjustment to FICA.
329-338	Adjustment to FICA Tax	Enter zeroes if there is no significant amount. Enter right justified and zero filled if significant. For Form 941E this field represents Adjustment to Tax on hospital insurance benefits wages.
339	Sign for Adjusted Total of FICA Tax	Enter "1" if the Adjusted Total of FICA taxes is positive. Enter zero if the Adjusted Total of FICA taxes is negative. Enter "1" if there is no significant amount in the Adjusted Total of FICA Taxes.
340-349	Adjusted Total of FICA Taxes	Enter zeroes if there is no significant amount. Enter right justified and zero filled if significant. This field is the result of the addition of Total FICA Taxes and the Adjustment to FICA Tax.

TAX DATA "B" RECORD—Continued

Tape Position	Element Name	Entry or Description
350-363	Backup Withholding	Enter zeroes if there is no significant amount. Enter right justified and zero filled if significant.
364	Sign for Adjustment to Backup Withholding	Enter "1" if there is a positive Adjustment to Backup Withholding. Enter zero if there is a negative Adjustment to Backup Withholding. Enter "1" if there is no Adjustment to Backup Withholding.
365-374	Adjustment to Backup Withholding	Enter zeroes if there is no significant amount. Enter right justified and zero filled if significant.
375	Sign for Adjusted Total Backup Withholding	Enter "1" if there is a positive Adjusted Total of Backup Withholding. Enter zero if there is a negative Adjusted Total of Backup Withholding. Enter "1" if there is no Adjusted Total to Backup Withholding.
376-385	Adjusted Total of Backup Withholding	Enter zeroes if there is no significant amount. Enter right justified and zero filled if significant.
386-400	Total Taxes	Enter zeroes if there is no significant amount. Enter right justified and zero filled if significant. Total Taxes is the result of the addition of the fields known as Adjusted Total Tax Withheld, Adjusted Total FICA Taxes, and Adjusted Total of Backup Withholding.
401-410	Advanced Earned Income Credit	Advanced payment of EIC during the quarter. Must contain zeroes if no amount paid.
411-425	Net Taxes	Enter zeroes if there is no significant amount. Enter amount right justified and zero filled if significant. Net taxes is the result of the subtraction of the Advanced Earned Income Credit from Total Taxes.
426-440	Total Taxes Deposited plus overpayment from previous quarter	FTDs plus overpayment from prior quarter.
441-450	Overpayment from Previous Quarter	Enter zeroes if there is no significant amount. Enter right justified and zero filled if significant.
451-461	Excess	Amount that Total Taxes Deposited exceeds Net Taxes.
462	Credit Elect Indicator	Enter zero if credit is to be applied to next return. Enter "1" if amount is to be refunded or if Excess (tape positions 451-461) is zero.
463	Safe Haven Rule Indicator	Enter zero if taxpayer is making deposits using the 95% safe haven rule. Otherwise, enter "1".
464	First Time 3-Banking Day Depositor Indicator	Enter zero if taxpayer is a first time 3-banking day depositor. Otherwise, enter "1".
465-468	Number of FTDs Made	Enter the total number of FTDs made by this taxpayer during the tax period. Right justify and zero fill.
469-483	Total Taxes Deposited for this quarter	Enter the sum of Total Amount of FTDs in dollars and cents from preceding Tax Data "B" Records from the last Agent "A" Record. Right justify and zero fill.

TAX DATA "B" RECORD—Continued

Note: Positions 484-723 are used to report the accrual of the taxpayer's Federal Tax Liability.

1). If the tax liability is less than $500.00, zero fill these fields.

2). If the tax liability is less than $3000.00 in any given month, place the amount in the fields that refer to the last day of the month and zero fill the other fields.

3). If the taxes accrued are greater than $3000.00 for any month, find the eighth-monthly period(s) in which there was a payday and enter the accrued amounts in those fields. Zero fill any unused fields.

Tape Position	Element Name	Entry or Description
484-493	Tax Liability, 3rd Day (1st Month)	Enter the tax liability for the period beginning on the 1st day and ending of the 3rd day of the 1st month.
494-503	Tax Liability, 7th Day (1st Month)	Enter the tax liability for the period beginning on the 4th day and ending on the 7th day of the 1st month.
504-513	Tax Liability, 11th Day (1st Month)	Enter the tax liability for the period beginning on the 8th day and ending on the 11th day of the 1st month.
514-523	Tax Liability, 15th Day (1st Month)	Enter the tax liability for the period beginning on the 12th day and ending on the 15th day of the 1st month.
524-533	Tax Liability, 19th Day (1st Month)	Enter the tax liability for the period beginning on the 16th day and ending on the 19th day of the 1st month.
534-543	Tax Liability, 22nd Day (1st Month)	Enter the tax liability for the period beginning on the 20th day and ending on the 22nd day of the 1st month.
544-553	Tax Liability, 25th Day (1st Month)	Enter the tax liability for the period beginning on the 23rd day and ending on the 25th day of the 1st month.
554-563	Tax Liability, last Day (1st Month)	Enter the tax liability for the period beginning on the 26th day and ending on the last day of the 1st month.
564-573	Tax Liability, 3rd Day (2nd Month)	Enter the tax liability for the period beginning on the 1st day and ending on the 3rd day of the 2nd month.
574-583	Tax Liability, 7th Day (2nd Month)	Enter the Tax liability for the period beginning on the 4th day and ending on the 7th day of the 2nd month.
584-593	Tax Liability, 11th Day (2nd Month)	Enter the tax liability for the period beginning on the 8th day and ending on the 11th day of the 2nd month.
594-603	Tax Liability, 15th Day (2nd Month)	Enter the tax liability for the period beginning on the 12th day and ending on the 15th day of the 2nd month.
604-613	Tax Liability, 19th Day (2nd Month)	Enter the tax liability for the period beginning on the 16th day and ending on the 19th day of the 2nd month.
614-623	Tax Liability, 22nd Day (2nd Month)	Enter the tax liability for the period beginning on the 20th day and ending on the 22nd day of the 2nd month.
624-633	Tax Liability, 25th Day (2nd Month)	Enter the tax liability for the period beginning on the 23rd day and ending on the 25th day of the 2nd month.
634-643	Tax Liability, last Day (2nd Month)	Enter the tax liability for the period beginning on the 26th day and ending on the last day of the 2nd month.
644-653	Tax Liability, 3rd Day (3rd Month)	Enter the tax liability for the period beginning on the 1st day and ending on the 3rd day of the 3rd month.

TAX DATA "B" RECORD—Continued

Tape Position	Element Name	Entry or Description
654-663	Tax Liability, 7th Day (3rd Month)	Ente the tax liability for the period beginning on the 4th day and ending on the 7th day of the 3rd month.
664-673	Tax Liability, 11th Day (3rd Month)	Enter the tax liability for the period beginning on the 8th day and ending on the 11th day of the 3rd month.
674-683	Tax Liability, 15th Day (3rd Month)	Enter the tax liability for the period beginning on the 12th day and ending on the 15th day of the 3rd month.
684-693	Tax Liability, 19th Day (3rd Month)	Enter the tax liability for the period beginning on the 16th day and ending on the 19th day of the 3rd month.
694-703	Tax Liability, 22nd Day (3rd Month)	Enter the tax liability for the period beginning on the 20th day and ending on the 22nd day of the 3rd month.
704-713	Tax Liability, 25th Day (3rd Month)	Enter the tax liability for the period beginning on the 23rd day and ending on the 25th day of the 3rd month.
714-723	Tax Liability, last Day (3rd Month)	Enter the tax liability for the period beginning on the 26th day and ending on the last day of the 3rd month.
724	Schedule A Tax Indicator	Enter zero if the Schedule A Tax Liability amounts have been included on the regular Tax Liability fields (tape pos. 484-723). Enter "1" if the Schedule A Tax Liability amounts have been entered on the Mag Tape Schedule A Tax Liability fields (pos. 725-964). Enter "2" if the paper document Schedule A has been filed.

Note: Positions 725-964 are used to report Backup Withholding if the Schedule A Tax Indicator is set to "1". If Schedule A Tax Indicator is other than 1, zero fill positions 725-964.

1). If tax liability is less than $500.00, zero fill these fields.

2). If tax liability is less than $3000.00 in any given month, place the amount in the fields that refer to the last day of the month and zero fill the other fields.

3). If the taxes accrued are greater than $3000.00 for any month, find the eighth-monthly period(s) in which there was a payday and enter the accrued amounts in those fields. Zero fill any unused fields.

725-734	Schedule A Tax Liability 3rd Day (1st Month)	Enter the Schedule A Tax Liability for the period beginning on the 1st day and ending on the 3rd day of the first month. If none zero fill.
735-744	Schedule A Tax Liability 7th Day (1st Month)	Enter the Schedule A Tax Liability for the period beginning on the 4th day and ending on the 7th day of the first month. If none zero fill.
745-754	Schedule A Tax Liability 11th Day (1st Month)	Enter the Schedule A Tax Liability for the period beginning on the 8th day and ending on the 11th day of the first month. If none zero fill.
755-764	Schedule A Tax Liability 15th Day (1st Month)	Enter the Schedule A Tax Liability for the period beginning on the 12th day and ending on the 15th day of the first month. If none zero fill.
765-774	Schedule A Tax Liability 19th Day (1st Month)	Enter the Schedule A Tax Liability for the period beginning on the 16th day and ending on the 19th day of the first month. If none zero fill.

TAX DATA "B" RECORD—Continued

Tape Position	Element Name	Entry or Description
775-784	Schedule A Tax Liability 22nd Day (1st Month)	Enter the Schedule A Tax Liability for the period beginning on the 20th day and ending on the 22nd day of the first month. If none zero fill.
785-794	Schedule A Tax Liability 25th Day (1st Month)	Enter the Schedule A Tax Liability for the period beginning on the 23rd day and ending on the 25th day of the first month. If none zero fill.
795-804	Schedule A Tax Liability Last Day (1st Month)	Enter the Schedule A Tax Liability for the period beginning on the 26th day and ending on the last day of the first month. If none zero fill.
805-814	Schedule A Tax Liability 3rd Day (2nd Month)	Enter the Schedule A Tax Liability for the period beginning on the 1st day and ending on the 3rd day of the second month. If none zero fill.
815-824	Schedule A Tax Liability 7th Day (2nd Month)	Enter the Schedule A Tax Liability for the period beginning on the 4th day and ending on the 7th day of the second month. If none zero fill.
825-834	Schedule A Tax Liability 11th Day (2nd Month)	Enter the Schedule A Tax Liability for the period beginning on the 8th day and ending on the 11th day of the second month. If none zero fill.
835-844	Schedule A Tax Liability 15th Day (2nd Month)	Enter the Schedule A Tax Liability for the period beginning on the 12th day and ending on the 15th day of the second month. If none zero fill.
845-854	Schedule A Tax Liability 19th Day (2nd Month)	Enter the Schedule A Tax Liability for the period beginning on the 16th day and ending on the 19th day of the second month. If none zero fill.
855-864	Schedule A Tax Liability 22nd Day (2nd Month)	Enter the Schedule A Tax Liability for the period beginning on the 20th day and ending on the 22nd day of the second month. If none zero fill.
865-874	Schedule A Tax Liability 25th Day (2nd Month)	Enter the Schedule A Tax Liability for the period beginning on the 23rd day and ending on the 25th day of the second month. If none zero fill.
875-884	Schedule A Tax Liability Last Day (2nd Month)	Enter the Schedule A Tax Liability for the period beginning on the 26th day and ending on the last day of the second month. If none zero fill.
885-894	Schedule A Tax Liability 3rd Day (3rd Month)	Enter the Schedule A Tax Liability for the period beginning on the 1st day and ending on the 3rd day of the third month. If none zero fill.
895-904	Schedule A Tax Liability 7th Day (3rd Month)	Enter the Schedule A Tax Liability for the period beginning on the 4th day and ending on the 7th day of the third month. If none zero fill.
905-914	Schedule A Tax Liability 11th Day (3rd Month)	Enter the Schedule A Tax Liability for the period beginning on the 8th day and ending on the 11th day of the third month. If none zero fill.

TAX DATA "B" RECORD—Continued

Tape Position	Element Name	Entry or Description
915-924	Schedule A Tax Liability 15th Day (3rd Month)	Enter the Schedule A Tax Liability for the period beginning on the 12th day and ending on the 15th day of the third month. If none zero fill.
925-934	Schedule A Tax Liability 19th Day (3rd Month)	Enter the Schedule A Tax Liability for the period beginning on the 16th day and ending on the 19th day of the third month. If none zero fill.
935-944	Schedule A Tax Liability 22nd Day (3rd Month)	Enter the Schedule A Tax Liability for the period beginning on the 20th day and ending on the 22nd day of the third month. If none zero fill.
945-954	Schedule A Tax Liability 25th Day (3rd Month)	Enter the Schedule A Tax Liability for the period beginning on the 23rd day and ending on the 25th day of the third month. If none zero fill.
955-964	Schedule A Tax Liability Last Day (3rd Month)	Enter the Schedule A Tax Liability for the period beginning on the 26th day and ending on the last day of the third month. If none zero fill.

.10 Checkpoint Totals "C" Record

1. Write this record after each 100 or fewer (if less than 100 remain) Tax Data "B" Records. Each Checkpoint Totals "C" Record must contain a count of Tax Data "B" Records, the sum of Total Taxes, the Total Number of FTDs made and the sum of the Total Amounts of FTDs for all Tax Data "B" Records which have not been summarized in preceding Checkpoint Totals "C" Records.

2. The Checkpoint Totals "C" Record must be followed by a Tax Data "B" Record except as follows: If the Checkpoint Totals "C" Record is at the end of the reel, it will be followed by an End of Reel "F" Record. If the Checkpoint Totals "C" Record is at the end of the file, it will be followed by an End of File "E" Record.

3. All Checkpoint Totals "C" Records must be fixed length. All money amount fields will contain dollars and cents. The Checkpoint Totals "C" Records cannot be followed by a tape mark.

CHECKPOINT TOTALS "C" RECORD

Tape Position	Element Name	Entry or Definition
1	Record Type	Enter "C". Must be first character of the Checkpoint Totals "C" Record.
2-6	Number of Tax Data "B" Records	Enter number of Tax Data "B" Records processed since last Checkpoint Totals "C" Record or Agent "A" Record has been written. Right justify and zero fill if less than five positions are required.
7-22	Total Taxes	Enter the sum of Total Taxes in dollars and cents from Tax Data "B" Records in the preceding 100 or fewer records (tape positions 386-400). Right justify and zero fill.
23-29	Number of FTDs Made	Enter total number of FTDs made during the tax period for Tax Data "B" Records in the preceding 100 or fewer records (tape positions 465-468). Right justify and zero fill.
30-45	Total Amount of FTDs	Enter the sum of the Total Amount of FTDs in dollars and cents for Tax Data "B" Records in the preceding 100 or fewer records (tape positions 469-483). Right justify and zero fill.

11. End of File "E" Record

1. Write this record after the last Checkpoint Totals "C" Record in the file. All money amounts will contain dollars and cents. All End of File "E" Records must be fixed length. This record can be followed only by a tape mark or tape mark and trailer label.

END OF FILE "E" RECORD

Tape Position	Element Name	Entry or Definition
1	Record Type	Enter "E". Must be the first character of the End of File "E" Record.
2-6	Number of Tax Data "B" Records	Enter total number of Tax Data "B" Records (including the reporting agent) which are reported on the tape file. Only one Tax Data "B" Record is permissible for each taxpayer. Right justify and zero fill if less than five positions are required.
7-22	Total Taxes	Enter the sum of Total Taxes in dollars and cents for all Tax Data "B" Records reported on the tape file (tape positions 386-400). This should balance to Total Taxes accumulated in Checkpoint Totals "C" Records (tape positions 7-22). Right justify and zero fill.
23-29	Number of FTDs Made	Enter total number of FTDs made during the tax period for all Tax Data "B" Records reported on the tape file (tape positions 465-468). This should balance to number of FTDs accumulated in Checkpoint Totals "C" Records (tape positions 23-29). Right justify and zero fill.
30-45	Total Amount of FTDs	Enter the sum of the Total Amount of FTDs in dollars and cents from all Tax Data "B" Records on the tape file (tape positions 469-483). This should balance to Total Amount of FTDs accumulated in Checkpoint Totals "C" Records (tape positions 30-45). Right justify and zero fill.

12. End of Reel "F" Record

1. Write this record when the end of the normal writing area of each reel has been reached, but all records in the file have not been written. This record indicates that there are additional reels in the file. Each End of Reel "F" Record must contain a count of Tax Data "B" Records, the sum of Total Taxes, the Total Number of FTDs made and the sum of the Total Amount of FTDs for all Checkpoint Totals "C" Records on that reel.

2. The End of Reel "F" Record cannot be followed by an Agent "A" Record, Tax Data "B" Record, Checkpoin Totals "C" Record or End Of File "E" Record. A tape mark or tape mark anc trailer label only can follow this record.

3. Do not use this record on the fina reel of the file being transmitted.

END OF REEL "F" RECORD

Tape Position	Element Name	Entry or Definition
1	Record Type	Enter "F". Must be the first character of the End of Reel "F" Record.
2-6	Number of Tax Data "B" Records	Enter total number of Tax Data "B" Records contained on this tape reel. Right justify and zero fill.
7-22	Total Taxes	Enter the sum of Total Taxes in dollars and cents from all preceding Tax Data "B" Records from the last Agent "A" Record (tape positions 386-400). Right justify and zero fill.
23-29	Number of FTDs Made	Enter the total number of FTDs made during the tax period from all preceding Tax Data "B" Records from the last Agent "A" Record (tape positions 465-468). Right justify and zero fill.

Tape Position	Element Name	Entry or Definition
30-45	Total Amount of FTDs	Enter the sum of Total Amount of FTDs in dollars and cents from all preceding Tax Data "B" Records from the last Agent "A" Record (tape positions 469-483). Right justify and zero fill!

TITLE 26—INTERNAL REVENUE.—CHAPTER 1, SUBCHAPTER H, PART 601—STATEMENT OF PROCEDURAL RULES MISCELLANEOUS AMENDMENTS

SUMMARY: This document contains amendments to the Statement of Procedural Rules (SPR) to reflect changes in the fees charged with search and duplication services. The provisions are amended to conform to Department of Treasury Regulations related to the disclosure of records under the Freedom of Information Act and to incorporate a recent change in charges for copies of returns and return information.

EFFECTIVE DATE: April 25, 1983, except section 601.702(f)(5) (regarding charges for copies of returns, etc.) is effective October 1, 1985.

FOR FURTHER INFORMATION CONTACT: Mark S. Jennings of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W. Washington, D.C. 20224; Attention: CC:LR:T (202) 566-3458, not a toll-free number.

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains amendments to the SPR (26 CFR Part 601).

Section 601.702(f) of the SPR, relating to fees for services, is amended to conform with Treasury Department Regulations at 31 CFR §1.6 as amended April 25, 1983, (48 F.R. 12350). The section is also amended to reflect Rev. Proc. 85-56, 1985-46 I.R.B. 45 (modifying Rev. Proc. 66-3, 1966-1 C.B. 601) regarding charges for copies of returns and transcripts.

The Treasury Department amended its regulations implementing the Freedom of Information Act (FOIA). The amendment increased the fees charged for duplication, search, and unpriced printed material to reflect increased costs to the Department. The fee for copying records is $.15 per copy of each page made by photocopy or similar process. The rate of $.15 per copy of each page also applies to preprinted materials, which will no longer be available at reduced rates. The search fee has been increased to $10.00 for each hour or fraction thereof and applies to all searches, including those which take less than one hour. Charges for computer searches will reflect the actual direct cost of the Department, as will fees for computer printouts. Section 601.702(f) of the SPR is amended to reflect these changes.

Rev. Proc. 85-56, 1985-46 I.R.B. 45, modified Rev. Proc. 66-3, 1966-1 C.B. 601 to reflect the implementation of a pre-paid fixed fee system for furnishing taxpayers with photocopies of their tax returns or transcripts of return information. The charge for a photocopy of a tax return is $4.25 and the charge for a transcript of tax information is $2.25. The Revenue Procedure includes instructions for making requests for copies and advance payments. The purpose of the new system is to eliminate the administrative costs involved in billing taxpayers who request copies of returns and return information. Requiring payment in advance will ensure that the total cost of securing and furnishing photocopies will be paid by those individuals who request such information. Section 601.702(f) is amended to add a new paragraph (f)(5) to set forth these rules.

EXECUTIVE ORDER 12291

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required.

PAPERWORK REDUCTION ACT

The collection of information contained in this regulation has been submitted to the Office of Management and Budget (OMB) in accordance with the requirements of the Paperwork Reduction Act of 1980. This collection has been approved by OMB (Control No. 1545-0429).

DRAFTING INFORMATION

The principal author of these amendments to the Statement of Procedural Rules is Sandra E. Wallach of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service participated in developing the amendments both on matters of substance and style.

Adoption of Amendments to the Statement of Procedure Rules

Accordingly, 26 CFR Part 601 is amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for Part 601 continues to read in part:

Authority: 5 U.S.C. 301 and 502.

Par. 2. Section 601.702 is amended as follows:

1. Paragraphs (f)(3) and (f)(4) are revised to read as set forth below.

2. Paragraphs (f)(5), (6), (7), (8), and (9) are redesignated as paragraphs (f)(6), (7), (8), (9), and (10) respectively, and a new paragraph (f)(5) is added, to read as set forth below.

3. Paragraph (f)(6) as redesignated is amended by removing the first two sentences.

§601.702 Publication and public inspection.

* * * * *

(f) *Fees for services.* * * *

(3) *Search services.* Fees charged for search services are as follows:

(i) Searches other than for computerized records—$10.00 for each hour or fraction thereof for time spent by each clerical, professional, and supervisor in finding the records and information within the scope of the request.

(ii) Searches for computerized records—Actual direct cost of the search. The fee for computer printouts will be actual costs.

(iii) Searches requiring travel or transportation—Shipping charges to transport records from one location to another, or for the transportation of an employee to the site of requested records when it is necessary to locate rather than examine the records, shall be at the rate of the actual cost of such shipping or transportation.

(iv) Other services and materials requested, pursuant to the Freedom of Information Act, which are not covered by this part are chargeable at the actual cost of the Internal Revenue Service.

(4) *Duplication other than for returns, transcripts of return information, and related documents.* Fees charged for duplication other than for returns, transcripts of return information, and related documents are as follows:

(i) $.15 per copy of each page, up to 8½" × 14", made by photocopy or similar process.

(ii) Photographs, films, and other materials—actual cost of reproduction.

(iii) Records may be released to a private contractor for copying and the requester will be charged the actual cost of duplication charged by the private contractor.

(iv) When other duplications not specifically identified above are requested and provided pursuant to the Freedom of Information Act their direct cost to the Internal Revenue Service shall be charged.

(5) *Charges for copies of returns, transcripts of return information, and related documents.* Charges for furnishing copies of returns, transcripts of return information, and related documents are as follows:

(i) A charge of $4.25 will be made for each request for a copy of a return or other related document (other than Employee Plans and Exempt Organization Returns). Payments are to be submitted in advance using IRS Form

4506, Request For Copy Of Tax Form or Individual Income Tax Account Information.

(ii) A charge of $2.25 will be made for each request for a transcript of individual income tax account information. Payments shall be submitted according to procedures prescribed in paragraph (g)(5)(i) of this section.

(iii) A charge of $1.00 for the first page and $.15 for each subsequent page will be made for copies of Employee Plans and Exempt Organizations tax returns and related documents. Payments will be submitted subsequent to receipt of Form 2860, Document Transmittal and Bill.

Par. 3. Section 601.9000(c) is amended by inserting in the appropriate place in the table "§601.702(f)(2) . . . 1545-0429".

ROSCOE L. EGGER, JR.,
Commissioner of
Internal Revenue.

Income, Excise, and Estate and Gift Taxes; Effective Dates and Other Issues Arising Under the Employee Benefit Provisions of the Tax Reform Act of 1984—Public Hearing

Announcement 86-72[1]

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to effective dates and certain other issues arising under the employee benefit provisions of the Tax Reform Act of 1984 [Pub. L. 98-369, 1984-3 C.B. (Vol.1) 1].

DATES: The public hearing will be held on Thursday, June 26, 1986, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Thursday, June 12, 1986.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (EE-96-85), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Faye Easley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, telephone 202-566-3935 (not a toll-free call).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 72, 79, 125, 133, 162, 402, 404, 419, 419A, 461(h), 463, 505, 512, 1042, 2039, 4976, 4978 and 7701(a)(46) of the Internal Revenue Code of 1954. The proposed regulations appeared in the FEDERAL REGISTER for Tuesday, February 4, 1986 (51 FR 4391) [EE-96-85, 1986-13 I.R.B. 48].

The rules of §601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Thursday, June 12, 1986, an outline of oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speaker will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

Treatment of Qualified Real Estate Agents and Direct Sellers as Nonemployees; Determination of Employer Liability for Certain Employment Taxes; Information Reporting of Direct Sales and Payments of Remuneration for Services—Public Hearing

Announcement 86-73[1]

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the following subjects: (1) The treatment of qualified real estate agents and direct sellers as nonemployees for Federal income and employment tax purposes, (2) the determination of employer liability for income tax withholding and employee social security taxes where the employer treated an employee as a nonemployee for purposes of such taxes, and (3) information reporting of direct sales and payments of remunertion for services.

DATES: The public hearing will be held on Wednesday, June 18, 1986, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Wednesday, June 4, 1986.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, ATTN: CC:LR:T (LR-214-82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:; Faye Easley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, telephone 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 3508, 3509, and 6041A of the Internal Revenue Code of 1954. The proposed regulations appeared in the FEDERAL REGISTER for Tuesday, January 7, 1986 (51 FR 619) [LR-214-82, 1986-6 I.R.B. 46].

The rules of §601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Wednesday, June 4, 1986, an outline of oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

Announcement of the Disbarment, Suspension, or Consent to Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents and Enrolled Actuaries from Practice Before the Internal Revenue Service

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Revenue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletin for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended and will later be consolidated and published in the Cumulative Bulletin.

The following individuals have been placed under consent suspension from practice before the Internal Revenue Service:

Name	Address	Designation	Term of Suspension
Gary E. Borushko	Grosse Pointe Woods, MI	Certified Public Accountant	Indefinite from April 7, 1986
Paul Skulsky	Spring Valley, NY	Certified Public Accountant	Indefinite from April 1, 1986
Mack I. Frank	Eunice, LA	Attorney	Indefinite from April 1, 1986
Carl Goldfarb	Charlotte, NC	Attorney	Indefinite from April 28, 1986
Dennis M. Hayes	Ann Arbor, MI	Attorney	Indefinite from April 15, 1986
Ronald N. Kief	Warren, MI	Certified Public Accountant	Two Years from June 1, 1986
Richard L. Leopold	Ottawa, OH	Attorney	Three Months from May 1, 1986
Julius Stackel	Flushing, NY	Certified Public Accountant	Thirty Months from April 15, 1986
John Such	Lyndhurst, OH	Enrolled Agent	Eighteen Months from April 22, 1986

Under Section 330, Title 31 of the United States Code (1970 ed.), the Secretary of the Treasury, after due notice and opportunity for hearing, is authorized to suspend or disbar from practice before the Internal Revenue Service any attorney, certified public accountant, enrolled agent, or enrolled actuary who has violated the rules and regulations governing such practice.

Attorneys, certified public accountants, enrolled agents and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by, or sharing fees with, any practitioner disbarred or under suspension from practice before their Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify such disbarred or suspended practitioners, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been disbarred or suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date of disbarment or period of suspension. This announcement will continue to appear in the weekly Bulletin for five successive weeks for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended or disbarred and will later be consolidated and published in the Cumulative Bulletin.

After due notice and opportunity for hearing, the following individuals have been disbarred from further practice before the Internal Revenue Service:

Name	Address	Designation	Effective Date
Thomas H. Foxhill, Jr.	Pemberton, NJ	Enrolled Agent	April 12, 1986
Peter Parker	Baltimore, MD	Attorney	April 12, 1986

Announcement Relating to Proposed Regulations Published With Notice of Proposed Rulemaking

Changes in regulations as announced below have been published in the Federal Register in tentative or proposed form to provide interested parties with an opportunity to file their objections or suggestions for consideration prior to final adoption of such regulations. These announcements will appear in the Bulletin during the period which has been prescribed for the submission and consideration of any views, arguments, or suggestions pertaining to the proposed regulations so published. Statement of such views, arguments or suggestions should be submitted in writing, preferably six copies, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

Section affected	Subject	Published in the Bulletin	Expiration date for submission of views

Original issue discount rules, imputed interest rules, and safe haven interest rates	1986-18 I.R.B. 4	June 9, 1986

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as "rulings") that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with *modified, below*).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with *amplified* and *clarified*, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in law or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in the new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1954 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, *modified and superseded* describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.

Abbreviations

The following abbreviations in current use and formerly used will appear in material published in the Bulletin.

A—Individual.
Acq.—Acquiescence.

[1] A cumulative finding list for previously published rulings mentioned in Internal Revenue Bulletins 1985-26 through 1985-52 will be found in Internal Revenue Bulletin 1986-1, dated January 6, 1986.

Index

Internal Revenue Bulletins 1986-14 Through 1986-21

For index of items published during the last six months of 1985, see I.R.B. 1986-1, dated January 6, 1986.

The abbreviation and number in parentheses following the index entry refer to the specific item; numbers in roman and italic type following the parentheses refer to the Internal Revenue Bulletin in which the item may be found and the page number on which it appears.

Key to Abbreviations:

RR	Revenue Ruling
RP	Revenue Procedure
TD	Treasury Decision
CD	Court Decision
PL	Public Law
EO	Executive Order
DO	Delegation Order
TDO	Treasury Department Order
TC	Tax Convention
SPR	Statement of Procedural Rules
PTE	Prohibited Transaction Exemption

INTERNAL REVENUE BULLETIN

The Introduction on page 3 describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of the weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and *are not* included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

BULLETIN INDEX-DIGEST SYSTEM

The Bulletin Index-Digest System provides a fast and easy way to research Revenue Rulings, Revenue Procedures, Public Laws, Treasury Decisions, and other matters of a permanent nature published in the weekly Internal Revenue Bulletin, or Cumulative Bulletin from 1953 on. It is a comprehensive and up-to-date research tool that requires no filing or other clerical maintenance. The current revision consists of four Services, available on a subscription basis, each including a basic volume that covers the period 1953-1983/1984 and a cumulative supplement covering material published in subsequent Bulletins for the following two-year period. Cumulative supplements are issued quarterly for the Income Tax Service and semiannually for the Estate and Gift, Employment, and Excise Tax Service.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Please allow two to six weeks, plus mailing time, for delivery.

Department of the Treasury
Internal Revenue Service

T22. 23:

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenues at the least cost to the public, and in a manner that warrants the highest degree of public confidence in our integrity, efficiency and fairness. To achieve that purpose, we will:

—Encourage and achieve the highest possible degree of voluntary compliance in accordance with the tax law and regulations;

—Advise the public of their rights and responsibilities;

—Determine the extent of compliance and the causes of noncompliance;

—Do all things needed for the proper administration and enforcement of the tax laws;

—Continually search for and implement new, more efficient and effective ways of accomplishing our Mission.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents of a permanent nature are consolidated semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

Part I.—1954 Code.

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1954.

Part II.—Treaties and Tax Legislation.

This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.

To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts.

Part IV.—Items of General Interest.

With the exception of the disbarment and suspension list included in this part, none of these announcements is consolidated in the Cumulative Bulletins.

The first Bulletin for each month includes an index for the matters published during the preceding month. These monthly indexes are cumulated on a quarterly and semiannual basis, and are published in the first Bulletin of the succeeding quarterly and semi-annual period, respectively.

The Bulletin Index-Digest System, a research and reference service supplementing the Bulletin, may be obtained from the Superintendent of Documents on a subscription basis. It consists of four Services: Service No. 1, Income Tax; Service No. 2, Estate and Gift Taxes; Service No. 3, Employment Taxes; Service No. 4, Excise Taxes. Each Service consists of a basic volume and a cumulative supplement that provide (1) finding lists of items published in the Bulletin, (2) digests of revenue rulings, revenue procedures, and other published items, and (3) indexes of Public Laws, Treasury Decisions, and Tax Conventions.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Prices: Domestic—$1.75 a single copy, $82.00 a year subscription. Foreign—$2.19 a single copy, $102.50 a year for subscription.

READEX FICHE best copy available

Part I. Rulings and Decisions Under the Internal Revenue Code of 1954

Section 162.—Trade or Business Expenses

26 CFR 1.162-1: Business expenses.
(Also Sections 262, 7805; 1.262-1, 301.7805-1.)

Business expenses; insurance; commodities trader; required contributions to commodities exchange. A commodities trader may not deduct as business expenses funds required by the commodities exchange to be paid to a fund that will pay death benefits to the beneficiary of the trader. Rev. Rul. 70-342 revoked.

Rev. Rul. 86-80

ISSUE

If an individual who is engaged in trade or business as a commodities trader is required to make contributions to a Board of Trade Gratuity Fund (Fund) that will pay death benefits to a Fund participant's beneficiaries or estate, may that individual deduct these contributions as business expenses under section 162(a) of the Internal Revenue Code?

FACTS

Taxpayer is a commodities trader and as such is required to become a member of a Board of Trade in order to trade on the floor of a commodities exchange. Every Board of Trade member under age 55 is also required to become a member of the Board of Trade Gratuity Fund and to pay assessments levied yearly by the Fund. The taxpayer is under age 55. The purpose is to provide, upon the death of a participant, an amount that is payable to the participant's beneficiaries or estate. Upon the death of a Board of Trade member, trustees of the Fund, pursuant to the specific provisions of the Board of Trade's constitution, pay out designated amounts to the participant's beneficiaries or estate.

LAW AND ANALYSIS

Section 162 of the Code provides, in part, that there is allowed as a deduction all the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business.

Section 262 of the Code provides that, except as expressly provided by the Code, no deduction is allowed for personal, living, or family expenses. Section 1.262-1(b)(1) of the Income Tax Regulations provides that premiums paid for life insurance by an insured are not deductible.

In *Commissioner v. Treganowan*, 183 F.2d 288 (2d Cir. 1950), *cert. denied*, 340 U.S. 853 (1950), the U.S. Court of Appeals for the Second Circuit held that amounts received from the New York Stock Exchange Gratuity Fund by a widow of a deceased member of the Exchange were "proceeds of life insurance." *See also Estate of Edmonds v. Commissioner*, 16 T.C. 110 (1951), which followed *Treganowan.*

In *Estate of Moyer v. Commissioner*, 32 T.C. 515 (1959), *acq. in part*, 1960-2 C.B. 6, the Tax Court held that (1) the Philadelphia-Baltimore Stock Exchange Gratuity Fund, a fund similar to the New York Stock Exchange Gratuity Fund, was a mutual insurance company, (2) the benefits paid to the beneficiaries of deceased members of the Exchange constituted amounts received under life insurance contracts paid by reason of the death of the insured and were excludable from the gross income of the recipients under section 101(a)(1) of the Code, and (3) the payments to the Gratuity Fund constituted "premiums or other consideration" for insurance within the meaning of section 811(g)(2) of the Internal Revenue Code of 1939. *See also* Rev. Rul. 72-463, 1972-2 C.B. 93, which holds that mandatory monthly dues and assessments paid by members of a labor union are deductible business expenses under section 162(a) of the Code, except that the portion of the assessments used to provide death benefits is a nondeductible personal expense.

Rev. Rul. 70-342, 1970-2 C.B. 32, however, reaches a different conclusion concerning payments to the New York Stock Exchange Gratuity Fund, which was maintained for the benefit of families of deceased members of the Exchange. Payments to the Gratuity Fund were mandatory under the Exchange's constitution in order for members to maintain their standing on the Exchange. Upon the death of an Exchange member, trustees of the Gratuity Fund, pursuant to the Exchange constitution, paid designated amounts out of the Gratuity Fund to designated beneficiaries. The ruling holds that payments to the Gratuity Fund by members who are actually engaged in business on the Exchange are deductible business expenses under section 162 of the Code.

The New York Stock Exchange Gratuity Fund, the Philadelphia-Baltimore Stock Exchange Gratuity Fund and the Fund in this case are similar because members of each exchange are required to pay assessments to the respective funds, each fund is maintained and operated exclusively to provide benefits upon the death of a member and the risk of loss from premature death is shifted from the individual to the group of other members of the exchanges. All three funds provide members of the exchanges with life insurance. Therefore, section 262 disallows any deduction for the "premiums" paid by the taxpayer-insured to the Board of Trade Gratuity Fund. This conclusion is equally applicable to the situation described in Rev. Rul. 70-342.

HOLDING

Payments to the Fund by the Board of Trade member are not deductible from gross income under section 162(a) of the Code, but rather are personal expenses under section 262.

PROSPECTIVE APPLICATION

Under the authority of section 7805(b) of the Code, the holding of this revenue ruling will not be applied adversely to amounts paid or incurred before June 9, 1986.

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 70-342 is revoked.

Section 262.—Personal, Living, and Family Expenses

26 CFR 1.262-1: Personal, living, and family expenses.

Whether contributions made by a commodities trader to a Board of Trade Gratuity Fund that will pay death benefits to a Fund participant's beneficiaries or estate are deductible business expenses or are personal expenses. See Rev. Rul. 86-80, this page.

Section 367.—Foreign Corporations

26 CFR 1.367(a)-1T: Transfers to foreign corporations subject to section 367(a): In general (temporary).
(Also Section 6038B; 1.6038B-1T.)

T.D. 8087

TITLE 26—INTERNAL REVENUE.—CHAPTER 1, SUBCHAPTER A, PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953; PART 7—TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1976; PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Transfers of Property by U.S. Persons to Foreign Corporations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary Income Tax Regulations relating to transfers of property by U.S. persons to foreign corporations. These regulations affect U.S. persons that transfer property to foreign corporations pursuant to the corporate organization, reorganization, or liquidation provisions of the Internal Revenue Code. They provide the public with guidance necessary to comply with the Tax Reform Act of 1984 [Pub. L. 98-369, 1984-1 C.B. (Vol.1) 1]. In addition, the text of the temporary regulations set forth in this document serves as the text of the proposed regulations cross-referenced * * * [on page 33, this Bulletin].

DATES: These temporary regulations are generally applicable for transfers made after December 31, 1984, and are effective June 16, 1986.

FOR FURTHER INFORMATION CONTACT: Charles W. Culmer, of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., N.W., Washington, D.C. 20224, Attention: CC:LR:T (202-566-4336, not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains temporary Income Tax Regulations (26 CFR Part 1) under section 367 of the Internal Revenue Code of 1954, as amended by section 131 of the Tax Reform Act of 1984 (98 Stat. 662) [Pub. L. 98-368, 1984-3 C.B. (Vol.1) 1, 170]. The temporary regulations are issued under the authority contained in sections 367 (26 USC 367) and 7805 (26 USC 7805) of the Internal Revenue Code of 1954.

DISCUSSION

Statutory provisions

The Tax Reform Act of 1984 substantially revised the rules that apply under section 367 to transfers of property by U.S. persons to foreign corporations. Section 367(a) now provides generally that a foreign corporation will not be considered to be a corporation, for purposes of applying the corporate organization, reorganization, and liquidation rules to a U.S. person's transfer of property to the foreign corporation. Thus, transfers of property to foreign corporations will generally be treated as taxable exchanges. However, an exception is provided for transfers of property that will be used in the active conduct of a trade or business outside of the United States. Such transfers may be made tax-free. On the other hand, certain types of property are specified that may not be transferred free of tax, even if they are to be used in the active conduct of a trade or business. In addition, a special rule requires the recapture of previously deducted losses of a foreign branch, when the branch is transferred to a foreign corporation. New section 367(d) applies a special rule to certain transfers of intangible property to foreign corporations, requiring the U.S. transferor to recognize a U.S.-source deemed payment for the transferred property annually over the useful life of the property. Finally, new section 367(e) provides that liquidating distributions by domestic corporations under section 336 will be taxable under rules similar to those of section 367(a).

Need for temporary regulations

The effective date of the amendments to section 367 is January 1, 1985. The proper application of the section is dependent upon the Service's detailed specification by regulations of the manner in which the general requirements of the statute will be administered. Without this specification, taxpayers will be unable to make transfers to related foreign corporations with certainty as to the U.S. income tax consequences of the transfer. Because of the need for immediate guidance in this regard, for both the public and employees of the Internal Revenue Service, the Service has found it to be impracticable to issue these temporary regulations either with notice and public procedure under section 553(b) of Title 5 of the United States code.

Description of temporary regulations

Section 1.367(a)-1T provides general rules describing the transfer of property that are subject to section 367(a), and explaining the effect of the section upon those transfers. A gain-limitation rule is provided in §1.367(a)-1T(b)(3), ensuring that the gain recognized under section 367(a) upon a transfer of appreciated property is not greater than the gain that would be recognized on a normal taxable exchange. Detailed rules are provided in §1.367(a)-1T(c) concerning various transactions that are considered to include a transfer subject to section 367(a). Relevant definitions are provided in §1.367(a)-1T(d). Section 1.367(a)-1T(e) contains effective date provisions.

Section 1.367(a)-2T provides rules concerning the exception from section 367(a) for transfers of property that will be used in the active conduct of a trade or business outside of the United States. Paragraph (b) of the section separately defines the concepts of "trade or business," "active conduct," and "outside of the United States." Each standard must be met for a transfer to qualify for the exception.

Section 1.367(a)-3T provides rules concerning transfers of stock or securities to a foreign corporation in an exchange described in section 367(a). Paragraph (b) specifies certain transfers of stock that are not subject to section 367(a). Paragraph (c) provides rules concerning transfers of stock of domestic corporations. Such transfers are generally taxable, but several exceptions are provided. Paragraph (d) provides rules concerning transfers of stock of foreign corporations. Again, such transfers are generally taxable, but several exceptions are provided. Paragraphs (e), (f), and (g) provide rules concerning the exceptions that are applicable under paragraphs (c) and (d). Under paragraph (e), a transfer of stock is not subject to section 367(a) if the transfer is for use in the active conduct of a trade or business, as defined in that paragraph. Paragraph (f) provides that a transfer is not subject to section 367(a) if the U.S. transferors of the stock obtain a limited interest in the transferee foreign corporation. Under paragraph (g), a transfer of stock is not subject to section 367(a) if the U.S. transferor agrees to recognize gain upon any subsequent disposition of the stock by the transferee foreign corporation. Finally, paragraph (h) sets forth two anti-abuse rules.

Section 1.367(a)-4T contains a series of special rules concerning the treatment of certain specified transfers of property. Paragraph (b) addresses transfers of depreciated property previously used in the United States, while paragraph (c) concerns property that will be leased by the transferee. Paragraph (d) concerns property to be sold by the transferee. Paragraph (e) specifies the circumstances in which oil and gas working interests will be considered to have been transferred for use in the active conduct of a trade or business. Paragraphs (f) and (g) provide exceptions from section 367(a) for transfers that are required by foreign governments and for transfers to FSCs.

Section 1.367(a)-5T provides rules concerning transfers of property that are subject to taxation by reason of section 367(a) regardless of whether the property will be used in the active conduct of a trade or business. These rules apply to transfers of inventory, installment obligations, foreign currency, intangible property, and leased property.

Section 1.367(a)-6T provides special rules relating to the incorporation of a foreign branch with previously deducted losses. Paragraph (b) provides generally that such losses must be recaptured by recognizing the gain realized on the transfer of the branch's assets. Paragraph (c) specifies the character of, and limitations on, the gain required to be recognized, while paragraphs (d) and (e) provide for adjustments to the amount of losses subject to recapture. Paragraph (f) provides an example. Finally, paragraph (g) defines the term "foreign branch."

Section 1.367(d)-1T provides rules under section 367(d) concerning transfers of intangible property by U.S. persons to foreign corporations. Paragraph (b) specifies the transfers that are subject to section 367(d), while paragraph (c) provides rules concerning the consequences of such a transfer. In general, the U.S. transferor will be treated as receiving payments contingent on productivity or use of the transferred property, over the useful life of the property (regardless of whether such payments are in fact made by the transferee). Under a special transitional rule contained in §1.367(a)-1T(d)(3)(iv), certain foreign marketing intangibles developed by a foreign branch and transferred prior to May 16, 1986 will not be subject to the rules of section 367(d). Transfers of such marketing intangibles made on or after that date are subject to the section 367(d) rules. Paragraphs (d), (e), and (f) provide rules for cases in which there is a later direct or indirect disposition of the intangible property transferred. In general, deemed license payments will continue if a transfer is made to a related person, while gain must be recognized immediately if the transfer is to be an unrelated person. Paragraph (g) provides several special rules, including a rule allowing appropriate adjustments where deemed payments under section 367(d) are not in effect received by the U.S. transferor of the intangible property, and a rule providing for a limited election to treat certain transfers of intangible property as sales at fair market value (in lieu of applying the general useful life-contingent payment rule). In addition, paragraph (g) provides rules coordinating the application of section 367(d) with other relevant Code sections. Finally, paragraph (h) defines the term "related person" for purposes of section 367(d).

Section 1.6038B-1T provides rules concerning the information that is required to be reported under section 6038B with respect to transfers of property to foreign corporations. Paragraph (b) of the section explains when and how to report under section 6038B. Paragraphs (c) and (d) specify the information that is required to be reported with respect to transfers of property described in section 367(a) and (d), respectively. Paragraph (e) is reserved to specify the information required to be reported with respect to transfers subject to section 367(e). Finally, paragraph (f) sets forth the consequences of a failure to comply with the requirements of section 6038B.

The temporary regulations do not provide rules concerning new section 367(e). When such regulations are issued, they will apply only on a prospective basis. The temporary regulations do, however, describe the situations in which section 367(a) will apply to corporate liquidations under section 332.

NONAPPICABILITY OF EXECUTIVE ORDER 12291

The Treasury Department has determined that these temporary regulations are not subject to Executive Order 12291. Accordingly, a Regulatory Impact analysis is not required.

REGULATORY FLEXIBILITY ACT

A general notice of proposed rulemaking is not required by 5 U.S.C. 553(b) for temporary regulations. Accordingly, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply and no Regulatory Flexibility Analysis is required for this rule.

PAPERWORK REDUCTION ACT

These regulations were submitted to The Office of Management and budget for review under the Paperwork Reduction Act and approved under OMB number 1545-0026.

DRAFTING INFORMATION

The principal authors of these regulations are Charles W. Culmer of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, and Robert E. Culbertson, Jr., of the Office of the Associate Chief Counsel (International), Internal Revenue Service. Personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations.

* * * * *

Adoption of amendments to the regulations.

Accordingly, 26 CFR Part 1, Part 7, and Part 602 are amended as follows:

INCOME TAX REGULATIONS

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 USC 7805. * * * Sections 1.367(a)-1T through 1.367(a)-7T also issued under 26 USC 367(a). Section 1.367(d)-1T also issued under 26

USC 367(d). Section 1.6038B-1T also issued under 26 USC 6038B.

Par. 2. Section 1.367(a)-1 is removed.

Par. 3. Section 1.367(a)-4T is redesignated as §1.367(a)-7T.

Par. 4. Sections 1.367(a)-1T through 1.367(a)-6T are added immediately after §1.362-2, to read as follows:

§1.367(a)-1T Transfers to foreign corporations subject to section 367(a): In general (temporary).

(a) *Purpose and scope of regulations.* These regulations set forth rules relating to the provisions of section 367(a) concerning certain transfers of property to foreign corporations. This §1.367(a)-1T provides general rules explaining the effect of section 367(a)(1) and describing the transfers of property that are subject to the rule of that section. Section 1.367(a)-2T provides rules concerning the exception from the rule of section 367(a)(1) for transfers of property to be used in the active conduct of a trade or business outside of the United States. Rules concerning the application of section 367(a)(1) to transfers of stock or securities are provided in §1.367(a)-3T, while §1.367(a)-4T provides special rules regarding other specified transfers of property. Section 1.367(a)-5T describes types of property that are subject to the rule of section 367(a)(1) regardless of whether they are transferred for use in a trade or business. Section 1.367(a)-6T provides rules concerning the application of section 367(a) to the transfer of a branch with previously deducted losses. Finally, §1.367(a)-7T contains transitional rules concerning transfers of intangible property to foreign corporations made after June 6, 1984 and before January 1, 1985. Rules explaining the operation of section 367(d), concerning transfers of intangible property pursuant to an exchange decribed in section 351 or 361, are provided in §1.367(d)-1T. Rules concerning the reporting requirements of section 6038B are provided in §1.6038B-1T.

(b) *General rules*—(1) *Foreign corporation not considered a corporation for purposes of certain transfers.* If a U.S. person transfers property to a foreign corporation in connection with an exchange described in section 332, 351, 354, 355, 356, or 361, then pursuant to section 367(a)(1) the foreign corporation shall not be considered to be a corporation for purposes of determining the extent to which gain shall be recognized on the transfer. Section 367(a)(1) denies nonrecognition treatment only to transfers of items of property on which gain is realized. Thus, the amount of gain recognized because of section 367(a)(1) is unaffected by the transfer of items of property on which loss is realized (but not recognized). The transfers of property that are subject to section 367(a)(1) are further described in paragraph (c) of this section, and relevant definitions are provided in paragraph (d) of this section.

(2) *Cases in which foreign corporate status is not disregarded.* Section 367(a)(1) shall not apply, and a foreign corporate transferee shall, thus, be considered to be a corporation, in the case of any of the following:

(i) The transfer of stock or securities of a foreign corporation which is a party to the exchange or reorganization (as defined in section 368(b));

(ii) The transfer of property for use in the active conduct of a trade or business outside of the United States in accordance with the rules of §§1.367(a)-2T through 1.367(a)-6T; or

(iii) Certain other transfers of property described in §§1.367(a)-2T through 1.367(a)-6T.

For the treatment of a transfer of stock or securities of a foreign corporation which is a party to the exchange or reorganization, see §§1.367(a)-3T(b)(1), 7.367(b)-4, and 7.367(b)-7.

(3) *Limitation of gain required to be recognized*—(i) *In general.* If a U.S. person transfers property to a foreign corporation in a transaction on which gain is required to be recognized under section 367(a) and regulations thereunder, then the gain required to be recognized by the U.S. person shall in no event exceed the gain that would have been recognized on a taxable sale of those items of property if sold individually and without offsetting individual losses against individual gains.

(ii) *Losses.* No loss may be recognized by reason of the operation of section 367.

(iii) *Ordinary income and capital gain.* If section 367(a) and regulations thereunder require the recognition of ordinary income and capital gain in excess of the limitation described in paragraph (b)(3)(i) of this section, then the limitation shall be imposed by making proportionate reductions in the amounts of ordinary income and capital gain, regardless of the character of the gain that would have been recognized on a taxable sale of the property.

(4) *Character, source, and adjustments*—(i) *In general.* If a U.S. person is required to recognize gain under section 367 upon a transfer of property to a foreign corporation, then—

(A) The character and source of such gain shall be determined as if the property had been disposed of in a taxable exchange with the transferee foreign corporation (unless otherwise provided by regulation); and

(B) Appropriate adjustments to earnings and profits, basis, and other affected items shall be made according to otherwise applicable rules, taking into account the gain recognized because of section 367(a)(1). Any increase in the basis of the property received by the foreign corporation resulting from the application of section 367(a) and section 362(a) or (b) shall be allocated over the transferred property with respect to which gain is recognized in proportion to the amount realized by the U.S. person on the transfer of each item of that property. See paragraph (c)(3) of this section for special rules applicable to transfers of partnership interests.

(ii) *Example.* The rules of this paragraph (b)(4) are illustrated by the following example.

Example. Domestic corporation DC transfers inventory with a fair market value of $1 million and adjusted basis of $800,000 to foreign corporation FC in an exchange for stock of FC that is described in section 351(a). Title passes within the U.S. Pursuant to section 367(a), DC is required to recognize gain of $200,000 upon the transfer. Under the rule of this paragraph (b)(4), such gain shall be treated as ordinary income (sections 1201 and 1221) from sources within the U.S. (section 861) arising from a taxable exchange with FC. Appropriate adjustments to earnings and profits, basis, etc., shall be made as if the transfer were subject to section 351. Thus, for example, DC's basis in the FC stock received, and FC's basis in the transferred inventory, will each be increased by the $200,000 gain recognized by DC, pursuant to section 358(a)(1) and 362(a), respectively.

(c) *Transfers described in section 367(a)(1)*—(1) *In general.* A transfer described in section 367(a)(1) is any transfer of property by a U.S. person to a foreign corporation pursuant to an exchange described in section 332, 351, 354, 355, 356, or 361. Section 367(a)(1) applies to such a transfer whether it is made directly, indirectly, or constructively. Indirect or constructive transfers that are described in section 367(a)(1) include the transfers described in subparagraphs (2) through (7) of this paragraph (c). See §1.367(a)-3T(b)(1) for rules relating to the transfer of stock or securities of a foreign corporation that is a party to the exchange or the reorganization.

(2) *Indirect transfers in certain reorganizations*—(i) *Mergers described in section 368(a)(1)(A)*—(A) *In general.* A transfer in connection with a reorganization described in section 368(a)(1)(A) to which either section 368(a)(2)(D) or (E) applies may be an indirect transfer described in section 367(a)(1) if the reorganization involves the merger of two domestic corporations and if stock of a foreign corporation which controls one of such domestic corporations is exchanged in the reorganization. The transfers in connection with such a reorganization that are described in section 367(a)(1) are specified in subdivisions (B) and (C) of this paragraph (c)(2)(i). If a transfer in connection with such a reorganization is described in section 367(a)(1), then the rules of §1.367(a)-3T shall apply to determine whether the U.S. transferor is required to recognize gain with respect to the transfer.

(B) *Mergers to which section 368(a)(2)(D) applies.* A U.S. shareholder of a domestic corporation shall be considered to make a transfer of stock that is described in section 367(a)(1) if—

(1) The domestic corporation transfers substantially all of its properties to another domestic corporation in connection with a reorganization described in section 368(a)(1)(A) to which section 368(a)(2)(D) applies; and

(2) The controlling corporation (within the meaning of section 368(a)(2)(D)) is a foreign corporation.

The indirect transfer of stock by the shareholder shall be subject to the provisions of §1.367(a)-3T.

Example. F, a foreign corporation, owns all the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(A) to which section 368(a)(2)(D) applies, S acquires substantially all the properties of W, a domestic corporation, in a merger of W into S. The stock of F is used as consideration. The reorganization is considered to constitute a transfer of stock described in section 367(a)(1) by the shareholders of W that are U.S. persons.

(C) *Mergers described in section 368(a)(1)(A) to which section 368(a)(2)(E) applies.* A shareholder of a domestic corporation that is a U.S. person shall be considered to make a transfer of stock that is described in section 367(a)(1) if—

(1) The domestic corporation acquires substantially all of the properties of another domestic corporation in connection with a reorganization described in section 368(a)(1)(A) to which section 368(a)(2)(E) applies; and

(2) The controlling corporation (within the meaning of section 368(a)(2)(E)) is a foreign corporation.

The indirect transfer of stock by the shareholder shall be subject to the provisions of §1.367(a)-3T.

(ii) *Reorganizations described in section 368(a)(1)(B).* If, in connection with a reorganization described in section 368(a)(1)(B), a U.S. person exchanges stock of a domestic corporation for voting stock of a foreign corporation that is in control (as defined in section 368(c)) of the domestic acquiring corporation, then that U.S. person is considered to make a transfer of stock that is subject to section 367(a)(1). The rule of this paragraph (c)(2)(ii) is illustrated by the following example.

Example. F, a foreign corporation, owns all the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(B), S acquires all the stock of domestic corporation Y, and the shareholders of Y receive voting stock of F. The reorganizaiton includes an indirect stock transfer described in section 367(a)(1) by those shareholders of Y who are U.S. persons.

(iii) *Reorganizations described in section 368(a)(1)(C).* A U.S. shareholder of a domestic corporation shall be considered to make a transfer of stock that is subject to section 367(a)(1) if—

(A) The domestic corporation transfers substantially all of its properties to another domestic corporation in connection with a reorganization described in section 368(a)(1)(C); and

(B) The domestic corporation receives voting stock in a foreign corporation that is in control (as defined in section 368(c)) of the acquiring corporation (and distributes the stock to its shareholders in accordance with section 368(a)(2)(G)).

The rule of this paragraph (c)(2)(iii) is illustrated by the following example.

Example. F, a foreign corporation, owns all the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(C), S acquires substantially all of the properties of Z, a domestic corporation, and Z receives voting stock of F (and distributes the stock to its shareholders). The reorganization is considered in section 367(a)(1) by the shareholders of Z that are U.S. persons.

(3) *Indirect transfers involving partnerships and interests therein*—(i) *Transfer by partnership treated as transfers by partners*—(A) *In general.* If a partnership (whether foreign or domestic) transfers property to a foreign corporation in an exchange described in section 367(a)(1), then a U.S. person that is a partner in the partnership shall be treated as having transferred a proportionate share of the property in an exchange described in section 367(a)(1). A U.S. person's proportionate share of partnership property shall be determined under the rules and principles of section 701 through 761 and the regulations thereunder. The rule of this paragraph (c)(3)(i)(A) is illustrated by the following example.

Example. P is a partnership having five equal general partners, two of whom are United States persons. P transfers property to F, a foreign corporation, in connection with an exchange described in section 351. The exchange includes an indirect transfer of property by the partners to F. The transfers of property attributable to those partners who are United States persons, that is, 40 percent of each asset transferred to F, are transfers described in section 367(a)(1). The gain (if any) recognized on the transfer of 40 percent of each asset to F is attributable to the two partners who are United States persons.

(b) *Special adjustments to basis.* If a U.S. person is treated under the rule of this paragraph (c)(3)(i) as having transferred a proportionate share of the property of a partnership in an exchange described in section 367(a), and is therefore required to recognize gain upon the transfer, then—

(1) The U.S. person's basis in the partnership shall be increased by the amount of gain recognized by him;

(2) Solely for purposes of determining the basis of the partnership in the stock of the transferee foreign corporation, the U.S. person shall be treated as having newly acquired an interest in the partnership (for an amount equal to the

gain recognized), permitting the partnership to make an optional adjustment to basis pursuant to sections 743 and 754; and

(3) The transferee foreign corporation's basis in the property acquired from the partnership shall be increased by the amount of gain recognized by U.S. persons under this paragraph (c)(3)(i).

(ii) *Transfer of partnership interest treated as transfer of proportionate share of assets*—(A) *In general.* If a U.S. person transfers an interest as a partner in a partnership (whether foreign or domestic) in an exchange described in section 367(a)(1), then that person shall be treated as having transferred a proportionate share of the property of the partnership in an exchange described in section 367(a)(1). Accordingly, the applicability of the exception to section 367(a)(1) provided in §1.367(a)-2T shall be determined with reference to the property of the partnership rather than the partnership interest itself. A U.S. person's porportionate share of partnership shall be determined under the rules and principles of sections 701 through 761 and the regulations thereunder.

(B) *Special adjustments to basis.* If a U.S. person is treated under the rule of paragraph (c)(3)(ii)(A) of this section as having transferred a proportionate share of the property of a partnership in an exchange described in section 367(a), and is therefore required to recognize gain upon the transfer, then—

(1) The U.S. person's basis in the stock of the transferee foreign corporation shall be increased by the amount of gain so recognized by that person;

(2) The transferee foreign corporation's basis in the transferred partnership interest shall be increased by the amount of gain recognized by the U.S. person; and

(3) Solely for purposes of determining the partnership's basis in the property held by it, the U.S. person shall be treated as having newly acquired an interest in the partnership (for an amount equal to the gain recognized), permitting the partnership to make an optional adjustment to basis pursuant to sections 743 and 754.

(c) *Limited partnership interest.* The transfer by a U.S. person of an interest in a partnership shall not be subject to the rules of paragraph (c)(3)(ii)(A) and (B) if—

(1) The interest transferred to a limited partnership interest; and

(2) Such interest is regularly traded on an established securities market.

Instead, the transfer of such an interest shall be treated in the same manner as a transfer of stock or securities. Thus, the consequences of such a transfer shall be determined under the rules of §1.367(a)-3T. For purposes of this section, a limited partnership interest is an interest as a limited partner in a partnership that is organized under the laws of any State of the United States or the District of Columbia. Whether such an interest is regularly traded on an established securities market shall be determined under the provisions of paragraph (c)(3)(ii)(D) of this section.

(D) *Regularly traded on an established securities market—(1) Established securities market.* For purposes of this paragraph (c)(3)(ii), an established securities market is—

(i) A national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934 (15 USC 78f);

(ii) A foreign national securities exchange which is officially recognized, sanctioned, or supervised by governmental authority; and

(iii) An over-the-counter market. An over-the-counter market is any market reflected by the existence of an interdealer quotation system. An interdealer quotation system is any system of general circulation to brokers and dealers which regularly disseminates quotations of stock and securities by identified brokers or dealers, other than by quotation sheets which are prepared and distributed by a broker or dealer in the regular course of business and which contain only quotations of such broker or dealer.

(2) Regularly traded. A class of interest that is traded on an established securities market is considered to be regularly traded if it is regularly quoted by brokers or dealers making a market in such interests. A class of interests shall be presumed to be regularly traded if the entity has a total of 500 or more interest-holders.

(4) *Transfers by trusts and estates*—(i) *In general.* For purposes of section 367(a), a transfer of property by an estate or trust shall be treated as a transfer by the entity itself and not as an indirect transfer by its beneficiaries. Thus, a transfer of property by a foreign trust or estate (as defined in section 7701(a)(31)) is not described in section 367(a)(1), regardless of whether the beneficiaries of the trust or estate are U.S. persons. Similarly, a transfer of property by a domestic trust or estate may be described in section 367(a)(1), regardless of whether the beneficiaries of the trust or estate are foreign persons.

(ii) *Grantor trusts.* A transfer of a portion or all of the assets of a foreign or domestic trust to a foreign corporation in an exchange described in section 367(a)(1) is considered a transfer by any U.S. person who is treated as the owner of any such portion of all of the assets of the trust under sections 671 through 679.

(5) *Termination of election under section 1504(d).* Section 367(a) applies to the constructive reorganization and transfer of property from a domestic corporation to a foreign corporation that occurs upon the termination of an election under section 1504(d), which permits the treatment of certain contiguous country corporations as domestic corporations. The rule of this paragraph (c)(5) is illustrated by the following example.

Example. Domestic corporation Y previously made a valid election under section 1504(d) to have its wholly owned Canadian subsidiary, C, treated as a domestic corporation. On July 1, 1986, C fails to continue to qualify for the election under section 1504(d). A constructive reorganization described in section 368(a)(1)(D) occurs. The resulting constructive transfer of assets by "domestic" corporation C to Canadian corporation C upon the termination of the election is a transfer of property described in section 367(a)(1).

(6) *Changes in classification of an entity.* If a foreign entity is classified as an entity other than an association taxable as a corporation for United States tax purposes, and subsequently a change is made in the governing documents, articles, or agreements of the entity so that the entity is thereafter classified as an association taxable as a corporation, the change in classification is considered a transfer of property to a foreign corporation in connection with an exchange described in section 351. For purposes of section 367(a)(1), the transfer of property is considered as made by the persons determined under the rules set forth in paragraph (c)(3) of this section, with respect to partner-

ships, and paragraph (c)(4)(i) or (ii), with respect to trusts and estates, and the rules of such paragraphs apply in determining whether a transfer described in section 367(a)(1) has been made.

(7) *Contributions to capital.* For rules with respect to the treatment of a contribution to the capital of a foreign corporation as a transfer described in section 367(a)(1), see section 367(c)(2) and the regulations thereunder.

(d) *Definitions.* The following definitions apply for purposes of this section and §1.367(d)-1T.

(1) *United States person.* The term "United States person" includes those persons described in section 7701(a)(30). The term includes a citizen or resident of the United States, a domestic partnership, a domestic corporation, and any estate or trust other than a foreign estate or trust. (For definitions of these terms, see section 7701 and regulations thereunder.) For purposes of this section, an individual with respect to whom an election has been made under section 6013(g) or (h) is considered to be a resident of the United States while such election is in effect. A nonresident alien or a foreign corporation will not be considered a United States person because of its actual or deemed conduct of trade or business within the United States during a taxable year.

(2) *Foreign corporation.* The term "foreign corporation" has the meaning set forth in section 7701(a)(3) and (5) and §301.7701-5.

(3) *Transfer.* For purposes of section 367 and regulations thereunder, the term "transfer" means any transaction that constitutes a transfer for purposes of section 332, 351, 354, 355, 356, or 361, as applicable. A person's entering into a bona fide cost-sharing arrangement under §1.482-2(d)(4) or acquiring rights to intangible property under such an arrangement shall not be considered a transfer of property described in section 367(a)(1). See §1.6038B-1T(b)(3) for the date on which the transfer is considered to be made.

(4) *Property.* For purposes of section 367 and regulations thereunder, the term "property" means any item that constitutes property for purposes of section 332, 351, 354, 355, 356, or 361, as applicable.

(5) *Intangible property*—(i) *In general.* For purposes of section 367 and regulations thereunder, the term "intangible property" means knowledge, rights, documents, and any other intangible item within the meaning of section 936(h)(3)(B) that constitutes property for purposes of section 332, 351, 354, 355, 356, or 361, as applicable. Such property shall be treated as intangible property for purposes of section 367(a) and (d) and the regulations thereunder without regard to whether it is used or developed in the United States or in a foreign country and without regard to whether it is used in manufacturing activities or in marketing activities. A working interest in oil and gas properties shall not be considered to be intangible property for purposes of section 367 and the regulations thereunder.

(ii) *Operating intangibles.* An operating intangible is any intangible property of a type not ordinarily licensed or otherwise transferred in transactions between unrelated parties for consideration contingent upon the licensee's or transferee's use of the property. Examples of operating intangibles may include long-term purchase or supply contracts, surveys, studies; and customer lists.

(iii) *Foreign goodwill or going concern value.* Foreign goodwill or going concern value is the residual value of a business operation conducted outside of the United States after all other tangible and intangible assets have been identified and valued. For purposes of section 367 and regulations thereunder, the value of the right to use a corporate name in a foreign country shall be treated as foreign goodwill or going concern value.

(iv) *Transitional rule for certain marketing intangibles.* For transfers occurring after December 31, 1984, and before May 16, 1986, foreign trademarks, tradenames, brandnames, and similar marketing intangibles developed by a foreign branch shall be treated as foreign goodwill or going concern value.

(e) *Effective date of certain sections*—(1) *In general.* Except as specifically provided to the contrary elsewhere in these sections, §§1.367(a)-1T through 1.367(a)-6T apply to transfers occurring after December 31, 1984.

(2) *Private rulings.* The taxpayer may rely on a private ruling under section 367(a) received by him before June 16, 1986.

(3) *Certain indirect transfers.* Sections 1.367(a)-1T(c)(2)(i) and (iii) and 1.367(a)-1T(c)(3) apply to transfers made after June 16, 1986. For transfers made before that date, see 26 CFR §1.367(a)-1(b) (revised as of April 1, 1986).

§1.367(a)-2T Exception for transfers of property for use in the active conduct of a trade or business (temporary).

(a) *In general.* Section 367(a)(1) shall not apply to property transferred to a foreign corporation if—

(1) Such property is transferred for use by that corporation in the active conduct of a trade or business outside of the United States; and

(2) The U.S. person that transfers the property complies with the reporting requirements of section 6038B and regulations thereunder.

Where there conditions are satisfied, the foreign corporate transferee of the property shall be considered to be a corporation for purposes of determining the extent to which gain or loss is required to be recognized upon the transfer pursuant to section 332, 351, 354 [reserved as to section 355 or so much of section 356 as relates to section 355], 356, or 361. Paragraph (b) of this section provides rules concerning the requirement that property be transferred for use in the active conduct of a trade or business outside of the United States, while paragraph (c) concerns the application of the requirement where the transferee itself re-transfers the property. In addition, §1.367(a)-3T provides rules concerning the treatment of stock or securities transferred to a foreign corporation in an exchange described in section 367(a)(1), and §1.367(a)-4T provides special rules concerning the treatment of other specified types of property. Finally, §§1.367(a)-5T and 1.367(a)-6T provide rules concerning certain transfers of property that are subject to section 367(a)(1) regardless of whether the property is used in the active conduct of a trade or business.

(b) *Active conduct of a trade or business outside the United States*—(1) *In general.* Property qualifies for the exception provided by this section if it is transferred to a foreign corporation for use in the active conduct of a trade or business outside of the United States. Therefore, to determine whether property is subject to the exception provided by this section, four factual determinations must be made:

(i) What is the trade or business of the transferee;

(ii) Do the activities of the transferee constitute the active conduct of that trade or business;

(iii) Is the trade or business conducted outside of the United States; and

(iv) Is the transferred property used or held for use in the trade or business?

Rules concerning these four determinations are provided in paragraph (b)(2), (3), (4), and (5) of this section.

(2) *Trade or business.* Whether the activities of a foreign corporation constitute a trade or business must be determined under all the facts and circumstances. In general, a trade or business is a specific unified group of activities that constitute (or could constitute) an independent economic enterprise carried on for profit. For example, the activities of a foreign selling subsidiary could constitute a trade or business if they could be independently carried on for profit, even though the subsidiary acts exclusively on behalf of, and has operations fully integrated with, its parent corporation. To constitute a trade or business, a group of activities must ordinarily include every operation which forms a part of, or a step in, a process by which an enterprise may earn income or profit. In this regard, one or more of such activities may be carried on by independent contractors under the direct control of the foreign corporation. (However, see paragraph (b)(3) of this section.) The group of activities must ordinarily include the collection of income and the payment of expenses. If the activities of a foreign corporation do not constitute a trade or business, then the exception provided by this section does not apply, regardless of the level of activities carried on by the corporation. The following activities are not considered to constitute by themselves a trade or business for purposes of this section:

(i) Any activity giving rise to expenses that would be deductible only under section 212 if the activities were carried on by an individual; or

(ii) The holding for one's own account of investments in stock, securities, land, or other property, including casual sales thereof.

(3) *Active conduct.* Whether a trade or business is actively conducted must be determined under all the facts and circumstances. In general, a corporation actively conducts a trade or business only if the officers and employees of the corporation carry out substantial managerial and operational activities. A corporation may be engaged in the active conduct of a trade or business even though incidental activities of the trade or business are carried out on behalf of the corporation by independent contractors. In determining whether the officers and employees of the corporation carry out substantial managerial and operational activities, however, the activities of independent contractors shall be disregarded. On the other hand, the officers and employees of the corporation are considered to include the officers and employees of related entities who are made available to and supervised on a day-to-day basis by, and whose salaries are paid by (or reimbursed to the lending related entity by), the transferee foreign corporation. Whether a trade or business that produces rents or royalties is actively conducted shall be determined under the principles of §1.954-2(d)(1) (but without regard to whether the rents or royalties are received from an unrelated person). The rule of this paragraph (b)(3) is illustrated by the following example.

Example. X, a domestic corporation, and Y, a foreign corporation not related to X, transfer property to Z, a newly formed foreign corporation organized for the purpose of combining the research activities of X and Y. Z contracts all of its operational and research activities to Y for an arm's-length fee. Z's activities do not constitute the active conduct of a trade or business.

(4) *Outside of the United States.* Whether a foreign corporation conducts a trade or business outside of the United States must be determined under all the facts and circumstances. Generally, the primary managerial and operational activities of the trade or business must be conducted outside the United States and immediately after the transfer the transferred assets must be located outside the United States. Thus, the exception provided by this section would not apply to the transfer of the assets of a domestic business to a foreign corporation if the domestic business continued to operate in the United States after the transfer. In such a case, the primary operational activities of the business would continue to be conducted in the United States. Moreover, the transferred assets would be located in the United States. However, it is not necessary that every item of property transferred be used outside of the United States. As long as the primary managerial and operational activities of the trade or business are conducted outside of the United States and substantially all of the transferred assets are located outside the United States, incidental items of transferred property located in the United States may be considered to have been transferred for use in the active conduct of a trade or business outside of the United States.

(5) *Use in the trade or business.* Whether property is used or held for use in a trade or business must be determined under all the facts and circumstances. In general, property is used or held for use in a foreign corporation's trade or business if it is—

(i) Held for the principal purpose of promoting the present conduct of the trade or business;

(ii) Acquired and held in the ordinary course of the trade or business; or

(iii) Otherwise held in a direct relationship to the trade or business. Property is considered held in a direct relationship to a trade or business if it is held to meet the present needs of that trade or business and not its anticipated future needs.

Thus, property will not be considered to be held in a direct relationship to a trade or business if it is held for the purpose of providing for future diversification into a new trade or business, future expansion of trade or business activities, future plant replacement, or future business contingencies.

(c) *Property transferred by transferee corporation*—(1) *General rule.* If a foreign corporation receives property in an exchange described in section 367(a)(1) and as part of the same transaction transfers the property to another person, then the exception provided by this section shall not apply to the initial transfer. For purposes of the preceding sentence, a subsequent transfer within six months of the initial transfer shall be considered to be part of the same transaction, and a subsequent transfer more than six months after the initial transfer may be considered to be part of the same transaction upon the application of step-transaction principles.

(2) *Exception.* Notwithstanding paragraph (e)(1) of this section, the active conduct exception provided by this section shall apply to the initial transfer if—

(i) The initial transfer is followed by one or more subsequent transfers described in section 351 or 721; and

(ii) Each subsequent transferee is either a partnership in which the preceding transferor is a general partner or a corporation in which the preceding transferor owns common stock; and

(iii) The ultimate transferee uses the property in the active conduct of a trade or business outside the United States.

(d) *Transitional rule.* Notwithstanding any other provision of this section, property shall be considered to have been transferred for use in the active conduct of a trade or business outside of the United States, if—

(1) The property was transferred after December 31, 1984, and before June 16, 1986;

(2) The property was, or would have been, considered to be transferred for use by the transferee foreign corporation in the active conduct, in any foreign country, of a trade or business, under the principles of section 3.02(1) of Revenue Procedure 68-23, 1968-1 C.B. 821; and

(3) Based on all of the facts and circumstances, it was, or would have been, determined under section 2.02 of Revenue Procedure 68-23 that tax avoidance was not one of the principal purposes of the transaction.

§1.367(a)-3T Treatment of transfers of stock or securities to foreign corporations (temporary).

(a) *In general.* This section provides rules concerning the transfer of stock or securities to a foreign corporation in an exchange described in section 367(a)(1). In general, a transfer of stock or securities by a U.S. person to a foreign corporation in connection with any exchange described in section 332, 351, 354 [reserved as to section 355 and so much of section 356 as relates to section 355], 356, or 361, is subject to section 367(a)(1) (and, therefore, treated as a taxable exchange) unless one of the exceptions set forth in this section applies to the transfer. Paragraph (b) of this section specifies certain transactions that are not subject to section 367(a)(1), while paragraph (c) provides rules concerning the treatment of transfers of stock or securities of domestic corporations pursuant to any exchange described in section 367(a)(1). Paragraph (d) of this section provides rules concerning the transfer of stock of a foreign corporation to another foreign corporation pursuant to section 332 or 351 [reserved as to section 355 and so much of section 356 as relates to section 355]. Finally, paragraphs (e), (f), and (g) provide detailed rules applicable to certain transfers described above and paragraph (h) sets forth anti-abuse rules.

(b) *Transfer to which section 367(a)(1) does not apply*—(1) *Transfers in certain reorganizations of stock or securities of foreign corporations.* If, pursuant to an exchange described in section 354, 361, or so much of section 356 as relates to section 354, a U.S. person transfers to a foreign corporation stock or securities of a foreign corporation that is a party to the reorganization, then section 367(a) shall not apply to the transfer, by reason of the operation of section 367(a)(2) and §1.367(a)-1T(b)(2)(i). Thus, section 367(a)(1) shall not apply to a transfer of stock of a foreign corporation by a United States person to another foreign corporation pursuant to a reorganization described in section 368(a)(1)(B) because the foreign corporation whose stock is transferred is a party to the reorganization. This result follows even though that foreign corporation may not be a party to other types of reorganizations or exchanges for which the transaction also qualifies. For rules concerning the treatment of certain transfers that are described in section 351 as well as one of the above-cited sections, see §§7.367(b)-4 and 7.367(b)-7.

(2) *Compulsory transfers.* For rules regarding a transfer of property (including stock or securities) that is compelled by foreign government action, see §1.367(a)-4T(f).

(c) *Transfer of stock or securities of domestic corporation*—(1) *In general.* The transfer of stock or securities of a domestic corporation to a foreign corporation (in an exchange described in section 367(a)(1)) shall be subject to section 367(a)(1) and shall therefore be treated as a taxable exchange, except in the circumstances set forth in paragraphs (c)(2), (3), (4), (5), and (6) of this section.

(2) *Active conduct of a trade or business.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a domestic corporation if (i) the transfer is described in paragraph (e)(2) of this section (ii) the transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section. In general, paragraph (e)(2) of this section describes certain transfers of stock or securities for use by the transferee in the active conduct of a trade or business outside of the United States.

(3) *U.S. transferors obtain limited interest in transferee.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a domestic corporation if the transfer is described in paragraph (f) of this section. In general, paragraph (f) of this section describes transfers in which the U.S. transferors of stock or securities obtain only a limited interest in the transferee foreign corporation.

(4) *Transferor files agreement to recognize gain upon later disposition.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a domestic corporation if (i) immediately after the transfer all U.S. transferors own in the aggregate less than fifty percent of both the total voting power and the total value of the stock of the transferee foreign corporation and (ii) the subject transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

(5) *Certain transfers in connection with performance of services.* Section 367(a)(1) shall not apply to a domestic corporation's transfer of its own stock or securities in connection with the performance of services, if the transfer is considered to be to a foreign corporation solely by reason of §1.83-6(d)(1).

(6) *Transfers pursuant to section 355 or so much of section 356 as relates to section 355.* [Reserved.]

(d) *Transfer of stock or securities of foreign corporation pursuant to section 332 or 351 [reserved as to section 355 and so much of section 356 as relates to section 355]*—(1) *In general.* If a

U.S. person transfers stock or securities of a foreign corporation to another foreign corporation in an exchange described in section 332 or 351 [reserved as to section 355 or so much of section 356 as relates to section 355] then section 367(a)(1) shall apply to the transfer (which is therefore treated as a taxable exchange), except in the circumstances set forth in paragraph (d)(2), (3), (4), (5), and (6) of this section. Transfers described in section 351 that are also described in section 368(a)(1)(B) shall be subject to the rules set forth in §§7.367(b)-4 and 7.367(b)-7 and shall not be subject to the rules of this paragraph (d).

(2) *Active conduct of a trade or business.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a foreign corporation if (i) the transfer is described in paragraph (e)(2) or (3) of this section and (ii) the transferor files an agreement to recognized gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section. In general, paragraph (e) describes transfers of stock or securities for use by the transferee corporation in the active conduct of a trade or business outside of the United States.

(3) *Transfer of stock or securities of foreign corporation to another corporation organized in same country.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a foreign corporation if—

(i) The transferred corporation and the transferee corporation are created or organized under the laws of the same foreign country;

(ii) At least 50 percent of the assets used in the trade or business of the transferred corporation are located in that same foreign country;

(iii) Prior to the transfer, more than 50 percent of the total combined voting power of all classes of stock entitled to vote of the transferred corporation was held by U.S. persons;

(iv) After the transfer, the transferee corporation holds more than 50 percent of the total combined voting power of all classes of stock entitled to vote of the transferred corporation;

(v) After the transfer, the U.S. persons that controlled the transferred corporation before the transfer hold at least 50 percent of the total combined voting power of all classes of stock entitled to vote of the transferee corporation;

(vi) After the transfer, the transferee corporation is a controlled foreign corporation within the meaning of section 957(a); and

(vii) The transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

The provisions of this paragraph (d)(3) shall apply to transfers occurring after June 16, 1986. For other transfers, see section 3.02(1)(a)(iii)(B) of Revenue Procedure 68-23.

(4) *U.S. transferors obtain limited interest in transferee.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a foreign corporation if the transfer is described in paragraph (f) of this section. In general, paragraph (f) of this section describes transfers in which the U.S. transferors of stock or securities obtain only a limited interest in the transferee foreign corporation.

(5) *Transferor files agreement to recognize gain upon later disposition.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a foreign corporation if (i) immediately after the transfer all U.S. transferors own in the aggregate less than fifty percent of both the total voting power and the total value of the stock of the transferee foreign corportion and (ii) the subject transferor files and agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

(6) *Transfer pursuant to section 355 or so much of section 356 as relates to section 355.* [Reserved.]

(e) *Transfer for use in the active conduct of a trade or business outside of the United States*—(1) *In general.* Section 367(a) shall not apply to a transfer of stock or securities of a corporation if (i) the transfer is described in paragraph (e)(2) or (3) of this section and (ii) the transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

(2) *Stock contituting operating asset.* A transfer of stock or securities of a foreign or domestic corporation to a foreign corporation shall be considered to be for use in the active conduct of a trade or business outside of the United States if the stock or securities are essentially operating assets in the hands of the transferee because ownership of the stock or securities grants material rights to acquire for use in the transferor's trade or business outside the United States products produced by the transferred corporation outside the United States. See *Kaiser Aluminum Chemical Corp. v. Comm'r*, 76 T.C. 325 (1981).

(3) *Consolidation of integrated business*—(i) *In general.* A transfer of stock or securities of a foreign corporation to a foreign corporation shall be considered to be for use in the active conduct of a trade or business outside of the United States if—

(A) Immediately after the transfer, the transferee foreign corporation holds more than 50 percent of the total voting power and more than 50 percent of the total value of stock of the transferred corporation; and

(B) Both immediately before and immediately after the transfer, the transferred corporation and the transferee foreign corporation constitute an integrated business in accordance with the provisions of paragraph (e)(2)(ii) of this section.

(ii) *Integrated business.* For purposes of this paragraph (e)(2), the transferred and transferee corporations shall be considered to constitute an integrated business only if—

(A) Each corporation is engaged, directly or indirectly, in substantial business operations beyond the mere provision of general managerial, financial, or similar services to the other corporation; and

(B) Either the business operations of one corporation are substantially identical to all or the principal part of the operations of the other, or the operations of the two corporations constitute in principal part complementary and mutually interdependent steps in the production and sale or lease of a product or products or in the provision of a service. Substantial identity of business operations requires that the two corporations engage in substantially the same production (or service) and marketing processes or activities for generally the same or similar products (or services).

(f) *U.S. transferors obtain limited interest in transferee*—(1) *In general.*

A transfer of stock or securities of a foreign or domestic corporation by a U.S. person to a foreign corporation shall not be subject to section 367(a)(1) if immediately after the transfer—

(i) All U.S. transferors own in the aggregate less than twenty percent of both the total voting power and the total value of the stock of the transferee foreign corporation; or

(ii) (A) All U.S. transferors own in the aggregate twenty percent or more of either the total voting power or the total value of the stock of the transferee foreign corporation, but less than fifty percent of that total voting power and that total value; and

(B) The subject U.S. transferor owns less than five percent of both the total voting power and the total value of the stock of the transferee foreign corporation.

(2) *Attribution.* Section 958 shall apply in determining the ownership of stock for purposes of this paragraph (f).

(3) *Rule not applicable to stock of holding companies.* The rule of paragraph (f)(1) of this section shall not apply if the assets of the transferred corporation consist principally of stock or securities held as portfolio investments. Stock or securities of a given entity held by the transferred corporation shall be presumed not to constitute a portfolio investment if the transferred corporation holds ten percent or more by value of the outstanding stock and securities of that entity. This presumption may be rebutted by evidence that the stock was held by the transferred corporation as a passive, portfolio investment.

(g) *Transferor's agreement to recognize gain upon later disposition by transferee*—(1) *In general.* A transfer of stock or securities shall not be subject to section 367(a)(1) if—

(i) The transferor complies with the reporting requirements of section 6038B and any regulations thereunder;

(ii) The transferor files a binding agreement to recognize gain upon the transferee corporation's later disposition of the transferred stock or securities, in accordance with the rules of this section; and

(iii) The transfer is described in paragraph (d)(3) or (e) of this section or, immediately after the transfer, all U.S. transferors own in the aggregate less than 50 percent of both the total voting power and the total value of the stock of the transferee foreign corporation.

(2) *Agreement to recognize gain: in general.* A transferor's agreement to recognize gain must be attached to, and filed by the due date of, the information return required under section 6038B. In general, the return must be filed with the transferor's tax return for the taxable year that includes the date of the transfer. However, pursuant to §1.6038B-1T(b)(1), returns with respect to transfers that took place prior to June 16, 1986 are not required to be filed until September 16, 1986. Therefore, an agreement to recognize gain under the rules of this section with respect to any such transfer may be timely filed until that date. The agreement must be signed under penalties of perjury by a trustee, executor, or equivalent fiduciary in the case of a trust or estate, by a responsible officer in the case of a corporation, by a debtor in possession or trustee in a bankruptcy case under Title 11, United States Code, and in the case of an individual, including a partner who is treated as a transferor by virtue of §1.367(a)-1T(c)(3), by the individual himself. An agreement may also be signed by an agent authorized to do so under a general or specific power of attorney. The agreement must set forth the following materials, preferably in paragraphs labeled to correspond with the subparagraphs set forth below:

(i) A statement that the document submitted constitutes the transferor's agreement to recognize gain, in accordance with the requirements of §1.367(a)-3T(g);

(ii) A description of the stock or securities transferred, an estimate of fair market value as of the date of the transfer, and a statement of cost or other basis and any adjustments thereto;

(iii) The transferor's agreement to recognize gain, as described in subparagraph (3) of this paragraph (g);

(iv) A waiver of the period of limitations, as described in subparagraph (4) of this paragraph (g); and

(v) An agreement to file with the transferor's tax returns for the 5 years following the year of the transfer of certification and waiver as described in subparagraph (5) of this paragraph (g).

(3) *Terms of agreement*—(i) *Recognition of gain.* The transferor must agree that if, prior to the close of the fifth taxable year following the taxable year of the transfer, the transferee foreign corporation disposes of the transferred stock in any manner (other than in a liquidation of the transferred corporation), then by the 90th day thereafter the transferor will file an amended return for the year of the transfer and recognize thereon the gain realized but not recognized upon the initial transfer. Such gain shall be computed as if there had been a sale of the stock or securities at fair market value at the time of the initial transfer. Net operating losses or credits against tax that were available in the year of the initial transfer and that have expired unused may be applied (respectively) against any gain recognized or tax owned by reason of this provision, but no other adjustments shall be made with respect to any other items of income or deduction in the year of the transfer or other years. If additional tax is required to be paid, then interest must be paid on that amount at the rates determined under setion 6621, with respect to the period between the date that was prescribed for filing the transferor's income tax return for the year of the transfer and the date on which the additional tax for that year is paid. For special rules applicable to nonrecognition transfers, see subparagraph (7) of this paragraph (g). For special rules applicable when a U.S. transferor that enters into an agreement under this paragraph (g) ceases to exist, see subparagraph (9) of this paragraph (g).

(ii) *Partial disposition.* If the transferee foreign corporation disposes of only a portion of the stock or securities of the transferred corporation, then the U.S. transferor shall be required to recognize a proportionate amount of the gain realized but not recognized upon the initial transfer. The proportion required to be recognized shall be determined by reference to the fair market value of the stock or securities disposed of and the fair market value of those retained. The rule of this paragraph (g)(3)(ii) is illustrated by the following example.

Example. A is a U.S. citizen who owns 100 percent of the outstanding stock of foreign corporation X. In a transaction described in section 351, A exchanges his stock in X for 25 percent of the outstanding stock of foreign corporation Y. A submits an agreement under the rules of this section to recognize gain upon a later disposition. In the following year, Y disposes of 50 percent of the fair market value of the stock of X. Therefore, A is required to recognize 50 percent of the gain he realized but did not recognize upon the initial transfer of the shares of X.

(iii) *Disposition of assets by transferred corporation.* For purposes of paragraph (g)(3)(i) and (ii) of this section, a disposition not in the ordinary course of business by the transferred corporation of all or a substantial portion of its assets (other than a distribution, including a liquidating distribution, to the transferee foreign corporation) shall be treated as a disposition by the transferee foreign corporation of a proportionate amount of stock of the transferred corporation.

(iv) *Disposition of assets after distribution by transferred corporation.* For purposes of paragraph (g)(3)(i) and (ii) of this section, a disposition not in the ordinary course of business by the transferee foreign corporation of all or a substantial portion of the assets received by it in a distribution, including a liquidating distribution, from the transferred corporation shall be treated as a disposition by the transferee foreign corporation of a proportionate amount of stock of the transferred corporation.

(4) *Waiver of period of limitation.* The transferor must file a waiver of the period of limitation on assessment of tax upon the gain realized on the transfer. The waiver shall be executed on such forms as are prescribed therefor by the Commissioner and shall extend the period for assessment of such tax to a date not earlier than the close of the eighth taxable year following the taxable year of the transfer. Such waiver shall also contain such other terms with respect to assessment as may be considered by the Commissioner to be necessary to ensure the assessment and collection of the correct tax liability for each year for which the waiver is required. The waiver must be signed by a person authorized to sign the agreement pursuant to the provisions of paragraph (g)(2) of this section.

(5) *Annual certification and waiver*—(i) *Certification.* The transferor must agree to file with its income tax return for each of the five taxable years following the taxable year of the transfer a certification that the stock or securities transferred have not been disposed by the transferee in a transaction that is considered to be a disposition for purposes of the this paragraph. If either a disposition qualifying under paragraph (g)(1) of this section or a nonrecognition transfer subject to paragraph (g)(7) of this section has occurred, the transferor's certification must provide the information required under the rules of the subject paragraph. The annual certification pursuant to this paragraph (g)(5) must be signed under penalties of perjury by a person authorized to sign the agreement pursuant to the provisions of paragraph (g)(2) of this section. The certification must identify the transfer with respect to which it is given by setting forth the date of the transfer and a description of the stock or securities transferred. If a taxpayer has made more than one transfer subject to the rules of this paragraph (g), the certifications for those transfers may be combined in a single document, but each transfer must be separately identified.

(ii) *Waiver.* The transferor must agree to file with its income tax return for each of the eight taxable years following the taxable year of the transfer a waiver of the period of limitations on assessment as described in paragraph (g)(4) of this section. For the rule extending the period of limitation upon a failure to comply with the reporting requirements of section 6038B and regulations thereunder, see §1.6038B-1T(f)(1)(iii).

(6) *Warranty of information regarding disposition.* The transferor must warrant that arrangements have been made in connection with the transfer of stock or securities to ensure that the transferor will be informed of any subsequent disposition of stock, securities, or assets that would require the recognition of gain under the agreement.

(7) *Treatment of nonrecognition transfers.* If, during the period the agreement is in force, the transferee foreign corporation disposes of the stock or securities of the transferred corporation in a transaction on which gain or loss would not be required to be recognized under U.S. income tax principles, then the U.S. transferor shall not be required to recognize gain under paragraph (g)(3)(i) of this section, provided that the U.S. transferor complies with the requirements of subdivisions (i), (ii), and (iii) of this paragraph (g)(7).

(i) The U.S. transferor must provide a notice of the transfer with its next annual certification under paragraph (g)(5) of this section, setting forth—

(A) A description of the transfer;

(B) The applicable nonrecognition provision; and

(C) The name, address, and identifying number (if any) of the new transferee of the stock or securities of the transferred corporation.

(ii) The U.S. transferor must provide a new agreement to recognize gain (in accordance with the rules of paragraph (g)(2) and (3)(i) of this section) if, prior to the close of the fifth taxable year following the taxable year of the initial transfer, either—

(A) The initial transferee foreign corporation disposes of the interest which it received in exchange for the stock or securities of the transferred corporation (other than in a disposition which itself qualifies under the rules of this paragraph (g)(7)); or

(B) The person that obtained the stock or securities of the transferred corporation disposes of that stock or those securities (other than in a disposition which itself qualifies under the rules of this paragraph (g)(7)).

If a disposition that triggers the recognition of gain under the rules of this paragraph is only a partial disposition of the property, then the U.S. transferor shall be required to recognize a proportionate amount of the gain realized but not recognized upon the initial transfer. The proportion required to be recognized shall be determined by reference to the fair market value of the stock or securities disposed of and the fair market value of those retained as of the date of the disposition.

(iii) The U.S. transferor must warrant that arrangements have been made, in connection withthe nonrecognition transfer, ensuring that the U.S. transferor will be informed of any subsequent disposition with respect to which recognition of gain would be required under the agreement.

(8) *Special rules for indirect transfers*—(i) *Transfers covered.* If a U.S. person that holds an interest in an entity is considered to make an indirect transfer of stock or securities described in section 367(a) under the provisions of §1.367(a)-1T(c), then the rules of this paragraph (g)(8) shall apply to the transfer.

(ii) *Applicable rules.* For purposes of this paragraph (g), the foreign corporation that issued the stock or securities received by the U.S. transferor shall be considered to be the transferee foreign corporation. Any agreement entered into under this paragraph (g) with respect to such a transfer shall require the recognition of gain by the transferor if—

(A) That transferee foreign corporation disposes of the corporation that it controls (regardless of whether that corporation is the transferred corporation itself or another corporation that obtained the stock, securities, or assets of the transferred corporation); or

(B) The corporation that holds the assets of the transferred corporation disposes of all or a substantial portion those assets other than in the ordinary course of business.

The rules of paragraph (g)(7) of this section shall apply if gain or loss would not be required to be recognized under U.S. income tax principles with respect to such a transfer.

(9) *U.S. transferor goes out of existence.* If a U.S. corporation, trust, or estate that has entered into an agreement under this paragraph (g) goes out of existence, and that corporation, trust, or estate is not required to recognize gain under section 367 upon its liquidating transfer of the stock of the transferee foreign corporation, or if an individual transferor that has entered into an agreement under this paragraph (g) dies, then either—

(i) The person winding up the affairs of the transferor must retain assets to meet any possible liability of the transferor under the agreement;

(ii) The person winding up the affiars of the transferor must provide security under subparagraph (10) of this paragraph (g) for any possible liability of the transferor under the agreement; or

(iii) Each person that obtains the stock of the transferee foreign corporation from the transferor must enter into an agreement under this paragraph (g) having the same terms as the agreement entered into by the transferor (but only with respect to that person's proportionate share of the gain realized but not recognized upon the transferor's initial transfer of stock to the transferee foreign corporation).

(10) *Use of security.* The transferor may be required to furnish a bond or other security that satisfies the requirements of §301.7101-1 if the district director determines that such security is necessary to ensure the payment of any tax upon the gain realized upon the transfer. Such bond or security will generally be required only if the stock or securities transferred are the principal asset of the transferor and the director has reason to believe that a disposition of the stock or securities may be contemplated. In addition, if a transferor corporation, trust, or estate ceases to exist, or if an individual transferor dies, then the person winding up the affairs of the transferor (such as a trustee in bankruptcy or an executor) may choose to supply security pursuant to paragraph (g)(9) of this section for the performance of the transferor's obligations under an agreement entered into under this paragraph (g).

(11) *Failure to comply.* If a person that has entered into an agreement under this paragraph (g) fails at any time to comply in any material respect with the requirements of this section or with the terms of any agreement submitted pursuant thereto, then the rule of paragraph (g)(1) of this section shall not apply. Thus, the initial transfer of the stock or securities will become subject to section 367(a)(1) (unless otherwise excepted under the rules of this section) and will be treated as a taxable exchange in the year of the initial transfer. Such a material failure to comply shall extend the period for assessment of tax until three years after the date on which the Internal Revenue Service receives actual notice of the failure to comply.

(12) *Availability of forms.* Any agreement, certification, waiver, or other document required to be filed pursuant to the provisions of this paragraph (g) shall use such forms as may be prescribed therefore by the Commissioner (or a similar statement providing the same information). Until such time as forms are published, all necessary filings may be accomplished by providing the required information to the Service in accordance with the rules of this paragraph.

(13) *Basis adjustments*—(i) If a U.S. transferor is required to recognize gain under this paragraph (g), then in determining for U.S. income tax purposes any gain or loss recognized by the transferee foreign corporation upon its subsequent disposition of the transferred stock or securities, its basis in such interests shall be increased by the amount of gain required to be recognized (but not by any tax or interest required to be paid on such amount).

(ii) If a U.S. transferor is required to recognize gain under this paragraph (g), then the U.S. transferor's basis in the stock of the transferee foreign corporation shall be increased by the amount of gain required to be recognized (but not by any tax or interest required to be paid on such amount).

(h) *Anti-abuse rules*—(1) *Coordination with subpart F.* Notwithstanding the provisions of paragraph (d)(2) or (3) of this section, section 367 (a)(1) shall apply to a transfer of stock or securities of a foreign corporation if either:

(i) The transferred corporation was a controlled foreign corporation within the meaning of section 957(a), and the transferee corporation is not a controlled foreign corporation; or

(ii) Both the transferred and the transferee corporations are controlled foreign corporations within the meaning of section 957(a) but the transferor was a U.S. shareholder of the transferred corporation within the meaning of section 951(b) and is not a U.S. shareholder of the transferee corporation, within the meaning of section 951(b).

However, section 367(a)(1) shall not apply to such a transfer if the transferor enters into an agreement to recognize gain under paragraph (g) of this section.

(2) *Incorporation of property to avoid section 367(a)(1).* Notwithstanding any other provision of this section, section 367(a)(1) shall apply to a transfer of stock or securities of a domestic corporation if:

(i) The domestic corporation holds property that would be subject to section 367(a)(1) if it were transferred directly to a foreign corporation;

(ii) A U.S. person transferred that property to the domestic corporation in a transaction on which gain or loss was not required to be recognized, and

(iii) One of the principal purposes of the incorporation and transfer was avoidance of the provisions of section 367(a).

A transfer of property shall be presumed to have been made to avoid the provisions of section 367(a) if the transfer to the domestic corporation occurred less than two years before the transfer of the stock of the domestic corporation to the foreign corporation, or if it otherwise appears that the transfer of stock to the foreign corporation was planned or contemplated at the time of the transfer of the property to the domestic corporation. The presumption created by the previous sentence may be rebutted by evidence establishing that avoidance of the provisions of section 367(a) was not one of the principal purposes of the incorporation and subsequent transfer.

§1.367(a)-4T Special rules applicable to specified transfers of property (temporary).

(a) *In general*. This section provides special rules for determining the applicability of section 367(a)(1) to specified transfers of property. Paragraph (b) of this section provides a special rule requiring the recapture of depreciation upon the transfer abroad of property previously used in the United States. Paragraphs (c) through (f) of this section provide rules for determining whether certain types of property are transferred for use in the active conduct of a trade or business outside of the United States. Paragraph (g) excepts certain transfers to FSCs from the operation of section 367(a)(1). The treatment of any transfer of property described in this section shall be determined exclusively under the rules of this section.

(b) *Depreciated property used in the U.S.*—(1) *In general*. If a U.S. person transfers U.S. depreciated property (as defined in paragraph (b)(2) of this section) to a foreign corporation in an exchange described in section 367(a)(1), then that person shall include in its gross income for the taxable year in which the transfer occurs ordinary income equal to the gain realized that would have been includible in the transferor's gross income as ordinary income under section 617(d)(1), 1245(a), 1250(a), 1252(a), or 1254(a), whichever is applicable, if at the time of the transfer the transferor had sold the property at its fair market value. Recapture of depreciation under this paragraph (b) shall be required regardless of whether any exception to section 367(a)(1) (such as the exception for property transferred for use in the active conduct of a foreign trade or business) would otherwise apply to the transfer. However, any applicable exception shall apply with respect to realized gain that is not included in ordinary income pursuant to this paragraph (b).

(2) *U.S. depreciated property*. U.S. depreciated property subject to the rules of this paragraph (b) is any property that—

(i) Is either mining property (as defined in section 617(f)(2)), section 1245 property (as defined in section 1245(a)(3)), section 1250 property (as defined in section 1250(c)), farm land (as defined in section 1252(a)(2)), or oil, gas, or geothermal property (as defined in section 1254(a)(3)); and

(ii) Has been used in the United States or has qualified as section 38 property by virtue of section 48(a)(2)(B) prior to its transfer.

(3) *Property used within and without the U.S.* If U.S. depreciated property has been used partly within and partly without the United States, then the amount required to be included in ordinary income pursuant to this paragraph (b) shall be reduced to an amount determined in accordance with the following formula:

$$\text{Full recapture amount X } \frac{\text{U.S. use}}{\text{Total use}}$$

For purposes of the above fraction, the "full recapture amount" is the amount that would otherwise be included in the transferor's income under paragraph (b)(1) of this section. "U.S. use" is the number of months that the property either was used within the United States or qualified as section 38 property by virtue of section 48(a)(2)(B), and was subject to depreciation by the transferor or a related person. "Total use" is the total number of months that the property was used (or available for use), and subject to depreciation, by the transferor or a related person. For purposes of this paragraph (b)(3), property shall not be considered to have been in use outside of the United States during any period in which such property was, for purposes of section 48 or 168, treated as property not used predominantly outside the United States pursuant to the provisions of section 48(a)(2)(B). For purposes of this paragraph (b)(3) the term "related person" shall have the meaning set forth in §1.367(d)-1T (h).

(4) *Transfer followed by section 338 election*. For purposes of paragraph (b)(1) of this section, property that is transferred by a U.S. corporation to a foreign corporation in a transfer described in section 367(a)(1) shall be treated as U.S. depreciated property at the time of the transfer if—

(i) The transferee foreign corporation was a member of the U.S. transferor's affiliated group (determined without regard to the exceptions contained in section 1504(b)) at the time of the transfer; and

(ii) Within three years after the transfer, a purchasing corporation files an express election under section 338(g) for any member of the U.S. corporation's affiliated group (determined without regard to the exceptions contained in section 1504(b)) and files a regular exclusion election under §1.338-5T(c)(2)(v) by virtue of which the transferee foreign corporation is excluded from the status of target affiliate.

(5) *Effective date*. This paragraph (b) applies to transfers occurring on or after June 16, 1986.

(c) *Property to be leased*—(1) *Leasing business of transferee*. Tangible property transferred to a foreign corporation that will be leased to other persons by the foreign corporation shall be considered to be transferred for use in the active conduct of a trade or business outside of the United States only if—

(i) The transferee's leasing of the property constitutes the active conduct of a leasing business;

(ii) The lessee of the property is not expected to, and does not, use the property in the United States; and

(iii) The transferee has need for substantial investment in assets of the type transferred.

The active conduct of a leasing business requires that the employees of the foreign corporation perform substantial marketing, customer service, repair and maintenance, and other substantial operational activities with respect to the transferred property outside of the United States. Tangible property subject to the rules of this paragraph (c) includes real property located outside of the United States. The rules of §1.367(a)-5T(b) shall apply to transfers of property described in that section regardless of satisfaction of the rules of this paragraph (c).

(2) *De minimis leasing by transferee.* Tangible property transferred to a foreign corporation that will be leased to other persons by the foreign corporation and that does not satisfy the conditions of paragraph (b)(1) of this section shall, nevertheless, be considered to be transferred for use in the active conduct of a trade or business if either—

(i) The property transferred will be used by the transferee foreign corporation in the active conduct of a trade or business but will be leased during occasional brief periods when the property would otherwise be idle, such as an airplane leased during periods of excess capacity; or

(ii) The property transferred is real property located outside the United States and—

(A) The property will be used primarily in the active conduct of a trade or business of the transferee foreign corporation; and

(B) Not more than ten percent of the square footage of the property will be leased to others.

(d) *Property to be sold.* Property shall not be considered to be transferred for use in the active conduct of a trade or business and a transfer of stock or securities shall not be excepted from section 367 (a)(1) under the rules of §1.367(a)-3T if, at the time of the transfer, it is reasonable to believe that, in the reasonably foreseeable future, the transferee will sell or otherwise dispose of any material portion of the transferred stock, securities, or other property other than in the ordinary course of business.

(e) *Oil and gas working interests*—(1) *In general.* A working interest in oil and gas properties shall be considered to be transferred for use in the active conduct of a trade or business if—

(i) The transfer satisfies the conditions of paragraph (e)(2) of this section;

(ii) At the time of the transfer, the transferee has no intention to farm out or otherwise transfer any part of the transferred working interest; and

(iii) During the first three years after the transfer there are no farm outs or other transfers of any part of the transferred working interest as a result of which the transferee retains less than a 50 percent share of the transferred working interests.

(2) *Active use of working interest.* Working interests in oil and gas properties shall be considered to be transferred for use in the active conduct of a trade or business if—

(i) The transferor is regularly and substantially engaged in exploration for and extraction of minerals, either directly or through working interests in joint ventures, other than by reason of the property that is transferred;

(ii) The terms of the working interest transferred were actively negotiated among the joint ventures;

(iii) The working interest transferred constitutes at least a five percent working interest;

(iv) Prior to and at the time of the transfer, through its own employees or officers, the transferor was regularly and actively engaged in (A) operating the working interest, or (B) analyzing technical data relating to the activities of the venture;

(v) Prior to and at the time of the transfer, through its own employees or officers, the transferor was regularly and actively involved in decision-making with respect to the operations of the venture, including decisions relating to exploration, development, production, and marketing; and

(vi) After the transfer, the transferee foreign corporation will for the foreseeable future satisfy the requirements of subdivisions (iv) and (v) of this paragraph (d)(2).

(3) *Start-up operations.* Working interests in oil and gas properties that do not satisfy the requirements of paragraph (e)(2) of this section shall, nevertheless, be considered to be transferred for use in the active conduct of a trade or business if—

(i) The working interest was acquired by the transferor immediately prior to the transfer and for the specific purpose of transferring it to the transferee foreign corporation;

(ii) The requirements of paragraph (e)(2)(ii) and (iii) of this section are satisfied; and

(iii) The transferee foreign corporation will for the foreseeable future satisfy the requirements of paragraph (e)(2)(iv) and (v) of this section.

(4) *Other applicable rules.* Oil and gas interests not described in this paragraph (e) may nonetheless qualify for the exception to section 367 (a)(1) contained in §1.367(a)-2T, relating to transfers of property for use in the active conduct of a trade or business outside of the United States. However, a mere royalty interest in oil and gas properties will not be treated as transferred for use in the active conduct of a trade or business outside the United States. Moreover, a royalty or similar interest that constitutes intangible property will be subject to the rules of §1.367(d)-1T, relating to transfers of intangible property.

(f) *Compulsory transfers.* Property shall be presumed to be transferred for use in the active conduct of a trade or business outside of the United States, if—

(1) The property was previously in use in the country in which the transferee foreign corporation is organized; and

(2) The transfer is either:

(i) Legally required by the foreign government as a necessary condition of doing business in that country; or

(ii) Compelled by a genuine threat of immediate expropriation by the foreign government.

(g) *Relationship to other sections.* The rules of §§1.367(a)-5T, 1.367(a)-6T, and 1.367(d)-1T apply to transfers of property whether or not the property is transferred for use in the active conduct of a trade or business outside the United States. See §1.367(d)-1T(g)(2)(ii) for a special election with respect to compulsory transfers of intangible property.

(h) *Transfers of certain propety to FSCs*—(1) *In general.* The provisions of section 367(a) and (d) and the regulations thereunder shall not apply to a transfer of property by a U.S. person to a foreign corporation that constitutes a

FSC, as defined in section 922(a), if—

(i) The transferee FSC uses the property to generate exempt foreign trade income, as defined in section 923(a);

(ii) The property is not excluded property, as defined in section 927(a)(2); and

(iii) The property consists of a corporate name or tangible property that is appropriate for use in the operation of a FSC office.

(2) *Exception.* The general rule in paragraph (g)(1) of this section shall not apply if, within three years after the original transfer, the original transferee FSC (or a subsequent transferee FSC) disposes of the property other than in the ordinary course of business or through a transfer to another FSC. Thus, the U.S. transferor may recognize gain in the taxable year in which the original transfer occurred through the application of section 367 and the regulations thereunder.

§1.367(a)-5T Property subject to section 367(a)(1) regardless of use in trade or business (temporary).

(a) *In general.* Section 367(a)(1) shall apply to a transfer of property described in this section regardless of whether the property is transferred for use in the active conduct of a trade or business. Certain exceptions to the operation of this rule are provided in this section, and a special gain limitation rule is provided in paragraph (e). A transfer of property described in this section is subject to section 367(a)(1) even if the transfer is a compulsory transfer described in §1.367 (a)-4T (f).

(b) *Inventory, etc.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of—

(1) Stock in trade of the taxpayer or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business; and

(2) A copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, held by—

(i) A taxpayer whose personal efforts created such property;

(ii) In the case of a letter, memorandum, or similar property, a taxpayer for whom such property was prepared or produced; or

(iii) A taxpayer in whose hands the basis of such property is determined, for purposes of determining gain from a sale or exchange, in whole or part by reference to the basis of such property in the hands of a taxpayer described in subdivision (i) or (ii) of this paragraph (b)(2).

For purposes of this section, the term "inventory" includes raw materials and supplies, partially completed goods, and finished products.

(c) *Installment obligations, etc.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of installment obligations, accounts receivable, or similar property, but only to the extent that the principal amount of any such obligation has not previously been included by the taxpayer in its taxable income.

(d) *Foreign currency, etc.*—(1) *In general.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of foreign currency or other property denominated in foreign currency, including installment obligations, futures contracts, forward contracts, accounts receivable, or any other obligation entitling its payee to receive payment in a currency other than U.S. dollars.

(2) *Exception for certain obligations.* If transferred property denominated in a foreign currency—

(i) Is denominated in the currency of the country in which the transferee foreign corporation is organized; and

(ii) Was acquired in the ordinary course of the business of the transferor that will be carried on by the transferee foreign corporation,

then section 367(a)(1) shall apply to the transfer only to the extent that gain is required to be recognized with respect to previously realized income reflected in installment obligations subject to paragraph (c) of this section. The rule of this paragraph (d)(2) shall not apply to transfers of foreign currency.

(3) *Limitation of gain required to be recognized.* If section 367(a)(1) applies to a transfer of property described in this paragraph, then the gain required to be recognized shall be limited to—

(i) The gain realized upon the transfer of property described in this paragraph (d), minus

(ii) Any loss realized as part of the same transaction upon the transfer of property described in this paragraph (d).

This limitation applies in lieu of the rule in §1.367(a)-1T(b)(1). No loss shall be recognized with respect to property described in this paragraph (d).

(e) *Intangible property.* Regardless of use in an active trade or business, a transfer of intangible property pursuant to section 332 shall be subject to section 367(a)(1), unless it constitutes foreign goodwill or going concern value, as defined in §1.367(a)-1T(d)(5)(iii). For rules concerning transfers of intangible property pursuant to section 351 or 361, see section 367(d) and §1.367(d)-1T.

(f) *Leased tangible property.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to a transfer of tangible property with respect to which the transferor is a lessor at the time of the transfer, unless—

(1) With respect to property that will not be leased by the transferee to third persons, the transferee was the lessee of the property at the time of the transfer; or

(2) With respect to property that will be leased by the transferee to third persons, the transferee satisfies the conditions set forth in §1.367(a)-4T(c)(1) or (2).

§1.367(a)-6T Transfer of foreign branch with previously deducted losses (temporary).
